EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIVIA
SYSTEMS INTERCONNECTION PROJECT
PUBLIC INVITATION FOR BIDS

Empresa Nacional de Electricidad (ENDE) is executing the systems interconnection project which consists of the construction and upgrading of the following transmission lines and substations.

1. Cochabamba-Vinto (Oruro) line, 115 kV, 153 kms.
2. Construction or upgrading the substations of Aracagua (Sacaba), Cochabamba (Valle Hermoso), Oruro and Santa Isabel, where transformer, circuit breaker and capacitor equipment will be installed.

Proposals for the aforementioned project are solicited for the design, fabrication, testing, guarantees and supply Cif-Antofagasta, Chile, of the following materials:

Specification 48P-E-1954.
Insulators, hardware and accessories for ACSR conductor and guard cable, steel cable and ground connection material.
Specification 48P-E-1956:
Equipment for substations
Specification 48P-E-1958:
Relays and control panels

The acquisition of the material described above will be financed by the proceeds of a loan from the International Bank for Reconstruction and Development (BIRF), and this bid is subject to eligibility requirements of the BIRF in conformance with the respective financial contract.

Bidders established in member countries of the International Monetary Fund and Switzerland can participate in this bid.

Bid documents 48P-E-1954, 48P-E-1956 and 48P-E-1958 may be obtained from Empresa Nacional de Electricidad S.A., Avenida de Las Heroinas No. 4574, Casilla No. 535, Cochabamba, Bolivia, upon payment of 1,500 Bolivian Pesos each.

Interested parties who obtain bid documents may make consultations, solicit whatever additional information or inspect any drawing not included with the bid documents at the Ende offices in Cochabamba.

The due dates for the presentation of proposals are:
Specification 48P-E-1954. February 10, 1977. 5:00 p.m. in the offices of Ende in Cochabamba.
Specification 48P-E-1956: February 15, 1977, 5:00 p.m. in the offices of Ende in Cochabamba.
Specification 48P-E-1958: February 3, 1977. 5:00 p.m. in the offices of Ende in Cochabamba.

Purchase orders will be awarded to the offers which are evaluated most advantageous to the interests of Ende.

Ende reserves the right to reject any of the received proposals.

EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIVIA
SYSTEMS INTERCONNECTION PROJECT
PUBLIC INVITATION FOR BIDS

Empresa Nacional de Electricidad (ENDE) is executing the systems interconnection project which consists of the construction and upgrading of the following transmission lines and substations:

1. Vinto (Oruro) - Catavi line, 115 kV, 73 kms.
2. Catavi-Potosi line, 115 kV, 180 kms
3. Potosi-Punutuma line, 69/115 kV, 73 kms
4. Construction or upgrading of the Catavi, Potosi, Punutuma, Tasna, Telamayu, Sucre and Corani substations, where transformer, circuit breaker and capacitor equipment shall be installed. Proposals for the aforementioned project are solicited for the design, fabrication, testing, guarantees and supply Cif-Antofagasta, Chile, of the following materials

Specification 48P-E-1953.
Insulators, hardware and accessories for ACSR conductor and guard cable, steel cable and ground connection material.
Specification 48P-E-1956
Equipment for substations.
Specification 48P-E-1957:
Relays and control panels.

The acquisition of the material described above will be financed by the proceeds of a loan from the Inter-American Development Bank (BID), and for that reason this bid is subject to the eligibility requirements of the BID's policies, in conformation with the respective financial contract.

Manufacturers of all regional countries, who were members of the BID before July 9 1976, may participate in this bid

Bid documents 48P-E-1953, 48P-E-1955 and 48P-E-1957 may be obtained from Empresa Nacional de Electricidad S.A., Avenida de Las Heroinas No 4574, Casilla No 535, Cochabamba, Bolivia, upon payment of 1,500 Bolivian Pesos each

Interested parties who obtain bid documents may make consultations, solicit whatever additional information or inspect any drawing or design that is not included with the bid documents at the Ende offices in Cochabamba.

The due dates for the presentation of proposals are:
Specification 48P-E-1953: February 10, 1977, 5:00 p.m in the offices of Ende in Cochabamba
Specification 48P-E-1955. February 15 1977. 5:00 p.m. in the offices of Ende in Cochabamba
Specification 48P-E-1957. February 3, 1977. 5:00 p.m. in the offices of Ende in Cochabamba

Purchase orders will be awarded to the offers which are evaluated most advantageous to the interests of Ende.

Ende reserves the right to reject any of the received proposals.

BUSINESS OPPORTUNITIES

SNW
SNW COMMODITIES LTD
Members of commodity exchanges in London, New York and Paris.
For all information on commodities, broker options and associated investments write or phone:
SNW Commodities Ltd
Rayner House,
39 Hatton Garden,
London EC1N 8BX.

BE A NEW SUBSCRIBER
and save up to
47% of the newsstand price
(Depending on your country of residence)

Take advantage of the International Herald Tribune's 25% Introductory Discount on the regular subscription rates. That's a big saving. But remember that the newsstand prices are always higher than the subscription rates. When you compare the reduced subscription rates with what you have been paying at the newsstand, you find that your saving is a lot more—you can save up to 47% of the newsstand price. In the Herald Tribune you'll find unsurpassed international news coverage and respected and influential columnists including James Reston, C.L. Sulzberger, Anthony Lewis, William Buckley, Art Buchwald, Russell Baker, Red Smith and Brian Glanville. In addition, you'll find special reports from the principal cities of Europe including Claire Sterling from Rome, John Dornberg from West Germany and Peter Lennon from London. You'll also find excellent important coverage of international business and economic news. And complete, daily Wall Street stock tables. Complete the coupon below and mail it to us with your check or money order today.

As the world gets smaller, everyone needs a newspaper with a bigger point of view.

These are the special rates after deduction of the introductory discount.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. l—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

All of these bonds having been sold, this announcement appears as a matter of record only.

BOOKS

OCTOBER LIGHT

By John Gardner. Knopf. 433 pp. Illustrated by Elaine Raphael and Don Bolognese. $10.

Reviewed by Christopher Lehmann-Haupt

So there'll be no misunderstanding, let me say at once that I think "October Light" is a quite marvelous John Gardner's most touching and accessible novel to date. It's about two old Vermonters, a feuding brother and sister who are trying to reconcile the past and the present. (He sees the past as noble and mythic, the present as trashy; she sees the past as straitening, the present as liberating.) And these two old Vermonters—James L. Page, who in a rage at television's "leering glittering-toothed monsters of ceremony" has blown out his sister's set with his 12-gauge shotgun and with a fireplace log chased her upstairs and locked her into her bedroom; and Sally Page Abbott, who has decided she won't come out of that bedroom, not for anything, until her rights as a human being and a woman are duly respected—these two old crotchety Vermonters are the most vivid and interesting characters that Mr. Gardner has yet created. Indeed the only Gardner characters who rival James and Sally in palpability are the other citizens of Bennington who wander in and out of "October Light."

What's more, the narrative of Mr. Gardner's new novel is easily the most compelling of any he has yet invented. As the warfare between James and Sally intensifies—as Sally begins to see her cause as symbolic of all contemporary egalitarian issues; as James discovers she's been emptying her chamberpot out the window, thus ruining the irises, and decides to retaliate by denying her food; as it for 1st progresses toward a quite terrifying melodramatic climax—we find ourselves reading faster and faster, and sweeping up with our increasing interest all the philosophical, aesthetic and historical ruminations that Mr. Gardner has built into his tale. It isn't comedy exactly: James has lost a wife to cancer and a son each to fatal accident and suicide; and two other characters in the story are badly injured in his and his sister's crossfire. Nor is it really comedy: In the end the combatants do become reconciled in their way. Dark pastoral comedy, one would call it if one had to affix a label; or if not dark, then shadowed, "suffused with ... crimson ..." like the fading at dusk of Vermont's October light.

Still, despite my admiration, I have a few small reservations about the book—disappointments, really, that Mr. Gardner has fallen short of his own aesthetic ideals. We have seen enough of the author's fiction by now to understand what those ideals may be. By degrees, he has been moving from a form of fiction in which narrative served to illustrate philosophy ("The Wreckage of Agathon," "Grendel" and the stories that composed "The King's Indian") to fiction in which philosophy merely illustrated narrative ("The Sunlight Dialogues") to narrative in which philosophy is embodied by plot and character—"Nickel Mountain." It is if Gardner were an academic weighted down by his vast knowledge of myth and literature, his preoccupation with [illegible] and determinism, who [illegible] escape into pure fiction.

He almost does it in "October Light." The characters are [illegible] rich and alive than ever [illegible] in "Nickel Mountain." The [illegible] osophical baggage has been [illegible] ed into the background, mak[illegible] it into a "trashy" paperback [illegible] that Sally finds in her bedr[illegible] and reads as inspiration for [illegible] rebellion. In fact, this paperb[illegible] whose somewhat tedious [illegible] tents appear as a novel wit[illegible] the novel that is "October Li[illegible] and which was written, acco[illegible] ing to Mr. Gardner's "Ackn[illegible] edgements," by himself and [illegible] wife Joan, can in some ways [illegible] seen as a parody of his ea[illegible] fiction, full as it is of w[illegible] implausible happenings that [illegible] make sense. If you underst[illegible] what ideas its characters [illegible] for.

Still, despite the relative p[illegible] of "October Light" as fic[illegible] there remains about it a de[illegible] of artificiality. Not only is t[illegible] that "trashy" novel inside o[illegible] The book is also full of bor[illegible] ing from the work of other [illegible] ers, as Mr. Gardner freely ac[illegible] elsewhere in his "Acknowled[illegible] ments." James's reflections [illegible] the words "up" and "down" [illegible] adapted from an essay by J[illegible] S. Held, "Gravity and Art"; [illegible] characters come from a yet-[illegible] be-published novel by Nicki [illegible] Delbanco; certain haunting [illegible] sages on the Vermont coun[illegible] side are "drawn from" Noel [illegible] rin's "Vermont in All Weathe[illegible] the blasted television set is sai[illegible] inspired by John Cheever, [illegible] the bear that surprises James [illegible] the concluding passage may h[illegible] essayed from the story by [illegible] liam Faulkner.

Of course the tradition[illegible] pastiche is long and honora[illegible] and, for all I know, to honor [illegible] tradition is what Mr. Gardner [illegible] tended in "October Light." [illegible] there is another ideal paid tri[illegible] in Mr. Gardner's novel whe[illegible] young musician reflects in [illegible] delightful passage, on "real mu[illegible] and work music": "Ballet [illegible] work music, violins trapp[illegible] inside the narrow limits [illegible] swans.... And then there [illegible] the worst work-music of all, [illegible] ture music, the kind they [illegible] having to play at school, 'Pines of Rome,' 'Pictures at [illegible] Exhibition.' Real music, on [illegible] other hand, was music liber[illegible] free to be itself."

Perhaps fiction can never "pure," because words, u[illegible] musical notes, must always [illegible] nify. On the other hand, [illegible] suspects Mr. Gardner believe[illegible] the possibility of its libera[illegible] from the way he kids Sally [illegible] Abbott for being "inspired" [illegible] her "trashy" paperback. In [illegible] case, what with the literary [illegible] rowings and the residue of p[illegible] sophical baggage in "Oct[illegible] Light," Mr. Gardner's fic[illegible] continues to have an elemen[illegible] "work" in it—to be trapped i[illegible] certain limits that prevent it [illegible] being itself. Yet it is also [illegible] parent from "October Light" [illegible] Mr. Gardner is capable of [illegible] ing "pure" fiction. One l[illegible] forward with happy anticip[illegible] to the inevitable day that [illegible] does.

Mr. Lehmann-Haupt is a [illegible] York Times book critic.

BRIDGE — By Alan Truscott

The contract shown was four hearts, reached with all possible speed after West had made a takeout double of the opening bid.

South took the trump finesse at the second trick after winning the first trick with the club ace. The odds in favor of the finesse are almost three to one, and it is very seldom right to play for the drop.

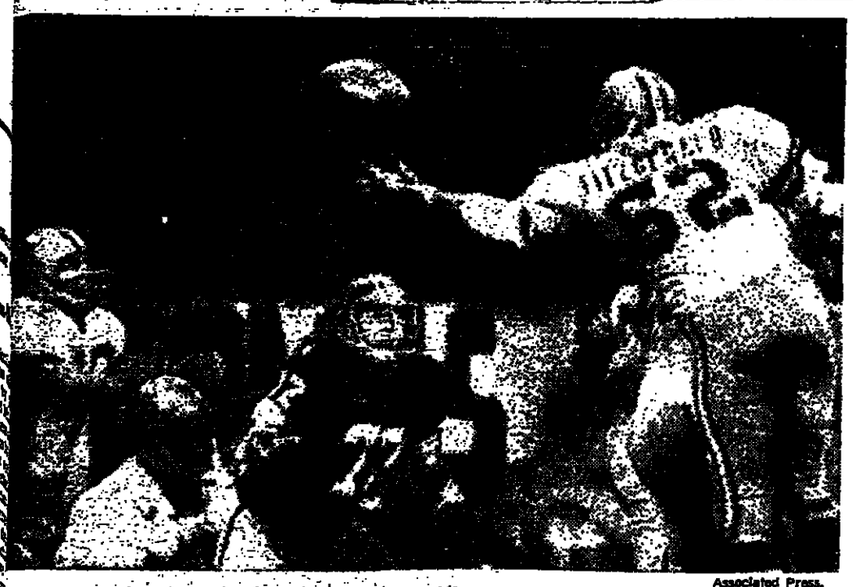
West won with his singleton heart king, and made a subtle play by leading a low diamond. He knew that if left to himself the declarer would lead to the diamond jack and score two tricks in the suit.

As it was, South had to consider the possibility that West had underled from a diamond holding of A-x-x-x, in which case the normal play of the jack would probably allow the defense to score two diamond tricks and a diamond ruff, with down two the likely result.

South did not fall into this small trap, since playing the king from dummy, to guard against a two-trick defeat, would have left him little chance of making the contract. He put up the diamond jack, and when this held, the contract was virtually assured.

South entered his hand with a trump lead and played another diamond. West put up the ace and exited with the diamond queen, which was won with the king in dummy. The declarer entered his hand with a trump lead and ruffed a club, leaving position:

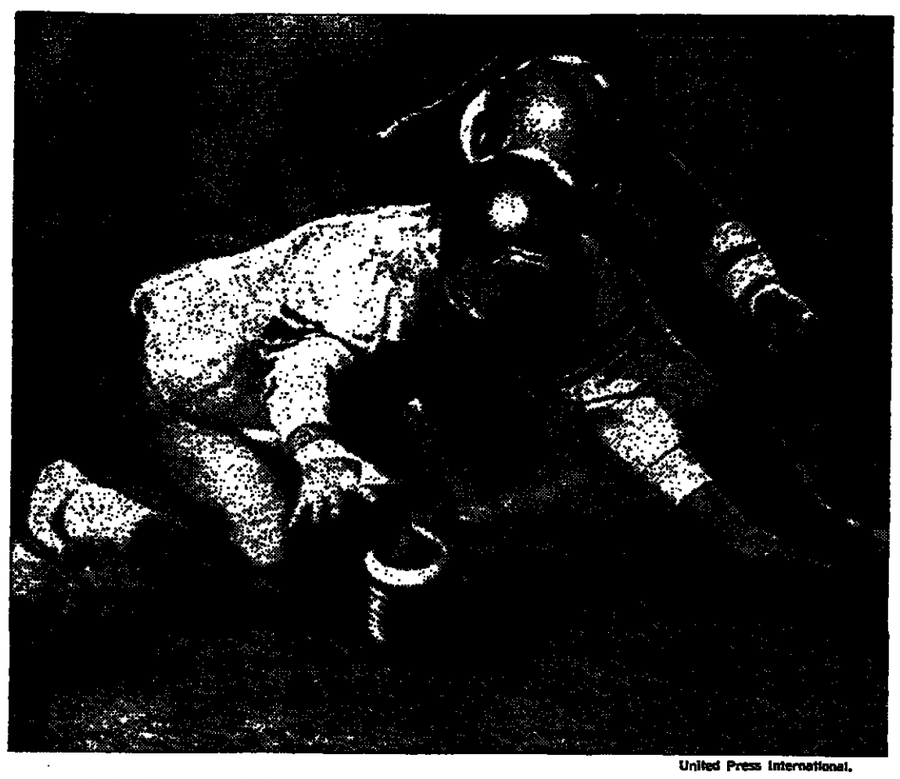
	NORTH ♠ 9 8 6 ♡ 7 ◇ 7 ♣ —	
WEST ♠ K 5 3 ♡ — ◇ 8 ♣ Q		EAST ♠ 7 [illegible] ♡ — ◇ — ♣ J
	SOUTH ♠ A Q 4 ♡ 10 9 ◇ — ♣ —	



It might seem that South headed for the loss of two s tricks and his contract, bu made a simple loser-on-loser South led the diamond e from dummy and discarde spade to end-play West. Re surprisingly, the defenders di make one spade trick, let the two to which they se entitled.

	NORTH ♠ 9 8 6 ♡ J 7 6 3 2 ◇ K J 7 6 ♣ A	
WEST ♠ K 5 3 ♡ K ◇ A Q 9 4 ♣ K Q 9 7 5		EAST ♠ J 10 ♡ 5 4 ◇ 10 5 ♣ J 10
	SOUTH ♠ A Q 4 ♡ A Q 10 9 8 ◇ 3 2 ♣ 5 3	

Neither side was vulnerable. The bidding:



East	South	West	N
Pass	1 ♡	Dbl.	4
Pass	Pass	Pass	

West led the club king.

Colts' Jones Is Next for Steelers...

By Dave Anderson

W YORK, Dec. 14 (NYT). the Pittsburgh Steelers, nine-game winning streak ely a prelude.

didn't say we got to win Andy Russell says. "We got to win 12."

they do, the Steelers will won a record third con- Super Bowl champion- "Everybody," says Mel likes to see their names the brick wall."

on Sunday at Baltimore, opening round of the ican Conference playoffs, Steelers have to keep the wall intact. They will op- the Colts in what, on paper, a monumental football On the field it might be better.

ring their nine victories that ed the Central Division after four losses in the first games, the Steelers had five nts, the most in a season 1944 when the New York s had that many in a 10- schedule. In the other four s of their winning streak, Steelers permitted a total of nts, only two touchdowns. on Sunday the Steelers to prevent Bert Jones from ing the brick wall down with sses. Jones is pro football's quarterback now. In the quarter of a 58-20 triumph Sunday the Colts scored 28 , with Jones throwing two down passes. That happen- ainst the Buffalo Bills, not Steelers, but the Steelers Jones can do it against any

t Jones," says Dwight the huge defensive end, competitor to the max." t Jones," says Russell, the linebacker, "has great verability. He can throw hard on the run, which a lot of guys can't do. And he can hurt you running the ball. When you get all the pass-receivers covered and he runs and gets a first down anyway, that really hurts."

"Bert Jones," says Blount, the cornerback with a shaved skull, "is capable of breaking a game open with a pass or a scramble."

In the opening round of the playoffs last year, the Steelers stopped Bert Jones, quickly and accidentally. In a pileup on the seventh play, J.T. Thomas, the Steelers' other cornerback, kicked the Colt quarterback's passing arm. The arm was bruised and numbed. Jones didn't return until the fourth quarter. By then the Steelers were in command of a 28-10 triumph that Jones mostly watched. But this Sunday the Steelers don't figure to be that lucky again and Jones doesn't figure to be that unlucky again. Jones will be passing and running instead of watching.

Rocky Bleier also will be running.

Of all the Steelers, none symbolizes their comeback from a 1-4 won-lost record as Robert (Rocky) Bleier does. After having missed two seasons while serving with an army combat unit in Vietnam and recuperating from a right foot wounded by an exploding hand grenade, Bleier hardly played for the Steelers five years ago. That 1971 season he didn't carry the ball once from scrimmage, he didn't catch one pass, he ran back one kickoff for 21 yards, he fair-caught one punt. And as recently as two years ago, he thought he would be cut in training camp.

But this season Bleier ran for 1,036 yards, only 92 fewer than Franco Harris, his more famous teammate.

On the blackboard in the Steelers' locker room before their 21-0 victory at Houston last Saturday, Dwight White chalked, "Countdown for the Rock," a tribute to perhaps the Steelers' most popular player.

Bleier's nickname among his teammates is "Prune Juice," a reminder that he's not as fast as O.J. Simpson.

"But the thing about Rocky," says Franco Harris, "is how much he gives of himself. He might not have the greatest ability but he has the greatest desire. And it shows. He never loafs on a play. When the other guys see him giving a little bit more, they have to say to themselves, hey, let's give a little more too."

Of all the famous Notre Dame running backs in NFL history, Bleir is the first to run for 1,000 yards in a season.

"I started thinking about it this year," he says. "If you get 50 yards a game, that's 700 right there and if you get lucky and have a few big games, you're up to 800 or 900 and then you've got a chance. That's the way it worked out."

Against the Colts' defense, the success of the Steelers might depend on Terry Bradshaw, the rusty quarterback.

Until the season finale, Bradshaw had missed two games and parts of two others with a wrist injury. Earlier he had missed two games and parts of two others with neck and back injuries. Chuck Noll, the Steelers' coach, acknowledged that Bradshaw was "rusty, his timing was still off" against the Oilers. He can't afford to be rusty against the Colts.

"The Colts are good," Blount says. "They remind me of us when we were coming into our prime to win two Super Bowl games."

...While No One Awaits the Cards

By William N. Wallace

NEW YORK, Dec. 14 (NYT).—Within the terms of comparative players at a majority of positions and every important statistic save one, the St. Louis Cardinals had a football team this season superior to the Washington Redskins. But the Redskins are in the playoffs and the Cardinals are not. How come? Although both had identical won-lost records, 10-4, Washington beat St. Louis twice and that statistic broke the tie. Simple.

But maybe not so simple. The Cardinals were the best team not to go to the playoffs—and this year's Cincinnati Bengals the second best—since the National Football League's present postseason program leading to the Super Bowl was introduced in 1970. There is, however, some lack of justice in the system because the NFL schedule is unwieldy and inequitable.

The Cardinals, for example, had a more difficult schedule than the Redskins. Their opponents had a winning precentage of .503 and Washington's .444.

Furthermore, the Cardinals and the Bengals were merely the second and third NFL teams with records as good as 10-4 to be shut out of the playoffs. The other was last year's Miami Dolphins.

The Cardinals did not know quite how to act when they got back to St. Louis after Sunday's game with the Giants. Aboard the airplane they had learned that the Redskins had beat the Cowboys and thereby eliminated St. Louis.

"It's a shame," said Joe Sullivan, the general manager. "This is the best team we've had. But we let Washington beat us at home." The score, on Nov. 21, was 16-10.

Don Coryell, the coach, addressed the players on the plane and said, over the intercom speaker: "Okay, guys. Once again we've learned another lesson. Never count on anyone else."

Jackie Smith, the tight end who has played for the Cardinals since 1963, said: "The best team? We've been talking about that. This is the best team since Coryell came. We thought if we could just get into the playoffs..."

In addition to the two defeats to Washington, the Cardinals also lost once to Dallas, and in the third game of the season they were surprised by the Chargers in San Diego, 43-24. After that, their suspect defense tightened and only once did they give up more than three touchdowns. St. Louis played four games against teams in the playoffs, apart from the two against Washington, and won three, beating Dallas and Baltimore. The Redskins had two, a victory and a loss against the Cowboys.

The Cardinals probably will put nine or 10 players on the National Conference Pro Bowl team: Mel Gray, Dan Dierdorf, Conrad Dobler, Tom Banks, Jim Hart, Jim Otis, Terry Metcalf, John Zook, Roger Wehrli and Jim Bakken. Only three or four Redskins come to mind: Mike Thomas, Frank Grant, Ken Houston and Chris Hamburger.

The Bengals had less to bleat about. The Pittsburgh Steelers came on so strongly at the end with their nine-game winning streak there was no way to keep them out of the playoffs. The Steelers, for example, gave up only 138 points.

Since the 14-game schedule was adopted in 1961 only two teams have given up fewer, the 1969 Minnesota Vikings, 133, and last year's Los Angeles Rams, 135.

Giants Retaining McVay as Coach

PLEASANTVILLE, N.Y., Dec. 14 (UPI).—The New York Giants rewarded interim coach John McVay with a multi-year contract today for making the football team respectable over the final seven weeks of the season.

McVay, 45, was elevated from the Giants' staff Oct. 25 to replace Bill Arnsparger, who was fired after the Giants lost their first seven games of the season.

Under McVay, the Giants went 3-4 with victories over Washington, Detroit and Seattle. New York also held Dallas without a touchdown in losing 9-3, fell 14-13 to Denver on a missed extra point and carried a lead deep into the final quarter against St. Louis Sunday before losing 17-14.

Victory and Money

Times Have Improved For U.S. Skiing Team

By Bernard Kirsch

VAL D'ISERE, France, Dec. 14 (IHT).—It is all happening at once for the United States ski team, which is way ahead of schedule. Consistant good results, even a victory. Television cameras to show off the good races back home. There is even a little money in the bank. Times have changed.

"The difference is incredible," said Andy Mill, a skier who remembers the "old" days such as the time the United States ski team ran out of money while in Europe. "Now we know where we're going. We're getting to the races and eating well. Now, you're given the opportunity to perform as good as you are."

The changes from five years ago were not accidental. There was a master plan, with the Alpine director Hank Tauber the architect and 1977-78 the year set for completion. The foundations for success, he said, were a dedicated coaching staff, the fund-raising ability of the United States Ski Foundation and convincing his skiers that this was not going to be a slipshod affair, that there would be victories in the future and that it would all be worth the pain and effort.

"Americans always have retired from competition early, before reaching their peak," said Tauber. Or they have decided that they could do better on their own. One case is Tyler Palmer, who until Friday had been the last American male skier to win a World Cup race in Europe, in 1972. But he soon went on his way. There was no one around to convince him that the best was yet to come.

The results for the opening three weeks of the season, a period that Tauber said usually was spent fooling around, have shown that the changes have been positive.

There have been three second places, by Phil Mahre and Cindy Nelson in World Series events, by Abbi Fisher Thursday in a World Cup giant slalom. There were two trimuphs in Europe Cup events by young women, Becky Dorsey and Christine Cooper. Finally came the result Tauber said he has been waiting years for—the victory on this side of the Atlantic in a men's event.

Mahre did the job. He later added a third place in another World Cup giant slalom. Mahre is an example of the new United States ways. He was moved up step by step, graduating from the junior and B squads to the A team last season. The timing was perfect for him. He was there for an Olympic year and will be an experienced man by the time the Lake Placid Games are held in 1980.

Rules Change Helps

Mahre, and the rest of the ski world, have benefited from the new rules of the Fédération Internationale de Ski, which allows deferred-time payments to the skiers once they finish their amateur days. It means there will be money waiting for Mahre when he decides that he's had enough of skiing.

The money prospects of the United States team also have improved. The ski budget for the Alpine and Nordic teams is the same as last year, $1.3 million, but this season television has come on the scene. Because of the enthusiasm generated by the Innsbruck Olympics, there will be 20 shows on United States network television showing the World Cup season. It is a breakthrough. It is also another incentive for the 20 members of the United States team to succeed, and for ski companies to finance the American cause so they can see their products paraded across the TV screen. The victory by Mahre, the only World Cup entry to use K:2 skis, may cause an avalanche.

Expected to be the most productive before the season's end in March are Nelson, the bronze-medal winner in the Olympic downhill, now 20 years old, and Mahre.

The head men's coach, Harald Schoenhaar, says a successful team needs stars to inspire the younger team members to try and reach the same level. And the team's head women's coach, John Bowerman, says Nelson, with the squad since 1972, is ready to accept that kind of role.

She is of the same mold, and thinks the same as many other of the United States team members, namely, that there is more to life than just skiing. But her coaches say she has put the sport in perspective, that she has reached the conclusion that this is her life now and that she is, indeed, a very good ski-racer. Maybe she has been listening to the "old" philosopher, Mill, who is 23. He says, "Sure, you make sacrifices. You don't see many museums, you put aside school, but it becomes a matter of where you take ski racing or where ski racing takes you. Harmony is where you grow together."

Thought of Quitting

Mill almost became one of the few team members who did not return this year. After nine injuries and two months in a hospital with a blood disease last summer, he said he thought of quitting. But he is back and says he doesn't want to quit as long as he has some ifs in his thoughts. His goal is the same as Mahre's once was—a World Cup victory.

Proell Fast

CORTINA D'AMPEZZO, Italy, Dec. 14 (UPI).—Despite abandoning second practice run because of fatigue, Austria's comeback skier Annemorie Proell-Moser had the best prerace time today for tomorrow's World Cup downhill.

In the first of two trials, she traveled the 2,800 meters in 1 minute 32.27 seconds, edging out her chief competitor, Brigitte Habersatter-Totschnig, also from Austria, who hit 1:37.66.

Proell-Moser, who retired 18 months ago after five straight World Cup titles, won the women's downhill 28 times between 1971 and 1975.

According to a Promoter, Ali Agrees to Face Foreman Next

NEW YORK, Dec. 14 (Reuters).—World heavyweight boxing champion Muhammad Ali has agreed to make his next title defense against No. 1 contender George Foreman, promoter Don King said yesterday.

King said Ali outlined his plans in a telephone call to the president of the World Boxing Association, Eliza Cordoba, in Los Angeles. Ali and his manager, Herbert Muhammad, were in Chicago.

Ali, who has been unable to decide about retiring from boxing since beating Ken Norton in a controversial, 15-round decision on Sept. 28, told the World Boxing Council last Friday that he definitely planned to fight again.

According to King, Ali gave Cordoba the same news yesterday.

Then the WBA president told Ali he accepted that decision, and urged the champion to fight Foreman before facing anyone else, because Foreman was the only logical opponent.

King, who promoted the fight in Kinshasa, Zaire, in October, 1974, when Ali dethroned Foreman, wants to stage the rematch.

King said Herbert Muhammad gave him 90 days in which to produce the $14 or $15 million necessary to finance the return.

During the last several months the promoter has said he had received a commitment from the Syrian government to provide $16 million to hold the fight in Damascus. Ali presumably would get his asking figure of $10 million and Foreman $6 million.

King said today he also was negotiating with interests in Nigeria, Haiti, the Philippines, Japan, Montreal and Cleveland, to hold the fight.

Transsexual Victor Twice in Tennis

LIHUE, Hawaii, Dec. 14 (UPI).—Renee Richards defeated Kathy Kuykendall, 6-1, 6-4, to win the $20,000 women's pro tennis tournament.

The transsexual also was on the winning doubles combination, teaming with Bettyann Stuart for a 6-3, 6-2 victory over Mimmi Wikstedt and Susan Mehmedbasich.

The Case Against Team Soccer Final in South America

By Brian Glanville

NDON, Dec. 14 (IHT).—ro plays at home in Belo onte, the Brazilians facing n Munich on Dec. 21, next day. But even their star, winger-center Jairzinho says inks they have very little e of saving the World Club pionship. Bayern beat Cru- comfortably in Munich, 2-0, with goals by the inevitable Gerd Mueller and the much undervalued Jupp Kappellman, that multi-lingual medical student. Both scores came in the final 10 minutes.

What struck me most, however, about that match was the attendance: a mere 18,000 in the massive Olympic Stadium. Cruzeiro has a huge stadium capable of taking 100,000 fans, a contrast indeed from the primitive little ground where England lost in Belo Horizonte to the United States in the World Cup of 1950, and used a hotel as its dressing-room.

Certainly there will be vastly more fans in Brazil than in Munich, but I feel the Munich supporters showed a sense of proportion. This intercontinental championship, to give it its correct and fancy name, is a confected affair, played between the winners of the European Cup and South American Libertadores' Cup. Its history is studded with brutality, mostly that of Argentinian teams. Though even Santos of Brazil, some fifteen years ago, was not guiltless.

In more recent years, prudent European teams have frequently refused to encounter Argentinian opposition, and the organizers have papered over the cracks as best they might, sometimes by asking the European Cup runners-up to take part. My own opinion is that it is high time the competition was ended, even if things are not remotely as bad as in the days when goal aggregate counted for nothing, and a playoff had to take place in the continent where the second leg was staged, a monstruous injustice.

Moreover, it led to horrid affairs like the Rangers vs. Racing Club of Buenos Aires playoff, or fight-off, in Montevideo, in 1967, when it's a wonder that half the players were not carried off on stretchers.

Despite Cruzeiros' defeat in Germany, Brazilian soccer is looking up—a 2-0 home victory in Rio over Russia was a fillip for a team which in the new year must start its World Cup program. In fact, the Argentinian organizers are so confident Brazil will qualify that it is said they've already decided on Mar del Plata as the city where they'll play their qualifying matches in 1978, as group leaders. It's near to Brazil, and has casinos, which the Brazilians ban. But despite these attractions to the tourists, all will not be clear sailing for the Brazilians.

The climate is a chilly, oceanic one, and there is speculation that the Brazilians will pick players used to such conditions, which means players from the South and such places as Porto Alegre, which would mean the likes of midfield players like the forceful Falcao and Cacapava.

A surprising new trend in French soccer: that of the player-manager—Jean-Marc Guillou at Nice, succeeding the unfortunate Yugoslav Markovic, Daniel Jeandupeux, the Swiss international, at Bordeaux. The more surprising in that when Robert Herbin was appointed manager of Saint Etienne at 32, he promptly hung up his boots, though still a very effective captain.

Surprising, too, in that Guillou, only weeks ago, was one of three Nice players fined for allegedly staying out at night after the team had lost a UEFA Cup tie in Barcelona against Espanol.

This is only his second season with Nice. For years he played for Angers, didn't win a regular place in midfield until his late twenties, nor a French international cap until he was 29, by which time he was recognized as the most elegant talent in France. It will be interesting to see if both he and Jeandupeux, a right-footed left-winger of considerable skill, will be able to play and manage at so high a level.

Meanwhile, Johnny Giles, much admired in France, beats even that: he's player-manager at 36 not only of First Division West Bromwich Albion, but of the Eire international team which competes in France's World Cup group.

Evert, Women Are Appreciated in 1976

By Thomas Rogers

NEW YORK, Dec. 14 (NYT).—Just eight days before her 22d birthday, Chris Evert was honored yesterday by Sports Illustrated magazine as its Athlete of the Year. Evert, who won $375,000 while dominating women's tennis, is only the second women to receive the award. Billie Jean King shared it with coach John Wooden of the University of California, Los Angeles, in 1972.

"It's interesting that most of the runners-ups mentioned were women," said Evert at a news conference at the Time-Life building. "I think the public and the press are beginning to appreciate the talents of women athletes."

The magazine, noting that 1976 had been a sports year in which women figured prominently, mentioned six runners-up to Evert: Judy Rankin, the U.S. golf pro; Rosi Mittermaier of West Germany, skier; American Shellia Young, speed skater; Dorothy Hamill, U.S. figure skater; Nadia Comaneci of Romania, gymnast, and Kornelia Ender of East Germany, swimmer.

Evert said she planned to play tournament tennis only "another two or three years, then cut down to World Team Tennis and some exhibition matches overseas."

"I've been thinking for several months of getting my own apartment," said Evert, who still lives with her parents in Fort Lauderdale, Fla. "It's time I get away from home. I've never been completely on my own. I'll probably take an apartment in New York where I have more friends than in Florida. Marriage is not on my horizon right now."

She said she maintained a competitive edge by not playing more than three weeks of tournament tennis in a row.

"If I played more than that, I'd crack, I'd go crazy," she said. "I like to relax at Fort Lauderdale by going to the beach or playing tennis with my family. Sometimes I spend time in New York, going out to dinner and the theater."

Highlighting Evert's year were victories at Wimbledon and in the United States Open.

"I played my best tennis at Forest Hills, but Wimbledon was more satisfying for me," she said. "In the final I had to play Evonne Goolagong, who had defeated me in Philadelphia and at Los Angeles. And I had never beaten her on a grass surface. I guess I had a mental block about her. It was a very emotional match. I looked across the net and saw worry in her eyes. She was really caring about how she did against me. I had always thought of her as being carefree and sometimes lackadaisical."

The only complaint voiced by Evert was for people who criticize her baseline game.

"They say it's boring and repetitive and things like that," she said. "But when I ask them what I should do, they don't have any good answer. What do they want me to do, change my whole game?

"I love almost all sports and I used to be good in lots of events in high school—track, volleyball, softball, football. But what I like best is some sort of individual competition. I love that. I've got a killer instinct."

SINGLE GENTLEMAN seeks Au-Pair. Own room. Light duties. 734.70.60 Paris. A.m. or evening.

Observer

The Phantom Rich

By Russell Baker

NEW YORK—One year a decade or so ago, I made $100,000. Never mind how. It was legal. It felt indecent and wonderful, and for several months I basked in the delusion of being a rich man. That was when I discovered the mystery of the American rich.

Feeling rich, I did what the rich are supposed to do and consulted a tax lawyer. "How delightful that anyone should think $100,000 a sum worth quibbling about with Internal Revenue," his smile said. He kindly offered some advice. The $100,000 was all in the nature of salaried income. About the only advice you can give anyone who has salaried income is: Buy yourself a new suit and put the rest aside for the government. This is pretty much what he suggested.

Baker

What prompts my admission now are the stories from Washington of the shock the Carter people arriving from Atlanta have had from the real-estate agents.

When they went house-hunting, they learned that people with government incomes can't afford to live in Washington. All the decent housing is already occupied by rich people, and I don't mean the kind of rich people who once made $100,000 in a big year. The trouble is, I don't know what kind of rich people I do mean. There is clearly a vast class of rich people in America whose wealth comes from mysterious sources never reported in government statistics.

In Washington, for example, it is almost impossible to buy a passable house in a second-drawer section of town for less than $100,000. A decent house there may run to $150,000. If you want more, it will be $200,000 and skyward.

Government people don't get paid at those rates, which is why the Carter people are discovering they're not going to Washington with Jimmy, after all. Instead, they're going to Rockville, Fairlington, Leesburg, Scaggsville and similar points north, east, south and west of Washington—far north, east, south and west—to make the acquaintance of Maryland's and Virginia's splendid turnpike system.

These people are undergoing the same kind of awakening that followed my year of the $100,000. If I'm on top of the world, how come there are so many people up there above me? It raises the question of who all those people up there are. The last figures I have show that only 91,707 Americans earned between $100,000 and $200,000 in 1972. Only 22,929 made more. This is slightly more than one-tenth of 1 per cent of all U.S. moneymakers.

So here is the question: Who are all those people occupying all the decent real estate in Washington? In Manhattan? They need miles of $200,000 houses in Los Angeles, Houston, Chicago, plus ranches and estates in Texas, Colorado, Kentucky, Maryland, Maine... plus winter real estate in Palm Springs and Florida and summer real estate on Cape Cod and Lake Michigan.

Don't try to tell me all this territory is occupied by Rockefellers, Mellons and similar Croesuses. They are not the rich rich. I've seen them by the thousands on their summer boats, boats that cost more than Rolls-Royces, and they are the kind of people whose idea of high life is drinking a beer before a television set on the poop deck.

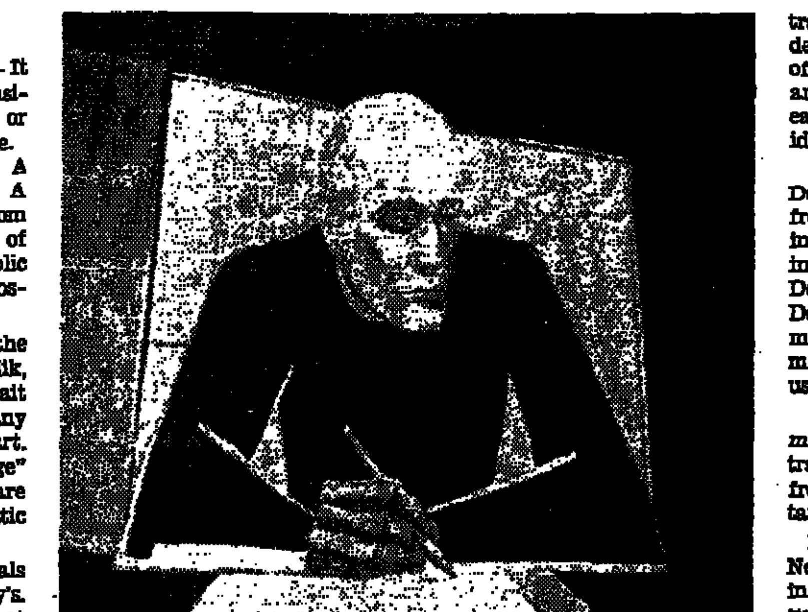
You don't sail those boats around Cape Cod on the occasional $100,000 windfall. Those boats represent what Bert Lahr used to call scratch, just like the Bel Air and Georgetown homes. And if there were really only 91,707 people who had it, most of us would never even see one, much less find them sitting athwart the row house of our choice.

It seems likely that government figures give no real idea of the true wealth of Americans or how widely it is spread, and the mystery is: Who are those people? Until the statisticians find out, they will remain the phantom rich who haunt the rest of us with a sense that we are never going to make it to Newport.

The American Heritage of Artistic 'Atrocities'

By Warren Brown

WASHINGTON (WP).—It happens with every transition, every time a president or a cabinet member leaves office.



An artist is commissioned. A portrait is done—eventually. A fee is paid—anywhere from $5,000 to $15,000—usually out of public funds. And the public official's image is hung for posterity.

It is a tradition as old as the Republic, said Marvin S. Sadik, director of the National Portrait Gallery—the repository of many of these official objets d'art. But, he said, it is "an outrage" in terms of quality. "They are leaving us a heritage of artistic atrocities."

He was referring to officials of long ago, as well as today's. President Ford—who has yet to commission an artist—and each of the 11 outgoing cabinet members are entitled to a portrait. Vice-presidents, when they are done at all, usually are sculpted, and the busts—according to a law dating back to 1886—are placed in or near the Senate chamber in the Capitol.

The problem, Sadik said, is that presidents and cabinet members choose their own artists, and few of them are worthy art critics.

"We [at the National Portrait Gallery] are supposed to know something about portraiture, but it isn't very often that we are asked" to help, Sadik said. When officials do seek an opinion, Sadik said, it is given "off the record, purely advisory."

"Terrible thing in the hall"—Katzenbach portrait.

Limited Advice

Sadik acknowledged that the gallery—a federal agency as part of the Smithsonian Institution—is limited in what advice it can give. Because officials do not have to put out bids for the artists, the gallery does not want to be placed in the position of appearing to play favorites, he said.

Without specifying any painters, he said, "Most of the conventional portraits today don't have any quality. They don't reveal any insight into the personality or character of the subject. They don't even look like the subject. Some of them have the quality of a well-polished shoe."

Sadik would like to see "more modern, more imaginative, more audacious portraits."

For example—though he hedged on evaluating the work—he said he was at least thankful for the break with tradition provided by the painting of former Attorney General Nicholas de B. Katzenbach.

That modernistic portrait, now hanging on the fifth floor of the Justice Department, was done around 1968 by Alan Wood-Thomas, a relatively obscure artist.

The portrait was roundly criticized by persons who expected to see a traditional, man-of-vision depiction. The painting's sharp, angular white features against a dark background gave Katzenbach a ghostly, skeletal appearance, the critics said. Even today, one Justice Department spokesman refers to the painting as "that terrible thing in the hall."

The official portrait of another ex-attorney general, Ramsey Clark, also falls out of the representational category. The modernistic painting was done by Robert Berks, who sometimes paints covers for Time magazine.

More artists like Thomas Eakins, a 19th-century American portrait and genre painter, are needed, Sadik said. "Eakins did gloriously insightful portraits. But some of his portraits were not accepted because they were too true, too accurate."

Sadik speculated—cautiously—that the same thing may have happened in 1967, when President Lyndon B. Johnson rejected a portrait of himself done by New Mexico artist Peter Hurd and had another artist paint one more to his liking.

Johnson called Hurd's portrait "the ugliest thing I ever saw." But Hurd received many offers for the painting, which now hangs in the National Portrait Gallery.

A Concession

Sadik conceded that some official portraits are good, but he said he believes most of them are not worth the cost. "It's money down the drain to pay that much for worthless pictures," he said.

It is difficult to determine exactly where the money comes from to pay for official portraits, largely because each department has its own method of payment. Also, limits on artist payments are flexible and each department has its own idea of what to pay.

For example, the Defense Department spends anywhere from $5,000 to $10,000 for paintings of its secretaries, according to a spokesman. The State Department and Transportation Department plan to spend as much as $12,000. Other departments, according to aides, usually spend $5,000.

The Department of Commerce usually pays for portraits with nonpublic funds from donations and the secretary's speaking fees.

Everett Raymond Kinstler, a New York painter, is currently in great demand because his subjects like his representational portraits and his relatively low prices.

Kinstler already has 28 official portraits to his credit, including one of former Defense Secretary Elliot Richardson, just unveiled.

Up to $15,000

Prices for official portraits can go as high as $15,000. That is what New York artist Aaron Shikler charged for his portraits of former first lady Jacqueline Kennedy and the late President John F. Kennedy on display in the White House.

Shikler also painted the official portrait of the late Robert F. Kennedy. The former attorney general's portrait was done posthumously, after his family rejected an earlier effort by Gardner Cox. Shikler was paid $5,000.

Not all presidents and cabinet officials, however, get their portraits painted.

"The White House does not have a portrait of (former President) Nixon," said Sadik. "Ultimately, Mr. Nixon was to sit for (artist) Andrew Wyeth, but things happened," Sadik said.

A portrait of Nixon does hang in the National Portrait Gallery, however. It was done by Norman Rockwell in December, 1968, after Nixon's election, for a cover of Look magazine.

PEOPLE: *The Fingerprints Found On Hughes's 'Mormon Will'*

An attorney for the estate of Howard Hughes says that gas station attendant Melvin Dummar was involved in forging the Hughes "Mormon will" which names Dummar as one of the billionaire's heirs. James Dilworth made the statement in a Los Angeles court Monday, saying that the FBI concluded 10 days ago that fingerprints on an envelope containing the document belonged to Dummar. The FBI refused to comment. Dummar's lawyer, Roger Dutson, suggested that someone may have attempted to transfer his client's thumbprint to the envelope. Dummar claims that he found Hughes wandering in the desert in 1968, gave him a ride and lent him a quarter. He was named in the handwritten will to receive a sixteenth of Hughes's estate—Dummar has said he had no knowledge of the document until it was made public. Dilworth is representing three of Hughes's maternal cousins in hearings to gather depositions prior to a Jan. 10 Las Vegas trial on the will's authenticity. The will itself was found in the Salt Lake City headquarters of the Church of Jesus Christ of Latter-Day Saints three weeks after Hughes's death on April 5.

Melvin Dummar ... an allegation.

Wernher von Braun, 64, the father of the American space program, is seriously ill with cancer, his colleagues say. The German-born scientist has been undergoing regular treatment for some weeks at a hospital near his home in Alexandria, Va., Reuters reported Tuesday.

* * *

The city water department employee who was transferred to a "dirtier" job after he shut off water at the home of Mayor Charles Wheeler of Kansas City, Mo., has his old job back, just in time to announce that he's moving to Concord, N.C. The incident, which local wits like to call the city's "water-shutoff-gate," began last October when James Staton turned off the water at Wheeler's house because of a long-overdue $66 bill. It stayed shut off for six hours, when an aide to Wheeler paid the bill. A few days later, Staton was transferred to what is called a "dirtier" job, and he charged that he was being punished by water department officials for causing them "embarrassment." Staton won his old job back a few days ago, but now he's quitting to move to North Carolina, where he will continue his studies for the ministry and serve as associate pastor of a church.

Mrs. Joseph Orna's driving lesson on Monday in the Isle of Wight was not a success. She drove over a 250-foot cliff and landed in an apple tree. The instructor was her husband, Joseph. When the car went out of control, it skidded across the road, over a sidewalk, through a fence and over the cliff. The apple tree fell down the slope, saved the car and its occupants from rolling another 200 feet to the base of the cliff where there is a row of houses. Mrs. Orna was hospitalized with cuts on her arms and her legs. Her husband, 68, was in fair condition with a broken arm and facial cuts.

The State Department is paying tribute to two of its greats by naming rooms for them. An auditorium has been named for the late Secretary of State Dean Acheson. And the international conference room is now the Loy Henderson conference room, in honor of the now retired statesman. These are the first rooms in the State Department to be named for contemporary diplomats. On the eighth floor rooms are named for John Quincy Adams, Thomas Jefferson and Benjamin Franklin.

Britain Slashes Spending by £2.5 Billion in Effort to Win IMF Loan

LONDON, Dec. 15 (Reuters).—Britain's Labor government today announced spending cuts totaling £3.5 billion (about $6.16 billion) in a two-year program for economic recovery designed to pave the way for large-scale international aid.

Chancellor of the Exchequer Denis Healey told Parliament the measures had the backing of the International Monetary Fund's managing director, Johannes Witteveen.

The financial markets were unimpressed. A 2-cent drop by the pound sterling to $1.665 reflected foreign-exchange-market disappointment that the government had not taken more drastic measures.

The cuts listed by Mr. Healey in the House of Commons affected defense, overseas aid, schools, housing and education. Higher duties were imposed on tobacco and alcohol.

When Mr. Healey finished his 35-minute statement, he was greeted by shouts for his resignation both from the opposition Conservatives and left-wingers in his own party.

Mr. Healey said Mr. Witteveen was prepared to recommend acceptance of Britain's request for a $3.9-billion loan to the IMF's executive directors.

The chancellor of the Exchequer expected the first installment of the loan, amounting to $1.15 billion, to be available in the first few days of next month. A further $1 billion would be added before the end of next year.

Meanwhile, he was taking up an offer of $500 million from the United States to strengthen Britain's reserves, and West Germany was ready to make $350 million available on a standby basis.

Britain's reserves now total only $3.6 billion, the lowest level for five years. The extra hard currency will help the Bank of England to defend the pound in the event of another crisis.

In addition, Mr. Healey said he expected an international agreement before long to stabilize sterling balances held by foreigners in London totaling £6 billion.

To raise extra funds the government plans to sell part of its substantial holding in the giant multinational oil company, British Petroleum. The Treasury already holds 48 per cent, and the Bank of England recently acquired 20 per cent from Burmah Oil.

Mr. Healey said the planned sale would leave the combined Bank of England and Treasury stake at 51 per cent in BP.

'IMF Budget'

In a scathing attack on the measures in the House of Commons, the Conservative spokesman on financial affairs, Sir Geoffrey Howe, said it was an "IMF budget," and a last chance for the Labor government.

The leader of the powerful Transport and General Workers Union, Jack Jones, said the measures should not affect trade union cooperation with the government.

In Washington, U.S. Treasury Secretary William Simon said the United States will support Britain's application for the $3.9-billion IMF loan.

Mr. Simon said the program of spending cuts, reductions in borrowing and control of the growth of the British money supply announced by Mr. Healey was "excellent."

The $3.9-billion credit to Britain will be the first standby loan in IMF history to run for two years, monetary sources said in Washington tonight.

Standby loan agreements are normally for a 12-month period.

Early in his statement, Mr. Healey said the measures would form part of a medium-term program for national recovery.

"They will insure that the 1980s offer us the prospect of an economy fully restored to balance, with high levels of output, em-

Protection Is Shah's Obsession

Strait of Hormuz: An Oil Bottleneck

By Joe Alex Morris Jr.

TEHRAN, Dec. 15.—The Strait of Hormuz is the narrow bottleneck of the Gulf, between Iran and the northern tip of Oman on the Arabian peninsula. According to experts here, a single tanker sunk across it could effectively block navigation.

"Should that happen, lights would dim all over the so-called free world," a Western ambassador told a visitor.

Iran's Premier, Amir Abbas Hoveida, pointed out that 40 per cent of U.S. oil imports, 60 per cent of Europe's and 90 per cent of Japan's pass through the strait. "It is our jugular vein, and yours too," he said.

Safeguarding the strait, as an ambassador put it, is an obsession with Shah Mohammed Reza Pahlevi. It is a major reason behind his determination to make Iran the region's dominant military power.

Biggest Customer

Iran is engaged in a controversial arms buildup, and the Shah has become the most important customer abroad for the products of the U.S. weapons industry. He has contracted to buy $10 billion worth of U.S. arms—and the know-how to use them—over a five-year period.

The program has come under sharp criticism from a U.S. Senate subcommittee, which described it as being "out of control" and warned that thousands of U.S. technicians in Iran with their families "could become, in a sense, hostages." U.S. officials said that more than half of the 31,000 Americans here are connected with the military program.

Aware that the Shah is paying cash for his guns, and that he

Iraq Blames Syria for Blast Killing 3 at Baghdad Airport

BEIRUT, Dec. 15 (NYT).—Iraq today officially accused Syrian authorities of responsibility for an explosion at the terminal of Baghdad Airport last night.

A government statement broadcast on the state-controlled Baghdad radio said that three persons were killed, 10 wounded seriously and several others received minor injuries. Those who died were a Saudi citizen and two Iraqis, the statement said. Among those injured were Iraqis, Syrians, Egyptians, Palestinians and non-Arab foreigners who arrived on an Egyptian airliner from Damascus, it said.

According to the statement, explosives with a timing device were planted in a suitcase that was put on the airliner at Damascus Airport before taking off. "The bomb was planted by the Syrian authorities at Damascus Airport," the declaration charged.

It added that explosives experts said that the booby-trapped suitcase contained 17 pounds of TNT.

Arab diplomatic sources here said that the Baghdad explosion showed that underground warfare between the rival regimes in Baghdad and Damascus is growing.

The sources recalled that the Syrian authorities had blamed Iraq for recent terrorist activity in Damascus, which included an attempt on the life of Vice-Premier Abdel Halim Khaddam.

Mr. Khaddam left the hospital in Damascus yesterday after recovering from shoulder and neck wounds that he received in the attempt, which took place Dec. 2.

In September, gunmen stormed the Semiramis Hotel in the Syrian capital. A Syrian government statement said that the terrorists, who were captured and later hanged, had received their training in Iraq.

An underground group calling itself the "Black June Organization" claimed responsibility for the attempt on Mr. Khaddam's life and the attack on the Semiramis Hotel. It also said that its members carried out the attack against the Intercontinental Hotel in Amman last month.

Last July, Syria charged that Iraqi agents assassinated an Iraqi member of the Syrian leadership of the Ba'ath party in Damascus.

The Iraqi and Syrian regimes belong to rival factions of the Arab Socialist Ba'ath party and have been at odds for nine years.

Tarik Aziz, the Iraqi information minister, in a press statement earlier this week said that a Damascus-based Iraqi Kurdish activist was the mastermind of recent shooting incidents inside Iraqi territory near the border with Syria.

Newspapers Seized

BEIRUT, Dec. 15 (UPI).—Syrian troops of the Arab peacekeeping force today seized three pro-Iraqi Lebanese newspapers.

The move appeared to fit into the pattern of the cold war between Syria and Iraq.

Lebanese journalists speculated that the Syrians did not want the newspapers to publish the story of the Baghdad Airport bombing.

The journalists said that about 60 Syrian troops occupied the Al Moharrer, Beirut and Al Yom newspapers.

No reason was given for the occupations.

Price Parley Heavily Guarded

OPEC Chief, Opening Talks, Cites 'Global Responsibility'

DOHA, Qatar, Dec. 15 (UPI).—Under what its president called a "heavy burden of global responsibility," the Organization of Petroleum Exporting Countries today began its conference on possible changes in the price of oil.

On the table before them, oil ministers from the 13 nations in the OPEC had options ranging from Saudi Arabia's call for a six-month price freeze to Iraq's demand for a 25-per-cent increase.

Expert betting was that there would be a rise somewhere in the middle of that range—about 10 per cent. OPEC's president, Mohammed Sadli of Indonesia, said as the conference opened that the ministers bore "a heavy burden of global responsibility" because their decision would "affect the state of health of the world not only now but for some time to come."

The ministers' scheduled three-day meeting began under intense security aimed at preventing an attack like the shooting assault in which terrorists kidnapped OPEC ministers at their meeting in Vienna a year ago. Police stations posted photographs of Ilich Ramirez Sanchez, the Venezuelan terrorist known as "Carlos," who allegedly masterminded the Vienna raid.

The ministers convened today in the Gulf Hotel, in a sumptuous room sealed by steel shutters and guarded by helmeted troopers carrying automatic rifles.

Newsmen were barred from the hotel after the conference's formal opening.

Fears have been expressed in many quarters that a price increase might stop the Western economic recovery and bankrupt several developing countries that lack their own oil. It is estimated that a price rise of 10 per cent would add $12 billion to the world's oil bill.

President-elect Jimmy Carter has said that he feels "very good" about the attitude of certain OPEC countries that have been in contact with Secretary of State Henry Kissinger and with Cyrus Vance, Mr. Kissinger's designated successor.

Sheikh Ahmed Zaki Yamani, the Saudi oil minister, called last night for a continued price freeze, saying the world's economic recovery has not been as strong as hoped. Iranian Oil Minister Jamshid Amouzegar said he would seek an increase between the extreme proposals. The Shah of Iran has been calling for a 15-per-cent increase.

The Saudis and Iranians, the OPEC's leading oil producers, are considered to hold the key to the price increase. Despite the two nations' widely disparate

A 'Yes' Vote Is Indicated

Turnout in Spain Is Heavy For Referendum on Reforms

MADRID, Dec. 15 (UPI).—Spaniards cast their votes in a referendum today to decide whether their nation will become a democracy.

Officials said the balloting was orderly and the turnout heavy—70 per cent in Madrid by midafternoon and even more in some rural provinces. All indications pointed to a heavy yes vote.

But a shadow was cast on the peaceful balloting when the kidnappers of a high government official sent an ultimatum saying that their victim will be killed unless their demands are met within 48 hours, according to highly placed government sources.

Antonio Maria de Oriol y Urquijo, president of the Council of State, was kidnapped in Madrid Saturday by members of a gang of leftist urban guerrillas. They said it was a protest against the "phony fascist referendum" and demanded the release of 15 militants jailed for terrorism.

The kidnappers' latest message was a handwritten note wrapped around a stone and thrown into the offices of the newspaper Informaciones. It was the first time that the guerrillas made a direct threat to Mr. de Oriol's life and also the first time that they set a deadline.

A Chance to Choose

The referendum was the first free and secret vote in Spain in 40 years, giving Spaniards a chance to choose their political system by ballot instead of having it imposed on them in a coup or civil war such as the one that brought the late Generalissimo Francisco Franco to power.

The nearly 23-million eligible voters—men and women over 20 years of age—were voting on a constitutional amendment that would set up a western-style parliamentary system and scrap or reform the key institutions of the Franco regime.

If the "law for political reform" is approved, there will be free elections for the new parliament within six months, with the expected participation of political parties ranging from ultraconservatives to Marxists.

The government of King Juan Carlos has said that passage of the reforms means that Spain will go all the way to full democracy.

The only incidents were reported from the restive Basque region, where police scattered crowds of up to 3,000 persons demonstrating in four towns against the referendum. In one case, Civil Guards used tear gas.

A strike called by leftist groups in the Basque region fizzled. But police dismantled several bombs and explosives tied to Basque flags and symbols. Many Basques are pushing for autonomy or even independence.

In other incidents, a bomb exploded in a Zaragoza polling station without causing injury, and in Madrid, police detained five persons for handing out anti-referendum propaganda.

Information Minister Andres Reguera said he expected a 75-per-cent yes vote, with 10 per cent voting no and 15 per cent abstaining. Avila, the home province of Premier Adolfo Suarez, reported an 80-per-cent turnout by 4 p.m.

Spaniards who voted said they had no doubt the balloting was secret and free. They were given an envelope containing three ballots—yes, no or blank—and made their choice in privacy be-

During 2d Day of Congress

Vietnam Portrays Changes in South

By David A. Andelman

BANGKOK, Dec. 15 (NYT).—Senior Vietnamese leaders expanded today on the picture being painted of a new and reintegrated southern Vietnam as the Vietnamese Communist party's fourth congress moved into its second day in Hanoi.

They spoke of a series of vast resettlements of the population of the larger cities in the south—about a million persons during the early days of the new five-year plan that is expected to be approved this week—and they talked of a conversion of wide areas of the south, including the suburbs of Saigon, into a huge rice bowl.

"In the near future, a target of more than a million people from Ho Chi Minh City [Saigon] will be completely resettled in new economic zones," Nguyen Van Linh, secretary of the Ho Chi Minh City party organization, told the delegates. "The outskirts of Ho Chi Minh City will be developed as a vast farm around the city to supply sufficient foodstuffs and vegetables to the city."

'A New Direction'

The congress of the Vietnam Workers party—as the Communist organization is officially called—is the first such comprehensive gathering of Indochinese Communists and their guests in 16 years and is billed as having the goal of "setting a new direction" for the postwar development of the country. The proceedings are being broadcast by Hanoi radio in Vietnamese and are being monitored here in Bangkok.

Mr. Linh's was one of a series of comparatively short statements presented this morning after yesterday's six-hour "political report" by the party's first secretary, Le Duan. Today, representatives of the Vietnamese Army and the Hanoi city committees also delivered brief statements.

Mr. Linh's speech seemed to indicate an expansion and acceleration of the program designed to develop the rural areas of the south, particularly the new economic zones—wide areas of hitherto undeveloped forests and fields to which tens of thousands of people have been shipped, with little preparation, to begin cultivation and other improvements.

Also being expanded, according to Mr. Linh, will be the membership of the party in the south—whose ranks are still considered thin as a result of its largely underground operations during the war.

Most Western observers monitoring the deliberations believe that Vietnam intends to develop heavy industry in the north while the south's rural improvements are sought.

It was long a cliché of the war years that the hard-working northern Vietnamese viewed the abilities of the southerners with a degree of contempt. The south's most valuable commodity was the fertility of the rice regions of the Mekong Delta.

The heavy industrial backbone of the country, it would seem, will remain in the north, and it will be expanded with substantial assistance from the Soviet Union. The chief Soviet delegate, Mikhail Suslov, a member of his country's Politburo and the chief theoretician in Moscow, led a parade of foreign Communist leaders to the rostrum.

China has apparently sent no delegation to the congress although yesterday Le Duan expressed his "deepest gratitude to the Soviet Union, China and other fraternal Socialist countries."

Italy Reportedly Ready to Ration Major Products

ROME, Dec. 15 (Reuters).—Italian Premier Giulio Andreotti believes that rationing of a number of major products may be necessary to reduce Italy's huge balance of payments deficit, trade union leaders said today.

They quoted Mr. Andreotti as telling them that the government was making contingency plans for printing within 20 days rationing cards for gasoline, meat and other expensive imported products.

The Premier has frequently expressed concern over the impact that a new oil price increase could have on the balance of payments deficit, which is estimated at more than $2 billion for this year.

Mr. Andreotti and the union leaders discussed means of cutting labor costs and other economic measures today. They agreed to meet again Dec. 29.

Israeli troops patrol the streets of Nablus during a curfew imposed as the result of a widespread general strike by Arabs on the occupied West Bank of the Jordan River.

Against New Israeli Tax

West Bank Arabs Stage a One-Day Strike

By William E. Farrell

NABLUS, Israeli-Occupied West Bank, Dec. 15 (NYT).—Commercial activity in the major towns of the Israeli-occupied West Bank of the Jordan River came to a halt today as thousands of Palestinians staged a silent protest against the imposition of a new Israeli tax.

There was a brief and turbulent anti-Israeli demonstration by Arab students in the main square of Ramallah, but it was dispersed by Israeli security forces riding in armored personnel carriers. The police said that a 15-year-old Arab boy was shot in the leg early this morning in the Ramallah area when Israeli soldiers opened fire while dismantling roadblocks erected on the road to Jerusalem.

The one-day cessation of work and commerce was ordered by a group of West Bank majors with the concurrence of their municipal councils. Most of the mayors were elected to their offices earlier this year and are considerably more radical than their predecessors. Lately, they have been reaffirming that the Palestine Liberation Organization is *the sole representative of the* Palestinian people.

First Overt Organization

Today's strike was believed to be the first such protest ordered overtly by West Bank officials. Previous strikes and protests were clandestinely organized.

In Nablus, the largest and most radical of the West Bank municipalities, an eerie quiet prevailed, in contrast to the recent days and weeks of tire-burnings and stone-throwings by protesting teen-agers.

The calm in Nablus was an unplanned combination of the effectiveness of the general strike ordered by Palestinian officials and an Israeli-imposed curfew in the vicinity of the town's casbah —a warren of alleys and narrow streets where many of the youthful protesters live.

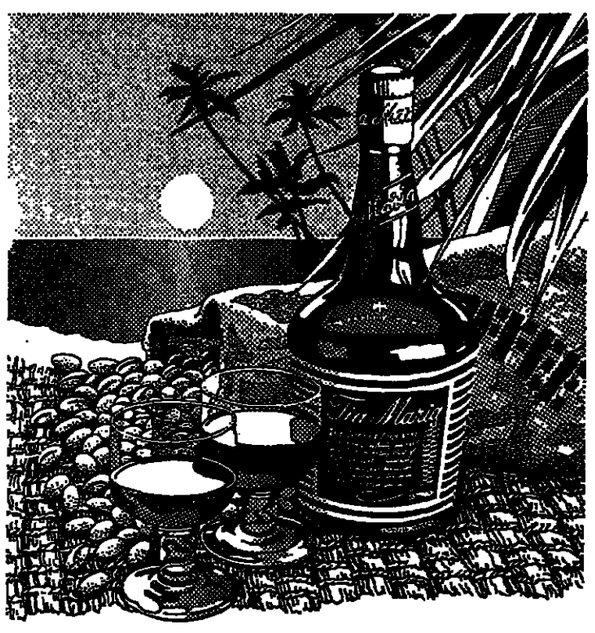
Besides Nablus and Ramallah, there was a *halt in business in the towns of* Tulkarm, Jenin and Hebron and some interruption in business in the Gaza Strip.

Latest Focus

The opposition to the new Israeli tax, called a value-added tax, *has provided the latest focus* for the venting of the Palestinians' objections to continued Israeli occupation. Israel has held the West Bank territories since the 1967 war.

The tax, which Israelis have been paying for several months, requires merchants and businessmen to keep extensive records. One of the enunciated Arab objections is that small-business men have neither the staff, nor the education nor the expertise for such a bureaucratic exercise. Another, less trumpeted objection, is that the record-keeping required by the tax would mean a more scrupulous accounting of income for other tax purposes than many merchants are accustomed to doing.

May Shut Again



Hatam Abu-Ghazaleh a leading political figure here, said that plans called for business to return to normal tomorrow but to shut down again if Israel attempted to collect the new tax.

"If the customs officials go to the shops, they will close immediately and the strike will continue," he said. He added that elected officials along the West Bank were discussing ways of setting up a common fund so that businessmen fined for evading the tax will not become bankrupt.

He said that officials here were attempting to curb the stone-throwing protest of the town's youth, but that "time exacerbates this situation more and more."

Vorster to Visit Transkei

UMTATA, Transkei, Dec. 15 (Reuters).—South African Prime Minister John Vorster will pay an official three-day visit next month to Transkei, the black homeland proclaimed independent in October.

Give her a few moments in the Caribbean.

Oil Prices and Mideast Situation Are Crucial

Developing Network of U.S.-Saudi Ties Requires Stability

By Don Oberdorfer

WASHINGTON, Dec. 15 (WP).—In the three years since the oil embargo, the United States and Saudi Arabia have created a web of mutual dependence. This still-expanding relationship is being severely tested by the current oil price talks of the Organization of Petroleum Exporting Countries, in which Saudi Arabia holds the strongest hand, and by uncertainty over the future of the Arab-Israeli conflict and the policies of the Carter administration.

A sharp swerve by either nation—economically, militarily or politically—would create grave difficulties, and an open confrontation, as in the 1973 oil embargo, would bring a crisis for both nations. Partly by design, partly by accident, the two distant and dissimilar countries have so bound themselves together that sudden separation would be catastrophic.

Almost overnight, soaring shipments of Saudi oil to fill a widening U.S. energy deficit have made the desert kingdom the largest single source of petroleum imported by the United States. Saudi Arabia has also become a large source of capital for the U.S. Treasury, banks and corporations.

On the other hand, U.S. government agencies and private companies are deeply involved in Saudi Arabia, running its hospitals and airline, designing and *building its roads, constructing* industrial areas and military bases, equipping, training and sometimes maintaining its armed forces.

Moderate Influence

U.S. policy-makers believe that Saudi leaders, under pressure from other oil-producing nations and from technocrats at home, are prepared to approve a price increase of 5 to 10 per cent at the OPEC meeting opening today in Qatar. Although even a small increase will leave U.S. officials *unhappy, in view of the fragile* state of the U.S. and other economies, the widespread belief is that the increase would be much higher except for moderating Saudi influence.

A more complex challenge arises from the accelerating momentum toward either *settlement* or renewed warfare between the Arabs and Israel. The U.S. position in Saudi Arabia, the religious and financial fountainhead of the Arab world, rests on explicit assurance that Washington is actively working for a solution to the conflict. Should Washington's policy shift or fail and another war occur, a shutoff of Saudi oil to the United States is probable, in the opinion of both official and unofficial U.S. observers.

"The present situation [between the two countries] is tolerable only if there is peace in the Middle East," said James Akins, former U.S. ambassador to Saudi Arabia and one of the architects of the post-1973 developments.

Recently returned from the *Middle East, Mr. Akins said* Saudi officials expressed interest in discussions next year with the United States on oil-supply increases, oil prices and still closer industrial-technological ties. But all this would be impossible if there was another war, in the view of Mr. Akins, who is now consultant to several U.S. firms.

Increase Since 1970

Direct deliveries of Saudi crude oil and petroleum products were only 42,000 barrels per day in 1970, about three-tenths of a per cent *of total U.S. consumption*, according to Library of Congress data.

By 1974, Saudi shipments were up to an average of 461,000 barrels daily, despite the embargo early in that year. Last spring, they were 715,000 barrels daily and by this spring before the abnormal surge of orders to beat the coming price increase, direct Saudi imports were 1,125,000 barrels daily and growing rapidly.

The United States currently *imports about 42 of every 100* barrels of oil it consumes. And this year Saudi Arabia passed Canada and Venezuela to become the largest U.S. supplier. On a direct-sale basis, the Saudis will probably account for about 20 per cent of the U.S. imports in 1976, or about 8 per cent of U.S. consumption. On an indirect basis—tracing oil refined or shipped elsewhere on the way to U.S. ports —Saudi Arabia was the origin for 17.4 per cent of U.S. consumption in the first half of the year, according to an estimate of the Petroleum Intelligence Weekly.

"As a practical matter, as of today, the only place additional oil for our future growth can come from is Saudi Arabia," a Commerce Department specialist said. The same is true for most of the developed world for the next decade and perhaps until the end of the century, thus creating an extraordinary reliance on Saudi Arabia.

Due to the quadrupling of oil prices after 1973, the financial power of Saudi Arabia and other oil producers has become a fact of international importance.

Financial Missions

At least three U.S. special financial missions, including one by Secretary of the Treasury William Simon, have aimed at convincing the Saudis to place a large amount of their excess funds in U.S. Treasury securities. The size of the resulting deposits, usually estimated unofficially at $5 billion to $10 billion, is "one of the most closely held figures within the U.S. government," according to a Treasury Department official.

Shaken by the sudden increase in Saudi wealth, importance and political independence at the time of the oil embargo, the United States set out in 1974 to deepen existing ties and build a network of new ones. The aim was to develop Saudi self-interest in close cooperation with the United States and at the same time funnel large portions of the Saudi financial surplus back to U.S. coffers.

The U.S.-Saudi Joint Commission on Economic Cooperation is headed by Mr. Simon and the Saudi finance minister, and there is a Joint Commission on Military Cooperation made up of defense officials. The United States, in fact, has created in Saudi Arabia one of its largest economic and military assistance programs, with the novel feature that all of the help is paid for by the recipient country.

Under a technical-cooperation agreement signed in February of last year, the Saudis have paid $113 million into a U.S. Treasury account for technical assistance projects involving U.S. government and private experts.

A unique arrangement first approved in 1965 and greatly expanded in the last several years permitted the U.S. Army Corps of Engineers to act as engineering and construction managers—in effect, as supervising contractor—on Saudi projects. The corps built the Dharhan commercial airport and the Saudi television system (subcontracted to *RCA and the National Broadcasting* Co.) in the 1960s.

According to a spokesman, the corps has 720 military and civilian employees detailed to Saudi work—at the kingdom's expense —and $7.5 billion of jointly approved projects on its construction list. A less formal list, compiled last January by the corps' special "Saudi Arabia District," adds up to about $17 billion as the ultimate cost of corps-contracted ports, medical centers, military academies and schools and other projects. So far this year, 55 per cent of the corps' Saudi subcontracts, by value, went to U.S. firms.

Naval Training

The Saudi naval program includes two bases and a headquarters designed and supervised by the Corps of Engineers, ships built by U.S. firms and about 2,000 Saudi officers and men trained in a special school at the San Diego Naval Training Center.

Bendix Corp. is the backbone of the Saudi Army Ordnance Corps, providing training and backup support to operate jeeps, trucks and tanks. Vinnell Corp. is training the Saudi National Guard, AVCO Corp., which built two Saudi coast guard facilities, is running a coast guard school and maintaining patrol boats. Lockheed operates the air defense network. Raytheon is selling the highly sophisticated Hawk air-defense missile system and providing training, technicians and advisers to make it work.

In the civilian area, TWA runs the national airline and other U.S. companies are designing a highway network, building roads, designing a nationwide power system and advising the Saudi Arabian monetary agency.

Most of the leading Saudi technocrats and many younger members of the royal family were educated in the United States. Now, 5,000 more Saudi students are studying in the United States.

Secretary of State Henry Kissinger, who has visited Saudi Arabia 13 times in the last three years, recently called Saudi Arabia his "our oldest friend in the Arab world," with whom the United States has had "an uninterrupted relationship of trust and confidence."

In view of the high stakes in the extensive connections, an interruption in the relationship would be an event of immense importance.

OPEC Opens Conference on the Price of Oi

(Continued from Page 1)

stands on the price of oil, both have close ties to the United States, and Sheikh Yamani and Mr. Amouzegar today appeared to be on good terms, strolling arm in arm through the hotel lobby.

Flexibility, Rigidity

Sheikh Yamani has called for a price freeze in advance of previous OPEC meetings and then has gone along with an increase. But he was largely instrumental in maintaining the price at a meeting in Bali, Indonesia, last May. The price of $11.51 a barrel of light Arabian crude oil has been in effect since October of last year.

With their last reserves of both oil and petrodollars, the Saudis do not wish to damage Western economies, on which their development and overseas investments are based. More populous countries want increases to finance ambitious development programs undertaken on the proceeds of a fivefold increase since 1973.

With the exception of Sheikh Yamani, all delegates seek some increase in price to compensate for what they say is the soaring price of manufactured goods they import from the West.

Qatar's ruler, Sheikh Khalifa bin Hamad al-Thani, in a speech formally opening the conference, said: "All we ask is for a fair balance between the price of oil and imported industrial goods."

He accused Western countries of "taking the world back to the era of threats and intimidation" in their attempt to hold down the price of oil. The United States has said no increase is justified.

Oil Flow From Gulf Depend On Slender Strait of Hormu

(Continued from Page 1)

could readily find other nations to supply his needs, the subcommittee merely recommended that Congress and the White House watch the situation in Iran more closely.

The Shah answers his critics with a question of his own: "Can the United States or the non-Communist world afford to lose Iran?"

Soviet Aid to Iraq

"I cannot denominate any foreign country," the Shah said recently, but he is clearly concerned about the Soviet military strengthening of neighboring Iraq and fully aware of the entire region's instability.

There have been six major conflicts in this part of the world since World War II—three of them among the Arabs and Israel and three between India and Pakistan. The Shah sent military aid to the Sultan of Oman to help put down a 10-year leftist insurrection there that, before it ended last year, had the open support of Iraq and other radical Arab states. If successful, it would have meant having a power hostile to Iran directly across the Strait of Hormuz.

The area immediately surrounding Iran is dotted with potential flash points. Iraq threatened to invade Kuwait just 15 years ago, and the Kurdish rebellion in northern Iraq ended only 18 months ago, as a result of the Shah's withdrawal of support.

There was tribal unrest in Baluchistan in Pakistan this summer, an old trouble spot between Pakistan and Afghanistan and sensitive to the Iranians since some 700,000 Baluchis live on this side of the border.

Shah Doubts Pacts

The Shah is skeptical of the value of regional security alliances, such as the Central Treaty Organization, of which Iran is a member along with Turkey, Pakistan and Britain. The United States is an ex-officio member. CENTO did not help Pakistan in its wars with India. And, as Premier Hoveida put it, "the day you need a pact" they rush in with advice."

The security problem in Gulf became acute in 1971 when the British abandoned nearly military influence. Both United States and the So Union have made efforts to the gap, the United States w a small naval presence at Ba rain and the Russians throu increasing influence in Iraq.

Iran would like to see so sort of regional security pact the area, but there are proble with Iraq—an ideological groun —and with other Arab sta which fear that the Shah wa to dominate the region. Premi Hoveida denied this.

"We have enough oil and ot natural resources," he said. "I don't want anybody's sand."

Israel Will Ask Dutch to Transfer War Criminal

THE HAGUE, Dec. 15 (AP).—Israel will ask for the extradition of Dutchman Hans Loyen who yesterday was jailed for life by a Dutch court after being found guilty of killing and torturing Jews at a Nazi concentration camp during World War II, the Justice Ministry said.

The Dutch court was told that Loyen, 58, a former Waffen SS corporal, had shot, drowned, beat, castrated and buried alive more than 100 prisoners at Bobruisk camp in occupied Russia, where he was a guard.

The Justice Ministry spokesman said that Israeli authorities informed the Dutch monday that a formal extradition request was being prepared and that it would *be forwarded shortly.* The spokesman added that it would be up to Justice Minister Andries van Agt to decide on any request.

Spain Votes On Reforms

(Continued from Page 1)

fore dropping the folded paper into a glass box.

With the polling stations closing at 8 p.m. (1900 GMT), the first conclusive results were expected early tomorrow.

The reported heavy turnout favored the government and set back leftist opposition parties that had called on voters to abstain. The government slogan was "If you want democracy, vote yes." The left, insisting that full political freedoms be granted immediately, urged "No liberty, no vote."

Francoist diehards seized on the Oriol kidnapping as alleged proof that Spain was not ripe for democracy and would be thrown into chaos if the reforms were approved. "Franco would have voted no," their slogan said.

San Franciscan Escapes a Bomb

SAN FRANCISCO, Dec. 15 (UPI).—A powerful but flawed bomb hidden in a flower box misfired yesterday at the home of Acting Mayor Dianne Feinstein while she and her family slept. No one was injured.

Mrs. Feinstein, 43, a member of the San Francisco Board of Supervisors, said she and her husband did not hear the explosion of the bomb's detonator about 2 a.m. The bomb itself did not explode, and there was no damage.

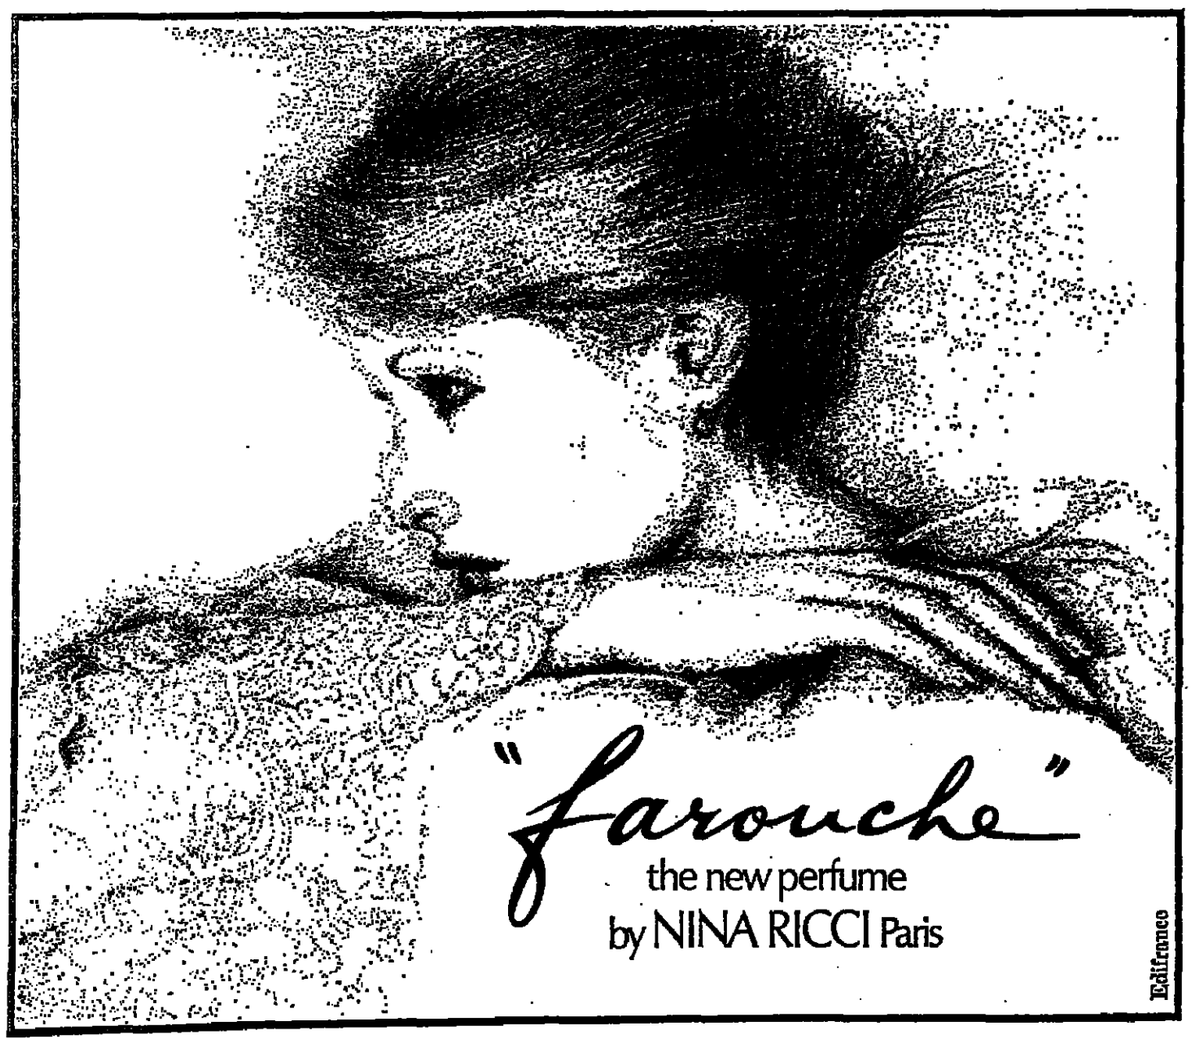
A neighbor heard a noise that *sounded like a gunshot and called* police. A clock that timed the explosion was blown into the street and later found there.

Leftists in Greec Say They Killed An Ex-Policema

ATHENS, Dec. 15 (UPI).—leftist organization that claim killed CIA agent Richa Welch here a year ago has clai ed responsibility for the murd of former Greek security polic man Evangelos Mallios, who di of gunshot wounds early today.

In a mimeographed statemen found near the site of M Mallios's murder, the Revolutio ary Organization of Nov. 17, leftist splinter group, said ambushed Mr. Mallios yesterd "because under a regime with democratic surface but a fasci substance, there is nothing le for the people to do but struggl

The statement accused the g ernment of failing to punish "torturers of the people" and "persecuting the fighters freedom."



Mr. Mallios, a former capta in the security police, served 10-month jail term on charges torturing leftist politica detai ees during the seven-year milita rule that collapsed in 1974. was scheduled to face trial further torture charges.

A police spokesman said t persons in a small car had fir two shots at the 45-year-old Mallios. Mr. Mallios died after emergency operation, police ported.

Austria Suspends Official in Gold Cas

VIENNA, Dec. 15 (Reuters) The head of Austria's mi Friedrich Zimmermann, has be suspended while possible rency-regulation violations investigated, the Finance M istry said today.

His suspension follows arrest last month of a Vien gold coin dealer, Walter Posh on suspicion of selling illega *imported gold* bars to the m rs scrap gold. M. Zimmerma is suspected of knowing about transactions.

Discover the distinctive taste of Glenfiddich pure malt.

Unlike blended whisky, Glenfiddich has a full-bodied smoothness all of its own.

Its pure taste comes from the fact that it is 100% pure malt.

And from the fact that it's still made in the same traditional way by the fourth generation of the Grant family.

So when you discover the distinctive taste of Glenfiddich for yourself, you'll soon appreciate why it's the world's finest Scotch whisky.

Glenfiddich Pure Malt Scotch Whisky.

... Scale Applies for One Year

...N Approves a Compromise ...n Raising Oil Nations' Dues

From Wire Dispatches

...ITED NATIONS, N.Y., Dec. ...N member nations unanimously approved a compromise ...ment yesterday of a dispute ...raising the world organiza... ...dues for oil-producing and ... countries.

...e 146-nation General Assem... gave general consent to a ...tion that limited to next ... new scale of assessments, ...ding the increases, and re... that the next scale avoid ...ments. The Assembly acted ...after its Administrative ...dget Committee, made up ... same 146 members, gave ... consent to the formula.

... compromise, designating ...ar instead of the normal ... for the new scale, was pro... by Algeria and Nigeria. ...e dispute concerned recom...lations of the Committee on ...ributions that the Assembly, ... lowering the assessments ... member countries for the three years, raise those of 28 others, including some wealthy oil exporters.

Members of the Organization of Petroleum Exporting Countries mustered opposition to the recommended scale of assessments, but both capitalist and Communist industrialized countries lined up support for it, and there was a deadlock in the Administrative and Budgetary Committee on the issue.

The groups compromised on the arrangement to adopt the scale for a year and to instruct the committee to draw up future scales in a way that would avoid "excessive variations of individual rates of assessments between two successive scales."

The scale included fourfold increases in the assessments of Saudi Arabia, from .06 to .24 per cent of total out-of-pocket UN expenses, and of the United Arab Emirates, from .02 to .08 per cent of the total. It called for increases in Iran's assessment from .20 to .48; Libya, from .11 to .17; Iraq, from .05 to .10; Kuwait, from .09 to .16; Algeria, from .08 to .10; Nigeria, from .10 to .13 and Venezuela, from .32 to .40.

The United States is assessed 25 per cent of UN expenses and the Soviet Union, 12.97 per cent, which the new scale would reduce to 11.33 per cent.

Rhodesia Embargo

Meanwhile, a General Assembly committee condemned South Africa and the United States yesterday for violating the mandatory sanctions against Rhodesia and called on all governments to enforce a stringent economic embargo against the white-minority government of Prime Minister Ian Smith.

The Committee for Non-Self-Governing Territories adopted the resolution by a vote of 121-1, with 6 abstentions. The United States cast the only negative vote.

Speaking for the United States, Richard Petree deplored the fact that the committee had singled out his country for condemnation. He said U.S. imports amounted to only 5 per cent of Rhodesia's foreign trade. Many other countries, including African nations, he said, were quietly violating sanctions on a larger scale. He accused the committee of hypocrisy and of using a double standard. The United States is continuing to import nickel and chrome from Rhodesia under special congressional legislation.

In another action, the Security Council approved a six-month renewal of the mandate of the UN peace-keeping force on Cyprus by a vote of 13-0, with China and Benin not participating.

To Keep Up With World Market

Russians Hint Oil Price Rise for Allies After OPEC Acts

By Paul Hofmann

VIENNA, Dec. 15 (NYT).—The Soviet Union has indicated it may revise the price structure for the oil it supplies to its allies once the Organization of Petroleum Exporting Countries has reached a decision on prices.

Information reaching here from Eastern European capitals indicates that economic planners in the Soviet-bloc countries are awaiting the outcome of the conference of OPEC ministers in Qatar this week with as much interest as the governments and economists of the free-market countries.

Officials in some Eastern European countries, though not in the Soviet Union, are known to be concerned about reports that the OPEC ministers intend to raise oil prices once again. Two reasons are cited for this concern:

• Several Soviet-bloc countries —including East Germany, Czechoslovakia, Hungary and Romania—have become increasingly dependent on OPEC suppliers and have to pay the oil cartel's prices at a time when their foreign indebtedness is growing.

• The Soviet Union, though still providing the bulk of the crude oil used by its allies in Eastern Europe, seems determined to raise its price gradually so as to reach the world market level by 1980.

Increased Strain

These trends have increased strains within the Council for Mutual Economic Assistance, the Soviet-dominated grouping of Communist economies.

Moscow has publicly supported the demands of some OPEC countries for sharp oil price increases, and has derided Saudi Arabia's call for moderation. "The Soviet Union, a major oil exporter, is getting a free ride with OPEC's realistic pricing policy," a member of the oil cartel's secretariat here said privately.

Not surprisingly, diplomats from the smaller Comecon nations are known to have discreetly pleaded with OPEC representatives from price restraint at the Qatar conference.

According to reports from Prague and other Comecon capitals, Moscow has for some time been reluctant to discuss oil prices beyond 1977 deliveries. The allies of the Soviet Union are eager to know what they will have to pay for crude oil after next year, because such costs are important to their current five-year economic plans.

In Case of Another Embargo

Congress Gets Plan for Vast Oil Storage

By Thomas O'Toole

WASHINGTON, Dec. 15 (WP).—The Federal Energy Administration sent Congress today a $10-billion program to store 500 million barrels of oil in Gulf of Mexico salt domes to alleviate the strains of another oil embargo.

Terms of the program to be sent to Capitol Hill involve asking multinational oil companies and foreign producing countries to bid on contracts that will supply the United States with up to 150 million barrels of oil by the end of 1982.

The oil is to be stored in onshore and offshore salt domes in Louisiana and Texas that are already free of salt or are to be leached free of salt and turned over to the federal government.

The oil to be stockpiled in the federal salt domes is to be financed by the sale of oil from the Elk Hills Naval Petroleum Reserve in California, which is now pumping about 120,000 barrels of oil a day and which is due to increase production to 600,000 barrels a day in the next three years.

Congress has already appropriated $440 million for the first 40 million barrels to be placed in the stockpile, meaning that it expects that oil to be bough at $10 a barrel. Foreign oil sells on the open market for $13 to $14 a barrel but is discounted in many places.

Oil Too Heavy

The FEA is turning to open bidding for oil to be put in the stockpile because Elk Hills oil is felt to be too heavy to be stockpiled. Federal strategists want stockpiled oil to be lighter so that it can be moved out of storage to refineries and be turned quickly into gasoline, jet fuel and other products in an emergency.

The emergency envisioned by the FEA is another Arab oil embargo, brought on either by deliberate Arab actions or by terrorism in the Middle East or on the high seas that halt the flow of oil tanker traffic to the United States.

The United States now imports 42 per cent of its oil, with more than half the imported oil coming from the Middle East. Saudi Arabia is the leading supplier of oil to the United States.

The FEA hopes it can let the first contracts for stockpiled oil by the middle of January, with the first oil being pumped into salt domes on the Gulf of Mexico by next May.

U.S. Given Moon Soil Brought by Luna-24

MOSCOW, Dec. 15 (UPI).—The Soviet Union today handed over to a representative of the U.S. National Aeronautics and Space Administration samples of moon soil brought back by the Luna-24 unmanned flight last August.

The samples were the third given to the United States under an agreement between the Soviet Academy of Sciences and NASA to share results of lunar expeditions, Tass said.

Lebanese Stress Economy

Sarkis, Hoss Confer on Policy To Seek a Vote of Confidence

BEIRUT, Dec. 15 (AP).—President Elias Sarkis met Premier Salim al-Hoss today to discuss a policy statement that will be used as the basis for the eight-man Cabinet to seek a vote of confidence in parliament.

Sources said that the policy statement has been approved. It concentrates on the task of rebuilding the country's war-ravaged economy.

Newspapers estimated that the government will need at least 4 billion Lebanese pounds ($1.4 billion) to bring administration and public utilities to their pre-war level. Beirut's airport and seaport have resumed operation on a limited scale.

Only 25 per cent of the sum required for rebuilding has been made available to the government in the form of reserves and pledges by wealthy Arab countries and other friendly states.

French, U.S. Talks

A French delegation arrived today to discuss aid needs while a Lebanese envoy, former Industry and Petroleum Minister Ghassan Tueini is discussing U.S. assistance in Washington.

Mr. Hoss is scheduled to fly later this week to Kuwait and Saudi Arabia, the two Arab oil states that finance the mainly Syrian Arab peace force here.

The sources said that Mr. Hoss will discuss with Saudi and Kuwaiti officials financial assistance as well as progress in reimposing peace a month after the Arab truce-enforcing army entered Beirut.

The force, supported by about 3,000 tanks and other vehicles, has occupied all of Lebanon, except a tiny strip of land bordering Israel in south Lebanon.

South Lebanon

Parliament Speaker Kamel Assad, who met with Mr. Sarkis to discuss a suitable replacement for the damaged parliament building, said that he also discussed the situation in south Lebanon.

"The situation in the south remains fraught with danger in the absence of government authority, or deterrence" by the Arab peace force, Mr. Assad said after the meeting.

Mr. Assad conferred yesterday with Syrian President Hafez al-Assad in Damascus on a formula for stationing peace troops in the south.

Rumor, 2 Others Lose in Plea to Testify in Public

ROME, Dec. 15 (UPI).—A parliamentary commission investigating the Lockheed corruption scandal will begin closed-door interrogation tomorrow of a former premier and two former defense ministers accused of accepting $1.8 million in bribes from the U.S. aircraft manufacturer.

Former Premier Mariano Rumor and the former defense ministers, Luigi Gui and Mario Tanassi, had demanded open commission hearings so they could defend themselves publicly.

In turning down the demand, the commission said its agreement with the U.S. Justice Department to obtain evidence in the case stipulated that the evidence remain secret.

The commission voted Dec. 1 to charge all three men with "aggravated corruption" by accepting bribes in the late 1960s to favor Italy's purchase of 14 C-130 Hercules transport planes.

After the commission completes taking testimony from the three men and other witnesses in the case, both houses of Parliament will meet in joint session to decide whether to order a trial before the Constitutional Court, Italy's highest judicial body.

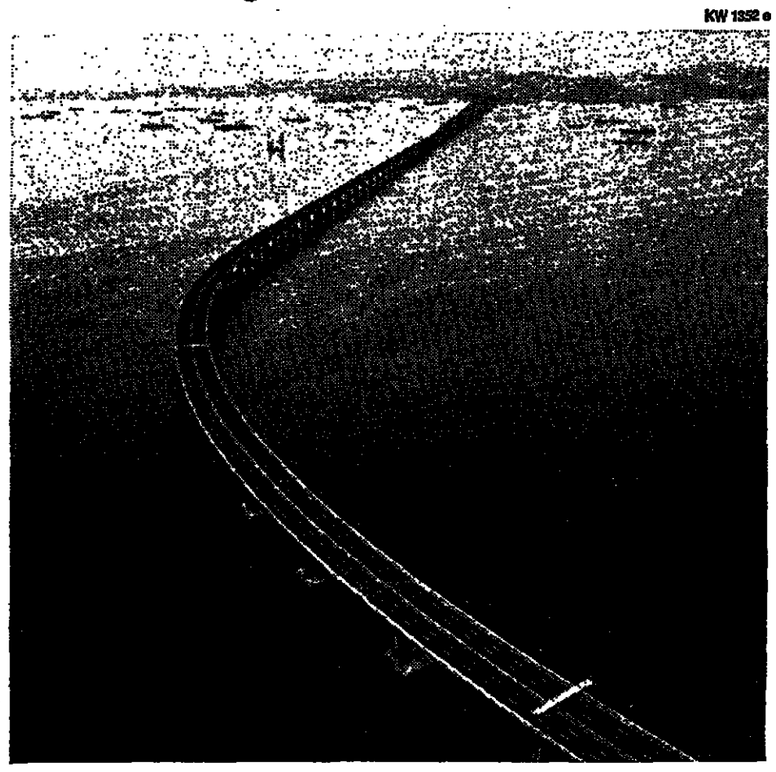
Cairo Asks Waldheim To Tour Middle East

CAIRO, Dec. 15 (UPI).—Egypt has proposed that United Nations Secretary-General Kurt Waldheim make a Middle East tour next month to prepare the ground for resumption of the Geneva Arab-Israeli peace conference by the end of next March.

Foreign Ministry officials said that Foreign Minister Ismail Fahmy made the proposal in a letter delivered to Mr. Waldheim in New York today and specifically invited the secretary-general to visit Cairo.

A Bomb Threat Delays Soares

LISBON, Dec. 15 (UPI).—A telephoned bomb threat forced the airliner carrying Premier Mario Soares on an official visit to Brazil to make an emergency stop today in the Canary Islands, Portugal's TAP airline said.



No bomb was found aboard the Boeing 707 and it was allowed to resume its journey after a six-hour delay, TAP officials said.

The airline received the bomb threat only hours after armed bombers claiming to be "revolutionary Communists" blew up the editorial offices of the rightist newspaper O Pais.

partnership with Bayer

+++ a bridge of 13 km length solves traffic problems in rio de janeiro +++

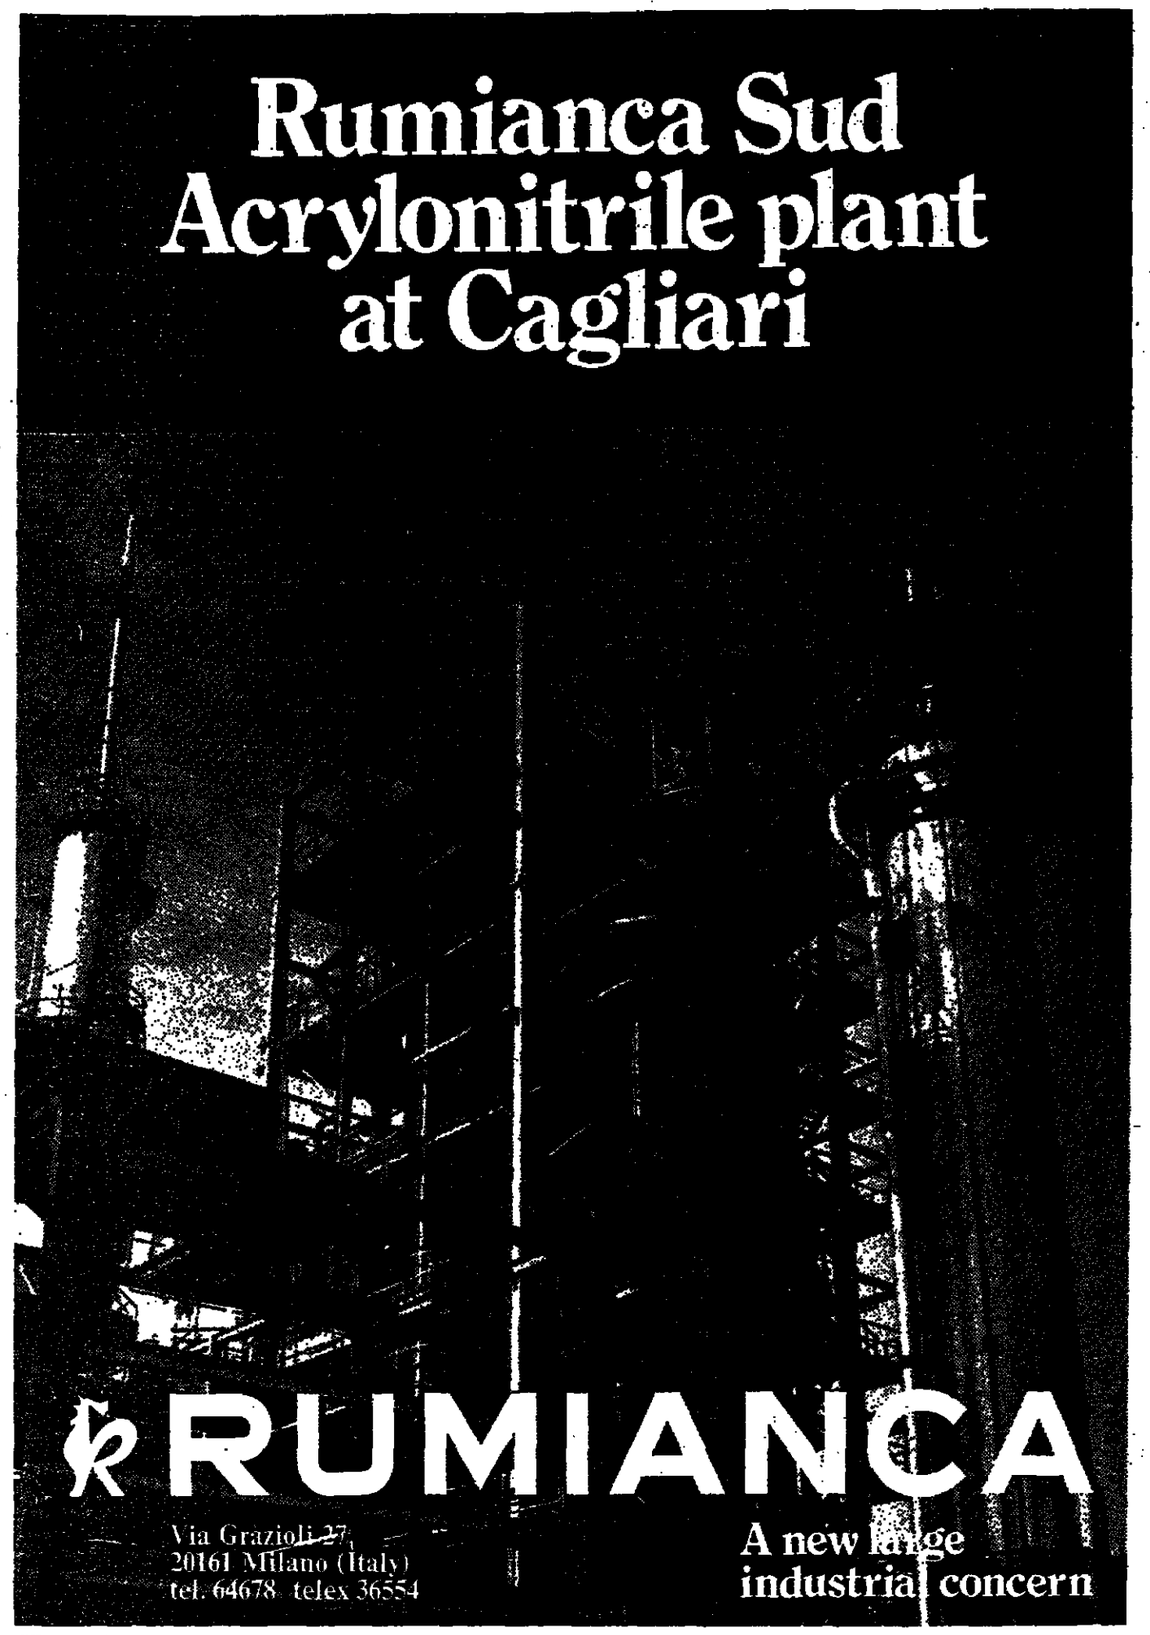
KW 1352 e

Infrastructure — Problem Number One of the Third World

Many young countries in Africa, Asia, and Latin America urgently require better utilisation of their natural resources and manpower. One of the basic prerequisites for a structural change to ensure survival, is the development of new roads and means of communication.

Wherever engineers are engaged in planning — Bayer can be of help.

A striking example is the present realisation of gigantic road-building plans and other urgent traffic projects in Brazil. Take the new bridge of 13 km length between Rio and Niterói which spans the bay of Guanabará. Elastic rests based on Baypren, Bayer's chloroprene rubber, were used for elastic vibration damping between the supporting pillars and the roadway. The Baypren bridge rests produced by a special firm in Brazil act as vibration dampers, shock absorbers, and sound absorbers, besides being resistant to weather and ageing and to changes in temperature. They do not require any servicing.



Bayer plastic engineering materials are made use of by engineers and architects in many countries of the world. In the modern construction of buildings, for example, they are used for window and face sealing, for roof-proofing sheets, or building supports. Bayer plastic engineering consultants can help whenever constructors look for new materials for translating novel ideas into reality. Our consultant experts are backed by a comprehensive research potential and extensive technological experience. For today Bayer develops the chemical engineering materials of tomorrow.

Bayer is active in almost all countries of the world in the field of chemicals, dyestuffs, chemical engineering materials, man-made fibres, pharmaceuticals and crop protection products.

Bayer thinks of tomorrow — today

Amount Held Hard for Carter to Cut

Ford Projected Defense Budget $123 Billion

By John W. Finney

WASHINGTON, Dec. 15 (NYT). —The Ford administration will propose a defense budget of about $123 billion for the next fiscal year, setting a level that the Carter administration may find difficult to reduce.

This figure, approved in recent days by President Ford and the Office of Management and Budget, is about $5 billion less than was proposed by the Defense Department and $13 billion less than it originally requested.

It is also not significantly higher than the $120.6-billion figure that the Ford administration originally projected in January for the defense budget in the fiscal year beginning in October.

For the present fiscal year, Congress approved $112.8 billion in defense appropriations. Between inflation and a planned real growth in the military program, the administration projected that the defense budget would reach the $120.6-billion level next year.

The Ford administration will present its proposed budget to Congress in January. That budget will provide the starting point for the Carter administration, which hopes to present its proposed changes in the budget to Congress by Feb. 15.

A similar process takes place every time a new president assumes office, and it is of particular significance when the White House is being taken over by the opposition party.

During the presidential campaign, Jimmy Carter talked in terms of how defense spending could be cut by $5 billion to $7 billion annually "without endangering the defense of our nation or commitments to our allies."

He suggested that such savings could be made through more efficient management of the defense establishment, but he was vague on when the savings could be achieved and whether he was talking of a specific reduction in the budget or a slowdown in the planned rate of growth in spending.

If only because of his campaign promises, Mr. Carter will be forced to reexamine the defense budget he inherits from the Ford administration. In the opinion of Pentagon officials and some of his congressional advisers, however, he has been placed in a difficult political and budgetary position by the Ford administration's decision to present what is regarded as a relatively tight defense budget.

The consensus among Pentagon officials and Carter advisers is that Mr. Carter now faces the problem of being unable to cut the budget proposed by the Ford administration by any significant amount without making a basic policy decision. This would be whether to reverse the planned real growth in defense spending or a political decision to challenge powerful vested interests that have developed around the personnel side of the defense program.

Personnel costs account for 55 per cent of the defense budget. It is a point being pressed on the Carter camp by Rep. Les Aspin, D-Wis., who has a reputation as a Pentagon critic. He has been asserting that the Carter administration "can make no intelligent cuts in the defense budget without taking on the vested interests."

An example cited by Rep. Aspin is the way the military has been resisting any change in its generous retirement system, which now costs $8 billion a year, with the cost still rising.

One reason the budget will rise above the projected $120.6-billion level is that Congress, responding to objections from various pressure groups, refused to carry out personnel economies proposed by the Ford administration, such as elimination of subsidies for military commissaries, reduction of pay increases for wage workers in the Defense Department and reductions in the Naval Reserve.

In the Carter Cabinet

Finding a Schlesinger Role Said to Delay Defense Post

By Murrey Marder

WASHINGTON, Dec. 15 (WP). —President-elect Jimmy Carter's decision to postpone naming a secretary of defense reflects an intense struggle at the top of the incoming administration over a role for James Schlesinger, informed sources said yesterday.

Mr. Carter's announcement that he will put off "until after this week" a decision on filling the key cabinet post was greeted with delight by Mr. Schlesinger's champions, and with dismay by his opponents.

At stake in the closely guarded deliberations is not just the issue of a cabinet job for the former secretary of defense, who was fired last year by President Ford.

To Democratic liberals, or doves, the renewed possibility that Mr. Schlesinger may get a post that can influence U.S. strategic policy in dealing with the Soviet Union, either at defense or as intelligence chief, is a cause of major alarm.

Mr. Carter gave no sign at his news conference yesterday that he is abandoning what Carter aides have said will be his choice for the Pentagon post, Harold Brown, president of the California Institute of Technology and secretary of the Air Force (1965-69) in the Johnson administration.

Supporters Alarmed

By putting off a decision, nevertheless, Mr. Carter alarmed many of Mr. Brown's supporters, as well as supporters of the most liberal of the three candidates for the defense job, Paul Warnke.

Mr. Warnke, a law partner of former Defense Secretary Clark Clifford, was an assistant secretary of defense for international security affairs in the Johnson administration.

Some insiders speculate that Mr. Carter is attempting only to placate the now fiercely divided Democratic doves and hawks by holding open the defense post until he can find some other job for Mr. Schlesinger.

In the interim, however, Mr. Schlesinger's champions on Capitol Hill, in the AFL-CIO and elsewhere served notice that they intend to push hard for his appointment to the senior Pentagon job.

As part of this strategy, Mr. Schlesinger's supporters are now assailing Mr. Brown as a hawk-turned-dove—a dove especially on the central issue in U.S.-Soviet strategy: the nuclear Strategic Arms Limitation Talks. They are also warning that a Brown nomination could come under heavy challenge in Senate confirmation hearings. To the congressional hawks, Mr. Warnke is totally unacceptable.

Conversely, a Schlesinger nomination as defense secretary, which appears improbable, would encounter opposition from Democratic liberals. A Schlesinger nomination as overall director of intelligence, one of the alternatives to resolve the internal clash, reportedly would meet less liberal opposition, but some strong protest on grounds that Mr. Schlesinger could influence foreign policy strategy.

Energy Czar

Least opposed of all, according to Democratic sources, would be the nomination of Mr. Schlesinger as energy czar to head a reorganized energy administration. Mr. Schlesinger's supporters insist that this is a diversionary move.

Mr. Schlesinger declined comment last night. Vice-President-elect Walter Mondale, who has been seeking to coordinate foreign policy views in Washington for Mr. Carter, would not speak to reporters about the dispute. Senior transition officers for Mr. Carter said that they were not privy to the decisions being made in Plains, Ga., on the defense-foreign policy dispute.

Mr. Carter summoned a former rival for the presidential nomination, Sen. Henry Jackson, D-Wash., to Georgia today.

The defense-oriented senator was reported to be pushing hard for the restoration of Mr. Schlesinger as secretary of defense.

Carter spokesman Jody Powell said that the meeting dealt with policy, not appointments. A Jackson spokesman in Washington said that the purpose of the meeting was "to talk about energy matters," another area of the senator's competence.

Mr. Carter had initially projected a top priority for filling the national security "cluster" of appointments—secretary of state, defense and presidential national security adviser. Only the State Department post has been filled, by the nomination of Cyrus Vance.

Supporters of Mr. Schlesinger said in advance of Mr. Carter's news conference that if the President-elect gave no indication that he was definitely "going for Brown" as defense secretary, that would "open up the contest" for Mr. Schlesinger.

Mr. Brown, Mr. Warnke and Mr. Schlesinger were all advisers to Mr. Carter during the campaign, although Mr. Schlesinger was a latecomer.

Democratic liberals have been upset that Mr. Schlesinger has been given any consideration for the defense post. Mr. Schlesinger was ousted by President Ford reportedly because he insisted on a higher military budget than Mr. Ford wanted at the time. Mr. Carter has called for cutting defense levels.

Mr. Schlesinger has also been an advocate of nuclear strategy, including advocacy of limited nuclear war, which contradicts numerous Carter campaign positions.

Mr. Carter, nevertheless, has been described as so impressed by Mr. Schlesinger's strategic knowledge and advice in preparing for the second Carter-Ford debate that he is described as eager to have him in his administration in some capacity.

Hollings Quits Race in Senate, Backs Humphrey

WASHINGTON, Dec. 15 (WP). —Sen. Ernest Hollings, D-S.C., withdrew from the Senate majority leader race yesterday and endorsed Hubert Humphrey, D-Minn., but Senate insiders believe Sen. Robert Byrd, D-W. Va., has built up an unbeatable lead and will defeat Sen. Humphrey for the post.

Sen. Hollings, in announcing he is dropping out "to clear the air and give Sen. Humphrey a shot at it," all but conceded that Sen. Byrd has probably nailed down the 32 votes he will need for election to the Senate's most important post at the 62-member Senate Democratic Caucus next Jan. 4.

"Sen. Byrd is right at that magic No. 32," the South Carolina senator said. "It would be tough for either one of us" to beat him.

Advised that Sen. James Abourezk, D-S.D., whom Sen. Humphrey had hoped to win over, had just come out for Sen. Byrd, Sen. Hollings said Sen. Byrd might well have 33 commitments.

House Unit Says No Missing GIs Held in Indochina

WASHINGTON, Dec. 15 (AP). —A special House panel concluded today that there are no Americans still being held prisoner from the Indochina war.

About 2,500 Americans were not fully accounted for at the end of U.S. involvement in the war, and the Pentagon still lists 728 men as missing in action and 33 as prisoners.

While no Americans are alive and captive, said Rep. Gillespie Montgomery, D-Miss., there is evidence that "Indochinese nations can account for many of these men. Not all of them, but many of them."

Rep. Montgomery is chairman of the House Select Committee on Missing Persons in Southeast Asia, appointed 15 months ago.

Rep. Montgomery said the main problem now is to achieve the fullest accounting of the missing as possible. That this has not been done, he said, is the fault of the Vietnamese, Laotian and Cambodian authorities.

The committee recommended that the Pentagon resume its case reviews, the mechanism for reclassifying a man from missing to killed in action. The Pentagon suspended the reviews in deference to the panel's investigation.

Foreign Service Unit Elects Woman Head

WASHINGTON, Dec. 15 (UPI). —For the first time, a woman has been chosen as president of the American Foreign Service Association.

Patricia Woodring, 37, a Foreign Service officer, was unanimously chosen in a special election by the executive board of AFSA, which is the professional diplomat's equivalent of a trade union. She replaces John Hemenway, who was removed from office last month in a special recall election.

Hayakawa Nods at Schoo For Senators

CAMBRIDGE, Mass., D 15 (AP).—S.I. Hayakawa, (lifornia's 70-year-old sena elect, says he has s through some of the Harv University seminars that and 22 colleagues are atte ing to learn how to be g legislators.

"I admit I may have d through some of the sessi But I haven't had a good since the campaign," Hayakawa, who unseated D ocrat John Tunney, said terday during a pause in weeklong training program

Some of the other first-t legislators who were inv criticized Mr. Hayakawa, is the oldest in the group says the others are "about age of my oldest son."

"He's slept through e meeting," said a legislator asked not to be identified don't think he's hear thing."

Ford Dona His Papers 2 Institutio

By Lou Cannon

WASHINGTON, Dec. 1 —President Ford yester nated the papers and memorabilia of his 28 y public life to the feder ernment on condition th be preserved and exhibit Michigan.

In a letter to the U.S. a ist, James Rhoads, and to versity of Michigan pre Robben Fleming, Mr. For rected that the papers be in a Gerald Ford Library university. He instructed the other memorabilia be played at a museum t built in Grand Rapids, Th chigan city that Mr. Ford resented for 25 years in House.

The university has a made plans for the libra the basis of a long-sta Ford promise to donate his gressional papers to his mater.

Funds for the museum library will be raised by p subscription but the U.S. ernment will spend about 000 a year to maintain th institutions.

Congress's Approval

Mr. Ford's offer, which accepted by the gover pending the approval of gress, marks the first ti president has donated his while still in office.

The donation of the and memorabilia is likely precedent-setting action.

All presidents from Washington through L Johnson took their papers them when they left offic Richard Nixon's attempt this was blocked by congres passage of the Presidenti cordings and Materials Pr tion Act, which is now challenged by Mr. Nixon Supreme Court.

The court decision in the case is considered unlik settle the broad question b owns presidential papers. White House counsel Buchen said that Mr. action will be welcomed study commission that was ed by Congress and is su to make recommendations question of ownership of papers.

Associated Press.
President-elect Jimmy Carter shakes hands with newly selected Secretary of the Treasury Michael Blumenthal after announcing choice in Atlanta. At left is Rep. Brock Adams, D., Wash., named by Mr. Carter as secretary of transportation in the cabinet.

New Transportation Chief

...ep. Adams Respected for Drive and Intellect

...y David E. Rosenbaum

...ASHINGTON, Dec. 15 (NYT). ...the members of the House of ...esentatives were polled on ...h of their colleagues they ...respected, Brock Adams of ...ington would surely finish ...the top of the list.

...ibiting a powerful intellect ...thorough grasp of political ...ties, he was the driving force ...House behind the institu...lization of congressional ...et procedures, a development ...members of both parties ...e was the most important ...ation in Congress in the ...decade. Some of his friends ...d him to run this year for ...position of Democratic leader ...the new Congress and many ...the House believe that, if he ...run, he would have won ...ily.

...at Rep. Adams scotched the ... of running for majority ...er and he even called off ...e leaders when they began ...ffort to change legislation so ...he could have continued for ...her term as chairman of the ...e Budget Committee.

...though he was then running ...a seventh term, he told his ...ds and colleagues last sum... that he was simply tired of ...g a representative. What he ...ed, he said, was to head the ...rtment of Transportation in ...w Democratic administration. ...xplained that it would be a ...nge to serve in the Cabinet ...arge of an area that fasci... him. And it would be a ...he said, to bide his time ...he was free to run for the ...e.

Some Criticism

...terday, Rep. Adams, who ...e 50 years old next month, ...named by President-elect ...y Carter to be secretary of ...portation. The nomination ...aised by those in Congress ...many in the transportation ...stry, but representatives of ...sumer organizations were ...what critical.

...e announcement of the ...nation was made in Atlanta, ...e Rep. Adams was born Jan. ...1927. He was christened ...man Adams, but he never ...that first name.

...e so many politicians his ...his early years were shaped ...he Depression, his young ...hood by World War II and ...olitical career by John Ken...

...father's clothing business ...lanta failed shortly after ...Adams was born. The family ...d first to Iowa and then to ...n, and much of his child...was spent on farms in those ...

...en he was 13, the family ...d to Seattle, and he graduat...om high school there and enlisted in the Navy four years later.

In 1952, Rep. Adams was graduated from Harvard law school and entered private law practice in Seattle. That year, he met Kennedy, then a freshman senator, and drove him around the state. The two men kept in touch and in 1960 Rep. Adams was chairman of the Kennedy presidential campaign in western Washington.

Thereafter, Kennedy appointed him U.S. attorney for the Western District of Washington.

In 1964, he quit being a prosecutor to run successfully for the House and he has represented the 7th District of Washington ever since.

Rep. Adams is trim and athletic-looking and he spends as much time as he can on the tennis courts or in the House gymnasium. He is married to the former Mary Elizabeth Scott. They have two sons and two daughters.

Rep. Adams's success as a politician has derived in part from his ability to avoid being typecast. In 1971, at a time when the seniority system was considered sacrosanct, he led an unsuccessful effort to oust a committee chairman he regarded as dictatorial. This action, as well as his early opposition to the war in Vietnam, were viewed as radical by some of his elders.

On the other hand, he masterminded the legislative battle for reorganization of the Northeast railroads and as budget committee chairmen he opposed some big-spending programs. Those efforts were praised by conservatives and criticized by liberals.

When Rep. Adams took over the Budget Committee two years ago, there was doubt about whether Congress could be persuaded to produce a budget that would give it a handle on overall expenditures and receipts. Rep. Adams twisted some arms and made some tradeoffs, but he succeeded primarily because he knew the facts better than his opponents.

Before he became involved in budgetary matters, Rep. Adams concentrated on the work of the transportation subcommittee of the Interstate and Foreign Commerce Committee. He was the panel's second-ranking Democrat in the last Congress.

His views on regulation in the transportation area have aroused the ire of some consumer lobbyists. Reuben Robertson 3d, a long-time associate of Ralph Nader, said yesterday, "I don't think he's strong enough for regulatory reform."

Execution of Gilmore Is Reset By Judge in Utah for Jan. 17

PROVO, Utah, Dec. 15 (AP).—Gary Gilmore today was ordered to face a firing squad Jan. 17. But the condemned man, angry over another delay, said he would seek freedom and called the judge a "moral coward" for not ordering an earlier execution.

"You could set it tomorrow morning as far as I'm concerned. I'm ready," said Gilmore, requesting execution next Monday.

Fourth District Court Judge Robert Bullock, acting on a motion from Utah County Attorney Noall Wootton, set the date to comply with a state law requiring that an execution date follow sentencing by 30 to 60 days. It was the third such date set by the court.

Gilmore had applied for release on grounds that his failure to meet a Dec. 6 death date due to a stay by the U.S. Supreme Court violated the state law. His attorney had said the motion for freedom would be withdrawn, but Gilmore told the judge today he had changed his mind.

"I was going to dismiss that motion, but you just imposed another unreasonable delay," the inmate said.

"You simply don't have the guts. You're a moral coward. You have put me through cruel punishment. I'm going to seek my release and my freedom in every court I can," Gilmore said.

The prisoner, who ended a 25-day hunger strike, had said he was pleased the U.S. Supreme Court acted swiftly to lift its stay.

Gilmore, 36, who has said he would rather die than spend the rest of his life in prison, said he wanted to talk with his girl friend, his mother and other relatives.

There have been no executions in the United States since 1967 and there have been none in Utah, the only state to use the firing squad, since 1960.

Concerning the execution, he said, "I've been under some little pressure and I don't want any more. I want this to be over for my family, my friends and for me. The warden has told me that if this takes any time, they would put me in an isolation cell and take away all my privileges. I don't want that. I simply want this to be over with."

Blumenthal Viewed as Pragmatist

Carter Treasury Secretary Called 'Intense, Combative'

By Hobart Rowen

WASHINGTON, Dec. 15 (WP).—Michael Blumenthal, President-elect Jimmy Carter's secretary of the Treasury-designate, is said by his friends to be a hard-charging professional manager who is "intense combative and, above all, a man who likes to win."

A colleague who worked with him during his years as a trade negotiator under Presidents John Kennedy and Lyndon Johnson, said:

"Mike is very smart. He's a wheeler-dealer, an operator. He may be the craftiest man I ever met. Next to him, Kissinger is a shrinking violet."

Now 50, Mr. Blumenthal has had to fight hard. The German-born son of refugees from Hitler, he spent his formative years behind Japanese barbed wire in occupied Shanghai.

Mr. Blumenthal was born in Berlin in 1926 to Jewish parents who did not practice that religion. (Today, he and his wife are affiliated with the Presbyterian Church). Nevertheless, in 1938, the Nazis sent Mr. Blumenthal's father to the Buchenwald concentration camp.

The family engineered his release after three months, sold everything and paid enough bribes to get ship passage to Shanghai.

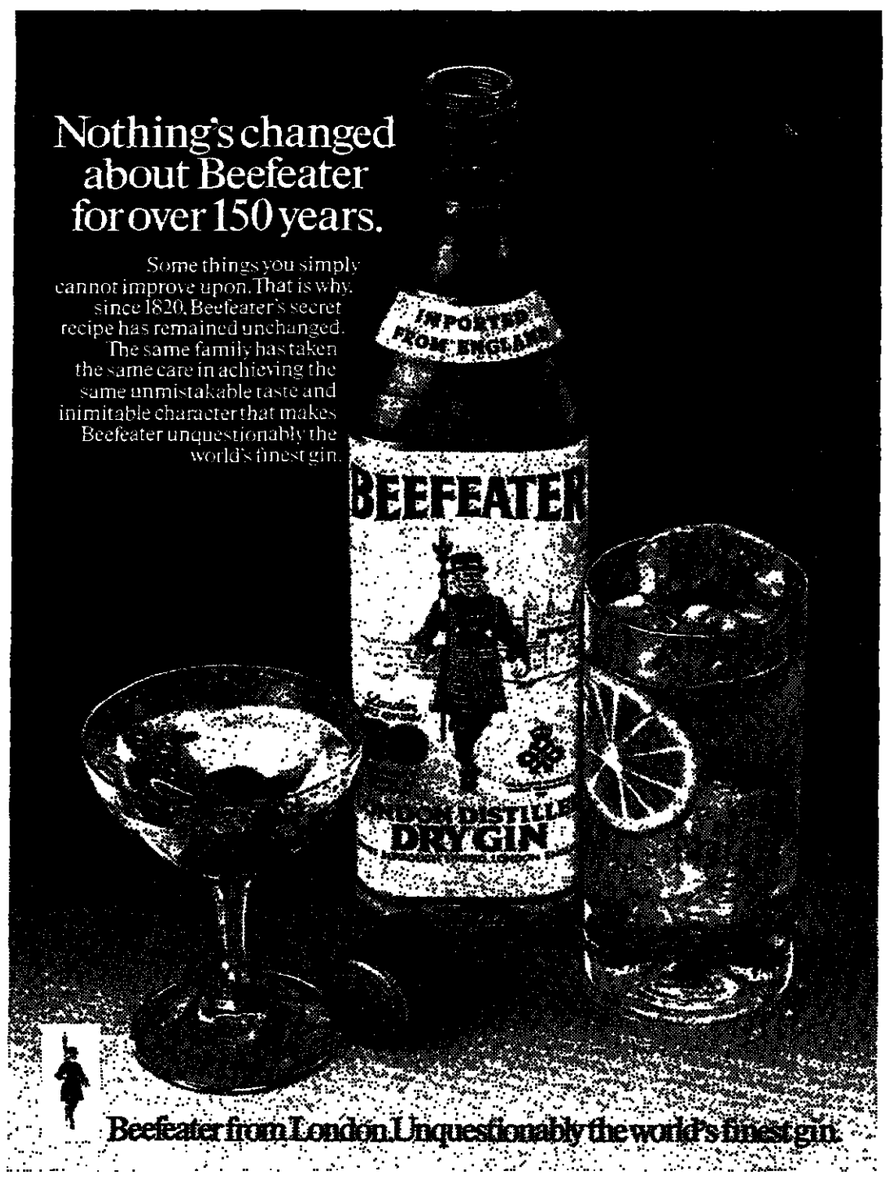
Friends say that young Blumenthal kept the family alive after the Japanese occupied Shanghai in 1941 by working at odd jobs. It was not until 1947 that he was able to wangle a U.S. visa out of the consulate in Shanghai.

Thus, 21 years old, and without even a formal high school education, Mr. Blumenthal finally arrived in what he considered the land of opportunity. To get himself into the University of California at Berkeley (where he got a degree in international economics), he prepped for a year at a junior college.

A brilliant record at Berkeley started him on the road from one success to another. Within five years, he had three degrees, including a PhD from Princeton, where he then spent three years as an economics teacher.

In 1957, he left the academic world to become assistant to the president of Crown Cork International, Herman Ginsburg. Eventually, he was promoted to vice-president, but left the firm to join the Kennedy administration in April, 1961. His first job was as a deputy assistant secretary for George Ball, then under secretary of state.

His big opportunity came with what was called the "Kennedy Round," a four-year negotiation for lower reciprocal tariffs that followed passage of the Trade Expansion Act in 1962.



Mr. Blumenthal had worked out a difficult textile tariff agreement in 1962, and got the job of day-to-day negotiations in Geneva, an assignment that lasted four years. He drove some hard bargains, played a lot of tennis (badly, say his friends) but left the administration when he thought his considerable achievements were not being rewarded with a top diplomatic post.

He decided that the best route to the top government job he coveted was to make a smashing success in the business world, and he gave himself 5 to 10 years to do it. The post announced yesterday puts him just about on schedule, although what he really wanted to be was secretary of defense.

He became president of Bendix, a manufacturing conglomerate, in 1967, and board chairman in 1972. Although he had no technical training for the job, beyond the international experience gained as a trade negotiator, the company has boomed under his leadership.

Nothing's changed about Beefeater for over 150 years.

Some things you simply cannot improve upon. That is why, since 1820, Beefeater's secret recipe has remained unchanged. The same family has taken the same care in achieving the same unmistakable taste and inimitable character that makes Beefeater unquestionably the world's finest gin.

Beefeater from London. Unquestionably the world's finest gin.

DÜSSELDORF

"It's been a hard day's night"

Whether a visitor or a local resident – Düsseldorf always offers opportunities galore to spend your spare-time in the way you like best. This is the "quality of life" in every aspect you desire!

Düsseldorf – A metropolis of renown and the leading foreign trade center of the Federal Republic of Germany.

The sparkling Capital and Cultural Center of the most populated Country of the Federality, with international schools and hotels and gastronomy of international acclaim.

Two New Appointments

By custom, an incoming president's secretary of the Treasury is usually either a banker or a man of great personal wealth. The idea is to reassure the financial world and to keep the president's lines open to it. President-elect Carter's choice is an interesting variation on the theme. He has chosen Michael Blumenthal, who has been running one of the country's biggest manufacturing companies for the past six years. The Bendix Corp. is a multinational, with plants and customers around the world. Before going to Bendix, Mr. Blumenthal represented the United States at the Geneva trade negotiations of the mid-1960s. Rather than finance, his field is commerce, and specifically, international commerce.

Perhaps Mr. Carter has concluded that world trade may now be more important to U.S. prosperity than the Treasury's more traditional concerns. If that is the case, he deserves to be congratulated on his perception. The U.S. domestic economy is running under very different rules than it did eight years ago, when the Democrats were last in the White House. The reasons for the change include the devaluation of the dollar, the vast increase in U.S. trade with the rest of the world, and the great increases in the prices of oil.

* * *

There is a certain symbolism to the coincidence that Mr. Carter should be putting his Cabinet together at the moment at which OPEC gathers to discuss oil prices again. At his brief news conference in Atlanta Tuesday, Mr Carter was asked what he could do to deal with OPEC. At this point, his best answer is the appointment of officials who, unlike their predecessors, have had wide experience and an informed interest in the areas of international trade and economic strategy.

The Department of Transportation in constrast, requires less in the way of technical expertise than of solid political sense. Here the secretary spends a great deal of his time arbitrating among colliding interests and making policy through compromise. Over the past two years Congressman Brock Adams, D-Wash., has organized the House Budget Committee and led it through its first crucial trials with great skill and energy. He demonstrated that the Budget Reform Law could be made to work, and that the 435 members of the House could retrieve a great part of the fiscal power that they had lost to the White House a generation ago.

Mr. Adams was able to get budgets through the House because he has an ability to locate his party's center of gravity and perceive which way it is moving. He comes from a thinly populated corner of the country, whose representatives at the Capitol generally learn to acquire influence by stitching together wide alliances of dissimilar regions and people. This aptitude is likely to serve him and the Carter administration well in matters not necessarily limited to Amtrak and airbags.

That makes four major appointments so far, when you take Mr. Blumenthal and Mr. Adams together with Cyrus Vance, the designated secretary of state, and Bert Lance, the next budget director. They are all men of the center. Three of them are experienced negotiators. There are no crusaders so far, or people who have made their reputations as the advocates of highly focused interests.

* * *

If these first four choices can be said to respond to the concerns of any specific group, perhaps it is, curiously, the businessmen. There's a substantial logic to it. Mr. Carter wishes to reassure them. He understands that if they come to see him as an enemy, they are capable of doing things that will make both the inflation and unemployment much worse. There is the example of the attempted increase in steel prices this month; it was apparently a panicky response to the rumors of price controls. It will not be helpful to the country, or any of its citizens, if businesses react to the inauguration like cows to a thunderstorm, running about in a fright and curdling the milk. Mr. Carter is demonstrating that he is ready to be reasonable.

But, of course, there are also other concerns and anxieties to be met. Not only women and blacks and other minorities but also the labor movement and other working people expect one degree or another of representation in the Cabinet. Four jobs are filled; 10 of equal rank remain open, as well as scores of lesser but significant policy-making posts. Mr. Carter has shown us one slice of his Cabinet. While it makes no sense to judge the final product on the basis of that portion now visible, it would be helpful to him and reassuring to the rest of us if he could find a way to demonstrate quickly how broadly representative that final product is actually going to be.

THE WASHINGTON POST.

Stalemate in Geneva

After talks with Foreign Secretary Anthony Crosland in London last week, Secretary of State Kissinger said he believed "a possibility of progress" existed in the stalemated Geneva negotiation on Rhodesia. Tuesday, in announcing adjournment of the Geneva conference until mid-January, Crosland said, "We have, in my view, a good chance of achieving a peaceful settlement in Rhodesia."

It would be fascinating to know why Crosland sees a good chance for a peaceful solution or why Kissinger sees a possibility even for progress. On the face of it, Ian Smith, the head of Rhodesia's white minority government, seemed more realistic when he asserted that in over six weeks of discussion the Geneva conference has made "no progress whatsoever."

Representatives of Rhodesia's 6 million blacks remain as implacably opposed to an interim government in which whites would control the Ministries of Defense and Law and Order as they were when Smith first announced this provision in September as part of what he calls the "Kissinger plan." Smith in turn has rejected as "ghastly" a substitute proposal that Britain provide these key ministers for the biracial interim regime that would guide Rhodesia to legal independence under majority rule.

Ambassador Ivor Richard, the British chairman at Geneva, will go to Africa immediately after Christmas to consult with all parties involved—including South Africa and the "front-line" black African states bordering Rhodesia—to try to resolve the difficulties about the makeup of the transitional government.

Only the increasingly impatient "front-line" leaders—particularly Presidents Kaunda of Zambia and Nyerere of Tanzania—can persuade the leaders of four black factions to greater flexibility at Geneva. Only Prime Minister Vorster of South Africa is in position to persuade Smith that he must accept British leadership of the interim regime—possibly backed by a military force from Commonwealth countries—11 years after his white government unilaterally declared Rhodesia's independence from Britain. U.S. influence will be crucial on both sides.

This is asking a lot of a lame-duck Washington administration and a secretary of state with only five weeks left in office. But it was Kissinger's belated African initiative that produced the Geneva negotiation; and the secretary should be able to get whatever advance sanctions he needs from the Carter administration and Democratic leaders in Congress to keep that critical effort from a collapse that might make inevitable widespread racial war in southern Africa.

THE NEW YORK TIMES.

International Opinion

Mideast Baton Passed

The Middle East baton has now passed from Mr. Kissinger to the new Carter-Vance team. The Arabs have been swift to create a sense of urgency in order to focus Mr. Carter's earnest attention on a settlement in the Middle East, a subject on which he has not, so far, been over-enthusiastic to speak. The apparent ending of the Lebanese civil war means that neither Arab nor Israeli can invoke that bloody tragedy as a reason for delay. On the ground in the Middle East the problems remain as painful and intractable as ever. But there is a new atmosphere abroad which is profoundly encouraging.

Far from pushing in the prenegotiation stage for the hardest arguments possible, the Arabs seem to be competing for the most moderate position—and Israel has belatedly joined in, too. If the Americans do their homework thoroughly, there is a better chance for a fundamental breakthrough than for many years. . . .

—From the Guardian (London).

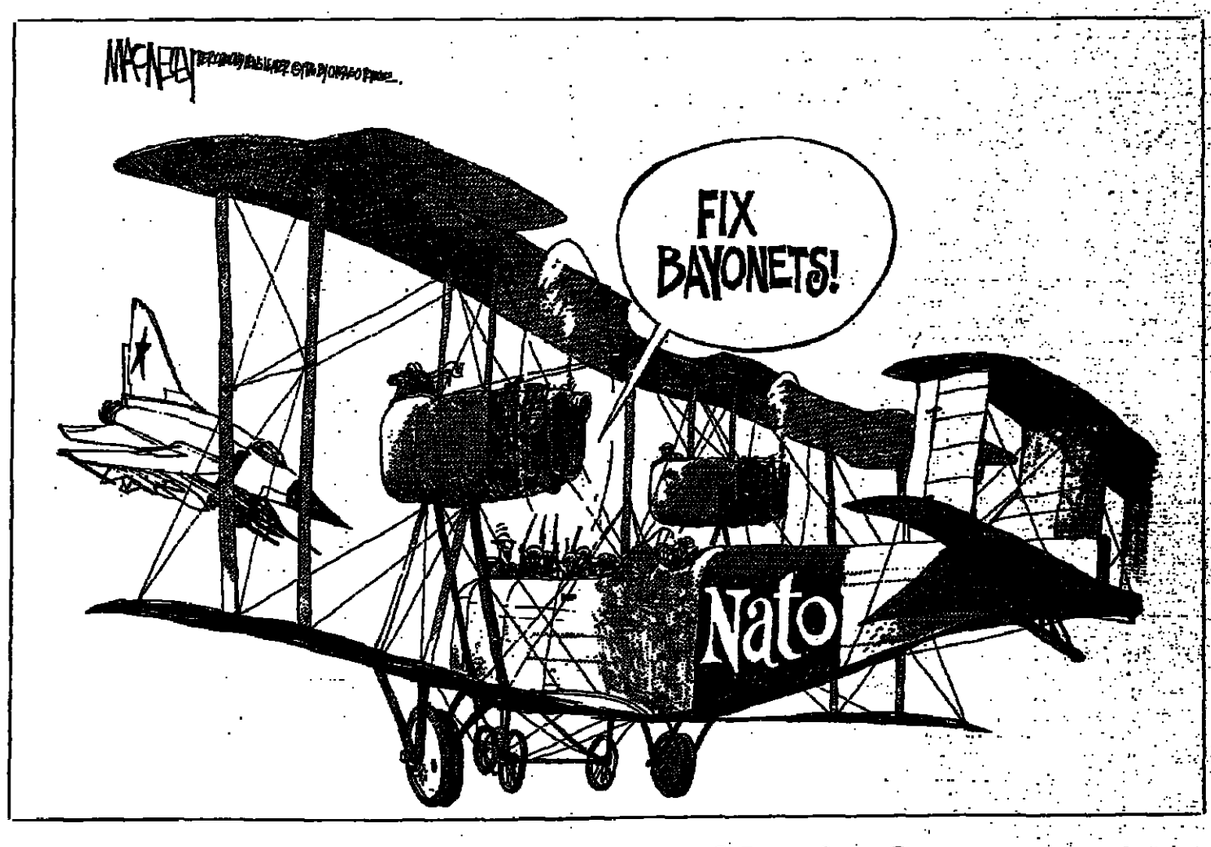
Jamaica's Vote

The tragedy is that the violence, demoralization and frustration [in Jamaica] are too deep-rooted for either party to be able to promise to eradicate them. Undoubtedly Jamaica badly needs fresh capital, as is suggested by the example of Trinidad, where oil wealth has eased (though not removed) the same social tensions which are endemic in the Caribbean. If Mr. Manley cannot obtain it, and world demand does not improve Jamaica's prospects, devaluation will only be the first of the unpleasant measures that Jamaica faces.

—From the Times (London).

In the International Edition

Seventy-Five Years Ago



December 16, 1901

NEW YORK—"The plan proposed by the Secretary of War for establishing and maintaining at a higher standard the education of the officers, is coherent, progressive and in consonance with the advance of military science and with the radical changes modern weapons and transportation have imposed upon the organization and direction of armies," the Herald editorial said yesterday.

Fifty Years Ago

December 16, 1926

CHICAGO—The American League baseball magnates, in their annual meeting which opened here today, unanimously endorsed Judge Kenesaw Mountain Landis, high commissioner of the diamond game, but voted to restrict his authority somewhat in questions concerning the welfare of Big League nines. This move was expected and there will be others, but his re-election was never in doubt.

Threat of Radicals to Mao's Successor

By Victor Zorza

WASHINGTON.—The threat to Mao's successor begins to gather momentum as the radical opposition to Hua Kuo-feng, the new party chairman, gradually recovers from the shock he administered to it. Anti-Hua posters have been appearing in the streets, and the fact that they are denounced in some broadcasts means that they are causing serious concern to the new authorities. As a rule, those in power in China prefer not to mention publicly such challenges to them in order not to encourage others to follow suit.

The military commander in the major industrial center of Wuhan has denounced the "despicable and obscene posters" which have "viciously attacked Chairman Hua." His broadcast speech indicates that the threat from the radicals is so serious that he has superseded the party secretary in authority. On the surface, his speech seemed to deal only with the radicals' past misdeeds, but it also contained strong hints that they posed a continuing danger which only the army could deal with. The problems he discussed affected the whole Province of Hupeh, with a population of some 40 million.

In the Province of Kiangsi (population 30 million) the radicals are attacking Hua by spreading "political rumors and reactionary slogans," and the populace is enjoined to "deal blows" to them. The execution of a man in Changsha for defacing a pro-Hua poster may be a rare example of barbarity, but it also shows what can happen when feelings run high. In Kiangsi, says a local broadcast, "some localities and units still face strong harassment and resistance in all forms." The dispatch of 12,000 troops to "help" the civilian administration of Fukien Province is another example of the threat posed by the radicals. "Down With Hua," said some posters in Kwantung.

A Fiction

The impression that the army, united and disciplined, is fully behind Hua is a fiction. Many of the senior commanders, particularly the old men who went through the Long March with Mao in the 1930s and still insist on clinging to their posts, will certainly defend Hua to the last. Their survival depends on him as his depends on them. But the radicals have worked hard and long to bring many of the younger commanders over to their side, by promising them the posts to be vacated by the old men. There is some evidence to show that they have succeeded, although the younger officers are not yet ready to show their hand.

Some of the evidence comes from what the military supporters of the radicals were saying openly about their preferences, but that was before Hua came out on top, and it could be argued that they were merely being opportunistic. But there is a good deal of other evidence, some of it from their arch-enemy, Teng Hsiao-ping, who sought to secure his succession to Premier Chou En-lai by taking on the radicals and those of the military who supported them.

Before Teng was overthrown by the radicals at the beginning of this year, he sought to undermine their military support by eliminating the radical faction in the army. He called on the senior commanders to keep closer control over the military "cadres" and to transfer and demote any who engaged in "factionalism." The military radicals' strength was shown by his complaint that in the past orders were obeyed as soon as they were issued. There was no need to repeat them. But nowadays "not only individuals but whole units disobey orders," which led to "tense relations" between some units. Because the forces had great authority, some of the regional armies had become "a power behind the throne," and this had led to the emergence of "regional factionalism."

Even if Teng had overpainted the picture a little, the radical influence in the army which he sought to combat by the various speeches from which these quotations are extracted cannot have simply evaporated. Indeed, some of the military statements made in China in recent days can be interpreted as showing its continuing existence. In carrying out Hua's orders, said an army article last week, "we must never show the least equivocation—we must carry out each and every one of them to the letter." Statements of this kind show that some units are even now guilty of "equivocation" and do not carry out orders "to the letter"—as indeed Teng was complaining last year. The article also let it be understood that the radicals have by no means been eliminated from the leadership of the armed forces. It was a "fundamental question," the article insisted, whether "absolute leadership" over the armed forces was exercised by the party, or by "careerists"—which, in this content, stands for radicals.

What the army wants from Hua is more money for more and better weapons as all armies do, everywhere. The moderates promised to give it to them, and the radicals made the fatal mistake of denying it to them. After they had overthrown Teng, they compared his promise to give the army the steel it wanted for tanks to Hitler's policy of guns and butter. But after the radicals themselves were overthrown, following Mao's death, the military began once again to demand their pound of flesh—and Hua is in no position to deny it to them.

The debate about defense spending now in progress in China is only a part, though a key part, of the wider policy debate on the pace and direction of the country's development, and on the extent to which it should remain loyal to Mao's teaching. The arrest of the radical leaders has not resolved the debate. In the face of the continuing challenge to his authority, Hua can remain in power only with the support of the army. But the army itself is divided. A leader who promises the younger military what they want might well be able to oust Hua, and the whole direction of China's policy might once again change as sharply as it has changed when previous power struggles were resolved.

'With All Due Reverent Speed'

By James Reston

WASHINGTON—During the London blitz in World War II, there were signs around the nave of Westminster Cathedral that read: "In the event of trouble, parishioners will descend to the crypts with all due reverent speed." This also seems to be Jimmy Carter's signpost as he prepares for the troubled future.

He seems more composed now than in the vaguely strident last phase of the campaign. He is clearly not impressed with the argument that he is not giving his Cabinet members enough time to take the measure of their jobs before Jan. 20, and his latest appointments to Treasury and the Department of Transportation have made a good impression on the outgoing administration and the Congress.

Mike Blumenthal, his nominee for the Treasury, is not noted as an expert on domestic finance, but he is respected here as a highly intelligent man who combines scholarship with an impressive record in business and international exchange rates and trade.

Tangle of Problems

Similarly, Rep. Brock Adams of Washington has the confidence of the Congress on the budget and the tangle of problems at the Department of Transportation, and after the appointments of Cyrus Vance at State and Bert Lance, the Atlanta banker, at the Office of Management and Budget, it is clear that Carter is picking a Cabinet of moderate and energetic men who will be concentrating on the serious economic problems of the nation and the world.

The Carter technique of cabinet-building is very deliberate. He seems determined to avoid sudden surprises. All of his appointments so far have leaked into the press before he announced them, and this is no accident. For he lets it be known well in advance who is on his short list of probable appointees, so that any serious opposition can surface and be considered before he makes his final choice.

Also, unlike Nixon, he is giving priority to his Cabinet over his White House staff, and insisting that Cabinet members, who are closer to the nongovernment institutions of the nation than White House aides, work together as a presidential council in the formation of national policy.

Much has been made of Carter's style, but perhaps not enough of his intelligence and the intelligence of the men he has brought to Washington already. The important thing about Jody Powell, Hamilton Jordan and Jack Watson, his three closest aides in the transition process, is not that they fuss with one another over appointments, but that they are highly intelligent, industrious and articulate.

These three even have a sense of humor, which is not Carter's most prominent quality. Watson recently made one of the funniest speeches heard at the Gridiron Club here in years, and in a town that hasn't had a good giggle since the Kennedy administration, this is an unexpected bonus.

Perhaps the most important change since the election, however, is in Carter's own public appearances. He is more relaxed now that the fevers and anxieties of the last days of the campaign are over. He is speaking more slowly and precisely, and being more brief and responsive to questions put to him by the reporters.

These first impressions may be misleading, for it is easier to pick good men and women than to solve the intractable problems that will face them later on. Also, all newly elected presidents get the benefit of the doubt in the first months after a close and hard-fought campaign, but first impressions are important.

For it is in these early months that presidents create trust or mistrust by their candor or evasiveness, and Carter has kept the first of his promises to be open, to consult the Congress and the leaders of business, labor and the intellectual community about the mutual problems of the nation and the best people available to help handle them.

If there is a handicap to his deliberate pace of consultation and selection it is that he may be in danger of losing some of the best of the professional experts in the Foreign Service and the Civil Service, who remember his criticism of the bureaucracy during the campaign, and are beginning to conclude that they may not be wanted in the new administration.

Pick Up Speed

The pace of selection is likely, however, to pick up speed in the next fortnight. He promised in his latest news conference to complete his Cabinet nominees by Christmas, and indicated that he would then meet with them in private for several days before the turn of the year.

Meanwhile, the key undersecretaryships will have to be filled, and these are almost as important as the top officials, for the undersecretaries will be responsible for the administration of the departments and for the critical task of seeing that the President's decisions are carried out.

Here again, Carter seems determined to make these appointments himself rather than leaving them to his Cabinet appointees. So he may be moving "half speed ahead," but he is moving and making clear, after all the consultation, who is in charge.

Letters

U.S. Tax Decision

Apparently those congressmen and other U.S. officials who worked on and voted increasing taxes on Americans living and working abroad have seen too many movies about successful U.S. businessmen touring around London or Paris with a seemingly unlimited amount of money available to them. Their decision to make American labor uncompetitive in foreign markets, especially those of the developing countries, was surely an emotional decision, not an economic one.

Most Americans love their country and choose to live in some of the most difficult places in the world strictly for the money, as do Englishmen, Frenchmen, Germans and Italians. In our company we pay all expatriate personnel the same wages for the same work and yet now we expect the Americans to work for much less? Are we so haughty as to believe that only Americans can find oil, build cars or construct plants?

The new tax law makes it impossible for companies to compensate American employees for a $7.00 jar of $1.15 peanut butter or a $200-per-month two-bedroom apartment with no light fixtures, flooring or drapes that costs $1,000 per month. Many Americans abroad will be retroactively thrown into a 50-per-cent tax bracket with a much lower standard of living and saving than an American at home earning far less.

Who will pay for it "Mr. U.S. Official"? The Americans back home will surely pay for it now, either through higher prices for products, reduced sales of U.S.-made equipment abroad, or increased unemployment back in the United States. Most countries don't tax their expatriate citizens because it reduces unemployment at home and provides foreign exchange for their countries through home-country equipment purchases and annual trips home.

DAVID W. MAY.

Tehran.

Kale and Hearty

Re "Kale and Its Scottish Champions" (IHT, Nov. 30):

I was quite surprised that Waverley Root had failed to mention the Netherlands as one of the great admirers and consumers of kale. Especially since boricole (one of its aliases) surely owes its pronunciation and derivation to the Dutch name for kale, "boerenkool," which means farmer's cabbage.

"Boerenkool met worst" is a traditional hearty winter dish of kale boiled with potatoes, mashed and eaten with smoked sausage. Buttery meat juices are usually added for taste and smoothness. Certainly not "haute cuisine," but it is an important and tasty staple in the Dutch winter diet.

BROOKS WARREN.

Amsterdam.

New Salvo Fired Over NATO Status

By William Buckley Jr.

NEW YORK—What would you do if you were the secretary of the Navy, and found yourself visiting Pearl Harbor on December 7? Why, you would strike a blow for liberty—by writing a letter to the New York Times. That is what the Honorable J. William Middendorf 2d did, anyway, en route to the Antarctic on his farewell tour of duty. That epistle to the heathens was published on the same day that Henry Kissinger, in his farewell tour of duty in Europe, cautioned against letting down our guard in NATO.

What prompted Mr. Middendorf to write was a strange editorial in The New York Times hailing the "good news" that the Russians have successfully MIRVed their submarine ballistic missiles. Now this has to be stated plainly in order to be understood, because The New York Times' editorial page is not written by Communists. The reasoning is based on the so-called Disequilibrium Doctrine, which holds that superpowers are safe only when approximately equal in strength. If it should happen (the doctrine goes on) that a superpower achieved, or threatened to achieve, decisive superiority—why then the underdog, or prospective underdog, might resolve that this is his last chance to go to war, undertaking a preventive strike. By this analysis, long as Moscow didn't have MIRVed missiles in its submarines, but we had MIRV missiles in our submarines, the people in Moscow would be wondering that the U.S. decided advantage should be taken of it in a first strike.

Good News?

Secretary Middendorf wondered whether it isn't time for a little good news in the opposite direction. He points out that the Soviet Union has just finished equipping its Kiev-class aircraft carrier with vertical-takeoff-and-landing aircraft. More, the Russians have developed a new missile for their Delta-class submarines. These missiles have a 4,200-mile range and, in the words of the secretary of the Navy, "can reach every city in the United States from the home waters of the Soviet fleet."

Nor is that all. The Russians are developing a civil defense program designed to shelter the major portion of their urban population." By contrast, our own civil defense programs consist of one concrete cellar in Pocantico Hills, installed by Gov. Nelson Rockefeller in the late 1960s when he was trying to interest everybody in home shelters. Instead, we developed 10 years later an anti-ballistic missile, authorized its deployment by a majority of one Senate vote—then abandoned the whole idea, in Moscow, in 1972, promising, via SALT, never to do it again.

Mr. Kissinger, in Brussels, reacting to a proposal by the Soviet Union in two parts: 1) That NATO countries and the Warsaw Pact countries should pledge that, in a combat situation, neither side would take the initiative in using atomic bombs. And 2) The two alliances would further pledge not to admit any new members. What's wrong with that is: a) The preponderance of military strength in Europe is theirs, not ours, so that an exchange of such a pledge would merely have the effect of guaranteeing Soviet military victory on the ground in Europe; b) Spain is being considered for a prospective NATO partnership, whereas there are no prospects for Warsaw Pact countries, until Leonid Brezhnev decides on some other military conquest, or Portugal goes Communist. The British Foreign Minister Anthony Crosland was more direct than Mr. Kissinger. He apparently denounced the Soviet proposal, and his colleagues as "cheap propaganda."

Surely Mr. Carter, in his first State of the Union message, should address himself to the past, diagnosing the feverish military activity of the Soviet Union? Who are they arming themselves against? Is there any prospective "good news" at this end of the military world? Why is the budget for strength of the Soviet Union such little apparent concern to the House Committee on Armed Services, or to Western Europe?

How is it that the defense of Europe, on which, year after year, less and less money is spent, is the only percentage of the gross national product of Europe, is so far as it was a lawyer the thought of a continent knows the horror of war, and the superior horror of servitude, such bitter experience during the century? And, finally, will Kissinger go on to write the definitive account of the days of détente?

...NEVA, Dec. 15 (UPI).— ...desian black nationalist lead... Robert Mugabe and Joshua ...mo rejected today any idea ...haring power with the whites ...ng the interim period before ...an majority rule.

...t Ivor Richard, the British ...man of the Rhodesia con..., which adjourned yester... said he believed that the two ...alists were only addressing ...r constituencies.

...mmenting on Britain's plan ...ent a compromise formula ... interim government to ...Rhodesia before majority ...independence set for March ..., Mr. Mugabe and Mr. ...mo stated at a news con...:

...al power, as related to the ...tries which control essential ...sses towards independence, ...t be in the hands of the ...ation movement. There can ...o question of power-sharing."

Post-Holiday Shuttle

...itain's plan, which Mr. Rich... will promote during a diplo... shuttle in southern Africa ... Christmas, suggests that a ...ish resident commissioner ...rol the army and police ...g transitional rule by a gov...ent made up of black and ... Rhodesians.

...a separate news conference ...y, Rhodesian Foreign Minis... Pieter van der Byl repeated ...hite minority government's ...tion of any British role in ...nsitional regime. He said ...overnment "sees no room" ...Britain other than in the ... form of a "diplomatic representative."

Mr. Richard said at his own news conference today that he is optimistic that during his shuttle he will get everyone's agreement to the British plan so that the conference can resume in Geneva by Jan. 17.

He said Britain would remain in "deep and close" contact with the United States on the Rhodesian question but that no U.S. diplomats would accompany him on his tour of the African states involved—Rhodesia itself, South Africa and the "front-line" black countries surrounding Rhodesia.

After their news conferences, the four men left for home. The Geneva conference lasted eight weeks before being adjourned.

Minister, Wife Die

SALISBURY, Rhodesia, Dec. 15 (UPI).—The military command said today that an elderly United Methodist Church minister and his wife have been killed in "a contact" between security forces and black nationalist guerrillas in eastern Rhodesia.

The government said that "during a contact with terrorists in the operational area, an African man and an African woman, subsequently identified a the Rev. Elisha Kuwana and his wife, were killed in thick bush during the clash. A sweep of the area after the contact revealed a terrorist base camp in the immediate vicinity."

The communiqué also said that since Monday, security forces had killed 11 guerrillas.

U.K. Cuts Spending £2.5 Billion in Loan Bid

(Continued from Page 1)

ployment and real wages and an industry which is vigorous, expanding and profitable."

Budget Deficit

He said the immediate effect of the measures would be to reduce Britain's budget deficit to £8.7 billion for the fiscal year starting in April, and about £8.6 the following year.

Estimates for the current year put the deficit at about $11 billion.

The reduction of this gap between revenue and planned spending by central government local authorities and nationalized industries has been one of the main concerns of the IMF in considering Britain's loan application.

Mr. Healey said his measures would amount to a reduction of £1.5 billion in public-sector borrowing in each of the next two years. There would also be tax adjustments of about £500 million in 1978.

Defense Cuts

Defense spending will be cut by a total of £300 million over two years.

Overseas aid—spared in previous economic packages—will be reduced by a total of £100 million during the two-year period. The aid budget is $516 million for this year.

Domestically, the cuts will affect road and school programs, housing, the civil service and nationalized industries. Food subsidies will be reduced more quickly than planned.

The Trades Union Congress general secretary, Len Murray, said tonight: "The government has clearly fought hard to minimize the cuts and their deflationary impact.

'Even Worse'

"Trade unionists will understand that if Britain did not get an IMF loan, the alternative would be even worse."

For Britain's business leaders, Jan Hildreth, director general of the Institute of Directors, said it was a stop-gap budget.

"We are still not tacking the basic problem of living within our means. We are still not doing enough to promote wealth creation."

Polish Premier in U.K., First Visit Since War

LONDON, Dec. 15 (UPI).—Polish Premier Piotr Jaroszewicz arrived today for a two-day official visit, including talks with the British government and signature of a commercial agreement between the two countries.

It was the first visit by a Polish premier to Britain since World War II.

Carter's Reported Choice as Envoy

Andrew Young: Georgia 'Gadfly' for UN Post

By Peter Grose

UNITED NATIONS, N.Y., Dec. 15 (NYT).—Rep. Andrew Young, D-Ga., reportedly in line to be the next U.S. representative at the United Nations, calls himself a "gadfly" in foreign affairs who is terrified of being taken seriously.

Yet with a seriousness that belied his statement, he singled out southern Africa as the place where the United States could reestablish its credibility on the world scene.

"Once we get on the right side of the moral issues in this world, then we can have an orderly approach to the problems of the Middle East and a genuine dialogue on the international economic order," he said. "Up to now, we've come down on the wrong side of too many issues."

Mr. Young, 44, who is black, was an aide of the Rev. Dr. Martin Luther King jr. and is now a confidant of Jimmy Carter. He spoke about the country's diplomatic challenges at a luncheon meeting of the Foreign Policy Association. Then he went off to meet the secretary of state-designate, Cyrus Vance, at his New York law office.

Soviet Threat Minimized

Just back from a trip through southern Africa, Mr. Young minimized the dangers of Soviet influence in African societies. The Russians, he said, "are more bewildered, more confused by the problems of racial confrontations than Americans are—they haven't had our experience of confrontations between peoples of different ethnic background."

"Furthermore," he continued, "the Soviet need for the natural resources of Africa is not great, while ours is serious."

Granting that Secretary of State Henry Kissinger had moved part of the way toward a positive African policy, Rep. Young said nevertheless that Mr. Kissinger had not "put all the pieces together."

The present administration seemed to be preoccupied with the economic weight of South Africa, he said, "without recognizing at the same time the economic weight of Nigeria—which is now a larger trading partner of ours than South Africa."

"We have unwittingly supported the worst leadership groups," he said, "and as a consequence we have become party to a vast network of oppression. We have ignored the real human needs."

Startles Audience

Rep. Young startled his audience by saying, "I felt very much at home in South Africa—it was just like traveling in Mississippi or Louisiana or Georgia when I was a child.

"The Afrikaners reminded me—it's a terrible thing to say—of the old Southern Baptists, there's this awful familiarity. But that's why I can't give up on South Africa, because I know how far people can come if they have to. And I saw stirrings among the whites in South Africa that reminded me of the early days of our own civil rights movement in the South."

The leadership role of the United States among Africans, he said, must lead to "decisions with them, rather than for them."

William Scranton, the present U.S. representative at the UN, has been making no secret of his hope that Mr. Young would be his successor—even writing the congressman a long letter recently trying to persuade him to take the post if it were to be offered to him. Mr. Scranton denied comment, pending official announcement of Mr Young's appointment.

Parries Questions

Mr. Young himself parried questions about the UN position, joking at one point that he was "trying to figure out what the UN really is."

"It's a glamorous opportunity, but a suicide job," he said, "unless you want to be senator from New York, which I don't"—an allusion to the newly elected senator, Daniel Moynihan, who served at the UN before Mr. Scranton.

Observers in the audience speculated that this might have been the last time Mr. Young could get away with such blunt statements. Similarly, he offered no clarification of his views on the Middle East, except to say that he did not believe that the African states were hostile to Israel.

"I always used to enjoy throwing out ideas on foreign policy, acting like a gadfly, just to stimulate discussion on important issues," he said.

Referring to his close friendship with Mr. Carter, he added: "Then I got involved with this peanut farmer from Georgia and everyone has started to take me seriously."

East Germany, Russia Continue Trade Talks

BERLIN, Dec. 15 (Reuters).—East German head of state and party chief Erich Honecker continued trade talks here today with Soviet Foreign Trade Minister Nikolai Patolichev, the ADN news agency reported.

The agency said Mr. Patolichev and his East German counterpart, Horst Soelle, yesterday signed an agreement on reciprocal trade in 1977—part of a five-year accord.

Leaflet Bombs Explode

CAPE TOWN, Dec. 15 (Reuters).—Two bombs containing leaflets apparently printed by the banned African National Congress exploded in the city center today, sending bystanders running.

The leaflets, written in English and headed "The Struggle Continues" and "Victory Is Certain," referred to recent black unrest in South Africa.

Police are searching for two Africans who were handing out pamphlets just before the explosions. The bombs were made of aluminum tubing and wooden boards.

Oath Taken By Schmidt

(Continued from Page 1)

chamber is the kind of accident that happens in most chancellorship elections," Mr. Schmidt said.

While regretting Mr. Arendt's departure, the Chancellor announced immediately that the minister would be replaced by Herbert Ehrenberg, who has been state secretary for labor and social affairs and is an SPD Bundestag member.

Political sources said that Mr. Arendt was not only criticised over the pension issue but also for his interpretation of the recently enacted law that gives West German workers the right to join management boards of major companies.

Two other new members of the Cabinet took office today. Mrs. Maria Schlei replaced Egon Bahr, who has become SPD secretary-general, as minister of economic development, and Mrs. Antje Huber took over for Mrs. Katharine Focke, former minister of the Family Youth Agency, who had resigned.

The dissension in the ranks of the majority members was one reason why the CDU and CSU were able, over the weekend, to patch up their own intraparty dispute, which had threatened to lead to the formation of a new nationwide conservative party headed by Franz Josef Strauss, the CSU leader.

Study Questions Many Diagnoses Of the Depressed

PITTSBURGH, Dec. 15 (AP).—As many as 60,000 Americans may be falsely labeled as victims of psychological depression, when they actually have physical disorders that make them dejected, a study of sleep patterns has suggested.

Researchers at the Western Psychiatric Center here said their three-year study showed a difference between the rapid eye movements (Rems) of persons whose depression was emotional and those whose depression was caused by a physical problem.

Rems, which occur naturally in sleep, can be monitored by electroencephalograph. A healthy person's Rems start about 90 minutes after sleep begins, the researchers said.

Dr. David Kupfer, one of the researchers, said he found that depressed persons whose disorders had no physical cause began Rems about 30 to 40 minutes after falling asleep. Persons whose depression could be explained physically showed almost no eye movement, he said.

The study, sponsored by the National Institute of Mental Health, concluded that up to 10 per cent of an estimated 800,000 existing cases of depression may have been inadequately diagnosed.

Population Gains .45% in Europe

BERLIN, Dec. 15 (UPI).—The population of Europe grew by only .45 per cent in 1975, to a total of about 450 million, according to the latest Swiss statistical yearbook, published here today.

In Austria, the number of deaths exceeded births in 1975 for the first time in 30 years—by 2,900, the yearbook said. In West Germany, where deaths have exceeded births since 1972, the gap remained, with 149,000 more deaths than births recorded.

If the "baby slump" trend continues, Britain, Sweden and Belgium soon will also have declining populations, the Swiss report said. But the population of the Netherlands and Norway will continue to increase into the 1980s.

Three Are Killed In Milan Sequel to Shooting in Rome

MILAN, Dec. 15 (Reuters).—Two policemen and a suspected leftist guerrilla were killed in a gun battle here today as political tension mounted both in Milan and Rome.

The deaths brought to five the number of people killed in less than 24 hours in political violence.

Police said today's shooting came as they were investigating an assassination attempt in Rome yesterday against Alfonso Noce, a senior official of the capital's anti-terrorist squad. A policeman and a guerrilla died in that shooting.

Police were searching an apartment believed to belong to a member of the extreme left "Red Brigades" when the owner, named as Walter Alasia, opened fire, they said.

One policeman was killed instantly and a second died later in a hospital. The owner was shot dead as he tried to escape through a window.

Dutch Legislators Reject Abortion

THE HAGUE, Dec. 15 (Reuters).—A bill to legalize abortion in the Netherlands was rejected in the upper house of parliament here last night.

The 75-member upper house, strongly divided in the issue, voted 41 to 34 against the bill, which had been adopted by the lower house by 83 votes to 58 in September.

The bill, proposed by the Labor and Liberal parties, would have allowed abortions provided certain conditions were met. The operation would have had to be performed in a hospital or a clinic by a gynecologist, and it would not be allowed if the fetus were capable of living outside the mother's womb.

The whole is more than the sum of its parts.

A BMW combines active, passive and perception safety features into one unique system: the BMW life preservation system.

The deformable rear protects passengers in the event of a rear impact.

The rigid passenger cell functions as a survival unit. The roof-pillars are specially constructed with special reinforced body-work and an integral roll-over bar.

The petrol tank is in a protected position in front of the rear axle.

There are adjustable head rests, and 3-point automatic seat belts in front. The interior absorbs energy, and is upholstered in flame-resistant material.

The bonnet buckles to a pre-determined programme, and is restrained by special safety hooks.

The safety steering-wheel, with its padded boss, is collapsible, and the steering mechanism is located well away from the buckling zone.

The cardan shaft tunnel and front bulkhead are rigid, to stop the engine and gearbox from penetrating the vehicle interior in the event of a frontal collision.

Front with programmed buckling zone provides protection in a frontal collision. Deformation is interrelated with the reaction time of the automatic front seat belts.

Laminated, or, as an optional extra, specially-toughened windscreen.

BMW seating, visibility, and control systems: the driver has everything he needs to give him perfect command in traffic. The ergonomically-perfect cockpit design gives him effortless control, and the sophisticated heating and ventilating system maintains a comfortable environment.

The power unit is reliable and economical, and provides the high performance that is the prerequisite for decisive action.

The exceptionally efficient suspension provides excellent road-holding in all conditions.

Safety must be a system.

The compact BMW treads a straight technological path between extremes. It's neither a ponderous and impractical monster, nor is it dangerously flimsy and unsafe. It relies for its very high standard of safety not simply on the mass of detailed safety features it incorporates, but on combining them into a single, comprehensive safety system. The individual safety components relate with each other, and draw extra strength from each other. The total system is what counts in the safety evaluation of a car. Isolated, individual solutions provide safety a little at a time – and a little safety is so often too little.

BMW cars

The BMW range of fine automobiles: the ultimate in performance, comfort and safety. Designed for the man who appreciates the excitement of driving.

BMW – Sheer driving pleasure

Linda McCartney Solos on Camera

By Judith Weinraub

LONDON (NYT).—Linda McCartney started out with just about the most unsympathetic press anybody could have. She had the wrong kind of background—rich. She had the wrong kind of style—a kind of indifferent, homespun, anti-style. She hung around taking pictures of musicians when groupies were trailing after them.

Then she married into the Beatles, and soon after that the fights and dissensions within the group made the legend crumble. And, perhaps worst of all, she tried to be a rock star.

"Paul said, 'Why don't we form a group?'" she said at the McCartney offices in Soho the other day, recalling how their group, the Wings, came to be. "'Oh yeah, great,' I thought. It sounded so ideal. 'Here's the music,' Paul said, 'Go and learn it.' I was scared. I remember crying one night before going on. I'm not a realistic person at all."

Last month it all came together for Linda McCartney. A selection of her best photographs—a kind of pop music history of the 1960s and 1970s and family album combined—was published by Alfred Knopf ($25). And the Wings, with Linda on piano, organ, *Moog and Mellotron* keyboards, were voted top rock band of the year as well as top pop band by the mass-circulation Daily Mirror here.

Ordinary People

Unlike the rest of the Beatles, Linda and Paul McCartney have stayed married. They maintain that they are ordinary people *with three children, a comfortable* Victorian house in North London, a farm in Scotland, and four big dogs, several horses, a turtle, some chickens, ducks, geese, fish and sheep scattered around their two homesteads.

She manages with the aid of Rose, a treasured housekeeper, and a sense of humor and distance about celebrity life.

"You have to take a lot in your stride, but mainly try to be as natural as possible," she said. "I grew up in Scarsdale (N.Y.), with all those upper-middle-class values. Those wealth values don't inspire me." She went on:

"I was a rock 'n' roll kid who listened to the radio all the time and used to run off to the Brooklyn Paramount—*the type who* wore jeans and a suede jacket. I loved the freedom of it.

"In the old Beatle days, it was hard, because a thousand people would stop if you sat down to have a pizza, but now I can handle it. If you're a natural person, you get natural reactions."

Linda McCartney may be natural, but she is still not quite relaxed in her multiple role as celebrity, mother, musician, photographer, and wife of one of the most famous performers in the world.

Her abrupt entry into rock music as an artist rather than a photographer caused a critical reaction that still hurts when she thinks about it. Critics questioned her talent and implied that she was just exploiting her relationship with McCartney. "It's like anything you want to do well," she said. "You want to be good, but you just can't be there and then. I guess I started out for the fun. There was nothing to do but try. The criticism hurt me most for Paul. A couple of times I was really ready to throw it over, but somebody would say, 'Come on, what's the point—it's only rock 'n' roll.'"

Linda McCartney's book, "Linda's Pictures," chronicles her life over the last decade: her early successes as a rock photographer, her family life and her continuing fascination with nature. Along the way, it evokes the pop music history of the decade from Simon and Garfunkel, Otis Redding, Ray Charles, Judy Collins, the Jefferson Airplane, the Rolling Stones and the Beatles to *David Bowie.*

There are also striking pictures of three stars whose early deaths have fixed them in the imagination—Janis Joplin, Jim Morrison and Jimi Hendrix. The pictures of Jimi Hendrix are among her favorites.

Linda McCartney started taking photographs at an evening course at the Tucson Art Center after she had gone to the university there, married for the first time, had a child, and saw her marriage fail. "Arizona is the most beautiful state in all America," she said, running her fingers through her blond hair. "After growing up in the East, it opened *my eyes up to the wonder of light* and color."

Some of her first pictures taken there were of an English acting company that had come out to Arizona to do Shakespeare on the desert.

After her first marriage broke up, she went back with her daughter to New York, a one-room apartment, furniture from the Salvation Army and an unlikely job as a receptionist at Town & Country magazine.

"I wasn't too bad at answering the phone, but I'm not exactly fashion-conscious," said Linda McCartney, who was wearing a yellow T-shirt, denim culottes, gold hoop earrings and a plastic necklace.

Receptionist

As the receptionist, she opened the mail, and one day an invitation to a Rolling Stones concert at the 79th Street boat basin came her way. "I took my camera," she said. "Millions of photographers were there. I was still a right little amateur, but in the end, the Stones didn't want the hard-core types, and I was the only photographer they let on the boat.

"I had a grand old time just sitting around, and when we came back, all the journalists needed pictures from this little girl they'd never seen before."

From then on her career as a pop photographer took off. "I started to get bigger assignments," she said. "It was the time of the Dave Clark Five and Herman and the Hermits. It was the most exciting thing that had ever happened to me."

On one of her trips to London, she photographed the Beatles. "It was around the time I began to get big work," she said, "but as the assignments got bigger, strangely it got to be less fun."

Family, Nature

Since her marriage to Paul McCartney in 1969, her photographs have turned away from the music business and more to her family and to nature.

One of the more intimate pictures in the book is a shot of her husband cradling their daughter Mary when she was a baby. Both are nude. "I really love that picture," said the photographer. "The way we were living then was very nice. It was very earthy."

For Linda McCartney the book is a tentative step out on her own. "This book has cleaned up the past," she said. "Now I can get on to other things. I'd love to do a book of photographs on peasant life in China, or even a book on horses. And I'm really interested in preserving wildlife. *For me it's all part of the whole* tapestry—a bit of photography, a bit of music, the kids, and a bit of nature."

Paul and Linda McCartney

WAVERLEY ROOT

The Foie Gras Debates— How, With What to Serve?

INDULGING himself in the pleasant pastime of composing an imaginary menu for "a once-in-a-lifetime feast," Craig Claiborne wrote in "Classic French Cooking," of the Time-Life "Foods of the World" series: "I would begin with fresh foie gras and a Sauternes that was freezing cold. There are many traditionalists who would strongly disagree with my choice of wine... They insist that the wines should always go from light to heavy, and a Sauternes should therefore only be taken at the end of the meal. But fresh foie gras eaten with an icy Sauternes is something to exult over. And if the foie gras happens to be centered in a perfectly made, egg-rich brioche, it is something to pray over."

After *mulling over* alternative beginnings for the perfect meal, an agreeable form of reverie too, I find myself unable to suggest anything better, with the possible exception of Iranian caviar with sour cream, so I will go along with Mr. Claiborne, including his choice of wine. Foie gras, like several very fine foods, spawns passionate and sometimes snobbish, protagonists of various methods of having at it; no issue is more hotly contested than what drink suits it best. Port is often suggested as an accompaniment to foie gras, to which the French gourmets Henri Gault and Christian Millau add: "One may also choose a Meursault, a Chablis, a Riesling of very good origin, a dry Anjou... or, more modestly, a Mâcon Viré or even a Sancerre... Champagne, too acid, is in our opinion not to be recommended, exception made for a nonsparkling natural champagne or the red champagne of Bouzy" (nonsparkling too). After running down this list, I find myself *still* on the side of Mr. Claiborne and Sauternes.

Another matter of concern for admirers of foie gras is what to spread it on. It is habitual to serve it with toast. As foie gras is eaten cold, it would be absurd *to offer hot toast with it,* and cold toast is so dispiriting that our mentors have come up with the compromise of lukewarm toast. I see no need for toast at all, whatever its temperature. If there is anything which goes better with foie gras than good plain French bread, I have yet to find it.

A third dispute revolves around the proper position of foie gras in the meal. One French gastronomic writer, James de Coque, has opined that Alsatian foie gras should be served at the end of the meal (with lamb's lettuce and foie gras from the southwest at the beginning, which strikes me as a distinction so fine as to approach preciousness. Our grandparents served foie gras at the end of the meal with port or a heavy red wine, though it seems a little late to tackle so rich a food as foie gras after having already put down the main part of a presumably hearty meal. Today the common practice is to serve foie gras at the beginning, usually with a white wine. I met a third solution some time during the 1950s, when I was invited to lunch by George Bonnet, then senator from the Dordogne (Périgord), foie gras country par excellence.

Middle of Meal

He had foie gras served in the middle of the meal, with a salad. My wife, who is from the Dordogne too, remarked disapprovingly that in Périgord a host who serves foie gras as the third course is branded as parsimonious, for having held back the most expensive dish until the petites had been dulled. I do not recall that my appetite had been sufficiently dulled on this occasion to prevent me from doing honor to Mr. Bonnet's excellent foie gras.

Until very recently, the hard part of Mr. Claiborne's prescription to fill would have been to find fresh foie gras. Foie gras is one of the most perishable of foods; worse than fish; it will not even keep in a refrigerator. To get genuinely fresh foie gras not very many years ago, you almost had to be at the goose's death bed. The increased speed of modern transportation has now greatly extended the range within which it can be had, but even so it must be eaten within two or three days. All that cannot be consumed within that period has to be sterilized so that it will keep—which simply means cooking it. Unfortunately cooking blunts the fine edge of its taste. As a result, interest has lately been building up in France in foie gras which has been cooked only partially—*foie gras mi-cuit,* which is poached briefly, or so. This preserves much more of the flavor, but does not sterilize the product completely; it must still be eaten before it is two months old.

Like Wine

Thoroughly cooked foie gras is not at its best when it is youngest, as one might expect. Like wine, it improves in its container, whether earthenware or tin (glass, which has been abandoned, for it does not look particularly appetizing in a glass jar). Once canned, a foie gras should not be touched for three or four months; keep it in a cool place, but not in the refrigerator. It will reach optimum condition somewhere between one year and three, and then start to go off. If you find a misfiled can six or seven years old, better forget about it.

Foie gras is not a food which can support mediocrity. It has no middle class: if it is not comparable it is insignificant. If you can't find or can't afford it (as who can these days?) then forget about it. What can you eat in its place? Nothing. Better have it from one of the many famous French chefs, Michel Guérard:

"There is no substitute for foie gras."

(The first installment of Root's foie gras article appeared in the IHT on Dec. 14.)

INTERNATIONAL EXECUTIVE OPPORTUNITIES

INTERNATIONAL BANK REPRESENTATIVE

Privately held international bank in the Caribbean with assets over 100 million dollars and capital of 15 *million dollars seeks an experienced Int'l Banking* Representative for Europe to be based in London.

The responsibilities of this individual will be to expand the bank's correspondent banking relationships and reciprocal lines of credit, and to develop additional trade financing letters of credit business with appropriate U.K. and European companies.

All replies will be held confidential.

Box 31,781, IHT, 28 Gt. Queen Street, London W.C.2.

EUROPEAN DIRECTOR OF FINANCE
AND
MANAGER
INTERNATIONAL FINANCIAL PLANNING

An international computer company with exceptional growth and profitability is seeking two financial oriented, aggressive individuals for management positions.

- The European Director of Finance will be based in the Netherlands and should be multilingual. A knowledge of U.S. accounting principles, foreign exchange, *cash management and familiarity with European taxation* are prerequisites, together with a proven track record and two to five years experience in these areas. An accounting degree is a minimum educational requirement.
- The Manager—International Financial Planning will be based in Orange County, California, *and will serve as an assistant to the Chief Financial* Officer. A knowledge of foreign exchange exposure management and international banking, as well as analytical financial experience are minimum requirements. Degree(s) in accounting and/or economics are also required. Minimum experience of two years in related position.

Salaries are commensurate with experience and qualifications. Excellent fringe benefits and advancement opportunities.
Qualified candidates should submit resumés, together with salary history and references, to:

Box D. 5,604, Herald Tribune, Paris
An Equal Opportunity Employer.

MANAGING DIRECTOR
NIGERIA
$50,000-$60,000

One of the world's leading contracting groups has an opening for a well *experienced, bilingual French and English, career oriented professional* to head up its company in Nigeria.

The appointed candidate will be an entrepreneur with a proven record *of success in high level contract negotiations for a large contractor* or construction engineering firm in Africa and/or the Middle East. He will be based in Lagos and will report directly to the Group Vice-President in charge of African Operations. Salary will be in accordance with qualifications in the range of $50,000 to $60,000. Generous expatriate allowances are also provided.

Please write in all confidence describing present responsibilities and career to:

FASHION: *Keeping Knitwear Original*

By Hebe Dorsey

PARIS (IHT).—Knitwear has become such an important part of fashion that almost every designer now has a knit collection.

But with popularity has come banality: The designers tend to lose their original spirit and with it, a basic, cottage-industry look.

However, young enthusiastic unknowns keep popping up. The most interesting in town is Guy Gerondeau, whose family had a well-known fabric house that dealt for decades with Paris couture. Unfortunately, Mr. Gerondeau had to close the house down a few years ago but his fascination with wool was such that he has opened a knitwear shop at 15 Rue de Babylone.

He leaves the designing to a woman friend, Andrée Lacqua, and concentrates on new colors and thread mixtures.

Seven Threads

"Look at that tweed-like texture," he said, "I got it by mixing seven different threads. My main concern is that, after it's knitted, it should look like a piece of fabric, with the colors well blended instead of repeating themselves in regular patterns."

"A sweater is a sweater is a sweater," he added, "the only way to make it different is by working with different wools."

Mr. Gerondeau's basic shapes are simple (and his sweaters can often be his or hers) but the depth in color and texture make them opulent. A supplier of Lord and Taylor and the Dior boutique, he delivers clothes that have that nice artisan feeling without looking as if they had been made by *loving hands at home.* Most of his knits are done by hand or on old knitting machines but are always hand-finished.

His prices seem reasonable in view of his costs—"My raw material is so expensive." Bonnets are 80 francs, scarves 130 francs, pullovers from 260 to 420 francs.

His best seller is a bulky, multi-striped mohair sweater but he also has a charming, skinny cardigan of bouclé wool, edged with a stripe in a different color (380 francs). The other attraction of that place is that Mr. Gerondeau will also take custom orders at roughly the same prices.

* * *

Julie Moor has been around *longer. In her boutique, Lupin,* at 17 Rue Chaumel, Miss Moor has established a solid reputation. Before that, she worked two years for another knitwear wizard, Dorothée bis.

Her clothes are slimmer and more citified than Mr. Gerondeau's, but the research is more in the shapes. She uses fine, shiny rayon for slip dresses with spaghetti shoulder straps and ruffled, bedjacket-like cover-ups. Or she tops a thin, skinny dress with a fluffy, hand-knit mohair jacket. She is also very comfortable with ruffles and floating panels, which add a delicate, feminine look.

While her prices run higher than Mr. Gerondeau's, they are still good value (290 francs for a skirt, 450 for a jacket).

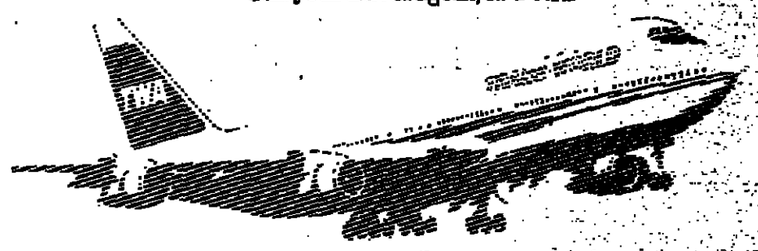
* * *

Janie Hos has just opened a mini-boutique at 7 Rue du Pas de la Mule, where she sells wools by weight (from 60 to 250 francs the kilo, according to quality).

A former painter on silk, Miss Hos keeps "experimenting all the time," she said, knitting away in a corner of her minuscule shop. Her choice is very wide, from bouclé, to angora to mohair mixture.

Unlike the other two designers, Miss Hos will gladly sell her wools but would rather give directions than make the garments herself.

American Based Manufacturer Seeks



GENERAL MANAGER

This position is responsible for Marketing, Sales, Administration and Manufacturing Management for our Manufacturing Operation in Belgium, East Flanders.
Our products are marketed through both direct OEM sales and industrial distributors. We are a growing successful company. The right candidate can achieve his growth ambitions while helping *us to achieve ours.*
The Manager we seek will have a strong marketing background, proven ability to coordinate Sales, Administrative and Manufacturing functions plus ability to forecast and meet profit objectives. Should be fluent in English, Dutch and French. German an added advantage.
Salary commensurate with experience. Many fringe benefits.
Please submit resumé with complete compensation history in confidence to:

Box D-5,544, Herald Tribune, Paris.

Italy Loan Canceled, Said Now Less Urgent

ME, Dec. 15 (AP-DJ).—Italy continue to seek a $500-on loan sponsored by the mon Market, but obtaining credit is not as urgent as been believed, the Treasury ry said today.

e loan had been considered lly to replace a similar that Italy had to repay to in at the beginning of mber, after Britain with-from an earlier EEC credit taly.

Treasury Ministry statement said: "The Italian govern-t, while maintaining its re-t for financial support from the community, has informed it that the conclusion of the planned operation is not of a greatly urgent character."

Approval of the loan had been expected next Monday, at an EEC ministerial meeting. However, the meeting has been cancelled.

EEC officials in Brussels, who confirmed that that loan application seemed less urgent, added that the ministers had hoped to approve an Italian medium-term economic plan. This has not yet cleared the European Parliament, however, so ministerial consideration must be delayed.

A spokesman for the EEC Commission announced that the EEC monetary committee meeting that was scheduled to discuss the conditions for the Italian loan during a morning session next Monday had been cancelled.

The committee is to hold its next meeting in January, with an exact date to be set later.

Officials said cancellation of the committee meeting was the obvious result of the cancellation of the ministerial meeting, since the monetary committee usually prepares decisions for the ministers.

In London, the banks that were syndicating the $500-million, five-year loan indicated that there would have been no problems raising the funds on behalf of Italy.

A statement issued by Orion Bank and the other four managers said the loan would have been oversubscribed at the proposed interest charge of 0.875 point above the London interbank offered rates.

The comanagers for the aborted loan were European Banking Co., Banque de la Société Financière Européenne, Europartners Bank (Nederland) NV, and Morgan Guaranty Trust Co.

"It is understood that the transaction may be revived in the new year on the basis of market conditions then prevailing," the statement said.

EC Planning uotas for eel Firms

RUSSELS, Dec. 15 (AP-DJ).—e Common Market Commis-announced today it will put ong-discussed anti-crisis plan the EEC steel industry into ct from Jan. 1, 1977.

nder the plan, the Commis-is inviting EEC steel compa-and groups of companies to ntarily accept restraints on distribution of rolled steel ucts to customers within the munity.

binding steel makers this the Commission hopes to id competitive outbidding on steel market at times of very demand.

Dec. 20, the Commission decide on the distribution as it will suggest to individ-companies and groups for first 1977 quarter. These fig-s will be kept strictly confi-tial. EEC officials explained it will be up to the compa-s and groups to accept the tas.

ndustry officials said it will until early January for all makers to reply to the Com-sion's quota suggestions.

Only Within EEC

ommission and industry ex-ts stressed that the distribu-quotas would only apply to veries to the EEC market and steel companies are free to rt to third countries as much as they can sell.

der the plan, the Commis-could also set minimum s for steel products, but such ve would apply only in a sit-n of a so-called manifest . Such a move is not plan-now.

e Commission is also entitled btain information from steel rs on their capital spending der to avoid creation of over-city.

fore making its final deci-the Commission conducted ther round of consultation industry, labor and govern-ts in the EEC. Officials said response was generally favor-to the Commission's plan.

dustry sources said it is gen-y assumed now that the rity of steel makers will ac-the Commission's distribu-quotas, which will apply only e first three months of 1977 are renewable for subsequent -month periods.

dustrial Output France Said nerally Steady

RIS, Dec. 15 (AP-DJ).—The of France estimates that trial output in France in mber was "generally steady" pared with the previous h and that it should remain esent levels on a short-term

central bank states in its vely optimistic monthly ap-al of the economy that it the attitude of French of industry to be more of ve, rather than genuine ," adding that they seem to ore pessimistic about the l outlook than over their ations.

nch industry chiefs have trying to adapt production ced demand, it notes, even this means extending deliv-ates. Deliveries have in cases exceeded production, stocks of goods ready for ry have declined.

Bank of France remarked during November the stiff-of international competition ot eased, and that the com-vity of many products, no-from West Germany, Brit-nd Italy, had seriously af-all markets. Foreign de-was disappointing, it said, y encouraging French ex-efforts.

Large French Bank Probed on Money Outflow

By Peter T. Kilborn

PARIS, Dec. 15 (NYT).—One recent morning at dawn, French customs inspectors descended unannounced on the homes of three middle-level executives of Crédit Lyonnais, France's second biggest bank, which, like the country's other big commercial banks, belongs to the state.

The inspectors then accompanied the two men and a woman to their offices. There they searched their desks and files, along with those of a fourth higher-ranking executive. The inspectors were looking for evidence that the bank itself, or some of its employees, or some of its clients were slipping money illegally out of France into anonymous numbered accounts in Switzerland.

It is illegal in most cases for Frenchmen to open bank accounts abroad, but it is widely known in Europe that hundreds of thousands of Frenchmen have such accounts and that such activity is growing.

Many Frenchmen keep such accounts merely to protect themselves against wars and revolutions; many keep them as well to evade taxes. Lately, more have been putting money into Switzerland because of fears of election of a leftist government in early 1978, worry over rising inflation, and because the price of gold, the Frenchman's traditional protective investment, has risen to a level that has made it less attractive.

That Crédit Lyonnais is even suspected of aiding the flight of francs, however remotely, suggests that "black money" is no longer the exclusive preserve of wealthy businessmen and the country's old landed rich.

It suggests that the middle-class Frenchman is worrying about his nest egg, the funds that he normally locks up in small, tax-free savings accounts and in government bonds.

Further, news that Crédit Lyonnais could somehow be connected with tax evasion through deposits in Swiss accounts—which French Communists have frequently attacked—could be politically difficult for President Valéry Giscard d'Estaing. His own government is investigating its own bank.

The man who runs the bank, Claude-Pierre Brossolette, is also close to the President. Until he was put in charge of the bank last summer, Mr. Brossolette was Mr. Giscard d'Estaing's top administrative officer at the Elysée Palace and his right-hand man. It is extremely unlikely, however, that Mr. Brossolette could have been involved in any way with the possible transactions that interest the customs inspectors.

In an interview, Mr. Brossolette confirmed that the visit had been made. He said he doubted that the inspectors found anything that would incriminate the bank, and he doubted that anything had been found that would incriminate bank employees. Another officer of the bank held open the possibility, however, that the inspectors may have found evidence of wrongdoing by some of the bank's clients.

One company executive, who like others declines to be named when taking about money, said if he wanted an account in Switzerland, he could have one easily. He would go to a "contact." All French businessmen have contacts, he said, or know someone who does.

He said he would visit the contact, give the man an envelope full of money, and the man would take it to Switzerland and return with an account number, nothing more.

A Swiss bank would then invest the money for the Frenchman, much of it in Eurobonds.

There are many other ways that Frenchmen get their money out of France. One of the easiest, when dealing in relatively small sums, is to make an arrangement with a visitor from abroad, particularly the United States or Switzerland, countries where many Frenchmen have relatives.

The Frenchman merely lends the visitor the money he spends during his stay in France. Then, when the visitor returns to his own country, he opens an account there for the Frenchman and deposits an equivalent amount in dollars or Swiss francs.

To Give Investors More Financial Information

U.S. Firms Told to Report Data by Industry Sectors

By Robert J. Cole

NEW YORK, Dec. 15 (NYT).—The Financial Accounting Standards Board, moving to give investors more financial information, directed businessmen yesterday to provide a sales and profit breakdown for "each significant industry segment of their operations."

It also ordered similar disclosure, by broad geographic area rather than by country, on operations outside the United States.

The board made the breakdown mandatory for both annual financial statements and for interim statements of the type filed with the Securities and Exchange Commission. Its directive will go into effect for the fiscal year starting tomorrow.

The board's instructions—regarded as official and enforced by the SEC—were contained in the board's statement Number 14, which is being mailed to businessmen. Last fall a proposed exposure draft had been circulated.

To Increase Costs

The new rules were described as no surprise although they are expected to increase auditing expenses of many companies. Accountants said that they had never audited such data and might have to develop new procedures.

Many companies already provide similar information to stockholders and the SEC but the Standards Board contended that the nature and extent of the data disclosed, together with the presentation of the information, varied widely. Moreover, the board said, only a portion of the information was included within the financial statements.

Two years ago businessmen raised a furor when the Federal Trade Commission attempted to get major industrial companies to disclose considerably more detailed information on their product lines, together with the contribution to sales and profits and other data. The FTC proposal is still involved in litigation.

Asked why businessman were unruffled by the Standards Board directive and vigorously opposed to the FTC proposal, one industry source said the FTC concept was "much more detailed." He added that, where the Standards Board might accept, say, dairy products as one industry segment, the FTC might want to know how much is Swiss cheese and how much is American cheese.

The Standards Board said an industry segment would be regarded as significant—and as such reportable—if its sales, operating profits or assets stood at 10 per cent or more of the total. All segments reported, it added, must account for at least 75 per cent of total sales. It suggested segments as a maximum limit, with some exceptions, and proposed that to keep the limit to 10 segments, some segments be combined into broader ones.

It also directed that, if a company derived 10 per cent or more of its sales revenue from a single customer, that this fact and the amount of revenue from each such customer be disclosed. Companies that sell largely to General Motors Corp., Sears, Roebuck & Co. or the federal government, for example, already provide such information.

Demand for Credit in U.S. Expected to Rise 12 Per Cent

NEW YORK, Dec. 15 (NYT).—The total demand for credit in the United States—corporate and government borrowing, mortgages, consumer loans—is expected to climb 12 per cent to a record $243 billion as the economy expands faster than is now generally expected, according to the annual Salomon Brothers credit market study released yesterday.

The study, the first of several detailed projections by the investment industry on sources and uses of funds for 1977, envisions a rather comfortable year ahead. Interest rates should rise, but not to levels that would "jeopardize the American economic expansion," said Henry Kaufman, a Salomon partner in charge of producing the study.

The current decline in interest rates, Mr. Kaufman continued, "will end at the latest early in 1977." The rise in rates after that will be "moderate," he added, mentioning a range for three-month Treasury bills of 5 3/4 to 6 1/4 per cent by yearend (compared with 4.35 per cent now) and a range for triple-A-rated utilities of 8 1/2 per cent or so (compared with 7.85 now).

Short-Term Rise Seen

Short-term rates will rise sooner and faster than long-term rates, the study predicted.

The 37-page study made these key projections:

• Corporations will be "reasonably prudent" in 1977 but nevertheless will have to finance an increasing volume of operating expenditures and investments. Business needs for money will increase from $175.8 billion in 1976 to $196 billion in 1977. Of the total, $140 billion will come from retained profits and $56 billion from the marketplace.

• Corporations, which have been heavy issuers of long-term bonds in the last two years to refund short-term debt, are expected to increase their use of the money market next year. Business loans and commercial paper financing will increase by $21 billion, a much larger rise than the $4.5 billion of 1976 and the $15.8 billion runoff of 1975.

• Net new issues of corporate bonds, it is anticipated, will decline to $34.1 billion in 1977 from $27.6 billion in 1976.

• Bonds of foreign governments and corporations sold in the United States are expected to increase by a record in 1977, somewhat more than the $9.3-billion rise this year.

The Treasury is expected to be "somewhat less passive" in affecting economic activity in 1977, and so the government is expected to borrow more in the first half of the year than it typically does. The Treasury's net financing in the private sector in the 1977 calendar year is projected at $49.5 billion, down from $62 billion this year. The issuance of Treasury bills may account for 30 to 40 per cent of new marketable debt sold in 1977 compared with 11.1 per cent in 1976.

Federal agency financing in 1977 will likely increase by $18.5 billion. This year, it expanded by $13.1 billion.

NYC Has Plan For Repayment Of Blocked Debt

NEW YORK, Dec. 15 (Reuters).—New York City and Municipal Assistance Corp. officials today presented a proposal for settlement of the $983 million of publicly-held moratorium notes which includes a plan to pay off the notes in three stages by Nov. 19, 1977.

Speaking at a news conference, Mayor Abraham Beame said that based on the plan, the city would make a payment equal to 20 per cent of the outstanding notes by Jan. 31, 1977, an additional 30 per cent by June 30 and the balance by Nov. 19, 1977, which is one year from the date of the court of appeals decision declaring the moratorium unconstitutional.

The plan to raise the money needed to meet these payments relies on a number of fund-raising techniques.

The city hopes to raise a total of $306 million through a "stretch-out" of maturities of presently outstanding MAC bonds. Another $250 million to $300 million would be borrowed from institutional investors who had recently agreed to purchase MAC securities in a sale that was ultimately channeled directly to public investors.

A further aspect of the plan calls for a public offering of $250 million to $300 million of MAC bonds.

Another $250 million is expected to be available from within the city's cash flow primarily through sale of Mitchell Lama mortgage notes for which the city is now negotiating federal guarantees.

The proposal notes the plan is contingent upon marketability of city or MAC securities with public and institutional investors, among others.

Tight Oil Supply In 1980s Seen By Japan Panel

TOKYO, Dec. 15 (Reuters).—The Japan Economic Research Council said yesterday that world crude oil supplies will become tight in the 1980s due to uncertainties in oil-producing countries and a downtrend in their oil production.

It also forecast that the price of crude oil will rise at about 80 per cent of the rate of inflation during the latter half of the 1970s.

The rise will be the same as inflation in the early 1980s and exceed it in the latter half of the decade, when world oil production is expected to decline and demand increase because development of alternative energies will be slow, the report said.

The council proposed that Japan step up its stockpiling of oil and oil products and that the Japanese government should bear the cost.

Japan should also expedite development of alternative energies and remodel its industrial structure to save energy.

The council said Japan should give active support to the "common fund" for building up international buffer stocks of primary products and help non-oil-producing countries develop their resources.

Output Revised

Meanwhile, the government reported that Japan's October industrial production index, base 1970, was revised upward to an adjusted 125.7 from the originally reported 125.4.

The Ministry of International Trade and Industry said the revised index stands 0.2 per cent above September and 11.9 per cent higher than in October 1975.

The ministry said the October shipment index was revised downward to 126.9 from the preliminary 127.2. The shipment index is down 1.5 per cent from September and 8.2 per cent above October 1975.

The inventory index for October was revised upward to 160.4 from the preliminary 160.2, and stands 1.1 per cent above September and down 1 per cent compared with October last year.

Merger Talks Ended

NEW YORK, Dec. 15 (Reuters).—Blyth Eastman Dillon and Kuhn Loeb have terminated preliminary discussions on a possible merger, but gave no reasons for the decision.

Toyota and Nissan Report Output Records

TOKYO, Dec. 15 (Reuters).—Exports by Toyota and Nissan, Japan's two biggest vehicle manufacturers, set a new record last month and both companies said they expected record production and exports for the whole year.

Toyota produced 215,654 vehicles last month, of which 110,229 were exported. Nissan produced 213,360, of which 93,857 were exported.

Toyota estimated its output and exports for 1976 would total about 2,480,000 and 1,170,000 vehicles respectively, while Nissan predicted 1976 output at 2,300,000 vehicles, of which 1,130,000 would be exported.

Swiss Trade Surplus

BERN, Dec. 15 (AP-DJ).—Switzerland's trade surplus in November narrowed to 241.2 million Swiss francs from 300 million in October, figures released by the customs office show.

'Leading' Index in U.S. Revised to Show a Gain

WASHINGTON, Dec. 15 (Reuters).—The Commerce Department said today that revisions now show that the index of leading indicators rose by 0.2 per cent in October. Earlier this month, the index was reported unchanged after two months of steep declines.

The index has also been revised for August and September to show declines of 0.4 per cent and 0.6 per cent, respectively, rather than the originally reported falls of 0.8 and 0.9 per cent for the two months.

The index of leading indicators has been used as a rough guide to the future course of the economy, and three consecutive movements have been used as "a rule of thumb" in determining the likely level of economic activity.

The two steep declines in August and September and the unchanged performance in October, as originally reported, caused some apprehension among economists that the economy was heading for further slippage in the early months of 1977.

Upturn Possible

However, the revisions would tend to indicate that the slowdown of economic activity which became evident in late spring has now bottomed, and that slight advances may be made in coming months, some economists said.

The Commerce Department said the revamping of the index is one of a regular series of overhauls which are undertaken every 12 to 18 months, with the composite indexes being recomputed back through 1948.

Innovations introduced, according to the Commerce Department, enhance the comparability among the composite indexes of leading, coincident and lagging indicators.

The major innovation was to superimpose on these three indexes an estimated long-run trend in economic activity, which helps to make the indexes more useful as indicators of current and future levels of economic activity.

Other Indexes

As well as the index of leading indicators, the Commerce Department will now release on a regular basis the coincident and lagging indicator indexes as well.

The Commerce Department said with the revisions now incorporated, the index of leading indicators now stands at 126.1 of its 1967 base, compared with the originally reported 107.1 for October.

The index of the four coincident indicators fell by 0.2 per cent in October, following a decline of 0.2 per cent in September, to stand at 122.1 per cent of its 1967 base.

The index of the six lagging indicators fell 0.1 per cent in October to 131.1 per cent of its 1967 base after a gain of 0.7 per cent in September.

U.S. Steel Firms' Price Rise Said To Be Resisted

WASHINGTON, Dec. 15 (AP).—U.S. steel companies are having problems putting into effect their recently announced steel price increases, according to the chief of the government's wage-price monitoring agency.

William Lilley 3d, acting director of the Council on Wage and Price Stability, said the average 6-per-cent price increase "so far is having a difficult time in sticking."

He said he feels the council's report on the increases was a factor, commenting "I think we strengthened the hands of the automobile companies and steel distributors" in resisting the measure.

Mr. Lilley made his comments at a hearing of the Senate Banking Committee. Chairman William Proxmire, D-Wis., the only senator present, questioned whether the council had provided steel buyers with any information they did not already have.

The report did not say whether the increase was justified but noted it had taken place despite declining demand for steel products and suggested it was an attempt to "jump the gun" against possible future wage-price controls.

Venezuela Seeks Loan

LONDON, Dec. 15 (AP-DJ).—Venezuela will float a $100-million, seven-year note issue in the international bond market early in January, reliable underwriting sources report.

Stocks Gain After Rally Attempts Stall

NEW YORK, Dec. 15 (IHT).—Stocks settled for a small gain after two rally attempts were stalled by profit-taking on the New York Stock Exchange today.

Analysts said prices were helped by hopes that any increase in oil prices would be modest and by Federal Reserve activity that tended to inhibit interest rate rises.

An afternoon rally attempt appeared to coincide with a report by American Telephone & Telegraph's higher three months earnings report.

Investors were also encouraged, analysts said, by a Commerce Department report that it revised its leading economic indicators index for October to show a rise from September.

The Dow Jones industrial average was up 3.16 at 983.79. It was up 2.17 at 3 o'clock. Some 28.3 million shares changed hands, compared with 25.13 million yesterday. Gainers outnumbered decliners by about 906 to about 625.

American Telephone, among the actives, was unchanged at 64 3/8. In addition to reporting higher net, it said it planned $11.4 billion in capital outlays next year.

General Electric lost 7/8 to 52 7/8 and Utah International rose 1/8 to 68 1/4. Shareholders of both companies approved their merger.

Olin Corp., which said it raised the price of chlorine $10 a ton, eased 1/8 to 38 1/2, but Du Pont rose 1/2 to 134, Union Carbide 1/2 to 61 1/4, Dow Chemical 3/8 to 40 5/8 and Allied Chemical 5/8 to 37 1/2.

Anaconda picked up 1/4 to 30 1/4, Phelps Dodge 1 1/4 to 36, Copper Range 1/4 to 19 1/4 and Amax 5/8 to 56 1/4. Anaconda revised some prices for copper products.

Among the actives, Occidental Petroleum gained 3/4 to 22 5/8, while Texas Oil & Gas, which forecast higher fiscal first quarter and full year net, eased 3/8 to 27.

Also active, British Petroleum slipped 1/8 to 12 1/8. A British official said the Bank of England should sell enough of its BP stake to leave government and bank holdings at 51 per cent.

(Continued on next page.)

Not too many people know our name. DG BANK. But we are one of the biggest in West Germany. We're the central bank of a group with more than 19,500 offices. So we cover the Federal Republic like no other banking system.

Those thousands of offices with their millions of depositors put thousands of millions of marks at our disposal. We also raise long-term funds by issuing our own bearer bonds.

As a world-wide commercial bank, we have borrowers in eighty countries. In addition, we offer a wide range of investment banking services, including syndication and Eurobond trading. With international subsidiaries, affiliated banks and representative offices we're a growing force in the world's important financial centers.

There's hardly any project we can't handle. So get in touch with us if you've got agribusiness to do.

DG BANK Deutsche Genossenschaftsbank, Taunustor 3, Postfach 2628, D-6000 Frankfurt (Main) 1, West Germany.

DG BANK

Vereins- und Westbank Aktiengesellschaft
M. M. Warburg-Brinckmann, Wirtz & Co.
Westfalenbank Aktiengesellschaft

Commercial Paper is a flexible and economic source of short-term dollars.

Let the facts speak for themselves:

"Most of America's largest U.S. corporations issue Commercial Paper, as it is often the least costly way to raise short-term dollars.

The Commercial Paper market has grown from $5 billion outstanding in 1962 to over $50 billion today.

As a non-bank source of borrowing, Commercial Paper broadens access to the dollar money markets.

In addition, it is an ideal introduction to American institutional investors.

Goldman Sachs is the world's largest and oldest Commercial Paper dealer. We act exclusively for more European and Far Eastern companies in handling their U.S. Commercial Paper needs than any other firm."

Facts about ourselves:

"We were established in 1869 and provide investors, corporations and governments around the world with a full range of investment banking services.

Institutional Investor's survey ranks Goldman Sachs as investment banker to more major U.S. corporations than any other firm.

Last year major institutions voted us top U.S. broker and best for overall service in the Financial World poll."

EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIVIA
SYSTEMS INTERCONNECTION PROJECT
PUBLIC INVITATION FOR BIDS

Empresa Nacional de Electricidad (ENDE) is executing the systems interconnection project which consists of the construction and upgrading of the following transmission lines and substations.

1. Cochabamba-Vinto (Oruro) line. 115 kV. 153 kms.
2. Construction or upgrading the substations of Aracagua (Sacaba), Cochabamba (Valle Hermoso), Oruro and Santa Isabel, where transformer, circuit breaker and capacitor equipment will be installed.

Proposals for the aforementioned project are solicited for the design, fabrication, testing, guarantees and supply Cif-Antofagasta, Chile, of the following materials:

Specification 48P-E-1954.
Insulators, hardware and accessories for ACSR conductor and guard cable, steel cable and ground connection material.
Specification 48P-E-1956:
Equipment for substations
Specification 48P-E-1958:
Relays and control panels.

The acquisition of the material described above will be financed by the proceeds of a loan from the International Bank for Reconstruction and Development (BIRF), and this bid is subject to eligibility requirements of the BIRF in conformance with the respective financial contract.

Bidders established in member countries of the International Monetary Fund and Switzerland can participate in this bid.

Bid documents 48P-E-1954, 48P-E-1956 and 48P-E-1958 may be obtained from Empresa Nacional de Electricidad S.A., Avenida de Las Heroínas No. 4574, Casilla No. 565, Cochabamba, Bolivia, upon payment of 1,500 Bolivian Pesos each.

Interested parties who obtain bid documents may make consultations, solicit whatever additional information or inspect any drawing not included with the bid documents at the Ende offices in Cochabamba.

The due dates for the presentation of proposals are:
Specification 48P-E-1954. February 10, 1977, 5:00 p.m. in the offices of Ende in Cochabamba.
Specification 48P-E-1956: February 15, 1977, 5:00 p.m. in the offices of Ende in Cochabamba.
Specification 48P-E-1958: February 3, 1977, 5:00 p.m. in the offices of Ende in Cochabamba.

Purchase orders will be awarded to the offers which are evaluated most advantageous to the interests of Ende.

Ende reserves the right to reject any of the received proposals.

EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIVIA
SYSTEMS INTERCONNECTION PROJECT
PUBLIC INVITATION FOR BIDS

Empresa Nacional de Electricidad (ENDE) is executing the systems interconnection project which consists of the construction and upgrading of the following transmission lines and substations:

1. Vinto (Oruro) - Catavi line, 115 kV. 73 kms.
2. Catavi-Potosí line, 115 kV. 180 kms.
3. Potosí-Punutuma line. 69/115 kV. 72 kms.
4. Construction or upgrading of the Catavi, Potosí, Punutuma, Tasna, Telamayu, Sucre and Corani substations, where transformer, circuit breaker and capacitor equipment shall be installed. Proposals for the aforementioned project are solicited for the design, fabrication, testing, guarantees and supply Cif-Antofagasta, Chile, of the following materials:

Specification 48P-E-1953:
Insulators, hardware and accessories for ACSR conductor and guard cable, steel cable and ground connection material.
Specification 48P-E-1955:
Equipment for substations.
Specification 48P-E-1957:
Relays and control panels.

The acquisition of the material described above will be financed by the proceeds of a loan from the Inter-American Development Bank (BID), and for that reason this bid is subject to the eligibility requirements of the BID's policies, in conformation with the respective financial contract.

Manufacturers of all regional countries, who were members of the BID before July 8, 1976, may participate in this bid.

Bid documents 48P-E-1953, 48P-E-1955 and 48P-E-1957 may be obtained from Empresa Nacional de Electricidad S.A., Avenida de Las Heroínas No. 4574, Casilla No. 565, Cochabamba, Bolivia, upon payment of 1,500 Bolivian Pesos each.

Interested parties who obtain bid documents may make consultations, solicit whatever additional information or inspect any drawing or design that is not included with the bid documents at the Ende offices in Cochabamba.

The due dates for the presentation of proposals are:
Specification 48P-E-1953: February 10, 1977, 5:00 p.m. in the offices of Ende in Cochabamba.
Specification 48P-E-1955: February 15, 1977, 5:00 p.m. in the offices of Ende in Cochabamba
Specification 48P-E-1957: February 3, 1977, 5:00 p.m. in the offices of Ende in Cochabamba

Purchase orders will be awarded to the offers which are evaluated most advantageous to the interests of Ende.

Ende reserves the right to reject any of the received proposals.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

These Notes were offered and sold outside the United States of America. This advertisement appears as a matter of record only.

HERE TO STAY

American Families in the Twentieth Century

By Mary Jo Bane. Basic. Illustrated with tables. 195 pp. $11.50.

Reviewed by Christopher Lehmann-Haupt

OCCASIONALLY we worry about who will look after the children—or if there will even be any children—in that inevitable future when the institution of the American family is finally interred. But that's all that remains to be settled, what with the increasing impermanence of things, what with declining births and rising divorces, what with the further recession into the past of the dear old days when grandma and uncle and cousin all lived happily together under one roof, what, in short, with the death of the family. Only details remain to be mopped up.

Right? No, wrong, at least according to Mary Jo Bane, associate director of the Center for Research on Women and assistant professor of education at Wellesley College. According to Prof. Bane, the declining birth rate reflects the decreasing size of individual families, not an absolute decision by the population to give up having children. Although divorce rates have risen dramatically, most people remarry after divorcing, those who do not, tend to keep their children with them more than people used to, and, given the increase of life expectancy, families today are less often "disrupted" by the loss of a parent than they were a century ago.

What's more, Prof. Bane argues, "recent historical studies show the myth of the extended family household to be just that—a myth. The nuclear family, consisting of parents living with their own children and no other adults, has been the predominant family form in America since the earliest period on which historians have data." In sum, "The facts—as opposed to the myths—about marriage, child rearing, and family ties in the United States today provide convincing evidence that family commitments are likely to persist in our society. Family ties, it seems clear, are not archaic remnants of a disappearing traditionalism, but persisting manifestations of human needs for stability, continuity, and nonconditional affection." The American family, as the title of her book declares, is "Here to Stay."

Now all this may be reassuring to those of us who happen to enjoy family life and appalling to those who see the family as an obstacle to progress in equality of the sexes and its attendant benefits. But Prof. Bane didn't write "Here to Stay" to appall or reassure. She recognizes that Americans are now committed to certain public values that appear to be at odds with the family's privacy—the most important of these public values being sexual equality, to which she herself is clearly a committed devotee, as well as "equality of opportunity for children," by which she means the right of minors to be protected by adults and the right of children to economic sufficiency. (She is not splitting hairs here; she simply has several practical points in mind.)

If the persistence of the family is not taken into account, she goes on to argue, the way Americans act on their commitment to these public values could prove destructive. Thus, her main purpose in writing "Here to Stay" is not so much to prove that the family is alive and well, but instead to propose ways of implementing these public values in such a way as to acknowledge the family's continued viability. As she concludes, following a detailed examination of such issues as mandatory day care for all (which she opposes), the Equal Rights Amendment (which she favors), and Aid to Families with Dependent Children (which she believes should be handled in the same way as unemployment compensation and Social Security)

"The tensions between family privacy and other values are to some extent resolvable by a policy like one that emphasizes the rights of individuals and lets family roles be worked out privately. For example, the most workable approach to sexual equality is probably to enforce the political and economic rights of women, and to rely on families to work through the power shifts and changing division of labor that political and economic equality imply. The protection of children, a more complicated task because of children's long-term dependency, may be partially dealt with by emphasizing the individual rights of children and designing mechanisms for articulating them.

"Yet another kind of tension between family privacy and equal opportunities for children, may also be resolvable within an individualistic framework. Lifetime insurance, which would make individuals responsible not only for their old age but also for their own childhood care—a mechanism for equalizing opportunity with minimal intrusion in family privacy. An insurance scheme to provide benefits to single-parent families would also try to reconcile access to children and noninterference in adult lives by emphasizing the notion of marital disruption as an insurable risk."

As you can see, Prof. Bane is a sober writer who throws words and ideas around as if she were building Stonehenge. But she brings to her study the authority she earned as one of the principal co-authors, along with Christopher Jencks, of the landmark study "Inequality: A Reassessment of the Effect of Family and Schooling in America." And "Here to Stay" packs a powerful punch because its author has stuck to quantitative data, which while they "allow for little psychological interpretation of the sort that has recently become fashionable," nevertheless "have the advantage of being reasonably straightforward and trustworthy." One hopes that it will be read widely and taken with the utmost seriousness.

Christopher Lehmann-Haupt is a book reviewer for The New York Times.

ON THE ARTS AGENDA

A series of concerts and public rehearsals being given at the Théâtre National Populaire in Villeurbanne (Lyons) under Pierre Boulez and associates of IRCAM organization includes a concert of 20th-century classics by Varèse, Ives, Stravinsky, Webern and Schoenberg—with Boulez conducting the newly formed Ensemble Inter-Contemporain on Dec. 16; a televised workshop session under Boulez on Dec. 17 dealing with Webern's Concerto for 9 instruments and Boulez's "Eclat," and a program of works by Xenakis, Risset, Berio and Stockhausen, with the ensemble conducted by Jacques Mercier[illegible]

* * *

José Van Dam and Nicolai Ghiaurov will alternate in the title role of a new production of Mozart's "Don Giovanni" which will have its first performance on Dec. 17 at the Théâtre de la Monnaie in Brussels. Gabriel Bacquier will sing Leporello, Horiana Branisteanu and Rosalind Elias will alternate as Donna Anna, and Evelyn Brunner and Ghislaine Delcourte as Donna Elvira. François Huybrechts will conduct, and the work will be staged by Jean-Marc Landier with sets and costumes by Thierry Bosquet. Other performances are scheduled for Dec. 18, 19, 21, 23, 28, 29 and 31.

BRIDGE — By Alan Truscott

North was able to judge the slam prospects very accurately on the diagram because he and his partner were using the Precision System.

In response to his partner's questions, South indicated a five-card spade suit with one of the top three honors, first-round control of diamonds and third-round control of hearts. Finally, when his partner asked again about hearts, he elected to show possession of the queen rather than a doubleton.

North now knew that everything would hinge on the position of the heart king. On sheer technical consideration, a final contract of six spades was indicated.

As East had not doubled four hearts or five hearts he probably did not have the heart king. Heartened by this reflection, North pressed on to seven spades and was proved right.

A diamond was led and South had no particular problem in the play. He won with the diamond ace, drew trumps, and led a heart three, allowing for the possibility that West might have a singleton king. Dummy's [illegible] was finessed successfully, and the hearts were established with a third-round ruff. North-South had now clinched their grand slam.

Takes Downhill, Leads Cup

roell Returns to Winning Ways on Skis

TINA D'AMPEZZO, Italy, 15 (Reuters).—Annemarie l-Moser, not quite in the she wants to be in, still d a devastating victory to- n the first women's downhill e season and returned to a ar position—atop the World tandings.

could explode with joy. I happy as I was six years hen I first won the World the Austrian, now 22, said. -Moser, coming back from retirement and a stomach , skied a perfect race to the powerful interna- field by almost two sec- Czechoslovak-born Elena now skiing for Iran, was up, 1.63 seconds behind, st year's top downhiller, Brigitte Totschnig Habersatter of Austria, third, 1.90 seconds slower than Annemarie as six Austrians finished in the top 12.

The time gap astonished everyone here, including Proell-Moser. "I cannot understand what happened," she said. "I went very well on the technical part of the course, and got a very nice line. But it was a difficult race for me because I was completely exhausted and could feel my legs hardening up.

"I am concerned with my condition, and I feel I'll be peaking around January, but after today I have received an enormous morale boost.

"I felt now is the time to show if you have the will to win. I was not too sure if I would get to the (finish) line at all, and when I did I was too tired to stop," she added.

Proell-Moser's time of 1 minute 34.43 seconds for the 2,700-meter Caprioli-Olympia track led to her 42d World Cup victory, her 22d in the downhill.

It also pushed her to the top of the World Cup standings after her third and seventh-place finishes in the two Val d'Isère, France, giant slaloms last week. She has 44 points, to 40 for Habersatter and 25 for Lise-Marie Morerod of Switzerland.

"She is too good. She should run with the men," said Italian team director Mario Cotelli. "The World Cup is over. In tomorrow's slalom, Annemarie will pick up more points, win the combined, and leave Brigitte Habersatter miles back in the standings." Annemarie has had no slalom training at all.

Habersatter, who became the top downhiller after her childhood friend retired in 1975, was philosophical after coming third. "I will try not to be discouraged. After all, to lose by nearly 2 seconds to a racer who has come back after doing no training for 20 months is simply unbelievable," she said.

The Austrians also took fourth place through Nicola Spelrs and had Brigitte Kersher in seventh. American Cindy Nelson was fifth. West Germans Evi Mittermaier and Irene Epple were sixth and eighth and Marie-Thérèse Nadig of Switzerland placed ninth.

Matous, who raced for Italy and San Marino before joining the Iranian team, started in the third group and produced a surprisingly good time to seize the runner-up spot. "I wanted to show the Italians that they made a mistake when they threw me out of their team four years ago," she said.

WOMEN'S STANDINGS

1. Annemarie Proell-Moser, Austria, 44 points.
2. Brigitte Totschnig Habersatter, Austria, 40.
3. Lise-Marie Morerod, Switz., 25.
4. Lea Soelkner, Austria, 22.
5. Abi Fisher, U.S., 20.
6. Elena Matous, Iran, 20.
7. Hanni Wenzel, Liechtenstein, 16.
   Kathy Kreiner, Canada, 16.
9. Cindy Nelson, U.S., 14.
10. Perrine Pelen, France, 12.

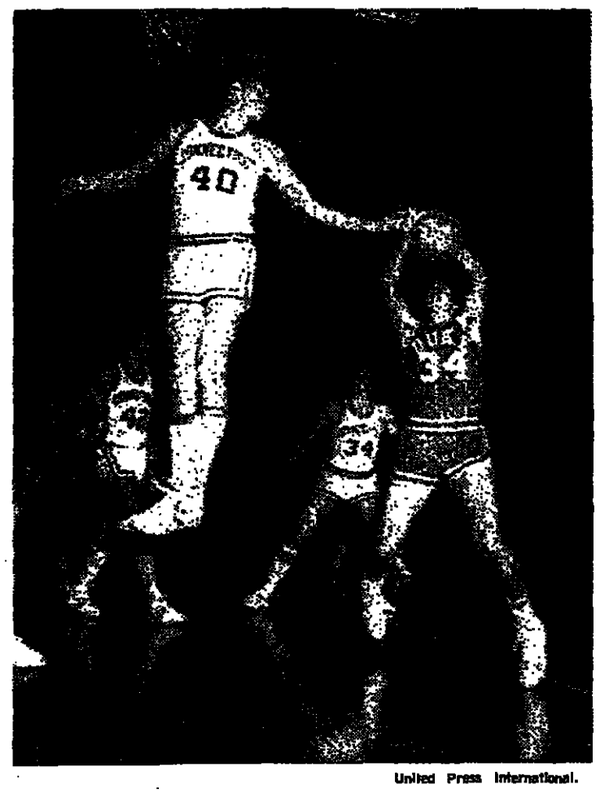
9. Hanni Wenzel, Liech., 1:37.74.

United Press International.



UP AND AWAY—Annemarie Proell-Moser is high on her way to victory in downhill.

Stenmark 1st

MORGINS, Switz., Dec. 15 (Reuters).—Sweden's World Cup holder Ingemar Stenmark skied to perfection today to win an international slalom race here for the second successive day.

Stenmark built a two-second lead as he dipped and swayed through 58 gates on his first run. He eased off on the second, staked out with 55 gates, but although fellow countryman Stig Strand clocked the fastest time on this trip, Stenmark remained ahead with an aggregate time of 1 minute 37.37 seconds.

American Phil Mahre, heading this season's World Cup standing, failed to finish both runs.

Connecticut's James Abromaitis descends to knock the ball away from Duke's Jim Sparnarkel. Duke won game.

Notre Dame Hurt in Handing Indiana's 5 Another Beating

NEW YORK, Dec. 15 (UPI).—Notre Dame's 78-65 victory last night over Indiana, the defending national collegiate champion, was impressive. It also was costly.

The fourth-ranked Irish lost starting guard Ray Martin for the season when the 6-foot-1 senior broke his ankle early in the second half.

"We won a ballgame all right," Notre Dame coach Digger Phelps said. "But the saddest part of it was the loss of Ray Martin. He's a great kid and didn't deserve this unfortunate accident."

Martin, a co-captain, led the Irish in assists and steals last year and was one of Notre Dame's best defensive players.

Notre Dame's victory over No. 19 Indiana was sparked by substitute center Tony Knight, who scored a career-high 23 points and grabbed 12 rebounds in sending the Hoosiers to their third loss in four games.

The Irish took advantage of numerous Indiana turnovers in the first 10 minutes to jump to a 21-10 lead. But Indiana rallied behind Kent Benson, the only returning starter from last year's 32-0 team, and freshman Mike Woodson to close the deficit to 35-33 at the half. Indiana committed 22 of its 30 turnovers in the opening half.

"We got in a bind tonight because of our handling of the basketball," Indiana coach Bobby Knight said. "In the last seven or eight minutes of the first half there was an improvement in the ballhandling. It was enough to get us back in the game in the first half, but overall it made the difference in the game."

Notre Dame increased its lead to 10 points with 12:18 remaining on Knight's crowd-pleasing slam dunk shot. Notre Dame's biggest lead was 60-47 with 8:18 left when Dave Batton, who finished with 18 points, scored on a layup.

Don Williams added 15 points and Bruce Flowers 10 for the Irish, who won their sixth game without a loss.

Wayne (Tree) Rollins scored 22 points and Stan Rome added 20 to lead undefeated No. 14 Clemson, 6-0, to a 98-67 rout of Buffalo, and Greg Ballard scored 17 points and grabbed 17 rebounds to help No. 19 Oregon beat Cal State-Fullerton, 61-51.

Rhode Island also won its sixth game without a loss, beating Robert Morris College of Pittsburgh, 52-43, behind Sylvester Williams's 24 points.

Czechoslovaks Defeated by WHA

EDMONTON, Canada, Dec. 14 (AP).—Bill Flett scored two goals and Bryan Campbell had three assists as the Edmonton Oilers of the World Hockey Association defeated the Czechoslovak national team, 6-4, before a capacity crowd of 15,294.

It was the second loss in a row for the Czechoslovaks, who blew a four-goal lead Sunday in losing 6-5 to the Winnipeg Jets. The Czechoslovaks continue their tour tomorrow against the Calgary Cowboys.

Good vs. Bad

Patriot-Raider Game Conflict of Characters

By John Schulian

WASHINGTON, Dec. 15 (WP).—The casting for a sports event hasn't been so clear-cut since a chattering cherub named Cassius Clay stood up to mean old Sonny Liston.

In one corner, wearing red, white and blue, boasting an 11-3 won-lost record that was 3-11 a year ago, and featuring Steve Grogan, Don Calhoun, Mike Haynes and a lot of other players you never cared about before this season—ladies and gentlemen, the New England Patriots.

In the other corner, wearing silver and gray, claiming they shouldn't have been fined for cheap shots, harboring some of the National Football League's most notorious desperadoes, and pointing to an unequaled 13-1 record as proof that might makes right—pack up the babies and hide the old ladies, it's the Oakland Raiders.

The good guys and the bad collide Saturday at Oakland-Alameda Coliseum in round one of the American Conference playoffs. As of yesterday, both sides were sticking to their roles the way footballs have been known to stick to Fred Biletnikoff's glue-laden hands.

"I had a season where I caught 51 passes. I had a season where I caught 49," said Randy Vatahs, the New England wide receiver who used to play one of Snow White's Seven Dwarfs at Disneyland. "This year I've caught 10 and this year is the best. This is what it's all about... Being part of a winner."

From the Raiders' executive bunker, Al Locasale, first mate to head man Al Davis, said, "Strange faces are not going to be welcome out here."

Keeping Quiet

Hospitality isn't part of Oakland's game plan no matter how good Ken Stabler and his wondrous playmates are going. If the Raiders seem more secretive than usual this week, it's because New England is the team that spoiled their bid for regular-season perfection.

"The Patriots," said Locasale of that 48-17 sneak attack, "really carved us up."

"I was stunned by how fast we came on," said Patriots' coach Chuck Fairbanks, whose team had upset Pittsburgh the week before and would surprise Baltimore a month later.

The Patriots' reserves provided a lot of the speed. When fullback Sam (Bam) Cunningham went to the sidelines with a bruised shoulder, for example, Calhoun, who was waived by Buffalo last season, came in and rushed for 100 yards-plus in four straight games.

It was the Patriots' good fortune, however, that Grogan, the kid quarterback who replaced Jim Plunkett, never missed a game.

Forget about Grogan's modest 48 per cent passing, the 20 interceptions he surrendered. The Patriots care much, much more about the 18 touchdowns he threw and the 12 others he ran for.

Even in the quicksand inside the 20, Grogan's versatility seldom forsakes him. "When we get to the line of scrimmage, we know we're going places," said tight end Russ Francis, who catches the passes that Darryl Stingley and Andy Johnson don't. "It's an incredible sensation."

Against Oakland, the Patriots had an advantage because they were attacking the 3-4 defense they were the first in the league to perfect. Locasale says, "We were just getting used to the three-man line then. Now our guys know what they're doing."

With all those gifted linebackers and defensive backs, there is always a question about whether the Raiders need any defensive linemen.

Complete Passing

On offense, it is a different story. Stabler, the only immobile quarterback in the playoffs, must be protected. While his legs don't work, his arm does. Beautifully. The proof is in his 66.7 passing percentage—second highest in NFL history—and in his astounding total of 142 completions to Biletnikoff, Clifford Branch and Dave Casper.

The Raiders don't talk much about running, but they can do that, too. Fullback Mark Van Eeghen plowed for 1,012 yards this season and free agent Carl Garrett finished fast.

Garrett, like defensive end John Matuszak and linebacker Rodrigo Barnes, is one of the Raiders who have been branded as trouble elsewhere. But in the strange chemistry that is Oakland's machine, he is just right.

The Patriots haven't been in a playoff game since 1964, when they were the Boston Patriots and they played San Diego for the American Football League championship and they got beat, 51-10.

The score may not be repeated Saturday, but the end result may. Stabler should pick to pieces a New England defense with only three quality players—linebacker Steve Zabel and rookie backs Haynes and Tim Fox. Meanwhile, Oakland's defense should be its usual nasty self.

The intangible the Raiders have going for them is their past playoff embarrassment. They have an .812 winning percentage for 10 NFL seasons, but they have lost eight of 15 postseason games. By now they should have had enough of such nonsense.

alian TV Decides to Show ore Than Just Davis Cup

ME, Dec. 15 (UPI).—Italian al television said yesterday uld broadcast delayed ex- s of the Italy-Chile Davis tennis matches this week- but would include editorial ent and film to show Chile's ry government has violated n rights.

announcement came after months of dispute over er the Italian tennis team go to Santiago to play atch and whether to tele- t back to Italy.

second channel of Italy's network, RAI, had already nced it would not broad- ive coverage of the match. announcing the delayed st of the match, the na- television's first channel

e editorial committee of holds that on the plane rnalistic information one t ignore an event of such tance as the Chile-Italy of the Davis Cup after sputes of the past weeks. editorial committee holds sport and politics in this re inseparable. One can- fact forget that the three f the match take place in ry oppressed by a pitiless y dictatorship," the first said.

these reasons," the first el's statement said, "The al committee of TG-1 has that it is indispensable delayed transmission of nnis match is to be in- d with comments and suitable to remind view-

ers that the event is taking place in a nation whose regime systematically violates all the essential rights of man."

Barazzutti First

SANTIAGO, Dec. 15 (Reuters).—Jaime Fillol of Chile will meet Corrado Barazzutti in the first match of the 1976 Davis Cup tennis final with Italy, which begins here on Friday, it was announced today.

The draw pitted Patricio Cornejo of Chile against Adriano Panatta in the second singles while the two singles on Sunday will put Fillol against Panatta and Cornejo against Barazzutti.

The two Chilean singles players will team up for the doubles while the Italian doubles team will consist of Panatta and Paolo Bertolucci.

HL Rangers Not Giving Any Presents to New York Rivals

By Parton Keese

—IONDALE—N.Y., Dec. 15 —Though Christmas was days away, the New York ers got that tie they didn't last night.

en their much-talked-about encounter of the season with New York Rangers ended at the Islanders skated off the Coliseum ice with heads d. They weren't losers, but they weren't winners, either, and that hurt.

The Rangers were delighted, especially after rallying from a two-goal deficit and outplaying their Patrick Division rivals in the scintillating kind of hockey that made the National Hockey League famous.

"That was quite a game," said coach John Ferguson of the Rangers. "It opened up fast, and we didn't want to play it that way, but I can't complain about my team, with only one loss in our last 12."

Behind by a score of 3-1 in the second period following two goals by Clark Gillies and a shorthanded tally by that Islander specialist, Lorne Henning, the Rangers refused to die. Back came their goal-scoring demon, Don Murdoch, who tallied his 24th and 25th goals, the second one beating Glenn Resch, the Islanders' goalie, with only one second left in the second period.

Bryan Trottier had put one past Gilles Gratton, the Rangers' goaltender between the Murdoch goals, so the Islanders carried a 4-3 lead into the final period. That's when Nos. 88 and 77 got together for a pass and a tip-in—Ken Hodge and Phil Esposito, respectively.

It was Esposito's second goal of the night and it tied the score.

"The tie was fitting," said coach Al Arbour of the Islanders, "because we didn't really play our game. I don't know what it is at home, but we don't execute the way we do on the road."

The 14,885 fans were the winners. They screamed and yelled and seemed to drive the players into a worse frenzy than they were already in. Referee Bob Myers called 11 penalties in the first period, most of them in the first 10 minutes, as he tried to curb the charged-up emotions.

"They're the best last-place team you'll ever see," said Resch, referring to the divisional status of the Rangers, who earned their 33d point, more than 11 other clubs in the league.

Kings 4, Capitals 2

At Landover, Md., Tommy Williams scored his 19th and 20th goals to lead Los Angeles to a 4-2 victory over the Capitals. Williams, who totaled 19 goals in 70 games for Los Angeles last year, matched that total in the Kings' 32d game of the season at 2:46 of the first period to put Los Angeles ahead 1-0.

North Stars 3, Flyers 3

At Bloomington, Minn., Tim Young's two goals in the last two minutes gave the North Stars a 3-3 tie against Philadelphia. Young scored the tying goal with 19 seconds left. It was the first time that the North Stars had pulled their goalie and scored to tie the game.

Sabres 6, Canucks 3

At Vancouver, Gil Perreault scored two goals to lead Buffalo to a 6-3 victory over the Canucks, who have managed just 10 points in 15 home games this season. The Sabres now are three points behind first-place Boston in the Adams Division.

Forego Voted the Best Horse In U.S. Third Straight Year

NEW YORK, Dec. 15 (NYT).—Forego, called "the greatest horse I have ever ridden" by Bill Shoemaker, was named Thoroughbred Horse of the Year yesterday for the third straight year in the Eclipse Award poll. The 6-year-old gelding, owned by Mrs. Martha Gerry, won six of eight starts in 1976, despite conceding his handicap rivals huge weight advantages, to become the third-leading money-winner in thoroughbred racing history.

In winning $491,701 to increase his career earnings to $1,656,317, the son of Forli-Lady Golconda also captured the divisional award for male thoroughbreds 4-years or older.

Bold Forbes, the Kentucky Derby and Belmont Stakes winner, was selected as 3-year-old colt of the year and 2-year-old colt honors went to Mrs. Karen Taylor's Seattle Slew, who raced only three times but won brilliantly in each race. Seattle Slew won the Champagne Stakes by 9 1/4 lengths.

Youth, Nelson Bunker Hunt's 3-year-old Washington, D.C., International victor, was selected as the leading turf horse.

William Haggin Perry's Revidere was named queen of the 3-year-old fillies after posting eight victories in 10 starts. Mrs. Marin Scott's Proud Delta captured the award for female horses above age 3. Nicholas Brady's Sensational was the champion 2-year-old filly and George Weasel's My Juliet, a 4-year-old filly, won the Sprinter-of-the-Year title.

The steeplechase title went to Mrs. Ogden Phipps's Straight and True.

The Eclipse Awards are based on balloting among the Thoroughbred Racing Association, the Daily Racing Form and the National Turf Writers Association.

Forego, trained in 1976 by Frank Whiteley jr., scored his most impressive triumph of the year in the Marlboro Cup when the 17-hand gelding conceded 18 pounds to Honest Pleasure and rallied from way back to win by a head. Forego is expected to return to racing next year in an effort to surpass Kelso's record earnings of $1,977,896.

Art Buchwald

It's in the Bag

WASHINGTON—You're not going to believe this, but things have gotten so exciting in Washington during the transition period that people are actually arguing whether Jimmy Carter should carry his own luggage or not.

Buchwald

It all started when Betty Beale, a columnist for the Washington Star, attacked Mr. Carter in print for doing something so "un-presidential" as carrying his own bags. She wrote that it gave the presidency a bad image. Then she went on to complain about Mr. Carter refusing to wear formal attire on Inauguration Day. Betty, I must tell you, is a stickler for protocol, but Washington being Washington, she did open up a can of beans, and the town is now divided between those who believe a president should carry his own suitcase and those who believe he shouldn't.

I must admit I sided with the pro-Carter-Luggage-Carrier people, on the theory that it shows the man who has his finger on the button is not too big to also have his hand on his own Samsonite.

Miss Beale wrote that Mr. Carter was just showing off and that he wanted to look like a man of the people by lugging his bags all around town. But I believe the President-elect is sincere when he picks up his baggage every time he makes a move.

Before Mr. Carter was elected President he had to travel on commercial airlines to every part of this land. He hardly had any staff. Until Theodore White's book, "The Making of the President 1976," comes out, we will have no idea how many times Carter lost his luggage during the campaign.

But I'm willing to bet it was more than once. After traveling on airlines, a person develops a phobia about his baggage getting lost, and the more one flies the bigger the fear gets. I sincerely believe Mr. Carter is suffering from lost-baggage phobia, which is not only natural but is justified, based on the experience of most air travelers.

I prefer to believe that the first thing Mr. Carter decided was that if he became President of the United States he would never let anyone else touch a bag of his again. It was a tough decision but it was the right one. And I do not believe it demeans the presidency to see the commander-in-chief walking along Pennsylvania Ave. with a two-suiter in one hand and the papers of state in the other.

The anti-Carter luggage people, and some of my best friends are in this group, maintain it is not only undignified for a head of state to carry his own bags, but is counterproductive. If Mr. Carter is sincere about putting people back to work, he is taking a job away from somebody who would ordinarily be assigned to carry his bags. It isn't just the President's luggage they're worried about, these people say, but Americans tend to follow their leaders and, if they see the President of the United States carrying his bag, they will decide it's all right for them to carry their own luggage and thousands of porters will go jobless.

They also point out that when people see a president carrying his own bag, they tend to wonder what he's hiding in it, and this gets everyone very nervous.

Betty Beale says all Carter is carrying around are the blue jeans he expects to wear to the inauguration—but we have only her word for this, and we must remember that the last person Mr. Carter would let peek into his suitcase would be Betty Beale.

So now you know what's going on in Washington this week. I know it's strong stuff just before Christmas, but I believe the people have a right to know what is going on in Washington at all times. Sorry, Walter, but that's the way it is.

£30,000 for Austen Ms.

LONDON, Dec. 15 (UPI).—A private collector yesterday paid £30,000 ($51,000) for the handwritten manuscript of Jane Austen's first serious novel, "Catharine," and a dealer handed over £750 ($1,275) for two fan letters written by the schoolboy Winston Churchill in 1888. The items were sold at Sotheby's.

The Unstoppable Taylor Caldwell at 76

By Nan Robertson

BUFFALO (NYT).—Taylor Caldwell is prodigious. One of the richest, most productive and widely read of American novelists, she tools on, said a reviewer, "as timelessly as a Rolls Royce Silver Cloud, hardly shifting gears from one volume to the next." She seldom writes "finis" to a book in fewer than a quarter-million words. Now 76 years old and ailing, she still seems unstoppable.

"Ceremony of the Innocent," her 31st published novel in 38 years, has just come off the presses. Like all the others, it is very long, very melodramatic, as dense as a plum pudding with characters and plots and is almost certainly destined to be immensely popular. Her next-to-last novel, "Captains and the Kings," loosely adapted and serialized for television, had millions of viewers hanging on the ropes with suspense this fall over the saga of an Irish-American highly reminiscent of Joseph Kennedy.

Miss Caldwell thought "the producers did a marvelous job." She was not able to hear a word of it. She is deaf: Her Greek housekeeper, Sula, and any visitors to her Buffalo home, must communicate with her by writing notes. Nonetheless, she granted an interview here the other day.

Breakfast at 3:30

She appeared downstairs for breakfast at 3:30 p.m., an imperial figure with piercing dark eyes and spots of rouge setting off her white skin. Her voice is clear and strong as a bugle. Clutching a box of Kleenex in one hand and stroking her German shepherd with the other, this admitted hypochondriac announced that the night had brought her inflamed sinuses, an ulcer attack and back pains, as well as a familiar burst of creativity.

She said that, as always, she had been working in her nightgown from midnight until the early morning hours, toiling at her electric typewriter in her book-crammed study.

"If I sleep during the day the house gets along by itself and there are no interruptions," she added.

Miss Caldwell has been described by those who know her as sometimes intimidating and "difficult," especially with women. She turned out to be both gracious and forthright, but her talk, like her books, was suffused with fantasy and exaggeration. ("My husband, Marcus, was a full professor at the University of Kiev at the age of 14.")

In a long and rambling monologue, while a grandfather clock she could not hear chimed the quarter-hours, she spoke of a life whose early years were fraught with bitterness and frustration. "Strange, how old hursts can haunt you," she mused, puffing on one of a chain of cigarettes. "I never had a childhood; I never had an adolescence."

'No Nonsense'

She spent "endless years of writing" before anything was printed. Born in Manchester, England, the daughter of a commercial artist, Janet Miriam Taylor Holland Caldwell was sent to school at the age of 4: "There was no nonsense about kindergarten or finger painting or hot lunches, and believe me, within six weeks you had to know how to read and write." She was called Janet then as now; the "Taylor" in her string of names was picked out by her first editor.

When she was 6, her family moved to Buffalo, where she has lived most of her life. By the age of 12 she had written a futuristic novel called "The Romance of Atlantis." A grandfather in publishing thought it was a fraud, that it could not possibly have been written by a 12-year-old. "And besides, I was a girl," she said, "and girls weren't supposed to amount to anything."

She does not recall her parents ever showing her affection. She remembers drudgery, marriage at the age of 18 to a man she described as shiftless, the birth of her first daughter, Mary Margaret. She earned her living as a stenographer and court reporter, studied nights at the University of Buffalo and was 31 before she got her degree.

That year, 1931, she divorced her first husband and married her boss, Marcus Reback, an official with the U.S. Immigration Department in Buffalo. With him she had a second daughter, Judith, and a happy marriage that ended with his death in 1970.

She was 38 years old, with "dozens" of unpublished novels behind her, when her first blockbuster, "Dynasty of Death," bowled over Scribner's editors. Since then, novels such as "This Side of Innocence" (1946), "Dear and Glorious Physician" (1959) and "Great Lion of God" (1970) have sold in the hundreds of thousands of hard-cover copies, with millions more through book clubs and in paperback.

"She is a miracle," said her editor at Doubleday, Stewart Richardson; and Fawcett Crest reports that nearly 19 million soft-cover copies of 16 Taylor Caldwell novels are in print under its aegis alone.

Nobody knows what fuels her leaping imagination and she is vague about it herself. She reads endlessly, is a student of the Bible, has written on biblical themes, Genghis Khan, ancient Greece and Rome, and most of all, on the getting and spending of great amounts of money.

Miss Caldwell, who said that her "most lyrical prose has resulted from the anticipation of big checks" from her publishers, commented further, in stentorian tones: "Nobody ever helped me. Nobody ever gave me anything. Nobody ever left me anything. Everything I have I earned myself."

There is no evidence of the wealth she has amassed in her solid yet modest Georgian-style house. But money most certainly interests her.

Third Husband

According to friends, arguments about it estranged Miss Caldwell from her younger daughter. The author also spoke frankly about how it came between her and her third husband, William Everett Stancell, a retired real-estate developer she met on a world cruise, wed in 1972 and divorced a year later.

"I want to know where everything is; he wanted me to turn everything over to him and I said no," she said.

It has been written that Miss Caldwell is against women's liberation, that she has said that a woman's place "is in the kitchen and the bedroom." Her whole life refutes that statement.

The author punched home the rebuttal by saying: "Women's lib and I have much in common. I had to struggle for a living. I had to struggle for an education. I believe that a woman should get equal pay for equal work; that she is entitled to an education to the best of her abilities. As a Catholic woman, I don't believe in a woman being a priest."

She does believe that the movement suffers from "too many raucous women who make fools of themselves."

"I also think both men and women should be tested for literacy and intelligence before they vote," said this outright elitist, former policy board member of the right-wing Liberty Lobby and darling of the John Birch Society, which gave her a plaque last year inscribed to a "great American patriot and scholar."

Citations and awards from the Daughters of the American Revolution, B'nai Brith, the Christian Crusade and the Patrolmen's Association of Buffalo also adorn Miss Caldwell's upstairs office.

Among those who do not like Miss Caldwell are New York reviewers. They have heaped scorn on her "antique diction," "verbosity" and literary "furbelows" while grudgingly acknowledging her storytelling gifts.

The author does not give a fig for such judgments. "Male reviewers resent women who write anything but silvery romances," she said.

PEOPLE: Prince Charles Takes Leave of Royal Navy

Prince Charles

Prince Charles left the Royal Navy Wednesday—in the traditional way—in a wheelchair. Officers of the minesweeper Bronington, wearing doctor's whites, grabbed Charles, 28, pushed him into a rickety wheelchair with his personal standard lashed to it and trundled the heir to the British throne down the gangway at Rosyth, Scotland. "Behave yourselves," he called back to the crew as he jumped into a car and drove off. His new job will be chairman of the Queen's Jubilee Appeal, a fund to finance youth projects in Britain.

* * *

Speaking of his days at the [embassy] in London and of his [...] to return there, he said, "[...] available anytime between [...] and my 70th birthday. By [that] time I am an elder states[man], perhaps even a Democratic pr[esi]dent would be willing to appo[int] me." He is 56.

* * *

Nevada Attorney-General Robert List has been directed to produce at a Dec. 28 hearing all evidence on the reported finding of Melvin Dummar's fingerprints on materials related to the Howard Hughes "Mormon will." The order followed disclosures Monday concerning the 31-year-old Utah gas station attendant who was a surprise beneficiary in the alleged will. Judge Keith Hays also ordered Las Vegas police to make immediate fingerprint tests of the Mormon will and test the paper and ink for indications of the document's age. Judge Hays ordered that the trial, scheduled for Jan. 10, to test the will's authenticity, be postponed indefinitely. The three-page handwritten will was delivered to Mormon headquarters three weeks after Hughes died. Some experts say that the handwriting on the envelope was Dummar's.

* * *

Kenya was extolled by evangelist Billy Graham in Nairobi as a "paradise on earth" and as a shining example of a multiracial Christian nation. He told people at the rally, organized by the Pan-African Christian Leadership Assembly, that white minority regimes in southern Africa could take a lesson in race relations from Kenya. He added that he believed the policy of apartheid in South Africa would be ended within 20 years.

* * *

"We follow newspapers m[ore] or less," declared NBC co-[an]chorman David Brinkley [in] Miami Beach the other day. "[...] we really ought to stop. If [...] news in a newspaper, is it not [...] news on radio and televis[ion]? No, it isn't. I do not sug[gest] more light or frivolous news." [The] American TV newscaster tol[d a] group of TV newsmen, "but [we] should not bore our audience [...] more than is truly necess[ary]. And we would have bigger [au]diences. Newspapers can pr[int] items most of their readers d[on't] give a damn about. We ca[n't]. We have to do things our [...] way to suit the medium that [we] work with."

Elliot Richardson, who jokes about his frequent changes of jobs, now says that the one he'd most like to go back to is that of ambassador to Britain. The secretary of commerce also served during the Nixon and Ford administrations as secretary of defense and attorney general,

Yamani Seen Giving In

0-15% Oil Hike Expected

From Wire Dispatches

DOHA, Qatar, Dec. 15.—The e of oil will rise by between nd 15 per cent next year, the rman of the oil ministers' erence here said today.

will be a minimum of 10 cent and a maximum of 15," di Oil Minister Sheikh Abdel- al-Thani said.

late Reuters report, however, d the Venezuelan oil minister, Valentin Hernandez, as saying that the conference had approved a solution allowing 11 of the 13 members to raise prices by 10 per cent, while two others—Saudi Arabia and the United Arab Emirates—would apply only 5-per-cent increases. No confirmation was immediately available.

A final decision is expected tomorrow.

The chairman met reporters after an afternoon session of the talks held by the Organization of Petroleum Exporting Countries.

Saudi Arabian Oil Minister Sheikh Ahmed Zaki Yamani left the discussions and flew home after insisting that oil prices should remain frozen for a further six months. Sheikh Yamani returned to the conference later after consultation with his government in Riyadh, which is 90 minutes from here by air.

A member of the Saudi delegation said Sheikh Yamani would not have come back to Doha unless he had brought with him a compromise moving away from Saudi Arabia's stand on a price freeze.

Libyan Oil Minister Ezzedin Mabrouk said he hoped the ministers could agree on a price increase later tonight.

Iraqi Minister Tayeh Abdel Karim, who has strongly urged an increase of 26 per cent, said a 15-per-cent rise would be acceptable if all 13 ministers agreed. Speaking after the latest ministerial session, held in Sheikh Yamani's absence, he rejected a 10-per-cent rise as too low. "Ten per cent now is refused," he said.

But other OPEC delegates said privately they believed ministers would compromise on their public positions in order to maintain OPEC unity.

Earlier, Mana Said al-Otaiba, oil minister of the United Arab Emirates, said all OPEC delegates except those of Saudi Arabia and his country called for price increases of more than 10 per cent at their session this morning.

"If the other members agree to raise their prices higher than 10 per cent, then we will consult with Saudi Arabia and decide among ourselves what to do. I am not saying OPEC will break up, but there is a real danger of reaching that stage."

Largest Exporter

Saudi Arabia, the world's largest oil exporter, can theoretically undermine any agreement it does not like by flooding the world market with oil from its vast reserves. But observers thought this was highly unlikely as it could prompt the breakup of OPEC.

Sheikh Yamani said on arrival here two days ago: "We have become used to always reaching an agreement which would be acceptable to everyone."

Sheikh al-Thani and other OPEC ministers were confident that Saudi Arabia would soften its stand. Asked specifically if he thought Saudi Arabia would accept an increase, the chairman repeated that the minimum was 10 per cent and the maximum 15.

Mr. Hernandez said there must be an increase of 10 per cent or more.

Iraqi Minister Tayeh Abdel Karim said the line-up among the ministers was 11 in favor of a rise in price and two against.

Delegation sources said the United Arab Emirates, which is formally seeking a 10-per-cent increase, would side with Saudi Arabia if it came to a choice between a freeze or a 15-per-cent rise.

Iran's chief delegate, Jamshid Amouzegar, said a 15-per-cent increase would not cripple Western economies. He said OPEC could offer special assistance to the two or three industrialized countries like Britain which might suffer from such an increase.

All ministers agreed that the developing nations should be shielded by being given an equivalent amount of additional aid, Mr. Amouzegar added.

In other business, the conference elected a new secretary general for OPEC to replace Nigeria's Meschach Feyide. He is Ali al-Jaidah, under secretary in the Qatar Ministry of Petroleum and Finance.

Family Pays $8.3-Million Ransom For Release of West German Heir

MUNICH, Dec. 16 (AP).—Richard Oetker, 25-year-old heir to a food and shipping fortune, was freed by kidnappers tonight after his family paid a ransom of 21 million marks ($8.3 million), police announced.

The ransom was the largest on record for a kidnapping in West Germany. The previous high was 5 million marks, paid last month for the freedom of Olympic equestrian Hendrik Snoek, whose family owns a supermarket chain.

Police said Mr. Oetker was abducted last night in Weihenstephan, outside Munich, where he was attending a beer-brewing school, but other sources said Mr. Oetker was kidnapped at his apartment Tuesday evening.

Police said Mr. Oetker was left in an auto outside Munich. They said he was injured and that he was seen by a physician. The injury was not described.

He was freed hours after his brother handed a suitcase containing the ransom money to the kidnappers in an underground shopping center in the center of Munich.

...ding Discord With U.S.

...rance Embargoes Exports ...f A-Reprocessing Plants

By James Goldsborough

...RIS, Dec. 16 (IHT).—The ...ch government today declar... an embargo on all future ex... of nuclear reprocessing ...ology, ending a dispute with United States that broke into open during Secretary of ... Henry Kissinger's visit here ...ummer.

...brief communiqué from the ...e Palace following a meet... of the Council on External ...r Policy made no mention ...e case of Pakistan, which ...itated the French-U.S. dis... ...ment, because that contract ...dy has been signed. It is ...stood, however, that the ...tan deal, involving a re... ...ing plant, will not go ...gh.

...day's announcement removes ...incipal issue between France the United States, and goes ...g way toward meeting the ...isms that Mr. Kissinger and ...dent-elect Jimmy Carter ... of French and West Ger... policy on nuclear prolifera...

...e French statement now ... West Germany as the only ... with a pending sale of reprocessing technology, which will increase the pressure on Bonn to align its policy with that of other nuclear exporting nations. West Germany has signed a $4-billion contract to provide Brazil with enriched uranium, nuclear power generating plants and a reprocessing plant, the so-called complete nuclear cycle. The reprocessing plant, however, represents only about $40 million of that contract.

Terrible Danger

"France does not intend to add to the terrible danger represented by nuclear arms proliferation," said the statement released today. It reflects the informal views adopted by nuclear-exporting nations during several meetings in London this year. But it also reflects changes in the French government itself, particularly since the resignation of Jacques Chirac as prime minister last August.

Mr. Chirac is being blamed in official circles here both for the Pakistan deal, involving a reprocessing plant, and an agreement

...itish Austerity Plan Draws ...iticism From Left and Right

...NDON, Dec. 16 (AP).—The ... government came under ...fire from both left and today for its new aus... plans to raise taxes and ... government spending by ...illion ($4.16 billion) in the ...two years.

... Jones, leader of the ...port and General Workers ... said the economic pack... announced yesterday by ...ellor of the Exchequer ... Healey was "very harsh." ... bankers and papers from ...n right said Mr. Healey's ...m was not harsh enough ...rse the country's economic ...

...oup of leftist Laborites ac... their party's financial ...of lacking a "clear and ...ht economic policy."

The government trimmed its programs for the third time this year to meet conditions set by the International Monetary Fund for a $3.9-billion loan to cover trade deficits, fight inflation and prop up the pound. The IMF announced that its board of directors would meet Jan. 3 to consider the British loan application and Mr. Healey told the House of Commons that the United States and West Germany would give Britain $850 million in interim credit.

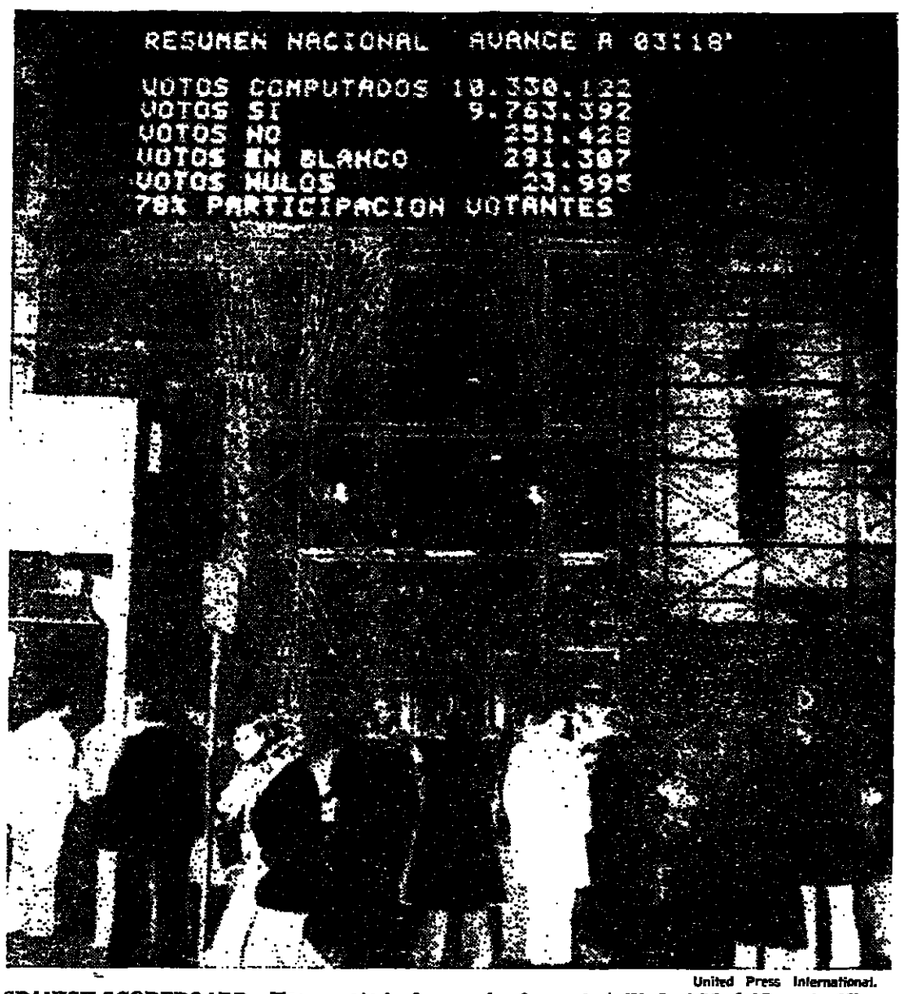
But the union reaction threatened new strains on the unions' agreement to hold wage demands down—in the so-called social contract, which is the key to the Labor government's economic program. Already the miners, whose 1973 strike brought down Prime Minister Edward Heath's Conservative government, were threatening to strike unless their retirement age was dropped from 65 to 60.

Among the newspapers, the pro-Labor Daily Mirror said that Britain needed an "action man" but got "a rubber chancellor."

The tabloid Sun accused Mr. Healey, Prime Minister James Callaghan and the Cabinet of "collective gutlessness."

"Always too little," said the Times.

The pound dropped 1 1/2 cents in London and 3 cents in New York. The Financial Times index of industrial stock prices on the London Exchange fell 10.5 points.



The government's spending cuts will hit defense, education, state housing, transportation and the civil service. Taxes are going up on cigarettes, alcoholic beverages, some foods and natural gas.

No cuts were announced in social welfare programs, an obvious concession to the unions and the Labor party's left wing.

SPANISH SCOREBOARD—Heavy vote in favor of reforms is tallied at Madrid post office.

Suarez Hails Spaniards' 94% Vote In Favor of His Democratic Reform

By James M. Markham

MADRID, Dec. 16 (NYT).—The government today savored its overwhelming victory in yesterday's national referendum on its political-reform program—a victory that seemed to be both a formal rejection of the Franco past and a sign of a certain docility in the electorate.

With the vote counted in 99 per cent of the precincts, the government had won 16.5 million "yes" votes—a stunning 94.2 per cent of the total.

"No" votes accounted for only 2.6 per cent, while 3 per cent of the ballots were handed in without being marked and two-tenths of 1 per cent were invalidated.

"I feel profound gratitude to the Spanish people," said Premier Adolfo Suarez, who stayed up until early this morning with King Juan Carlos at the monarch's Zarzuela Palace, watching reports on the returns.

'Everybody Participated'

The 44-year-old Premier, who on the eve of the referendum made a highly effective televised plea for the "yes" vote, said: "The important thing is that no one can capitalize on this triumph... Everybody participated in this success."

Meanwhile, a 48-hour deadline set by the kidnappers of Antonio Maria de Oriol y Urquijo, the rightist president of the advisory Council of State, closed in on the government:

An organization calling itself the October First Anti-Fascist Resistance has threatened to kill the 63-year-old former justice minister at midnight tomorrow if 15 leftist and Basque prisoners are not freed and flown to Algeria.

This afternoon, the police disclosed names and photographs of five men in their mid-20s said to be involved in the kidnapping.

Government officials said that Spanish diplomats in Paris had made contact with their Algerian counterparts in connection with the kidnapping, and the Algerian ambassador to Spain this afternoon visited the Foreign Ministry.

It was not clear whether the government was seriously thinking of exchanging prisoners for Mr. Oriol or was making gestures to buy time.

The big losers in yesterday's referendum were hard-line advocates of the policies of the late Generalissimo Francisco Franco. They had urged their supporters to vote "no" to the government's proposal to start Spain toward a West-European-style parliamentary democracy. The "no" vote seems to have triumphed only in Consuegra, a village of 7,000 near Toledo.

Many prominent figures from the Franco era have already swung in line to back the move toward democracy. But Carlos Ollero, a respected academic adviser to the leftist opposition, observed: "The defeat of the 'no' was the defeat of 'ideological' Francoism, not necessarily 'sociological' Francoism."

Aside from the two militant Basque provinces of Guipuzcoa and Vizcaya—where half of those eligible did not vote—the pro-abstention campaign by left-of-center and regional opposition groups did not make much of a dent. The government's figures show that 77.4 per cent of the national electorate voted.

The opposition groups charged, with some justification, that the government did not run a truly democratic referendum in the sense that it used its vital control of radio and television to put across a message that was largely its own. The nation's billboards were covered with signs urging people to vote—and, in the final days, to vote "sí."

Foes' Token Effort

Only token television appearances were made by those urging "no" or "abstentionist" positions and, except in Barcelona, where there was a surprising degree of official indulgence, leftist street demonstrations against the referendum were broken up. Scores of people were detained.

[Civil Guard police tonight arrested Communist labor leader Marcelino Camacho as he was addressing a group of 500 aircraft workers in a Madrid suburb, Reuters reported.

[Mr. Camacho, 57, has spent 14 years in prison for his political activities. He was released from jail last May on bail after being charged with conspiring to change the form of government in Spain, but the charge was dropped under a royal amnesty in July.

[Later, police sources said that Mr. Camacho was released almost immediately after being detained. He has recently had a police escort, since complaining that he was being followed by suspicious men.]

At a 4 a.m. news conference to-

(Continued on Page 2, Col. 8)

Swine-Flu Shots Suspended in U.S.

ATLANTA, Dec. 16 (UPI).—Federal health officials ordered a temporary halt of the $135-million nationwide swine-influenza immunization program today because of concern that the vaccinations may be connected with recently reported cases of paralysis 94 cases of Grillain-Barre syndrome in 14 states.

The announcement followed two days of emergency meetings at the national Center for Disease Control, attended by top officials of the Federal Swine Influenza Task Force. Dr. David Sencer, CDC director, left a sickbed to attend the sessions.

A spokesman in the CDC's public information office said the program was being halted while a more complete investigation was being made.

Carter Names UN, Economic, Security Aides

From Wire Dispatches

PLAINS, Ga., Dec. 16.—President-elect Jimmy Carter today named his top economic and national security advisers and the next U.S. ambassador to the United Nations. He said reports he is having difficulty filling Cabinet posts are "absolutely and terribly inaccurate."

Named by Mr. Carter at a nationally televised news conference were Charles Schultze as chairman of the Council of Economic Advisers; Zbigniew Brzezinski as White House national security adviser and Rep. Andrew Young, D-Ga., as UN ambassador.

Mr. Schultze, who was budget director in the Johnson administration, said that next to keeping the peace, the most important problem facing the new administration is that of getting the economy on a path to solid, sustained recovery.

"It's going to be done," he said. "We'll do it together," Mr. Carter added.

Later, answering questions, Mr. Carter repeated his statement that he will not seek standby authority to impose wage and price controls as a barrier against inflation.

Mr. Brzezinski said he sees his responsibility as one of enhancing the decision-making ability of Mr. Carter, Secretary of State-designate Cyrus Vance and the secretary of defense yet to be chosen.

That clearly was intended to dispel any speculation that Mr. Brzezinski might, as Henry Kissinger did during his days as a White House adviser, seek to become a dominant figure in foreign policy decision-making.

Mr. Brzezinski said he would advise Mr. Carter to take a harder line on détente with the Soviet Union. "It has to be reciprocal," he said.

At another point, Mr. Carter said that news media had "greatly exaggerated" the difficulties he had experienced in appointing Cabinet members.

"I've had no pressure on me to appoint a particular person or not appoint a particular person," Mr. Carter said.

"I'm putting together a Cabinet with very good ability to work together and good qualifications," he said.

"I can tell you that the reports about disharmonies and pressures have been grossly exaggerated and, in some instances, completely erroneous," Mr. Carter said.

Two Alternatives

Mr. Brzezinski said the new administration takes office at a time when the United States faces two fundamental alternatives, either greater international cooperation or greater global turbulence.

"It will be a time that will demand the very best from us, not only intellectually but morally," he said.

Mr. Carter announced the Young appointment first, calling the black congressman a man of integrity who stands in high esteem among world leaders and "one of the best personal friends that I have in the world."

"The United Nations ambassador will be a Cabinet-level position in my administration," Mr. Carter said. He said that status is clearly understood by Rep. Young and by Mr. Vance.

Mr. Carter was asked what he was doing to persuade the oil-producing nations not to raise the price of oil.

He said he had indirect talks with members of the Organization of Petroleum Exporting Countries, now meeting in Qatar, on the price issue and had expressed his hope of keeping the costs down.

Mr. Vance has talked directly with Saudi officials in Washington.

Previously, Mr. Carter had

Schmidt Lays Down Policies; Bonn to Continue Aid to Allies

By Michael Getler

BONN, Dec. 16 (WP).—West German Chancellor Helmut Schmidt said today that his country would continue to give financial help to allies facing economic problems, provided those countries made "energetic" efforts at home to put their own economies in shape.

"We will help those who help themselves," the Chancellor said.

Mr. Schmidt, in a major address on the domestic and foreign policy his newly elected government will follow for the next four years, made no mention of any specific country in his call for greater economic discipline in Europe.

It is widely assumed, however, that his remarks were aimed mostly at the British, and to a lesser extent at the Italians.

The Chancellor's wide-ranging speech went on for 2 1/2 hours, causing some restlessness in an audience which for the most part gave frequent but not vigorous applause.

Mr. Schmidt, who will be 58 next week, has gotten off to what many observers here view as a poor start on a second term after barely holding off a conservative drive to unseat him in the elections in October.

The Chancellor was able to muster only one vote more than the total needed to confirm his election, though for legislative purposes he still commands a 10-vote majority. Furthermore, immediately after the parliament vote, Mr. Schmidt's labor and social affairs minister, Walter Arendt, announced his resignation from the new Cabinet.

In a highly unusual opening to his policy speech, the normally outspoken Chancellor actually apologized for his ill-considered plan to delay pension payments, which was one reason for Mr. Arendt's resignation. He said he had misjudged public sentiment, and added that "a government is not infallible."

"That claim is only made by totalitarian administrations," he said. "It is good for a democratic government to have to respond to such clear criticism in this way."

The Chancellor also seemed to have been taken by surprise by the demonstrations last month

(Continued on Page 2, Col. 4)

Burglars Club 2 in Louvre, Steal French King's Jeweled Sword

PARIS, Dec. 16 (UPI).—Three masked, armed burglars broke into the Louvre Museum at dawn today and stole a priceless diamond-studded sword of French King Charles X from a display case.

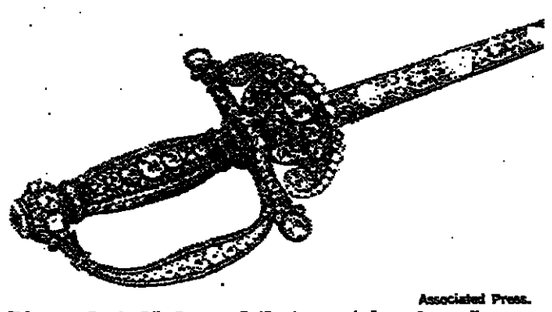
The burglars climbed a metal-tube scaffolding set up by workers cleaning the facade of the former palace and smashed unbarred windows on the second floor, a museum spokesman said.

The men clubbed two guards on duty and raced into the Apollo Hall, one floor above the statue of the Winged Victory of Samothrace. The crown jewels of France are displayed in the Apollo Hall.

Breaking one of the glass display cases, the thieves grabbed the sword, leaving behind the stirrups and saddle of Charles X.

The museum spokesman said the sword has such historical value that "one cannot set any value on it." The thieves could not sell such a well-known object but could remove the diamonds for quick sale, he added.

The sword was made of steel and crown diamonds by French artist Frederic Bapst in 1824 for the coronation of Charles X.



No passersby noticed the men scramble up the scaffolding around 4 a.m.

But a third guardian, alerted by the noise, managed to escape the robbers when they tried to overpower him, and he alerted police.

An automatic alarm—set off when the display case was broken—caused the burglars to flee the same way they entered, and they had no time to take other objects.

The two clubbed guards were taken to a hospital for treatment of bruises.

Charles X was king of France from 1824 to 1830. He was the brother of Louis XVI, beheaded during the French Revolution, and of Louis XVIII, who ruled after Napoleon's fall.

Diamond-studded sword that was taken from Louvre.

Amalrik Sees the Soviet Regime Surviving 1984

By Raymond H. Anderson

NEW YORK, Dec. 16 (NYT).—Andrei Amalrik, the dissident Soviet writer who caused a stir in the West in 1970 with "Will the Soviet Union Survive Until 1984?", has reluctantly reached the conclusion that the answer is "yes":

The 38-year-old former history specialist, who was active in a human-rights movement in the Soviet Union from the early 1960s—and was twice sent to Siberia as punishment—is in the United States for a lecture tour and to receive the Human Rights Award of the International League for Human Rights.

Mr. Amalrik explained at a news conference here why he now felt that the Soviet Union would survive beyond 1984:

First, the Chinese have been slower than expected in developing modern mass-destruction weapons, making a war with the Russians unlikely.

Détente, Emigration

Second, the Soviet leadership proved more flexible and agile than he had foreseen in coping with unrest and protest, easing internal pressures through policies of détente with the West and a relaxation of restrictions on emigration.

In his book Mr. Amalrik had forecast a military showdown between the Soviet Union and China and said it would unleash antagonisms in the Soviet Union against Moscow's policies and rule, especially among the many minorities.

Mr. Amalrik and his wife, Gyuzel, a painter who supported his protest activities and shared some of his exile, left the Soviet Union in July for the Netherlands, where he has a teaching post at the University of Utrecht. During his tour of the United States he will give lectures at Harvard, Yale, Columbia and other universities.

During their stay here in New York, Mr. Amalrik and his wife lunched with some of the American correspondents they maintained contact with in Moscow in the late 1960s despite restraint and retaliation. They also appeared at a news conference at the United Nations Plaza headquarters of the International League for Human Rights.

Mr. Amalrik said that a small group of activists who demonstrated in demand for more freedoms in Soviet society had been curtailed by arrests, exile, imprisonment and emigration—the latter sometimes voluntary and sometimes forced. The protest activities, which the dissidents call the democratic movement, are continuing, mainly among intellectuals, he said.

Another area of opposition to the Soviet authorities, Mr. Amalrik said, is among workers, who vent their grievances and frustrations through small and local acts of "sabotage" and violence. The opposition among the workers is more widespread and powerful than the opposition attitudes among more educated and intellectual Soviet citizens, he continued, but the worker opposition is virtually unknown abroad.

"The weakness of the two opposition movements is that they are not connected," the writer said. "If they should come together, then the Soviet Union would be faced with serious problems."

The struggle to achieve freedoms and human rights in the Soviet Union is gravely hampered, he went on, by an absence of a Russian tradition of freedom.

"Neither the regime nor the society at large understands what human rights are," he said, and activists fighting for human rights are pained to find themselves in conflict not only with the government but also with the very people for whom the rights are sought.

Ideology Is Lacking

Mr. Amalrik described the opposition to authoritarian Communist rule as a movement still searching for an ideology—for a political platform without which it will be unable to unite differing groups and classes to achieve the goal of a democratic society.

"Until the time that such an ideology is created and developed," he continued, "our movement cannot become a political movement." In the Russian tradition, ideology means everything and the individual means nothing, he said, adding: "The question now is whether the movement will give birth to some political movement or political party. But this, no one can answer."

Mr. Amalrik voiced scorn for the détente diplomacy of Secretary of State Henry Kissinger. He said Mr. Kissinger's achievement of accords with the Soviet government reminded him of a magician pulling rabbit after rabbit from a hat. "Only children believe that anyone can pull 20 rabbits out of one hat," he said.

French Communists Pledge To Keep Multi-Party System

NEW YORK, Dec. 16 (Reuters).—The French Communist party is firmly committed to a democratic multi-party system and the creation of a special French brand of socialism, according to the head of its Politburo's foreign affairs section.

In an article in the authoritative U.S. journal Foreign Affairs published today, Jean Kanapa detailed the policies of his party, once considered one of the most pro-Moscow Communist parties in the West.

He said that the party was convinced "that democracy is the sole machine that will move France forward."

He added that the French Communist party rejected the idea that a model for socialism exists and had abandoned the idea of a "dictatorship of the proletariat."

These policies are based on the party's reflections on the meaning of Stalinism and the Soviet-led invasion of Czechoslovakia in 1968, he said.

Permanent Feature

He rejected the idea that the Communist alliance with the French Socialist party was likely to break down, calling the union a permanent feature of Communist policy rather than some "Communist trick to gain power."

The basic theme of the party's foreign policy is independence, he said, adding that participation of Communist ministers in a future French government should not be incompatible with NATO although the party would favor a renegotiation of the Western alliance.

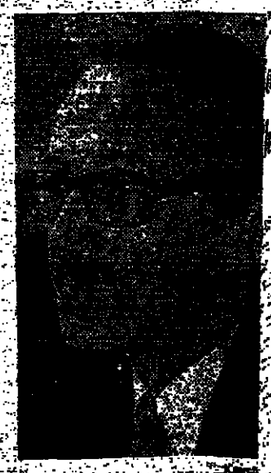
Mr. Kanapa said that a French government of the left would definitely not adhere to the Warsaw Pact and would be more forthcoming over international cooperation on such issues as nuclear proliferation. For example, it would favor the signing of the limited test ban agreements and the nuclear nonproliferation treaty, something that France has opposed since 1963.

Film Showing Hailed

PARIS, Dec. 16 (Reuters).—The French Communist party today welcomed the television broadcast of a film on the Stalinist purges in Prague in the early 1950s, saying that it was good to look reality in the face, however bitter it was.

On Tuesday French television telecast the film "L'Aveu" (The Confession), starring Yves Montand as Artur London, a former Czechoslovak deputy foreign minister who was tortured and forced to make a false confession.

Mr. London said in a televised debate following the film that, after his trial and four years' imprisonment, "I am still a Communist because I do not consider myself a victim of Communism. I was a victim of Stalinism and its criminal system."



René Andrieu, editor in chief of the French Communist party newspaper L'Humanité, wrote today: "It is good to look reality in the face even if it is bitter."

Since their February party congress, the French Communists have attempted to stress their independence from Moscow.

Mr. Andrieu added in an editorial: "There are still threats to liberty. We have shown we disagree. We will do so again whenever it is necessary."

L'Humanité condemned the film as anti-Communist when it first came out in 1970.

The Czechoslovak Communist party newspaper, Rude Pravo, was quoted here today as saying that the showing of the film and the debate "blackened Czechoslovakia."

Jean Kanapa

France Embargoes Exports Of A-Reprocessing Plants

(Continued from Page 1)

this summer to sell a highly-specialized Osiris research reactor using 93 per cent enriched uranium to Iraq. It would be Iraq's first nuclear reactor.

Today's announcement makes no reference to the Iraq sale, but it is known that the government is now highly dubious about it. Research reactors are not officially classified in the three areas of "sensitive technology" as defined by the London group, but highly enriched uranium is. The other two are heavy water and reprocessing technology.

The announcement was made as informed reports began circulating here about an imminent Soviet sale of nuclear technology to Libya. Reports reaching here from Moscow indicate that Moscow has been negotiating not only the sale of a nuclear power station to the Libyans, but also a research reactor. Libya, so far, has no nuclear technology.

Little Controversy

There would be relatively little controversy surrounding a Soviet sale of an ordinary light water power reactor, under rules of inspection, to Tripoli, but the inclusion of a research reactor would be a different matter. According to nuclear experts, it is far easier to convert the lightly burned waste plutonium from a research reactor into a nuclear bomb—as India did—than the exhausted waste from ordinary nuclear electrical power reactors.

France negotiated the sale of a 600-megawatt power station to Libya last spring, though nothing has been heard of it since. Paris indicated at the time that any such deal would involve no sensitive technology and would come under the safeguards of the International Atomic Energy in Vienna.

Strongest Stance

Though the reports from Moscow are unconfirmed, they have raised some questions here. The Soviet Union has adopted one of the strongest anti-proliferation stances of any of the nations in the London group. According to reports here, Moscow proposed at the last meeting of the group last month, that the group embargo all exports of nuclear technology, including ordinary power reactors, to third countries. The other charter members, the United States, Canada, France, Japan, Britain and West Germany, reserved their answer.

The group now has been expanded to include Belgium, the Netherlands, Sweden, Italy, East Germany, Czechoslovakia, Switzerland and Poland.

The group is trying to establish a code of conduct for nuclear exports, which would permit the exports of ordinary nuclear reactors but ban sensitive technology.

Reprocessing is the facility that converts the spent fuel of power reactors into usable plutonium. The only practical use for plutonium so far is in breeder reactors, still in the future, or for bombs.

Schmidt Lays Down Policies; Bonn to Continue Aid to Allies

(Continued from Page 1)

against a new nuclear power-plant site near Hamburg and pledged to consult more with local citizens and authorities from now on.

Continuing Growth

Mr. Schmidt said the chances for continued growth of West Germany's already powerful economy were good. But he warned that West Germany's growth, to which, he said, it was entitled, "must not make us an island" in which this country stands out above all others.

In the final analysis, he said, a strong European community "will be the guarantor of our own security, stability and economic strength."

Though Mr. Schmidt spoke of a new $700-million plan to create new jobs for the almost one million workers still unemployed here, and of another standby investment plan to stimulate the economy if needed, he gave no indication of any major new spending increases of the size that other Western nations are trying to pressure West Germany into making to bolster other export economies.

Mr. Schmidt stressed instead that West Germany would follow a responsible investment pattern that would not jeopardize its own, or Europe's, economic stability.

Aid to the Undeveloped

Mr. Schmidt echoed a growing theme among U.S. and British politicians when he noted that West German aid alone to underdeveloped countries was twice that of the Communist-bloc countries combined.

West Germany, he said, advocates continuation of the policy of détente with the East, and looks forward to the visit of Soviet party chief Leonid Brezhnev to Bonn next year to give a new expansion to Soviet-West German relations.

But he warned that the Soviet-led Warsaw Pact forces were already far beyond the level needed for defense and expressed concern over the mounting problems of "some" NATO partners in maintaining their conventional forces.

Mr. Schmidt said relations between West Germany and the United States had built up to a level of confidence "never before known" between the two countries. He added, "There is no alternative, either political or military, to the presence of American forces in Europe."

Rumor, 2 Others Deny Receiving Lockheed Bribes

ROME, Dec. 16 (UPI).—Former Premier Mariano Rumor and two former defense ministers told a parliamentary inquiry commission today that they never received any bribe money from the Lockheed Aircraft Corp. to influence Italy to purchase 14C-130 Hercules planes.

Mr. Rumor and former Defense Ministers Mario Tanassi and Luigi Gui said their names were falsely linked to the alleged $1.8-million bribery case.

Mr. Rumor and Mr. Tanassi said they believe Ovidio Lefebvre, a Rome lawyer who served as a go-between for Lockheed, used their names to impress Lockheed officials.

"It is entirely clear that there has been a speculation about me and someone misused my name," Mr. Rumor said. "I never heard of bribes, either before or after my meeting with Lockheed officials."

Answering questions, Mr. Rumor said he believed that Mr. Lefebvre was the one who misused his name.

Mr. Rumor admitted meeting Lockheed officials in Rome in March, 1969, but said they discussed business only in general terms.

Bomb Kills 1, Hurts 8 In North Italian City

BRESCIA, Italy, Dec. 16 (AP).—A bomb left in a suitcase exploded at a crowded square in the center of this north Italian city during rush hour this evening, killing one woman and injuring at least eight persons, six of them seriously. Two of the seriously hurt were policemen.

Premier Giulio Andreotti called a meeting of political leaders, including the Communists, for tomorrow to discuss the recent wave of violence in Italy. The meeting participants will include all parties not opposed to the government, thus excluding only those on the extreme left and right.

Two Yugoslavs Jailed For Cathedral Theft

COLOGNE, Dec. 16 (Reuters).—Two Yugoslavs were sentenced to five-year prison terms today for their part in a 10-million-mark ($4.166 million) theft from Cologne Cathedral a year ago.

Vilijam Dalavale, 26, and Branislav Tunjic, 24, were found guilty of stealing jewels and other precious objects from the cathedral's treasury after breaking into the building on Nov. 2, 1975. Almost all of the loot was recovered, much of it severely damaged.

9 Killed in Bombing In Argentine Ministry

BUENOS AIRES, Dec. 16 (AP).—Radical Peronist guerrillas claim they planted a bomb on the third floor of a Defense Ministry building that killed nine persons and seriously injured 19 others.

A government communiqué said an army colonel, an air force major, two navy lieutenant commanders and five civilians died in the explosion last night.

Suarez Hail Spanish Vot

(Continued from Page 1)

day with Interior Minister dolfo Martin Villa, a Spa journalist asked if a sli lower "yes" vote might have more "credible." The in minister declined to impug victory, but yesterday's figure is almost identical to generated by two Franco re duns in 1947 and 1966, alth them the level of abstention lower.

The distinction between rightist campaign for a "no" and the left's campaign for ple to stay away from the also seems to have been bl —judging from a scatterin conversations.

"I'm going to vote 'yes' be both the Communists and Pinar want me to vote 'no' taxi driver said the other r referring to a prominent ker" figure—but not rea that the Communists wante stentions on the referendum.

Elections to create a new liament are promised for spring.

12 Ethiopians Kille At Rally by Troops

NAIROBI, Dec. 16 (UP Twelve anti-government de strators have been shot killed by Ethiopian sec forces in the northern to city of Gondar, an official sp man said.

The report, monitored from Ethiopia radio, said t were forced to open fire on demonstrators last week when known persons fired at the rity forces in Gondar, spokesman said 31 persons wounded.

Man Faces Charges In French Slayings

SENLIS, France, Dec. 16 (—A 35-year-old former P Marine was charged today the murder of eight women at random over a seven period in the nearby tow Nogent-sur-Oise.

The police said Marcel Besault, married and father children, was the dreaded sassin of the shadows" wh rorized the small commun miles north of Paris with pe murders, always committe the darkness of the morni evening rush hours during winter or early spring.

Threat of Cuban Intervention Hangs Heavy Over Rhodesi

By Michael T. Kaufman

NAIROBI, Dec. 16 (NYT).—Behind the confidence of the Rhodesian military spokesman there was a small but evident streak of doubt. Yes, he said at a military briefing in Salisbury, the Rhodesian forces were getting all the supplies they needed. They were intercepting nationalist guerrillas almost as fast as the bands of young infiltrators crossed the border from camps in Mozambique. The "kill rate" was highly in favor of the Rhodesians. At the present level of warfare, he said, the Rhodesians could hold their own.

But then there was the flicker of doubt. Things, he said, could change drastically if there were "foreign intervention."

In other words, were the Cubans coming? Would they join forces with the Zimbabwe nationalists (Zimbabwe is the African name for Rhodesia) as they did with the Soviet-backed Popular Movement for the Liberation of Angola (MPLA)? It is a question, more often implied than stated, that lies behind much of the speculation on Rhodesia in Salisbury, in Pretoria and in black African capitals.

There has been no sign of any large influx of Cuban soldiers to Mozambique, as there was in Angola prior to that country's independence last year. But there are indications that the guerrilla chiefs and Mozambique, where the bulk of the guerrillas are trained and based, feel that the Cuban option is still open.

Since recent Rhodesian raids into their country, Mozambique leaders have said that they reserve the right to call upon friends and allies to repel attacks.

Cuban officials have asserted Havana's solidarity with both Rhodesian guerrillas and with Mozambique. Recent visitors to Maputo have seen sophisticated Soviet military equipment arriving in the Mozambican port, raising the question of who will man such weapons. In Angola, it was said, African troops lacked the training needed for such weapons and relied on the Cubans to man the equipment.

The Cubans are still deeply committed in Angola, where it is estimated that they have 14,000 to 18,000 men. This is close to 10 per cent of the Cuban Army. According to Western intelligence, the Cubans in Angola are rotated every six months at great cost, presumably borne by the Soviet Union. Some fighting by Angolan government troops with dissident nationalist factions continues, mainly in southern Angola. The Angolan minister of information has been quoted as saying that the continuing stabilization of the country by political education as well as military means may continue for years. In light of such comments, it seems unlikely that the Cubans can afford to leave Angola.

Another suggested inhibitant against the use of Cubans in Rhodesia is the fear among the nationalists and among the black African presidents who support them that such intervention could provoke increased South African support for Rhodesia, including the use of the South African Army.

The South Africans, when they fought alongside a black nationalist faction in Angola, sought to keep their involvement low-key. But would South Africa show similar restraint if Cuban forces entered Rhodesia? Many Westerners think not.

One advantage that the Rhodesian black nationalists and their supporters have gained so far from the Geneva talks is that the South African government, by throwing its weight behind a negotiated settlement in Rhodesia, has for the time being limited its involvement in the war there to supplying equipment to the Rhodesian forces.

Yet while it is no secret that Prime Minister John Vorster of South Africa does not want his country go to war in or over Rhodesia, nothing that he has said precludes the possibility of such a conflict should foreign, particularly non-African, soldiers join with nationalist guerrillas.

A Western military attaché in Pretoria said also that, despite the heavy losses suffered by Rhodesian guerrillas, their strategy of a terrorist war was more suited to their situation than would be a more conventional war with heavy equipment such as the Cubans might use.

By spreading thin Rhodesian defense forces along the large borders of the country, the guerrillas are eroding the Rhodesian forces' capacity. The Rhodesian forces, the attaché said, are finite while the guerrillas presumably have large reserves of still untapped manpower. If, on the other hand, the Cubans became involved in a conventional war, their forces would be ill while the Rhodesians, with tial South African aids would stand to gain.

Some black African leade believe that in terms of th tional sovereignty of Rh and of continental pride it be wrong to rely on several said Cubans to win the tion of 6 million Africans 270,000 white Rhodesians.

For all these reasons, the of direct Cuban involvem Rhodesia is not generally pe ed as imminent. There are analysts who feel that w more likely is the use of A troops from independent states.

However, as an African tional here in Nairobi said: stupid not to entertain th of this abstraction on the qu of Zimbabwe." He said he see many reasons why outsi tervention, particularly Cub sistance, should be ruled "but in other instances [of] his tactic and passive regis even necessary."

Where to find Jack Daniel's— a little help for our friends.

If you're having a difficult time finding Jack Daniel's, perhaps the list below will help. It names some of the restaurants, bars and hotels where our fine Tennessee Whiskey is served.

The demand for Jack Daniel's is great. But the supply can only be made through the slow, exacting process perfected by Mr. Jack Daniel. Each drop is mellowed through 12 feet of hard maple charcoal, then aged and watched over until it's ready to send your way. It takes time. But just one sip, we believe, will convince you that it's worth the wait.

New Man Assuming Control

Vance and Kissinger Discuss Three World Problem Areas

By Oswald Johnston

WASHINGTON, Dec. 16.—Cyrus Vance, quietly assuming control of the foreign policy bureaucracy he will head as secretary of state in the Carter administration, met with Henry Kissinger yesterday to review U.S. policy in three problem areas: the Middle East, Cyprus and southern Africa.

Mr. Vance was meeting Secretary of State Kissinger for the second time since his appointment, and he had the appearance of a man taking over. Asked by reporters before the meeting what he would discuss, Mr. Vance left no doubt that he had set the agenda. He would talk about the Middle East, he said, "then go on to other things."

Reporters who crowded into the State Department reception room in which the two were to meet during lunch directed not a single question to Mr. Kissinger, the star of two administrations.

After the two-hour private session, Mr. Vance again held an impromptu session with newsmen and said the discussion also touched on U.S. relations with Greece and Turkey, the continuing Cyprus stalemate and the stalled diplomatic effort to bring independence under black majority rule to Rhodesia. He gave no details.

Sources close to President-elect Jimmy Carter's foreign policy transition team said the group, made up of mostly youthful foreign policy specialists, is now mainly occupied with preparing briefing documents on the most pressing policy problems that will be facing the new administration in its first few months. The issues discussed yesterday are foremost among these.

The transition team has begun to bombard the State Department with requests for policy studies and some policy analysts are now mostly occupied with meeting these requests.

There was other evidence yesterday that a new team is beginning to influence policy, even though Mr. Kissinger has slightly more than a month to go as secretary of state. Sources disclosed that Mr. Vance gave no advance warning to Mr. Kissinger last week of his intention to meet with the Saudi Arabian ambassador to discuss oil prices.

Mr. Vance acknowledged to reporters that he had conferred with Ali Abdallah Alireza, the Saudi ambassador, but he declined to give any details. The meeting took place Saturday in New York.

Informed sources said few officials within the State Department knew about the meeting. The first public hint of it was given Tuesday, when Mr. Carter referred to it during a news conference in Plains, Ga.

Cyrus Vance and Secretary of State Henry Kissinger during State Department meeting.

'Constructive' Approach

MOSCOW, Dec. 16 (AP).—The Soviet foreign policy journal New Times expressed hope yesterday that Mr. Vance will take a "constructive" approach to the Soviet Union but warned him against interfering in Soviet human rights issues.

In the most extensive Soviet comment so far on Mr. Vance's appointment, the journal referred approvingly to Mr. Vance's interest in quickly concluding a new Soviet-U.S. strategic arms limitation treaty.

But it said Mr. Vance, in an interview, had called for close observance of how the Soviet Union handles the promises it made on human-rights and civil-liberties issues in the Helsinki agreement.

"It is not irrelevant to recall that the former administration had already set up a commission of 'observers' to look into how the [Helsinki] final act is honored by all the other countries except the United States," the journal said.

Ortoli Finds EEC Lax on Energy Policy

Calls Action 'Feeble'; U.S. Also Criticized

By David Haworth

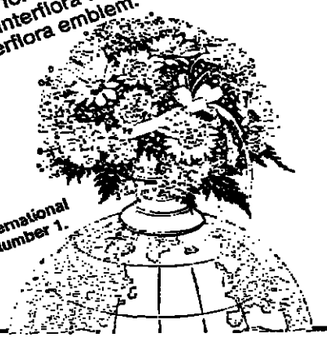
BRUSSELS, Dec. 16 (IHT).—Europe has failed to learn the lessons of the 1973 oil crisis and has not taken up its responsibilities to save energy since then, according to François-Xavier Ortoli, the outgoing European Commission president.

The chief executive of the European Economic Community was equally critical of the United States, whose oil consumption during the same period has increased.

Mr. Ortoli was speaking at a valedictory press conference as Commission president. On Jan. 1, he will become a vice-president under the new Commission leader, Roy Jenkins of Britain.

His theme, looking back over the last four years, was gloomy.

"The feeble response to calls for a common EEC energy policy to meet the tremendous challenge now facing the industrialized nations makes me wonder whether our peoples really do have the determination to guide their own destinies," Mr. Ortoli said.



He added it was essential for the EEC to convince its friends —notably the United States— that it will begin coherent, joint action on the energy front. He said, "The community dare not meekly sit back and accept being dependent on the outside world for over 60 per cent of its energy supplies."

The Frenchman said the fourfold oil-price increase of 1973 has had two effects on the community—stimulation of existing inflationary tendencies and growing EEC balance-of-payments deficits.

Mr. Ortoli called for a "greater solidarity" among community nations. "No one is strong enough to stand alone," he said.

"No one should believe that our difficulties are short-term," he said. "After three crisis years, the member states are as far out of step as ever. Annual inflation rates currently vary from 18.5 per cent to 5 per cent. Balances of payments differ sharply from one country to another and growth rates still lag below their pre-crisis levels."

Carter Appoints Envoy to UN And Finance, Security Aides

(Continued from Page 1)

selected Atlanta banker Bert Lance as director of management and budget; Mr. Vance, a Wall Street lawyer, as secretary of state; Bendix Corp. chief Michael Blumenthal as Treasury secretary, and Rep. Brock Adams, D-Wash., as transportation secretary.

Sources in the Carter camp said Joseph Califano is the top candidate to head the Department of Health, Education and Welfare. As chief domestic policy adviser to President Lyndon Johnson, Mr. Califano was the principal architect of the Great Society programs, many of which are administered by HEW.

Mr. Carter also is believed close to choosing Rep. Robert Bergland, D-Minn., to be secretary of agriculture.

Mr. Carter reportedly has been under strong pressure from foreign policy hardliners not to name the president of the California Institute of Technology, physicist Harold Brown, as defense secretary. He is said to have been advised by labor leaders to appoint John Dunlop as labor secretary, despite opposition by women and blacks.

Some Democrats, reportedly including Sen. Henry Jackson, D-Wash., are said to feel that Mr. Brown would not take a hard enough position against the Soviet Union.

Conceding that he had received some "expected" advice involving the top Pentagon job and other Cabinet positions, Mr. Carter denied that he had been pressured strongly.

He said he definitely will be appointing women and blacks to high government positions, noting that there will be jobs available "at the deputy secretary and assistant secretary" levels.

"I feel a responsibility to get the best qualified people in every instance," he said. "I feel women and blacks would agree with that."

Reagan Proposes 'Mini-Convention'

LOS ANGELES, Dec. 16 (IHT).—Ronald Reagan said yesterday the Republican party should call a national "mini-convention" to readopt its platform and discuss a major realignment, the Los Angeles Times reported.

He also said his party should consider changing its name because the word "Republican" may be turning off voters. And Mr. Reagan disclosed that a surplus of funds from his presidential campaign—estimated by an aide at about $1 million—will be used to establish a nationwide, conservative-oriented political action committee to help finance candidates for Congress and state legislatures.

The former California governor, who came within 60 delegate votes of beating President Ford for the presidential nomination at Kansas City last August, talked about the direction he believes the Republican party should take.

"It is very probably true," he said, that many voters who backed Mr. Ford did so more out of support for the party's platform than for the candidate. He said a "mini-convention" would be a "great" way to take the Republican party platform "and present it as an ongoing statement of policy" because such a meeting would call nationwide attention to the platform.

Civil Servant Wins Round 2 Against Bonn

BONN, Dec. 16 (Reuters).—A 57-year-old civil servant who complained that she was not given enough work to do won her case against the West German government today for wrongful dismissal.

Felicitas Strippgen was paid 3,100 marks ($1,300) a month in her office job at the Housing Ministry. In October, claiming she was bored doing nothing, she sued Housing Minister Karl Ravens before a labor tribunal, demanding work equivalent to her pay.

The two parties settled the dispute out of court but the ministry fired her for disloyalty after a television show about her. So Mrs. Strippgen, who is disabled, went to court again and today it ruled that she was not responsible for the TV program and ordered the ministry to reinstate her.

Gilmore Is in Hospital After Suicide Attempt

SALT LAKE CITY, Dec. 16 (UPI).—Gary Gilmore attempted suicide in his prison cell again today, a day after a judge set his execution for Jan. 17. He is in critical condition in a hospital.

Deputy Warden Owen Hatch said the 36-year-old condemned killer was found unconscious in his cell and was admitted to the University of Utah hospital here. A hospital spokesman said Gilmore appeared to be suffering from an overdose of drugs. His first suicide attempt, on Nov. 16, involved an overdose of sleeping pills.

Cuban Harvest Delay

HAVANA, Dec. 16 (Reuters).—Heavy rains in western and central Cuba have put back the beginning of the sugar harvest until the end of this month in four of Cuba's 14 provinces.

U.S. Navy Missile Contract Draws Fire From Congress

By John W. Finney

WASHINGTON, Dec. 16 (NYT).—The Navy recently awarded an $82.1-million contract to buy an airplane missile in apparent defiance of a congressional edict that the secretary of defense should first certify that the weapon was ready for production.

The Navy's action, reportedly taken at the direction of Malcolm Currie, director of defense research and engineering, is developing into a test case of whether the Pentagon or congressional committees are going to dictate the pace of major weapons programs.

Rep. Melvin Price, D-Ill., chairman of the House Armed Services Committee, last week wrote to Defense Secretary Donald Rumsfeld protesting the contract award and questioning whether the Defense Department had complied with a law passed last July.

After several days of high-level staff meetings between Navy and Defense Department officials, Pentagon spokesman Alan Woods acknowledged that the Navy had violated the law in awarding the contract, and he said the Defense Department was moving to "correct the situation."

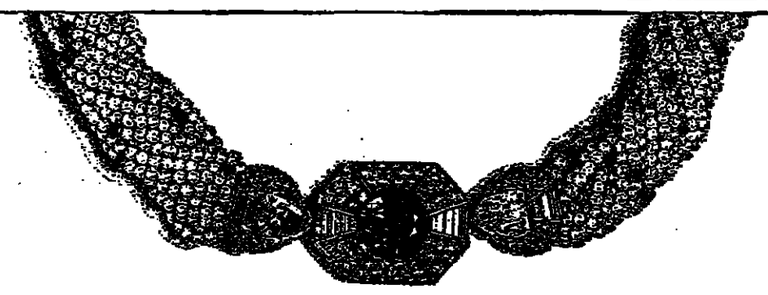
'Combat Effective'

A provision in this year's Military Procurement Law specifies that no money can be used to procure a new model of the Sparrow air-to-air missile until the secretary of defense has certified to the congressional Armed Services Committees that the weapon meets the requirements of the Navy and Air Force and is "combat effective."

Thus far, according to Rep. Price's letter, no such certification has been sent by the Defense Department. Yet on Nov. 30, the Navy awarded the $82.1-million contract to the Raytheon Co. to buy 1,100 of the missiles for the Navy and Air Force.

Mr. Woods explained that the Navy "system that was supposed to have run up a flag that a certification was required didn't work," resulting in what he described as a "technical violation" of the law. He said the Defense Department would "rectify" the violation, probably by sending a certification to Congress that the missile was ready for production.

But the contract award is being interpreted in congressional circles as a deliberate attempt to bypass a legal restriction imposed by Congress and to assert Pentagon independence of Congress in the management of weapons programs.



U.S. Airman Jailed For Jet Radar Theft

NORFOLK, Va., Dec. 16 (AP).—Airman Timothy Rice was convicted yesterday of stealing and destroying $450,000 worth of classified F-14 jet radar components. A military judge, saying the crime had "greatly curtailed the defense of our nation," sentenced him to three years at hard labor.

Rice, 19, had been charged with stealing property, destroying property and dereliction of duty in the September theft of the components from a fighter squadron at Oceana (Va.) Naval Air Station. He was found not guilty of the dereliction charge. No motive was established in the case.

Java Crash Kills 49

JAKARTA, Dec. 16 (AP).—A truck carrying 83 soccer players and their supporters to a match plunged into a river in east Java, killing at least 49, police reported.

KLM. From the people who offer you Europe's best bargains.

Giving value for money is a trait of the Dutch. As you'll find reflected on board KLM. In the friendly, efficient attention. The comfortable surroundings. Even in the way you're served a meal.

But also on the ground. More particularly, at Amsterdam Airport, KLM's homebase. All under one roof, it offers you every convenience imaginable. Restaurants, hotel rooms, lounges, conference halls, speedy transfer facilities.

And five superb taxfree areas, of which three are specially close at hand for transit passengers to pick up bargains.

And what a taxfree centre. Fifty one shops, selling anything from liquor to leather.

Perfume to pipes. Diamonds, tobacco, cameras and typewriters. Even cars. The largest selection of goods at prices that are the lowest in Europe.

In fact, in itself worth a trip via Amsterdam. With KLM. The airline that offers you fast, frequent flights to 40 European cities.

And 70 others worldwide. Ask your travel agent for full details on KLM's services and Amsterdam Airport's taxfree facilities. Free brochures available from: KLM Advertising Dept. AMS/MC, P.O. Box 7700, Schiphol-Oost, The Netherlands.

KLM

The reliable airline of those surprising Dutch.

Torture, Cover-Up in Chile Alleged

UN Gets Evidence on Aide's Death

By Dan Griffin

WASHINGTON, Dec. 16 (WP).—A United Nations official found dead last summer in Santiago was beaten or tortured to death and the Chilean authorities have covered up the case as an accident, according to evidence received by the United Nations.

Staff members in Chile have criticized the UN for not taking any vigorous action in the five months since Carmelo Soria Espinosa died. They say they fear that they will suffer reprisals for having aided Mr. Soria's family.

In New York, Erick Suy, UN under secretary for legal affairs, said that the United Nations has been "in constant contact" with Chile's ambassador and foreign minister, demanding a "full, detailed and thorough report" of the circumstances surrounding Mr. Soria's death in mid-July.

Coroner's Report

He said that Chile is investigating the case but has given no indication of when the investigation will be completed, and he expressed surprise at some of the details of the coroner's report.

Among the elements provoking an investigation are Mr. Soria's time of death and the condition of his body, sources say.

Although doctors say that some of his injuries would have caused almost instant death, the coroner's findings indicate that Mr. Soria died nearly 24 hours after his car plunged into a water-filled irrigation canal.

Moreover, three doctors questioned separately about the coroner's findings say that the multiple injuries Mr. Soria suffered are more consistent with strangulation and beating than with an automobile accident.

When Mr. Soria's widow and children pressed for an investigation into the circumstances of his death, they were put under surveillance and received threatening phone calls.

They left Chile at the end of September and now live in Spain, and according to a UN document, "the staff members who tried to help them in their efforts [to get a thorough investigation] are suffering the same fate" of surveillance and threats.

At the time of his death, Mr. Soria, 54, was chief of publications of the Latin American Demographic Center, a division of the UN Economic Commission for Latin America.

Spanish-born and a leftist, he had emigrated to Chile in 1947 and although he held Chilean citizenship as well as Spanish under the agreement between the Chilean government and the United Nations, he had diplomatic immunity.

Open Surveillance

Nonetheless, he was under open surveillance by Chile's National Intelligence Directorate (DINA) for some months before he died, his family and associates say.

They gave the following account of his death and the incidents surrounding it:

On Wednesday, July 14, Mr. Soria left his office at the usual time, a little after 5 p.m., for the 15-minute drive home and disappeared.

About 2 a.m. the following day, the hour Chile's curfew begins, residents in Santiago's northern Conchali District heard the sound of a car crashing down a steep 180-foot incline that leads to a deep irrigation canal. The next afternoon, police found Mr. Soria's car upside down in the canal; on the bank, near the car, were Mr. Soria's UN passport, his Chilean identification card and his scarf stained with blood. There was no body.

Since no body was found, a police official ordered the canal drained. Just before noon the next day, July 16, Mr. Soria's body was found face down in the water about half a mile downstream from the wrecked car.

The official autopsy report, which has not been made public, said that Mr. Soria died of injuries to the cervical area of the spine and massive brain hemorrhages.

Beaten and Strangled

The three physicians who reviewed the coroner's findings concluded that he was bound, beaten about the head and chest, strangled slowly and finally killed by sharp blows to the back of the neck.

Although Mr. Soria's associates say that he did not drink, because of a medical problem, his blood showed a high level of alcohol.

The doctor who performed the autopsy told family members that Mr. Soria was dead when he entered the water and that his body had been in the water for less than 12 hours, meaning that his car had been in the canal for at least 22 hours before his body was.

The head of Chile's criminal investigations bureau told the press that the case was closed as an "accidental death" and that Mr. Soria had died as a result of driving his car off a cliff while intoxicated.

A criminal court judge appointed to investigate the case refused, however, to characterize the death as accidental, and the investigation is continuing.

Mr. Soria, who was a friend of the late Pablo Neruda, the Communist Chilean poet, had held an important position in a government-owned publishing house during the Allende government, which was overthrown by a rightist coup in September, 1973. Many of his friends were leftist intellectuals.

Associates say that he had spoken of being followed by DINA agents. Nonetheless, they say, he did not seem to feel that he was in any danger.

Examining Judge Vetoes Tax Case On Wildenstein

PARIS, Dec. 16 (AP).—Examining magistrate Robert Landreau ordered prosecutors today to drop a three-year-old tax fraud charge against millionaire art dealer and racehorse owner Daniel Wildenstein. The prosecutors said that they would appeal the ruling.

The tax administration alleged that Mr. Wildenstein, 59, fraudulently established residence in the United States and Switzerland although his real domicile was in France, where he declared an income of only $10,000 to $12,000 a year. The tax men claimed that Mr. Wildenstein should have paid French income tax on at least $2 million annually.

The prosecution said Mr. Wildenstein spent at least four months of the year in France, where he keeps several country estates, nearly 2,000 race horses, a private plane, a helicopter and a yacht. His attorney, Arnaud Lyon-Caen, told Judge Landreau that Mr. Wildenstein has been considered a resident of both Switzerland and the United States for the last 32 years, and pays income tax in both countries.

Mr. Wildenstein was charged on Oct. 30, 1973, but was freed immediately on bail of 3 million francs ($600,000). At the end of the investigation, Mr. Landreau ruled that the prosecution had failed to establish a case for Mr. Wildenstein to answer.

Bright Spanish Yule

MADRID, Dec. 16 (Reuters).—The government yesterday gave Spaniards the go-ahead to celebrate a bright Christmas by temporarily lifting energy-saving restrictions on street illuminations, shop windows and the outside of homes.

Denmark Convicts 5 In Korean Envoy Case

COPENHAGEN, Dec. 16 (UPI).—Five Poles were convicted today of buying contraband cigarettes from the North Korean diplomats expelled in October for trafficking in illegal goods.

Ten others involved in the affair—including five Danes accused of buying contraband cigarettes and three Danes, a Syrian and a Lebanese accused of buying hashish—were still on trial.

Proposed Legislation Is Liberal

Abortion Bill Finds Smoother Going in Italy

ROME, Dec. 16 (NYT).—When 26-year-old Maria decided to have an abortion recently, she went to the headquarters of a feminist group for one of their weekly information sessions on the clandestine operations available for ending unwanted pregnancies.

A week later, in the kitchen of a house in the center of the city, she underwent a 20-minute abortion performed by two young women dressed in jeans.

The Italian Parliament this week is discussing a bill that would give this Roman Catholic country one of the most liberal abortion laws in Western Europe.

It would provide, in effect, abortion on demand.

Women now resort to clandestine abortions. Although an abortion in Italy is still regarded as a "crime against the race," about a million a year are carried out secretly.

In addition to the operations set up by feminist groups, Italian women charter planes to Britain or the Netherlands or simply go to the back streets of their home towns. The private doctors charge up to $600.

In Maria's case, she thought first of flying to London where, she knew, specialized clinics perform abortions. But she heard from friends that feminist groups in Rome carried out such operations safely and inexpensively.

At the information session, the method and after-effects were described and she was told that it would be "a political abortion at a political price" of Lira 50,000 (about $58), for those who could afford it. It would be less for those who could not afford the full amount.

Of the more than 60 women present, most were 16 to 25 years old.

Those whose cases were judged as urgent were given appointments immediately. Maria's appointment was last week.

"Everything was very relaxed," she said after it was over. "One of the women performed the abortion, which was almost painless. The other held my hand and explained every step. And they talked to me all the way through. I think it was the talking that helped most."

The women who performed the abortion were not doctors but had received brief training in carrying out simple abortions.

Maria said she did not have enough money for the full fee. "I gave them what I could afford, about 25,000 lire," she said. "Before I left they gave me the name of a gynecologist just in case, and the name of medication to help keep my muscles relaxed."

West Bank Arabs Continue Strike

RAMALLAH, Occupied West Bank, Dec. 16 (Reuters).—A strike by Arab shopkeepers protesting a new Israeli tax entered its second day here today.

Although business life was normal in Nablus, most shops in Ramallah, Hebron and other towns remained closed, but food and vegetable stores were open. Schoolchildren boycotted their classes.

Israeli security forces said that they had arrested youths believed to have been involved in more than a week of demonstrations against the tax. They also rounded up persons suspected of fomenting the unrest.

U.K. Referenda Over Home Rule By Scots, Welsh

LONDON, Dec. 16 (UPI).—The government said today the people of Scotland and Wales will be allowed to vote in referenda on whether they want limited home rule with their own assemblies.

John Smith, a government spokesman on Scotland, told Parliament, "The Cabinet decided this morning to hold referendum votes in Scotland and Wales."

He made the announcement at the beginning of the fourth and final day of a debate on a government bill that would give Scotland and Wales limited home rule and would establish assemblies in Edinburgh and Cardiff.

Mr. Smith said the government will insert a new clause into the Home Rule Bill providing for referenda in Scotland and Wales before the elected assemblies are set up.

Scandal Probers Fault Leadership At West Point

WASHINGTON, Dec. 16 (AP).—A special commission reported yesterday that the U.S. Military Academy was as much to blame for the worst cheating scandal in its history as the cadets who created it, collaborating last spring on a take-home examination in electrical engineering.

Unanimously endorsing the honor code but saying it was corruptly administered through the honor system, the commission—headed by former astronaut Frank Borman, a 1950 graduate of the academy—recommended that all 151 cadets expelled or reassigned for the cheating be reinstated "as soon as possible." They were in the class graduating next spring.

The commission said that cheating has been far more widespread than the Army has conceded and it criticized West Point's administration for failing to act on warning signs over the years. The commission declared:

"Inadequacies in the honor system, in the academy environment which was to have supported this system, and the administration of the . . . examination combined to make a cheating incident practically inevitable."

The commission, appointed by Army Secretary Martin Hoffmann in September, also said in its 91-page report that it was "distressingly apparent" that the honor system "had indeed become grossly inadequate by the spring of 1976."

Target Is Passed By Food Fund

ROME, Dec. 16 (AP).—A $1-billion food development fund set up under the auspices of the United Nations has passed its target for contributions, fund officials announced today.

The fund will become official "very shortly," when some members of the Organization of Petroleum Exporting Countries withdraw their original condition on their contributions: that they be matched with funds from the industrial world. The fund is called the International Fund for Agricultural Development.

A Landslide Victory

Jamaican Leader Wins Vote, Mandate for Socialist Policy

KINGSTON, Jamaica, Dec. 16 (AP).—Prime Minister Michael Manley won a landslide victory in yesterday's parliamentary election, gaining a clear mandate to move ahead with his "democratic socialism" policies.

Challenger Edward Seaga, who had attempted to wrest power from Mr. Manley with a pro-capitalist platform that attacked the Prime Minister's ties with Cuba, conceded defeat last night, saying: "I think the People's National party [Mr. Manley's party] has scored a clear and decisive victory."

The voting followed the most violent election campaign since Jamaica became independent from Britain in 1962. Police said one person was killed yesterday, but that the 10 hours of balloting went more peacefully than had been anticipated.

The government-operated television reported that on the basis of nearly complete returns from its correspondents at the 60 local tabulation centers, Mr. Manley's party had 392,200 votes to 285,800 for Jamaica Labor.

An official count will begin today at election headquarters in Kingston. Between 75 and 80 per cent of the 870,000 eligible voters cast ballots in the election.

Victory Statement

At a tumultuous victory celebration at his campaign headquarters, Mr. Manley told reporters: "There was this tremendous attempt to smear us with Communism, to make Communism an issue. Obviously the people have rejected this in a very, very decisive way."

But the 52-year-old Mr. Manley made an emotional appeal to his supporters to avoid violent victory celebrations or recriminations.

"I want to command all PNP people to be at work or at home tomorrow. I don't want to hear of any undue or unseemly celebrations in the streets," Mr. Manley said.

Security forces extended for 30 days a ban on political rallies.

The independent Radio Jamaica Ltd. projected that Mr. Manley's party would win 44 of the 60 seats in the House of Representatives. The radio gave Mr. Seaga's Jamaica Labor party 15 seats. Results were not in for one district. In the outgoing House, which had only 53 members, Mr. Manley's party had 37 seats and the Labor party 15.

No third party or independent candidates ran.

Mr. Seaga said in an interview that it was "difficult to say" what caused his decisive defeat in an election the analysts had rated a toss-up.

'Great Disproportion'

He noted that there was a "great disproportion" between the number of seats won and Jamaica Labor's share of the popular vote. He said gerrymandering to create seven safe seats had hurt his party.

Political observers said Mr. Seaga's party won a greater share than expected of the middle class vote in the Kingston area. But the party lost substantial backing in rural areas where it had traditionally been strong.

Mr. Manley called his victory "very important in the whole evolution of the Third World."

Mr. Seaga called on his supporters to accept the decision of the electorate. "I think we must accept it in light of the fact that the people had a clearcut choice before them," he said.

Miki Is Resigning Premiership and Party Post Today

TOKYO, Dec. 16 (UPI).—A spokesman for the ruling Liberal-Democratic party said today that Takeo Miki will resign tomorrow as Premier by quitting the party presidency, a post which carries with it the premiership.

Mr. Miki, 69, who has said he is quitting to show that he takes personal responsibility for the party's setback in recent elections, will submit his resignation to party executives at a morning meeting.

But he will continue as de facto head of the government until the lower house of parliament selects a new premier Dec. 24.

The Liberal Democratic party is to hold a caucus Dec. 23 to choose a new president. His election as premier the next day will be virtually assured, since the party still holds a majority in the lower house, thanks to the support of 11 independents.

Kodama Trial Put Off

TOKYO, Dec. 16 (UPI).—The Tokyo District Court today postponed the trial of Yoshio Kodama, accused of tax and trade law violations in the Lockheed scandal until after next April because of his illness. The trial was to have begun today, but Mr. Kodama, 65, is bedridden.

9 Black Students Guilty in Long S. Africa Trial

PRETORIA, Dec. 16 (NYT).—The longest trial ever held under South Africa's controversial Terrorism Act ended last night when nine of the country's principal black student leaders were found guilty of a conspiracy to endanger law and order. They face a minimum of five years in prison.

The judge, Wessel Boshoff, found the defendants not guilty on 11 of the 13 counts, including one that alleged that they had conspired to bring about revolutionary change by violent means.

The judge's ruling was remarkable for the degree of sympathy it implied for blacks who despair of achieving peaceful change.

He said that the tactics of the organizations represented at the 17-month trial were rallies and demonstrations, not sabotage and terrorist tactics. He added: "In the case of the blacks, we must remember that, if they use language which may seem to be unnecessarily strong, they have no effective voice or vote and can only protest against what they might regard as grievances."

Sino-Soviet Talks Reported Stalled

TOKYO, Dec. 16 (AP).—Chinese officials said yesterday that there was no progress in the Sino-Soviet border dispute talks in Peking "because the Soviet side made no concessions and refuses to reduce its armed forces along the common border," Japanese reports from Peking said today.

The officials were quoted as saying that the Soviet Union resumed the border talks in order to gain a better position in dealing with the United States and not because of any sincere desire to settle the dispute.

The reports said that this was the first confirmation by Chinese officials that the talks were deadlocked.

The officials were identified only as those in charge of border defense in northeast China.

Ireland, Russia Agree To Step Up Trade Ties

MOSCOW, Dec. 16 (UPI).—Ireland and the Soviet Union agreed today to step up cooperation in the economic, industrial and scientific fields, Tass news agency said.

An agreement on the expanded ties was signed by Irish Foreign Minister Garrett FitzGerald and Soviet First Deputy Foreign Trade Minister Mikhail Kuzmin.

Lisbon Tries PIDE Agent For Torture

A Former Policeman Denies Maltreatment

By Marvine Howe

LISBON, Dec. 16 (NYT).—One of the most prominent figures of the former dictatorship's political police went on trial today and confidently denied all accusations of maltreating prisoners.

The trial of former assistant inspector Henrique de Sa Seixas is widely seen as a test case as to whether Portugal's military courts intend to sanction the widely detested political police generally known by its initials PIDE.

Six PIDE officers and agents have been tried, convicted and set free since the trials started at the beginning of this month. All of them were granted extenuating circumstances, given light sentences and released because they had already served their time in preventive detention.

Mr. Seixas faced the court today on the first day of the trial and rejected accusations of witnesses who alleged that he had used torture against political prisoners.

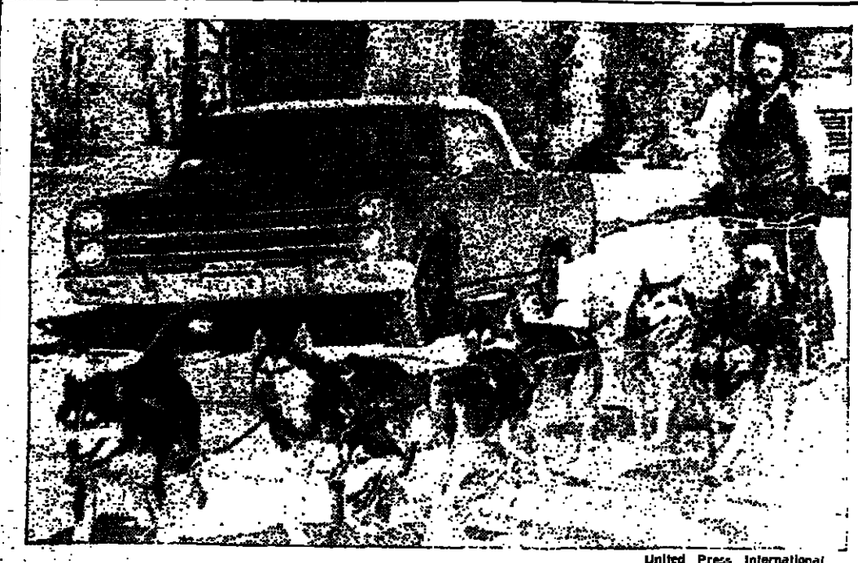
Mr. Seixas, who was one of a dozen PIDE agents not to be freed pending trial, was at one time chief of the prison guards at the concentration camp of Tarrafal in the Cape Verde Islands, a former Portuguese colony.

There have been press attacks against the leniency of the military courts and indignant protests from the general public.

Socialist Deputy Carlos Candal denounced the trials as "truly scandalous," and has presented to the National Assembly a bill calling for the repeal of the legislation specifying special extenuating circumstances for the PIDE.

The Portuguese public has been critical of the long delay in bringing the PIDE men to trial and is abashed that even officers with responsibility have been set free.

A score of PIDE agents, informers and officers are to be tried by the middle of next month in Lisbon's two military courts.



Courts Not Equipped

Another PIDE officer, Antonio Domingues, is also on trial not for belonging to the organization but for the murder of a Communist sculptor, Dias Coelho, in 1961.

At this rate, observers point out it will take years to try all the PIDE agents. About 2,000 of them were arrested after the overthrow of the rightist dictatorship April 25, 1974. They were held under preventive detention for many months by the revolutionary military authorities until most of them were progressively released after the purge of the far leftist military a year ago.

Minister of Justice Antonio Almeida Santos explained recently that the principal reason for the delay in the PIDE trials is the fact that they come under military jurisdiction and the military courts are not equipped to handle so many cases.

He said that the lightness of the sentences was due essentially to a spirit of comradeship which existed between PIDE agents and the armed forces in the struggle against nationalists in Portugal's former African colonies.

Guerrilla Drive Includes Leaflets, Intimidation

Morale of Black Rhodesia Forces Is Target

By Robin Wright

SALISBURY, Rhodesia, Dec. 16 (WP).—Guerrillas have opened a campaign aimed at destroying the morale of almost 10,000 Africans serving in the Rhodesian Army and police.

The two-pronged campaign includes a new wave of attacks and intimidation against families of African soldiers and policemen, and threatening leaflets urging them to "turn their guns" on whites.

The strategy in the four-year-old war, revealing a new level of sophistication among the insurgents, could be devastating to the Rhodesian effort to counter insurgency in the escalating conflict since both the army and police depend heavily on African support.

There are about 3,500 Africans serving with the battalions of the Rhodesian African Rifles—65 per cent of Rhodesia's regular army forces—which have vital front-line roles in the war against guerrillas based in neighboring Mozambique and Zambia.

Blacks also dominate Rhodesia's super-commando unit, the Selous Scouts, which has been heavily involved in intelligence and recent raids on guerrilla camps across the border.

And in the Rhodesian police, there are about 6,000 blacks, making up 75 per cent of the force, many in support units that have a combat role.

Military authorities maintain that the psychological campaign has not yet led to disaffections by African troops nor a lowering of morale.

But the strategy is aimed at Rhodesia's largest subtribe and the group most vulnerable to intimidation, the Karangas.

The majority of black troops and the majority of guerrillas come from this militant subgroup of the Shona tribe. Some families have relatives fighting on both sides in the war.

Guerrilla leader Rex Nhongo and the commander in chief of the Zimbabwe People's Army, Gen. Josiah Tongogara, are both Karangas.

This has made the campaign easier for the guerrillas, since the tribal network and familiarity with the area near Fort Victoria facilitates the operation.

The objective appears to be to pressure an influential section of Rhodesia's 6.3 million blacks to change allegiance and provide active support for the insurgents.

Torture Cited

For about the last two months, guerrillas have focused their attacks on Kraals, or African villages, in the Gutu and Bikita tribal trustlands, where officials claim a favorite guerrilla tactic has been the dismemberment and torture of Africans, often in front of relatives.

The government recently published a pamphlet "Harvest of Fear," detailing attacks. A particularly grisly report involved a black whose ears, nose and lips were cut off by guerrillas. His wife was then allegedly forced to fry the skin and eat it.

The crudely prepared leaflets now circulating in southeastern Rhodesia, obviously aimed at Karanga soldiers, ask: "Do you get as much money as white soldiers?"

"Do you have homes as beautiful as those of white soldiers? Do your children go to beautiful schools? Yes or no? Why? Because you are black. You have no brains. You are said to be as good as an animal, a baboon. This is what the whites think."

U.S.-British Talks

LONDON, Dec. 16 (UPI).—U.S. and British officials conferred here today on possible new peace moves in Rhodesia, the Foreign Office said.

A spokesman said John Reinhardt, U.S. assistant secretary of state for public affairs, and Frank Wisner, chief of the southern Africa desk in the U.S. State Department, held talks with Ted Rowlands, Foreign Office minister of state, and other British officials.

Ivor Richard of Britain, the Geneva conference chairman, also took part, the spokesman said. He said Mr. Richard will return Saturday to the post of United Nations ambassador. Shortly after Christmas, Mr. Richard will go to Africa to discuss with government leaders there steps to revive the deadlocked Geneva peace talks on Rhodesia.

"The purpose of the meeting was to align U.S. and British thinking before Richard leaves for Africa," the spokesman said.

Hanoi Plans Major Population Shifts in 1977

By David A. Andelman

BANGKOK, Dec. 16 (NYT).—Vietnam Premier Pham Van Dong told the fourth Vietnam party congress today that large-scale redistribution of the nation's population would begin early next year, including movement of workers from the southern portions of the country to the north.

He presented a summary of the nation's five-year plan for development and economic growth to a morning session of the congress. The session was broadcast by Hanoi radio and monitored here.

While Mr. Dong did not spell out in detail how many persons would be mobilized, the head of the party's Saigon committee reported yesterday that about a million could be expected to be moved out of the former southern capital into new economic zones in the countryside.

Premier Dong seemed to Western analysts here to be indicating that there would be a movement northward involving still other individuals.

"Distribution of work forces will be started in 1977," Mr. Dong told the thousands of assembled delegates and foreign observers. "Areas of dense population where there is surplus labor will be the first areas to be rearranged. Work forces in the south will be moved to the north if it is necessary."

Such themes have been echoed and, in some cases, expanded upon in speech after speech by senior officials and provincial-level cadres, providing an emerging pattern during the first three days of this largest gathering of Vietnamese Communist party officials since 1960.

It is a pattern of domination that the North seems intent on continuing to exert over the major affairs of the nation. Southerners seem to have had little role to play in any of the proceedings of the congress.

Western analysts are waiting for the disclosure of the new Politburo and Central Committee lists to determine whether the Lao Dong (Workers party) really has any intention of more fully integrating the south into the party organization and whether the party will follow through on the desire expressed in recent weeks to revitalize the organization by bringing in young blood.

"Most of the accents I've heard in the past three days in the broadcasts have been northern ones," said a veteran Western expert in Indochinese affairs, referring to the six-tone dialect spoken in northern Vietnam in contrast to the five-tone language spoken in the south. Hanoi radio has been carrying full coverage of the proceedings.

Since the take-over of South Vietnam by the Communists in April of last year, the south seems to have had little role to play in the top organization of the Lao Dong, which has ruled for more than 20 years in Hanoi.

Member From South

The 11-man Politburo has remained virtually unchanged, with Pham Hung, the member earmarked to run the party organization in the south, as the only senior representative from the southern part of the country.

Today, the principal reports of the session were completed with the presentation of the report of the army and the Ministry of the Interior.

The army report was, surprisingly, not delivered by the army commander, Gen. Vo Nguyen Giap, but by the army's chief of staff, Gen. Van Tieng Dung, known as the "liberator of the south" and believed the likely successor to the great tactician of much of the war, Gen. Giap.

Neither this report nor that of the minister of the interior, understood to be Gen. Dung's twin brother, Tran Quoc Hoan, contained any surprises but continued the refrain of the need to maintain the same national strength that "crushed the American imperialist aggressors."

Suicide Estimate

PARIS, Dec. 16 (AP).—A Canadian Jesuit missionary recently expelled from Saigon, the Rev. André Gelinas, estimates that 15,000 to 20,000 Vietnamese have committed suicide rather than live under Communist rule.

Father Gelinas, who worked in Vietnam for 19 years, said that "entire families" ended their lives. He said he based his estimate on "conversations with hospital officials and some of the would-be suicides who lived."

New President Vows to Reshape Mexico Economy

MEXICO CITY, Dec. 16 (Reuters).—Mexico's new government introduced yesterday a budget under which federal spending is sharply reduced while new government investments are channeled into agriculture and industry.

President Jose Lopez Portillo, who took office at the beginning of this month, said that he would double investment in energy facilities, including the country's new oil fields, and would aid the petrochemical, mining, wood pulp and fertilizer industries.

"In the face of the scarcity of resources which today characterizes the national economy, it has been decided to strengthen production which generates jobs and stimulates other activities," the President said.

He said his budget was intended to help Mexico get back on its feet after the severe recession which followed the floating of the peso on Aug. 1.

Meanwhile, about 7,000 landless peasants yesterday began a 950-mile march to Mexico City aimed at persuading the government to expropriate more big estates. Police said the marchers set out peacefully from Los Mochis in Sinaloa State, northwest of this capital.

S. Africa Plans Army for Women

GEORGE, South Africa, Dec. 16 (AP).—A women's corps is to be formed in the South African Army early next year, Defense Minister Pieter Botha said here today.

Such a unit had become necessary to accommodate the growing number of women who want to join the armed services, he said in an address marking the Day of the Covenant, which celebrates the defeat in 1838 of an army of Zulu warriors by a vastly outnumbered force of Boer pioneers.

Mr. Botha said that about 500 women a year would be trained at the Civil Defense College here, which, so far, has been training about 150 women a year in civil preparedness. The college would be expanded and renamed the Army Women's College, he said.

NATO, East Halt Troop-Cut Talks

VIENNA, Dec. 16 (UPI).—NATO and Warsaw Pact negotiators recessed their three-year-old disarmament talks today with a report that they have so far increased, instead of reducing, troop levels in Central Europe.

East German delegation chief Ingo Oeser suggested that U.S. President-elect Jimmy Carter might help get the deadlocked talks moving when he takes office in January, by "overcoming passivity on the Western side."

Willem de Vos van Steenwijk of the Netherlands said the latest NATO computations show there has been "a slight increase in manpower on both sides" since the talks on mutual and balanced force reduction opened in October, 1973.

Syria Denies It Caused Blast at Baghdad Airport

DAMASCUS, Dec. 16 (Reuters).—Syria today denied the Iraqi allegation that it was responsible for Tuesday night's bomb explosion at Baghdad airport, which killed three people.

"The charge by Iraq that Syria arranged the explosion is intended to cover up for the crimes Iraq has committed in Syria," an official spokesman said.

He added that some of these activities had already been revealed and others would be made public.

The Damascus newspaper Tishrin suggested that Iraq itself planted the bomb. "When all the Arabs point an accusing finger at them, they set off the bomb in Baghdad airport," Tishrin said.

An Iraqi spokesman said yesterday that a suitcase containing the bomb had been slipped aboard an Egyptian airliner which flew here from Damascus. He blamed Syrian authorities.

Mrs. Papadopoulos Acquitted of Fraud

ATHENS, Dec. 16 (AP).—Despina Papadopoulos, wife of imprisoned former strongman George Papadopoulos, was acquitted yesterday on charges of defrauding the state during the dictatorship years from 1967-1974.

Mrs. Papadopoulos admitted that she had illegally received a salary from the Greek Central Intelligence Agency during the dictatorship era without working for it. After the collapse of the army-backed regime in July, 1974, she returned 800,000 drachmas ($25,000).

2d Electricity Strike In 2 Days Snarls Paris

PARIS, Dec. 16 (AP).—A two-hour cut in electricity yesterday disrupted service on the Paris Métro, forced cancellation of some suburban trains, snarled automobile traffic and inconvenienced many parts of France.

It was the second day in a row that employees of the state-owned gas and electricity company struck briefly to protest the government's cancellation of a 1971 agreement giving them annual wage boosts 2 per cent above the cost-of-living increases.

ack of Quorum ets Back House robe of Koreans

VASHINGTON, Dec. 16 (NYT). Leaders of the Hous: Ethics mmittee vowed yesterday to ke a thorough investigation South Korean influence-ped-ng in Congress, but their plan launch officially a formal in-ry was delayed, probably until t month.

quorum of the committee did show up. Five of the 12 mem-s attended, but seven votes are uired for any action to be en.

lowever, Rep. John Flynt jr., eorgia Democrat who is chair-n of the committee, and Rep. yd Spence of South Carolina, ranking Republican, an-nced their intention to ap-nt Philip Lacovara, a Wash-ton lawyer and former coun-to the Watergate special pro-utor, to be counsel for the mittee's investigation.

ep. Flynt said the staff of his mittee had begun a prelimi-y inquiry Sept. 27 and had mulated more than 500 pages material dealing with allega-s.

Britain's Labor in a Box

The speech delivered in the House of Commons on Wednesday by Chancellor of the Exchequer Denis Healey, announcing spending cuts and higher taxes, does not look like the decisive event in the struggle to stem Britain's economic decline. On the contrary, financial markets at home and abroad received the speech with skepticism: the British stock market fell and the pound plunged still further.

What troubles the markets—and, even more important, British public opinion—is doubt whether the Labor government has the will and the political strength to do the job. Far from rallying the nation to a "Dunkirk spirit," Healey and Prime Minister Callaghan seem to be making their moves mainly in response to the pressures of the International Monetary Fund as the required condition for getting an urgently needed $3.9-billion loan.

The IMF had originally told the British government it would have to cut the budget by $4.8 billion to get the loan; Healey has trimmed this to $4.2 billion, of which $1.7 billion is to be cut in the fiscal year starting next April 1 and $2.5 billion the following year. The tax increases are on liquor and tobacco, but the government considerately put these off until after Christmas.

The Bank of England intends to slow the rate of growth of the money supply to 10 per cent in the coming year, and believes this will gradually bring down the present rate of inflation. Yet it expects inflation to continue at about a 15-per-cent rate for several months longer, as higher costs of imports, resulting from the recent fall of the pound, are passed through to consumers.

The Callaghan government faces threats to its existence from both the left and the right. The Conservatives, led by Margaret Thatcher, may try to overthrow Labor on the issue of "devolution"—greater self-government for Scotland and Wales. The threat could not come at a worse moment, in the midst of Britain's economic crisis.

At the same time, the left wing now controls the National Executive Committee of the Labor party, and is challenging Callaghan's and Healey's entire economic policy of "austerity." In his new budget, Healey was clearly trying to avoid losing not the left wing but the "moderates," resistant to slashes in housing, education and social services. Healey had to be wary of destroying the compact on which his party's "incomes policy" of voluntary wage restraint by the trade unions depends.

Thus, Labor is in a box from which it will be hard to escape. Its best hope is that the pound will hold at about its present level, and that the worst impact of the austerity program on the British economy will be over by the second half of next year. By then inflation may be slowing and unemployment starting to recede.

Callaghan's capacity for leadership will be at stake during the hard times that lie ahead. The package Healey has put together appears acceptable to the majority of his own party, and the left wing will be loath to precipitate a general election that could, and probably would, hand the government over to the Tories.

It will take nerve—and luck—for Labor to check the decline, but it is by no means impossible if Callaghan can only raise the confidence and support not only of his own party but of a beleaguered nation.

THE NEW YORK TIMES.

The Cutting Edge

Under fire from students who charged that their education was "irrelevant," many college faculties and administrations in the turbulent 1960s beat a hasty retreat and abandoned most course requirements. Viewed initially as a triumph of student freedom, the absence of a firm framework of study has begun to be recognized, even by many undergraduates, as an abdication of institutional responsibility and a detriment to effective education.

There are encouraging signs that a counter-revolution is now gathering force. Concerned academicians are trying to chart a new course of liberal learning.

The revolt against the old requirements was frequently justified by the stagnation that had turned mandated courses into a bore for students and teachers alike. Many of the courses undergraduates were compelled to take treated students as a captive audience, allowing academic departments to build overstaffed empires, without sufficient concern for the quality of instruction.

Yet the absence of requirements signals a dangerous retreat from the common ground shared by educated men and women. At a time of extreme pressures toward specialization and early career decisions, lack of consensus on the basic intellectual underpinning needed by college graduates only reflects a fragmented society whose elite of talent will find communication ever more difficult.

Fortunately, a number of leading institutions have begun the search for new definitions of a cohesive program of general education. Henry Rosovsky, dean of Harvard's faculty of arts and sciences, has initiated a crusade against an education that has "no common denominator." Harvard, which in the 1940s codified the then prevalent idea of general education, is once again trying to list specific fields in which students ought to have "informed acquaintance."

Columbia, which has never given up on certain basic courses in the humanities, hopes that the rest of academia may once again be persuaded to acknowledge that some of the "great books" remain indispensable to those who claim to be educated.

The issues and the emphasis in any new core curriculum call for an open mind on the part of those who attempt to chart tomorrow's liberal education. The world is no longer bounded, as critics of the old approach have rightly charged, by the region between Athens and California. The non-Western world cannot be ignored. An understanding of science and technology cannot be left to the engineers. Knowledge of the urban condition and environment is crucial.

There has been a tendency to blame politicians too exclusively for their narrow view of the U.S. future. The range of a self-governing nation's vision is not primarily determined by its elected leaders. The key to a wider focus is held by educated citizens who are any civilization's cutting edge. The return to a common core in undergraduate education is essential to sharpen that edge.

International Opinion

NATO on Use of A-Arms

The refusal [at the NATO talks] to pledge not to use atomic weapons first is more justified than appearances would make one believe. The atom logic, different from that of conventional arms, has actually made the difference between offensive and defensive arms very confused, to the point that, in extreme cases, the so-called offensive arms can appear as the most defensive ones. This is, for example, the case of the anti-missile arms, apparently "more respectable" than the offensive arms insofar as it is quite normal to try to protect one's population and one's own forces from a nuclear holocaust, but which actually are "destabilizing" and therefore rather aggressive inasmuch as they can facilitate the designs of a potential aggressor by protecting him from reprisals. The same applies to the prohibition to use nuclear arms first. Nothing in any case could guarantee observance of this interdiction. By virtue of what is termed "the equalizing power of the atom," the possession of a nuclear deterrent enables a middle-sized power like France to threaten to inflict a punishment disproportionate to the pursued stakes on a more powerful aggressor, and therefore to discourage him to use against a weaker power even the non-nuclear means which it has in large quantities. By forbidding in advance anyone to use atomic arms, the bigger power suggests that it tries to eliminate the deterrent which the smaller powers could acquire, while on the contrary keeping for its own use the coercive power which the ownership of the immense conventional arsenal of a superpower gives it...

Brazilian View of Soares

The results of the municipal elections in Portugal consolidated the position of Premier Mario Soares in the government and so he can arrive in Brazil, in this visit of clear political importance, with ample tranquillity and redoubled authority for the conversations on the agenda. Meanwhile, more than only a party leader and a man of the government who was victorious in the election, Mario Soares will arrive here as a symbol of a viable Portugal: A nation which managed by hard work and pain to escape from the Communist precipice, from the mad military-Communist adventure, from the programmed economic disorder to adjust itself to political, social and cultural models of Western Europe.

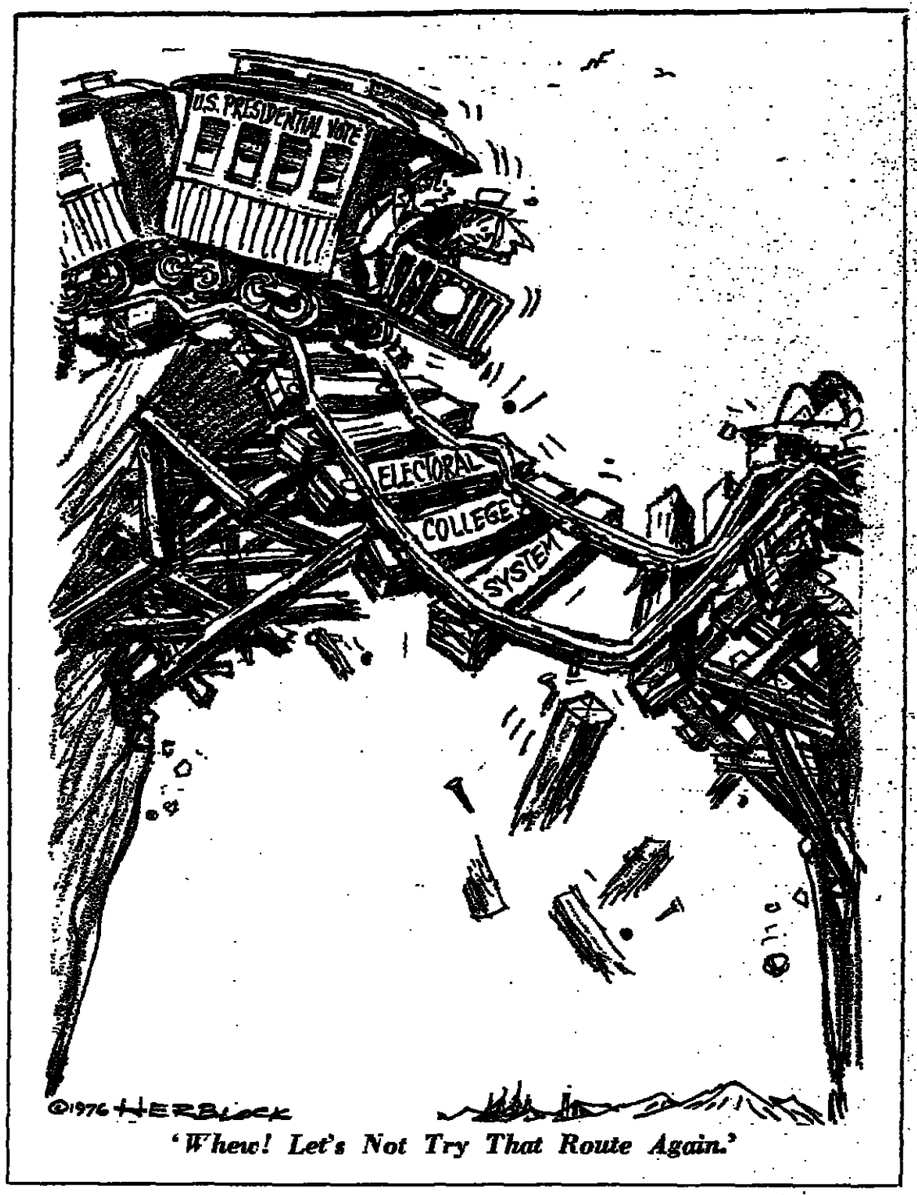
Seventy-Five Years Ago



December 17, 1901

BOLOGNA—"Thirty or 40 years have not sufficed to unify morally a people like the Italian, which for centuries has been divided, and which includes so many differences in customs, language and traditions. But it must be remembered and thoroughly understood that the interests of the north and those of the south are the interests of Italy, and they must be studied in the interests of Italy," said an editorial from the Resto del Carlino yesterday.

Fifty Years Ago

December 17, 1926

NAIROBI, British East Africa—Carl Ethan Akeley, American big-game hunter, naturalist and explorer, sculptor and artist, was buried on Mount Mikendo, Uganda, in the heart of the game country where he spent so many years of his life. The noted explorer was buried near the place where he died, in accordance with his wishes. The services were attended by the American consul, Martin Johnson and scores more. Mrs. Akeley will carry on her husband's work.

'Whew! Let's Not Try That Route Again.'

New Israeli Signals on U.S. Arms

By William Beecher

WASHINGTON.— Israel asked the United States this week to cancel a request for 175 U.S.-made M-60 tanks and permit Israel instead to apply the funds to produce an equivalent number of a radically new tank of its own design.

This was one of a series of significant arms and financial commitments Defense Minister Shimon Peres sought from the outgoing Ford administration in hopes they would carry over to the Carter administration.

U.S. and diplomatic sources said the requests were pressed by Peres not only to Secretary of State Henry Kissinger and Defense Secretary Donald Rumsfeld, but also discussed with Cyrus Vance, who has been designated by President-elect Jimmy Carter to be his secretary of state, and with James Schlesinger, who may be given a top role in the next administration.

Fighters, Too

Among the other requests, the sources said, were:

- Permission to co-produce in Israel 200 of 250 U.S. F-16 jet fighters, the supply of which was promised in principle to Israel in the fall of 1975 as part of the Sinai-2 agreement.
- Permission to co-produce in Israel a new U.S. hydrofoil missile patrol boat having roughly twice the speed of conventional patrol boats.
- Agreement that President Ford would ask for at least $1.8 billion in aid to Israel in his final budget, which goes to Congress on Jan. 16. Israel previously had sought $2.3 billion, but got word the President had slashed the total to $1.5 billion.
- Agreement to apply formally to Congress soon after it convenes on Jan. 4, and well before the Carter administration takes over on Jan. 20, for permission to sell some advanced weapons systems President Ford promised to provide shortly before the election. These include a new concussion bomb and a new night-viewing system for planes and helicopters.

Sources said Peres was given assurances that letters of offer would be sent to Congress early next month on the new weapons, but that the co-production schemes present so many problems that they might have to be slipped to the new administration for decision.

The sources said that Peres stressed Israel's willingness to constructively explore the possibility of an overall settlement of the Arab-Israeli dispute, but wishes to assure itself that it will be strong enough to take the security risks that shrunken borders would entail.

He reportedly argued that the buildup of Israel's defense industry would enhance its self-sufficiency and that arms commitments made by the outgoing administration would less likely upset the negotiating climate than if made by President Carter during the height of discussions on the convening of a new Geneva conference.

Peres is understood to have been told, however, that most of the issues would of necessity have to be reviewed by the new President and some decisions couldn't be made before Jan. 20.

For instance, on the request to co-produce the F-16, the members of the European consortium, who are buying the plane for their own air forces, have been assured the United States would make no sales to third countries without full consultation, and that they would be permitted to make 10 per cent of the components of F-16s sold elsewhere.

Would Belgium, for instance, want to tie itself to a contract to manufacture components for frontline fighters for Israel knowing that in the event of another Mideast crisis and oil embargo it might lose Arab oil because of that fact?

Would President Carter, with his stress on cutting unemployment in the United States, be willing in effect to transfer jobs to Israel?

During the presidential campaign, Carter talked of the need to review the massive sale of U.S. arms abroad, particularly to the Mideast. The expectation in many quarters has been that he would order a temporary freeze in new arms commitments pending an overall review of weapons sale policy.

It is thus understandable that Israel would seek to firm up commitments as soon as possible before Ford leaves office.

Sources say Israel is strapped for funds to build many of the new tanks, dubbed the Chariot. It is a heavy tank, of very low silhouette, capable of long range and carrying not only its crew but a number of infantry or commandos as well.

If the U.S. cancelled a request for 175 M-60s, and provided the $80 million to $100 million to Israel to produce the Chariot, that would be a major shot in the arm to the program. Peres pointed out that some of the components of the new tank would still be produced in the United States, thus somewhat mitigating the adverse impact on jobs.

Sources said Peres, who has hopes of succeeding Premier Yitzhak Rabin in elections next fall, assured Ford and Carter officials that the situation in southern Lebanon seems to be nonvolatile at the moment and that Israel has been impressed with the apparent rise of interest on the part of Syria, Egypt and Saudi Arabia to explore an overall settlement. But he was less than optimistic about the chances of such a settlement next year.

Mr. Beecher, a member of the Washington bureau of the Boston Globe, is a former deputy defense secretary for public affairs.

The Cold Warriors

By Anthony Lewis

BOSTON—Five weeks before he takes the oath, President-elect Jimmy Carter is in danger of compromising the character of his presidency in a vital respect. That is the uncomfortable inference to be drawn from what is known of the process at work in his choice of a secretary of defense.

Carter is under pressure to pick a hard-line figure, someone who takes a dim view of agreements with the Soviet Union and favors higher U.S. defense spending. So far, it is not at all clear that Carter feels able to resist the pressure—or wants to. And resistance is crucial, not only in the particular context but in terms of the new President's general freedom of action in future.

The pressure is coming from familiar sources: conservative Democrats in Congress, the labor movement, right-wing newspaper columns and editorial pages, the warrior intellectuals in the academic world. They are able, experienced people, the more effective because they focus single-mindedly on one area of policy. And as this episode shows, they play rough.

Their favored candidate is James R. Schlesinger, secretary of defense in the Nixon-Ford administration. Those pushing him range from Sen. Henry Jackson to Lane Kirkland, secretary-treasurer of the AFL-CIO and George Meany's heir apparent. But the first effort has been to prevent the appointment of a defense secretary with a different view.

The opening target was Paul Warnke, assistant secretary of defense in the Johnson administration, who played a key role in 1968 in stopping the escalation in Vietnam. The critics portrayed him as a far-out dove—a wild mischaracterization of a blunt, strong-minded lawyer known for his insistence on the facts, his unwillingness to take old formulas for granted. Warnke has even said that defense budget figures should be subject to questioning as others are.

Next came Harold Brown, former secretary of the Air Force. When Carter seemed about to pick him, the knives got to work again. A Wall Street Journal editorial said, "Our contacts in the national security community are absolutely terrified" at the thought of Brown becoming defense secretary.

The extraordinary thing about the attack on Brown is that he is to the right of center in defense policy. He supports production of the B-1 bomber. And his record on Vietnam was hawkish. On March 4, 1968—less than a month before President Johnson limited the bombing and moved for a settlement—Brown put forward three options for escalation of the bombing. According to the official history in the Pentagon Papers, he "envisaged the elimination of virtually all the constraints under which the bombing then operated and an aggressive attack on North Vietnamese resources, import capability and population centers." Bombing would have been permitted "without the present scrupulous concern for collateral civilian damage and casualties."

Sharp Concern

Those familiar with the situation at the time say that Brown as Air Force secretary had a minimal policy role and was probably just passing on proposals. But the fact that he put his name on such ideas at that late stage of the war gives reason for sharp concern about his judgment, to put it mildly.

As for Schlesinger, he is rightly held in high regard for his integrity. For example, when he became director of the Central Intelligence Agency he promptly turned over to the Watergate prosecutors evidence that Richard Helms had deceitfully withheld.

But his appointment now to Defense or any other national security job would be a powerfully distorting symbol for the Carter administration. However wise it was to be skeptical of the advantages for the United States in some of Henry Kissinger's deals with the Soviet Union, Schlesinger came to seem a figure obsessed by fear of Soviet aggression. To choose him would be to signal a return to the cold war.

Those putting on the pressure would doubtless prefer a sharp turn away from détente, from the attempt to negotiate with the Russians. But Carter as a candidate promised something more sophisticated, more difficult, more necessary. That is to be strong in opposing Soviet cruelty and aggressiveness—but also confident enough to negotiate for mutual advantage.

An escalating arms race does not benefit the security of the United States: the old leaders have given us less security at more cost. The necessity of the next administration is precisely to overcome the momentum of old ideas, of military-industrial habits, and find a new security equilibrium. And Jimmy Carter seemed an ideal leader for that effort because he had been in the military himself: He did not need to prove himself a patriot.

The fact that the cold warriors have fought even a Harold Brown suggests that they have great confidence in their ability to influence Carter. If he gives way to them now, they will not stop. That is why Jimmy Carter's choice of a defense secretary has become so important for him and the country.

Soviet Inefficiency And Priorities of U.S.

By Walter C. Clemens Jr.

WASHINGTON.—"How can the Soviet Union have been the first country to launch a sputnik, test-fly an ICBM and deploy an ABM defense?" This question comes naturally to a Westerner looking for a bobby pin, a Band-Aid, or even good tennis shoes in Moscow (where they would be much easier to find than in the provinces).

One traditional explanation has been: "The Soviet system may be clumsy in producing consumer goods, but it excels where the Kremlin decides to commit its best brains and resources." This commonplace is now being challenged. The apparently poor performance of the MiG-25, that fell into Japanese hands only adds to mounting evidence casting doubt on the belief that Soviet socialism can be efficient (at least in some sectors) even if it is not democratic. This belief should have been questioned long ago.

The physicist Andrei D. Sakharov has warned the Politburo that Soviet economic and technological development will remain second-rate unless the whole social order is liberalized and Soviet intellectuals are permitted to communicate freely with each other and the outside world.

CIA Studies

Mr. Sakharov's judgment now seems corroborated by recent CIA studies showing that the Soviet Union is grossly inefficient—not only in agricultural and industrial production but in military production as well. The Russians invest more of their natural and produced wealth than the United States, sacrificing not only their freedom but their living standards, and wind up with a smaller return.

The Soviet Union devotes one-fourth of its gross national product to investment, compared with one-sixth in the United States, but total Soviet production remains only half that of America's while Soviet living standards are only one-third the U.S. average. Indeed, they are lower than in many East European countries. Soviet output per unit of capital and labor is only half the U.S. standard.

In agriculture, the ratio is even worse. The Soviet Union employs several times as many workers in agriculture as in the United States, but produces only about 80 per cent as much grain for food and fodder in normal years, and even smaller proportions of most other food products. Russians must spend $15 of grain to produce $1 worth of livestock —almost double the U.S. ratio. Their grain yields per acre are 50 per cent to 65 percent of America's.

Is this because Americans spend more on equipment and fertilizer? To be sure, the United States benefits from a level of agricultural development reflecting many decades of investment, but annual Soviet investment in agriculture has exceeded America's by 5-to-1 for over 10 years, without comparable returns.

Is the difference because of weather and soil? To be sure, the erratic zigs and zags of Soviet production (bumper crops in 1973 and 1976; disappointing crops in 1972, 1974 and 1975) result primarily from the combination of drought and cold that plagues Soviet farmers. But North Dakotan and Canadian farmers faced with comparable conditions produce much better than their Soviet counterparts.

The agronomist and businessman Ronald Nairn explains: "In North American farms are in optimum size for knowledgeable decisions by interested managers. Soviet farms are generally too large to permit fine-tuned decisions by far-away planners. Where Soviet farmers do know their local needs and have material incentive, yields are quite good. Thirty per cent of Soviet agricultural production comes from private garden plots that make up a tiny fraction of planted lands.

Now the CIA reports that even in military industry, Soviet inefficiency is about half what the analysts formerly estimated. And the CIA has learned more about the ruble costs of Soviet weapons components. It has doubled its estimates of the real costs to Moscow of fielding the current military establishment. The burden of defense is 11 per cent to 12 per cent of the gross national product rather than 6 per cent to 8 per cent as formerly believed. Despite huge investments the Russians lag behind the United States in almost every domain of advanced military technology. Many U.S. weapons systems are so far beyond current Soviet capabilities that the CIA cannot even estimate a price tag for a supposed equivalent Soviet product.

Theoretically, the price could be "infinite," the CIA had told Congress. "The U.S.S.R. is now concentrating on a computer series modeled on the technology of the IBM 360 line, which was developed here in the early 1960s." This kind of technology gap besets the Russians at every turn. America is already second to none—militarily as well as economically.

Warhead Lead

The most recent report of the International Institute for Strategic Studies shows a two-to-one lead for the United States in strategic missile warheads, an advantage that will be narrowed only slightly by the mid-1980s and one that could be vastly expanded if Washington decides to deploy strategic cruise missiles.

The Soviet Union has gradually acquired the image of strategic equivalence with the United States. Despite its many problems, it has developed the world's second largest gross national product, one that produces more oil, more steel, more wheat and barley than any other country. The costs—both material and spiritual—to the Soviet citizen continue to be enormous.

Just because Russians must spend more of their wealth to stay in the race does not prove that Washington should imitate comparable sacrifices on the part of its people. We do more with less. America could well slow down advanced weaponry—the B-1, Trident, and so on—with little risk to Western security.

As George Kennan, the specialist on Soviet affairs, and other members of the American Committee on U.S.-Soviet Relations put it: "Security in today's world cannot be achieved by expanding armaments." Indeed, the dangers of restraint are less than those of an all-out weapons race. The same idea was reiterated by W. Averell Harriman after recent talks with the Soviet leader Leonid I. Brezhnev.

Though the U.S. system is materially efficient, the quality of life in this country leaves much to be desired. A few billions devoted to the problems of habitat and spirit would do more for the commonwealth than making our missiles more accurate. Rather than more "over-the-horizon" radar, we could use greater light on the needs of the body politic, its soul and environment.

Walter C. Clemens Jr., a fellow at the Kennan Institute, Woodrow Wilson International Center for Scholars, wrote this article for The New York Times.

Nutcracker' as Seen By Roland Petit

By David Stevens

RIS, Dec. 16 (IHT).—Roland Petit is having a go at "The cracker" to enliven the holi- season, taking full advantage situation compounded of kovsky's undefeatable mu- dipa's almost nonexistent- nd Ivanov's all but lost choreography.

result, as with Petit's para- last season of "Coppelia," thing quite different from aditional "Nutcracker." If a thing can be said to exist. basic outline remains—the there called Marie, after A. Hoffmann's original) gets tcracker-doll for Christmas, broken and turns into a e who takes her off through torm of dancing snowflakes to and of divertissements.

It has converted the old acter Drosselmeyer, who s the nutcracker present, ally into the central per- ge. In the person of Rudy ns, he is youngish and hand- a combination of fairy god- r and mysterious magician ack, and he has his finger erything.

hen the toy's jaw is broken Marie's mean little brother, elmeyer takes her scarf and ges it. After she falls p he returns and tosses the e his magician's trunk, then it out transformed into a e Petrushka-like doll with chback and still with his n a sling. Marie's love es some life into the Nut- r, and Drosselmeyer sum- s a balloon in which all three off. When it lands, Marie is wedding dress and she and Nutcracker are married by a nch mayor in his tricolor They watch the Act II di- rtissements, then Marie and Nutcracker—cured of broken and deformity—do the grand de deux in lieu of the Sugar Fairy and her cavalier, who d not make it to this party. e is a kitschy waltz of the ers and an epilogue in which elmeyer returns in the ning to present his nephew the awakened Marie. The ew is, of course, a dead r for the Nutcracker-Prince.

t?

haikovsky is intact here, but rtunately he did not do gh music to accommodate the elmeyer conceived by Petit e kind of role he would have ed himself a few years ago. emedy this, Petit has inserted t-shoe dance for him and ids, in straw hats and with zy piano accompaniment.

Petit borrows two move- s of a piano trio by Hoff- (who also wrote music) for ng and rather labored solo ich Drosselmeyer transforms disabled Nutcracker into a some prince.

Mixture

e result is good, clean fun, curious mixture of romantic and Casino de Paris. Some he best choreography Petit devised in recent years is spoced with some of his her ideas, such as the hip- ging corps of flowers in the e. The magical Snowflake e is marred or enlivened, ac- ing to your taste, by a chorus Salvation Army girls, who the practical purpose of ing attention from the rather derly corps de ballet. The appear to be a gang of allets, put to rout by the cracker and a platoon of toy rs, aided of course by elmeyer, who produces a and small howitzer in the of time.

ns carries out his some- obtrusive dancing tasks strength and élan. Elisa- Terabust is appealing as child Marie and impressive, soft-edged way, in the vir- demands of the pas de while Denys Ganio was rather more impressive as the forlorn hunchback than in his duties as a princely cavalier.

Ezio Frigerio designed a color- ful succession of flats—a lavish house for Marie that dissolved in the dream sequence to be over- shadowed by a giant Christmas tree, and a series of pastel post- cards for the Spanish, Arab, Chi- nese and Russian dances.

The show continues to mid- January at the Théâtre des Champs-Elysées, with Dominique Khalfouni and Noëlla Pontois of the Paris Opéra scheduled to dance Marie in some of the per- formances in January.

Elisabetta Terabust, Rudy Bryans and Denys Ganto take off in the "Nuteracker" balloon.

Bernand.

MADRID

The Creaky Franco Legend as High Camp

By James M. Markham

MADRID (NYT).—A delighted shopper on the lookout for political antiques stumbled upon a children's game, dating from the 1940s, called "The Life of a Christian." The player goes for- ward two spaces after his first communion, tumbles into hell af- ter sinning, is rescued by arch- angels, skirts the dreaded "Red menace" and, finally, makes it into heaven.

Another sharp-eyed buyer found a Parchesi game whose winner reaches "the great na- tional rising" of July 18, 1936, which after a "glorious crusade" brought Generalissimo Francisco Franco to power.

Only a year in his grave, Fran- co is suffering the ultimate humiliation: He and his creaky legacy are becoming high camp in Madrid.

Flea Market

Madrilenos are latching onto things that were fashionable in America and Europe years ago. Little shops, like Popular on Calle Huertas, which specialize in kinky antiques and village art are mushrooming; Burger King is the in-place for teen-agers; protest folk music—sung in once outlawed languages like Basque and Catalan—leaps through the barrios; fleeing the appalling pollution of the capital, young couples are discovering and refurbishing old village houses in the vast, empty coun- tryside.

In the Rastro, Madrid's ram- bling flea market, where on a Sun- day there is barely room to walk, the elderly ex-Nazi hawker of Fascist emblems and memor- abilia now has new competition on the left. Young peddlers push posters of Marcelino Camacho, the Communist trade union leader. Anarchists stage tiny demonstrations and strikers raise funds from passers-by.

The "Camacho sweater"—ma- roon, long-sleeved, turnover col- lar, frontal zipper—has begun to make inroads on Madrid's once obligatory coat and tie. The first Camacho sweater, in fleck- ed wool, was knitted by his wife when he was in prison.

Even though humor magazines are proliferating, it is generally agreed that the level of political humor has fallen off since Fran- co died and Juan Carlos was crowned. "Black humor was, somehow, more cutting," said one woman journalist. "And it is easier to joke about a prince than about a king."

The capital's busy spray-can graffiti writers tend to take themselves rather seriously. But, shortly before the ultra-rightist rally in the Plaza de Oriente on the first anniversary of Franco's death, some humorist went about scrawling invitations for psy- chiatrists to attend.

Periodically, neo-Fascist "com- mandos," untroubled by the police, burn out book stores and barge into "progressive" hang- outs, coercing "vivas" to Franco. One favored target is the Gijon, a venerable café on the Paseo de la Castellana, which was founded in 1890 and patronized in the past by Ernest Hemingway, José Ortega y Gasset, the Communist poet Rafael Alberti and José Antonio Primo de Ri- vera, the founder of the Fascist Falange.

"We never had any problems then," recalled José Garcia Lopez, the owner of the Gijon. "I don't know why these idiots keep coming here, they don't have an idea in their head."

* * *

Spain's most celebrated actress is Ana Belen, who is 25 years old. Her husband, Victor Ma- nuel, is one of Spain's leading folk singers; her father is a cook in the swank Palace Hotel. She has been acting since she was 10.

Her latest film, "La Peticion," has been a multiple *cause célèbre*. For one, it was directed by a woman, Pilar Miro; two, Ana Belen plays the amoral daughter of stuffy landed centry who manipulates and destroys two men of far humbler origins.

"This is a film that didn't please the men of Spain very much," said Miss Belen over a cup of tea. "Obviously, España, much more than any other country, is totally *machista*—and so there were many attacks from *la critica masculina*."

The film's most controversial passage is a love-making scene in which the headstrong daughter accidentally kills her maid's son, flinging him against a brass bedstead; she only discovers, af- ter a considerable amount of sexual intercourse, that he is dead. Coolly, she recruits an- other lover, dumps the maid's son in a lake and then kills the man who helped her.

"If we want to do a political movie in Spain—one that goes directly to the worker," said the young actress, at ease in her jeans and lumberjacket, "it is not with 'La Peticion'. I think if a worker comes to 'La Peti- cion', he comes basically for one reason—because he sees me nude." Miss Belen thinks that too much fuss has been made over the love-making scene in "La Peticion". In any case, she looks forward to doing a film about the Spanish Civil War— which she is too young to have known.

"All the films have been done from the point of view of the winner," she said. "All those years that are... nothing but blanks."

PARIS THEATER

Mishima and Sade: Not Boring

By Thomas Quinn Curtiss

PARIS, Dec. 16 (IHT).—Yukio Mishima and the Marquis de Sade had one literary trait in common. Both mistook violence for power and wrote accordingly. And both were sensational figures of their times. The marquis was put in the Bastille by the ancien régime and ordered to a mad- house by Napoleon. The Japanese author committed hara-kiri pub- licly in Tokyo to protest Western materialism.

At the Petit-Orsay, Jean-Pierre Granval has staged a play that Mishima wrote about the Mar- quis de Sade. There have been so many discussions of sadism in France during the past 200 years that the eccentric aristocrat is often dubbed the Marquis de Fade. But the Mishima piece, though somewhat long-winded, is not a bore. It probably benefits from the lucid, flowing adapta- tion of André Pieyre de Mandiargues and, sagaciously cast, it is extremely well acted.

In "Madame de Sade," the mar- quis never appears, but his in- visible presence dominates the proceedings, haunting all that happens in a singularly eerie manner.

The Marquise de Sade has left her husband and returned to her mother's home after her husband has fled the police following a brutal orgy in Marseilles. She is welcomed and comforted as the victim of a ghastly experience. The mother, shamed by the scandal, becomes more alarmed when she learns that her younger daughter had been the compan- ion of the libidinous son-in-law when he was hiding out in Ven- ice.

Unlike the novels of the Japanese author, this play is free of any shrill hysteria. It states its case clearly, directly and without overemphasis. It is a conversation or discussion piece with some dramatic punctuation. At the Petit-Orsay, it proves an absorbing theatrical evening for, though the text is repetitious in the final stages, the perform- ance, intelligently modulated, never flags. One becomes increas- ingly interested in the characters due to admirable interpretation.

Both daughters, it appears, en- joyed the bizarre entertainments and are, in a sense, converts to the doctrines of the unseen sen- sualist. The former wife contem- plates entering a convent. Years later it is announced that her husband, now in tatters, awaits her at the door. She refuses his offer to rejoin him, but his deeds and his unorthodox notions have opened a door in her conscious- ness and colored her views. Mi- shima is in accord with the Mar- quis that the problems of man- kind are basically physiological.

Danièle Lebrun brings a fas- cinating strangeness to the enig- matic marquise. Louise Conte as her mother, at first morally in- dignant and then seeking be- wilderedly to understand the mysteries of sexual possession, has regal authority. Marie-Hélène Dasté as the servant who be- comes less servile as the French Revolution approaches, Anne- Prospere as the sister, Pascale Roberts as the neighboring coun- tess and Eleonore Hirt as the sympathetic nun are assets.

* * *

At the Petit Odéon—at 6:30 p.m.—Jacques Toja and Alain Pralon recite Diderot's "Le Para- doxe sur le Comédien," while Christiane Millet sits by as mute decoration.

Henry Pillsbury, responsible for the dramaturgy, has set the scene in an actress's dressing room with the actress present. It seems unlikely that any actress would refrain from joining in when histrionics are being so au- thoritatively discussed and the two visitors are in modern dress in- stead of being clad in 18th-cen- tury costume which is a bit dis- concerting, considering their pe- riod conversation.

But the ideas tossed about are stimulating and evergreen. Dide- rot, like Brecht, was opposed to lifelike realism, aware that a finished performance is a work of intricate guile and not an emotionally inspired reproduc- tion of personal experience. If the latter were true what actor, he seems to suggest, would be equip- ped to act Macbeth or Oedipus. Like Brecht, he recommends alienation and proves the point with examples. The talk is rich and provocative.

Bonn Is Funding Adenauer Chair In Washington

WASHINGTON, Dec. 16 (WP). —The West German government has presented a $400,000 Bi- centennial gift to Georgetown University to endow a permanent professorial chair in German pub- lic and international affairs.

The endowment will support the Konrad Adenauer Chair, named after the West German chancellor from 1949 to 1963. It will be held annually by a visiting scholar from Germany who will teach and do research at Georgetown.

West German Ambassador Berndt von Staden said that the award was being made to George- town as an expression of gratitude for close ties between Georgetown and German scholars and officials in the years immediately follow- ing World War II.

The first holder of the Aden- auer chair is Peter Graf Kiel- Mansegg of the University of Cologne, who will teach courses in 19th-century German civilization, politics in the Federal Republic of Germany, European diplomatic history of the 20th century and Germany in international affairs.

West Germany's grant to Georgetown is one of several gifts in recent years to U.S. colleges and universities by foreign gov- ernments and foreign industries.

SHARPS & FLATS

BRUSSELS—Gerry Mulligan is featured at the Maison Culture Woluwe-St. Pierre on Dec. 17 at 8 p.m. and on Dec. 18 from 11 a.m. to 1 p.m. and then from 2 p.m. till 6 p.m.

* * *

The Martini Dry,
the whole Martini Dry, and nothing but the Martini Dry.
Ladies and gentlemen of the jury. Please examine the facts.
Martini & Rossi Extra Dry is a drink with an unequalled taste. Pure, clean, dry—with a definite hint of spiciness about it.
A taste that's absolutely perfect on its own with ice and a twist of lemon.
As to the propriety of mixing it with gin, vodka, or soda, to make a host of intriguing combinations... well, you must be the judge of that. Case rests.
Martini & Rossi Extra Dry.
The right one just by itself. MARTINI
EXTRA DRY

To-day, "science fantasy" reaches your wrist: The new Pulsar with calculator and memory.

After the Master Time Computer, the watch will never be the same again. And nor will the calculator!

Pulsar equips you with a mini-computer, a veritable bank of information on your wrist.

The Pulsar quartz module is programmed to display the hour, the minute, the second, the date and the month. And when you switch to the calculator, you control a fantastic instrument. Your Pulsar adds, subtracts, multiplies, divides, works out percentages — and is capable of retaining all these calculations in "memory"! Its answers are expressed in six large red figures on the screen of your watch.

Ask to see the incredible Pulsar with calculator: it comes to you together with an exceptional three-year guarantee!

Pulsar — a product of the utmost reliability, available only from the highly qualified watchmaker who is an authorized Pulsar dealer.

apan Payments Show A Return to Surplus

KYO, Dec. 16 (AP-DJ).—
n's overall balance of pay-
was in surplus by $280 mil-
November compared with
million deficit in October
$401-million deficit in the
ear-earlier month, the Min-
of Finance said in a prelim-
report today.
tober's deficit was the first
shortfall since January this
year, and followed a $428-million surplus in September, the ministry said.

The current account in November was in surplus by $50 million, down sharply from $622 million in October but still slightly higher than the $37 million current account surplus in November, 1975.

November's trade was in surplus by $540 million, down sharply from $1,142 million in October, but up from a $444-million surplus in the year-earlier month, as imports rose and exports fell from October's levels.

After seasonal adjustment, the current account posted a deficit of $138 million in November, compared with an adjusted surplus of $218 million in October. A bank analyst said the current account deficit on an adjusted basis was in line with expectations.

Exports Rise 28 %

November exports rose 28 per cent from a year earlier to total $5.52 billion, but were below October's $6.004 billion. In November, 1975, exports totaled $4.337 billion.

Imports in November rose to $4.98 billion from $4.862 billion in October and $3.883 billion in the year-earlier month.

Seasonally adjusted, the November trade total was in surplus by $352 million, down from October's $698-million surplus. Adjusted exports totaled $5.639 billion, up slightly from $5.557 billion in October, while adjusted imports totaled $5.287 billion, up from $4.859 billion in October.

The long-term capital account showed a deficit of $130 million compared with a deficit of $482 million in October and a $147-million deficit in November, 1975.

The short-term capital account combined with errors and omissions was in surplus by $360 million compared with a short-term capital account deficit of $218 million and an errors and omissions deficit of $59 million in October.

The invisibles account combined with the transfers account was in deficit by $490 million in November compared with a $433-million invisibles deficit and a $47-million transfers deficit in October.

EC Panel ts Tax on old Deals

USSELS, Dec. 16 (AP-DJ).—

does not refer to such trans-
ns.

est German Court Stays Roche Price-Cut Order

RLSRUHE, West Germany,
16 (Reuters).—Hoffmann
oche will not have to lower
rices for Librium and Valium
tives for the time being, the
German Supreme Court
today.
e court overturned a deci-
by the cartel division of
Berlin's Supreme Court,
h last January ordered prices
he drugs to be reduced by
er cent.
e Berlin court ruling was in
response to an appeal by Hoffmann La Roche against a decision by West Germany's Cartel Office to order the price of Valium to be cut by 40 per cent and Librium by 35 per cent.

The Berlin court also said that Hoffmann La Roche had misused its dominant position in the market by demanding prices here that were much higher than those in the Netherlands and Britain.

The Federal Supreme Court said, however, that setting prices above those resulting from a completely free competition in the market did not necessarily constitute a misuse of a market position.

A certain latitude above the free-market price level may be allowed, a court spokesman said. He added that the matter was now up to the Berlin court, which would decide on how to proceed.

A spokesman for the Berlin court said it was possible that negotiations would be reopened between Hoffmann La Roche, the Berlin court and the Cartel Office next year.

l Exporters' venues Rise Third Quarter

NDON, Dec 16 (Reuters).—
oil revenues of the oil ex-
ng countries rose an estim-
.4 billion to $29 billion in the
quarter this year, reflecting

As Japan's Share of Sales Rises

Imports Killing U.S. TV Firms

NEW YORK, Dec. 16 (AP-DJ).—The U.S. television-set industry is engaged in a bitter marketing war with Japanese companies that is eroding prices and contributing to the large losses being suffered by most U.S. TV-set makers.

One U.S. executive, John Nevin, chairman and president of Zenith Radio Corp., says employees of U.S. electronics concerns face a "threat of extinction."

The Japanese have captured about 35 per cent of the U.S. color television market and as a result there are now only eight U.S.-owned makers of color sets left, a number that soon may be reduced to seven. Yet a decade ago there were 20 U.S. firms making sets.

U.S. electronics companies are convinced that most of the Japanese manufacturers have gained this foothold through unfair marketing practices. "We see a conspiracy," maintains George Konkol, who heads the consumer electronics business of General Telephone & Electronics Corp.'s GTE Sylvania division.

The government is looking into whether there is a need to impose import quotas on color sets, with a decision on the matter expected in late March. Last month the U.S. Customs Court heard a suit brought by Zenith that, if the court rules for the company, could have serious effects, not only on Japanese TV imports but on the entire spectrum of trade between the United States and Japan.

The decision of the three-judge panel that heard this case is of particular interest to U.S. television manufacturers because it addresses one of the thorniest issues in the industry: the fact that Japanese companies receive Japanese government subsidies (in the form of commodity tax rebates) on all consumer electronics products they export. This helps them sell their products, such as TV sets, in the United States for less than comparable U.S.-made products.

If Zenith wins, then all Japanese electronics imports would be liable to a 15-per-cent duty that would amount to about $225 million a year, based on the current annual level of imports, valued at $1.5 billion. Even though the case would almost certainly be appealed to higher courts, importers of the products, in some cases subsidiaries of the Japanese companies, would be required to post bonds to cover the potential duty.

Treasury Department officials are concerned that if the court ruling goes against the government, a precedent would have been set for actions against other Japanese goods and goods from other nations receiving similar tax rebates. Such a ruling would probably have an impact on 60 per cent to 70 per cent of all U.S. imports.

One thing is clear, U.S. manufacturers say: Something must be done or else an American-owned TV industry will vanish. "We're fighting like mad to hold our market share. We've been seriously hurt," says Mr. Konkol.

Most analysts believe that Zenith, RCA Corp. (which controls about 20 per cent of the U.S. color TV-set market) and General Electric Co. are the only major U.S. makers that will show a profit from their color TV sales this year. One small company, Curtis Mathes Corp., also is expected to make a small profit. The others, Sylvania, Rockwell International Corp.'s Admiral subsidiary, Whirlpool Corp.'s Warwick Electronics subsidiary and Wells-Gardner Electronics Corp., are losing between $5 and $40 on every color set they make, analysts estimate.

The statistics are indeed gloomy for the U.S. industry: In 1965 there were no color TV imports into the United States; in this year's first nine months, Japanese color TV imports increased by 179 per cent over the same period last year for color sets and by 138 per cent for black-and-white.

A decade ago, 10 U.S. companies made color picture tubes. Now there are only four.

All of this has had a serious impact on the domestic job market. Since 1971, Zenith calculates that more than 60,000 jobs have been lost in U.S. color television plants. Counting plants that make black-and-white TV and stereos, the job losses total more than 100,000, Zenith says.

Made Obsolete by World Events

Portugal's Industrial Project Seen a Folly

By Marvine Howe

SINES, Portugal, Dec. 16 (NYT).—A few years back, visitors came to this isolated fishing village to sun on the deserted white sands, climb the dark rocky cliffs and see the house where Vasco da Gama was born.

Today Sines has become the center of one of Europe's most ambitious industrial projects and, in the opinion of many, a major modern folly.

With national economic growth paralyzed since the revolution two and a half years ago, Sines seems an oasis of activity. Some 7,000 men with giant earth-moving equipment are at work on a dozen aspects of the gigantic project: Building a spectacular deep-water port, an immense refinery, highways, railroads, pipeline and a new residential town.

Even now, with parts of the multibillion-dollar project nearing completion, authoritative voices are still urging Portugal to scrap it. But Socialist Premier Mario Soares has confirmed his government's decision to carry on with the works.

The project is expected to consume one-third of the government's total investments for the next few years and will continue to be a heavy financial burden for the foreseeable future.

Only last month, a World Bank consultant, Bela Balassa, warned against the danger of a "serious misallocation" of Portugal's meager resources in Sines. He urged the government to make a rigorous economic analysis of the project and cut back wherever possible.

The total investment in Sines will be more than 110 billion escudos ($3.7 billion), or about three times original estimates, according to the latest revised projection by the Sines development agency.

The project took form at the beginning of this decade when Portugal's right-wing dictatorship decided on the need for a grandiose development project to revive the stagnant economy.

The central idea was not so much the industrial complex but the deep-water port, which was designed to serve as an international transshipment port for oil tankers and ore carriers.

According to the rationale behind the project, it is more economical to carry oil and other goods in large ships but many European ports cannot accommodate large carriers. Hence the need for a deep-water port for transshipment.

Serious doubts about the economic profitability of the Sines project arose after the 1973 oil crisis, which brought radical changes in the market demand for petroleum and petroleum products, as well as a cutback in the use of giant tankers.

Early last year American economists Richard Eckhaus and Lance Taylor made a study and concluded that there was now no economic justification for such a large-scale port in view of the cutback in tankers, the reopening of the Suez Canal, and the costs of transshipment.

Industrial Output In U.S. Rises by 1.2% in Month

WASHINGTON, Dec. 16 (Reuters).—U.S. industrial production rose in November by a seasonally adjusted 1.2 per cent following a downward revised decline of 0.4 per cent in October, the Federal Reserve Board reported yesterday.

The industrial production index now stands at a record 132 per cent of its 1967 base, surpassing the previous record of 131.9 reached in June, 1974.

The Fed said more than half the increase in November was the result of a resumption of production following strikes in the auto and farm equipment industries, although there were additional moderate production increases in consumer goods, business equipment and nondurable materials.

The products index rose 1.5 to 131.5 during November, the final products index rose by 1.7 to 129.5, the consumer goods index increased by 1.8 to 138.9 and the durable goods index, paced by the auto sector rose by 4.7 per cent to 144.6.

Auto assemblies increased by 14 per cent during November to an annual rate of 8.8 million units, and the Fed said current production schedules indicate a further rise during December.

In another report, the Commerce Department said personal income rose sharply in November, increasing by $15 billion to a seasonally adjusted annual rate of $1.42 trillion, following an upward revised increase of $11.2 billion in October.

The increase for October was originally reported at $10.2 billion.

Net Purchases Of Japan Bonds Reach a Record

TOKYO, Dec. 16 (AP-DJ).—Net purchases of Japanese bonds hit a record for one month of about $270 million in November, up from $125.8 million in October and the 13th consecutive monthly inflow, press reports and securities industry sources said today.

Investors purchased about $400 million of Japanese bonds, while selling an estimated $130 million last month, they said.

The previous record for a month of $243 million was set last July. Bond purchases by foreign investors totaled $1.23 billion in the year to October, far surpassing the 1975 total of $920 million.

Reports said that sales of Japanese securities last month again outpaced purchases by about $90 million, compared with net sales of $95.62 million in October.

Analysts said the flow of money into Japanese bonds was the result of rising short-term interest rates in Japan while interest rates continued to ease in the Eurodollar market.

Eurodollar Borrowings

WASHINGTON, Dec. 16 (Reuters).—Liabilities of U.S. banks to their foreign branches rose $272 million to $4.89 billion in the week ended Dec. 8, the Federal Reserve Board reported. This was $1.6 billion higher than the level of Eurodollar borrowings in the week ended Dec. 10, 1975.

Rank Xerox Found To Hold Monopoly

LONDON, Dec. 16 (AP-DJ).—Britain's Monopolies and Mergers Commission today called on Rank Xerox Ltd. to end some of its pricing methods for copying machines which the commission said had the effect of preserving monopoly conditions "against the public interest."

Rank Xerox is owned by Rank Organization Ltd., of Britain, and Xerox Corp., of the United States.

The commission found that monopoly conditions prevail in the supply of copier equipment in Britain because Rank Xerox supplies at least one third of the market.

U.S. Probes Steel Price Increase

By Edward Cowan

WASHINGTON, Dec. 16 (NYT).—Justice Department lawyers are examining the Dec. 1 price increase by nine steel producers to determine whether the anti-trust laws "may have been violated," according to the acting head of the anti-trust division, Hugh Morrison jr.

A spokesman for the division said that the inquiry was preliminary but not routine. Ultimately, it could lead to a formal investigation and perhaps then to a criminal or civil proceeding against the steel companies under the Sherman Act, which prohibits conspiracies to set prices.

Mr. Morrison disclosed that a "preliminary review" of the price increase was under way in a Dec. 10 letter to Ralph Nader and Mark Green of the Corporate Accountability Research Group, a public affairs organization. Mr. Nader and Mr. Green, who made the Morrison letter available to The New York Times, had written to the anti-trust division on Dec. 5 urging that it investigate.

"The anti-trust division has been closely monitoring this steel price increase since its inception on Nov. 24," Mr. Morrison wrote. "Staff attorneys responsible for steel industry matters are currently reviewing information pertaining to the price increase."

Mr. Morrison said that "if our preliminary review discloses facts which suggest that the anti-trust laws may have been violated, we will not hesitate to institute a full investigation of this matter."

A spokesman for the division said that the lawyers would "look for linkage" among the companies such as "agreement" or "some kind of signal" as evidence of a conspiracy. The essence of such understandings, he said, would be assurances, direct or indirect, that if one company raised prices others would follow.

Several steel companies announced a price rise for flat-rolled steel in August, but when several major producers failed to go along the markup was rescinded.

The Dec. 1 round of increases of about 6 to 7 per cent was criticized by the Ford administration as unjustified by market conditions, namely weak demand, and as an attempt to anticipate any possible imposition of price controls by Congress and the Carter administration.

Fed May Change Option Margins

WASHINGTON, Dec. 16 (Reuters).—The Federal Reserve Board has issued a proposed amendment to its regulations that will permit registered market makers or specialists in the options market to obtain stock in certain limited circumstances, on a 25-per-cent margin requirement.

The Fed said the purpose of the proposal is to ease the making of markets in options.

Under the proposal, option specialists could purchase and carry stock as a hedge in their options operations, under specified limitations, at the lower margin rather than the current 50-per-cent margin required when stocks are carried on credit.

The board requested comments on the proposed amendment through Jan. 17, 1977.

Doubts About Oil Price Rise Depress Stocks on Big Board

NEW YORK, Dec. 16 (IHT).—Prices moved lower on the New York Stock Exchange today amid profit-taking and uncertainty about the outcome of the oil pricing conference in Qatar.

The slide was "just part of some profit-taking after a very steep advance," especially among second-tier stocks, said Newton Zinder of E. F. Hutton.

Another analyst said part of the decline was "a knee-jerk reaction of confusion about the significance of the (oil price) negotiations."

He said investors were having difficulty deciding whether statements by various oil ministers represented a "powerful effort to raise prices" or were just bargaining positions.

Analysts said some investors may have moved to the sidelines late in the session in advance of U.S. money supply figures for the week and delayed figures on U.S. housing starts for November.

After the close of New York Stock Exchange trading, the Federal Reserve reported the money supply (M 1) rose $800 million in the latest week and the Commerce Department said housing starts fell 6 per cent in November but revised the October figure upward.

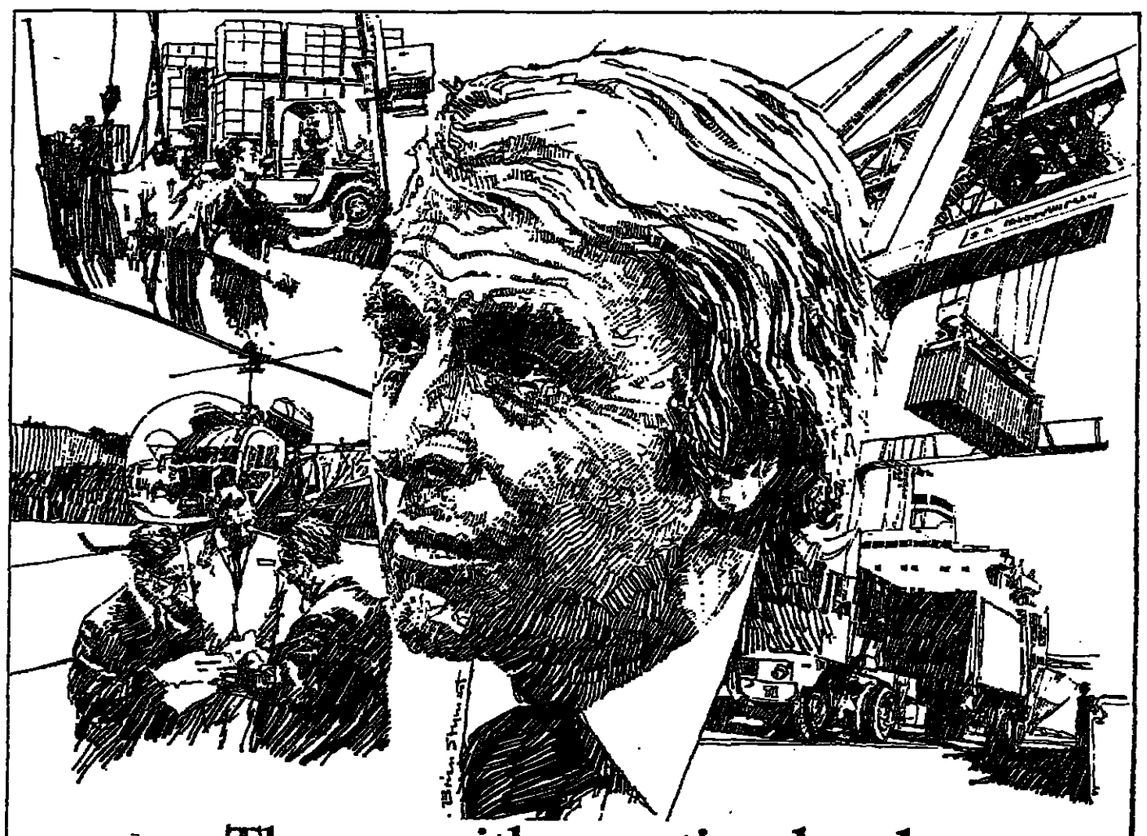
The Dow Jones industrial index was down 2.49 points to 981.30. It was down 1.16 at 3 o'clock. Some 23.92 million shares changed hands compared with 28.3 million shares yesterday.

At the final bell declines outnumbered advances by about 855 to about 632.

Among the actives, American Telephone lost 1 2 to 63 7/8 and General Electric 1 8 to 52 3 4, while Westinghouse Electric rose 1 2 to 16 7 8.

Active Occidental Petroleum gained 3 8 to 23. It said a subsidiary filed suit in a Texas court charging Buttes Gas & Oil, Skelly Oil and Cities Service Oil Co. illegally took $6.4 million of oil from the Gulf.

Skelly was unchanged at 110, Cities Service eased 3/8 to 57 and Buttes, on the American Exchange, was unchanged at 17 7/8.



MEPC of Britain Cuts Its Losses

LONDON, Dec. 16 (AP-DJ).—MEPC Ltd., a major British property company which has had financial problems, today announced a net loss of £981,000 in the year ended Sept. 30 compared with a year-earlier loss of £5.7 million.

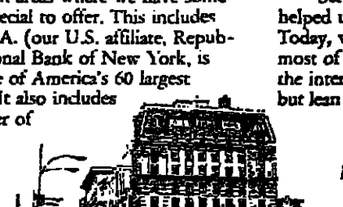
Post-tax profit was £1.6 compared with a year-earlier loss of £3.9 million. The post-tax figures are before minority interests of £728,000 versus £355,000.

Revenue was £58.3 million versus £45 million.

MEPC said it still had problems to resolve before the company can return to a level of satisfactory earnings. The company said that although higher interest rates and sterling's fall in value are beyond its control, it is creating a base for the company's recovery. However, MEPC said that the recovery cannot be achieved any faster than the general economy allows.

The man with exceptional goals needs an exceptional bank.

What makes Trade Development Bank exceptional? To start with, there is our policy of concentrating on things we do unusually well. For example, trade and export financing, foreign exchange and bank notes, money market transactions and precious metals.



Geographically, too, we work mainly in areas where we have something special to offer. This includes the U.S.A. (our U.S. affiliate, Republic National Bank of New York, is now one of America's 60 largest banks). It also includes a number of out-of-the-way countries which, frankly, many other banks lack the first-hand knowledge to tackle properly.

What's more, we keep our back-office systems running abreast of our business. You don't notice this directly, but it shows up in quicker decisions, less red tape, fewer errors.

Serving our clients well has helped us grow uncommonly fast. Today, we're big enough to provide most of the sophisticated facilities of the international banking giants—but lean enough not to keep you waiting for committees to deliberate.

As part of the Trade Development Bank Holding Group ($2.9 billion in assets, $258 million in capital funds employed), we're ready to serve you in most of the world's financial centers.

Key Group offices: Geneva, London, Paris, New York (Republic National Bank of New York). Other offices in Buenos Aires, Caracas, Chiasso, Frankfurt, Luxembourg, Mexico City, Nassau, Rio de Janeiro, São Paulo.

Trade Development Bank

Shown at left, head office of Republic National Bank of New York, U.S. subsidiary of the Trade Development Bank Holding Group. The 59th largest bank in the United States, ranked by order of deposits. Republic is one of America's fastest-growing financial institutions.

Now is the time to buy in Germany's bond market

The opportunities offered by the German bond market should be grasped now because the signs are good for a further fall in interest rates and for capital gains.

Of course, an investment in bonds, as with any other securities, demands constant attention. Much more, perhaps, than the average investor is able to give. Bonds and mortgage bonds must be carefully selected to achieve a satisfactory spread of investment and the mix adjusted to meet changing market conditions. This is the kind of management that Deutscher Investment-Trust offers you.

through INTERNATIONALER RENTENFONDS

Mutual Fund

INTERNATIONALER RENTENFONDS is one of eight Mutual Funds under the management of Deutscher Investment-Trust, Frankfurt a.M. It is widely invested in the DM-bond market, currently to the extent of more than 70%. Being based on one of the world's strong currencies, it gives excellent performance prospects. The keynote of the investment policy is flexibility to meet fluctuations on the capital market and interest rates.

The Management

Deutscher Investment-Trust has 20 years' experience and nearly 4,000 million DM under management for more than 300,000 investors. Depositary Bank is Dresdner Bank AG, Frankfurt a.M., West Germany.

Performance

Between inception in February 1969 and November 1976 there has been 54.6% growth in the Fund, including all distributions. Foreign investors have fared even better because of the continuing strength of the DM – as follows:–

US $ investors	157.8%
£ Sterling investors	285.6%
FF investors	160.4%

Regular Income

INTERNATIONALER RENTENFONDS makes a yearly distribution, which in 1976 amounted to DM6.80 per Unit.

Charges

Loading: 3%. Management: 0.1% quarterly. Depositary Bank (additional to usual safe custody fee): 0.01% quarterly.

Make the most of the advantageous conditions in the German bond market. Complete this application form without delay.

Purchase of Units in West Germany

Units of the Fund may be purchased at any time. Redemption is also assured at any time by German Law. They are obtainable, in bearer form, from Deutscher Investment-Trust or from the depositary bank Dresdner Bank AG, as well as from Bank für Handel und Industrie AG, Bayerische Hypotheken- und Wechsel-Bank and Westfalenbank AG. The current offering price is approximately DM 72.

To Deutscher Investment-Trust, Postfach 2685, D-6000 Frankfurt a.M.1

* Please delete whichever is inapplicable

* Investment Account: I wish to open an INTERNATIONALER RENTENFONDS investment account with regular reinvestment of distributions. Please send me the necessary documents.

* Information: Please send me, without obligation, free literature on INTERNATIONALER RENTENFONDS and the investment account.

Federal Deposit Insurance Corporation, as Receiver

In the Matter of American Bank & Trust Company

NOTICE *Pursuant to Section 626 of the New York Banking Law*

WHEREAS, on September 15, 1976, the Superintendent of Banks of the State of New York took possession of the business and property of AMERICAN BANK & TRUST COMPANY, pursuant to Section 606 of the New York Banking Law, and appointed the FEDERAL DEPOSIT INSURANCE CORPORATION as Receiver of the Bank, pursuant to Section 634 of the New York Banking Law, for the purpose of liquidating the affairs of the Bank.

WHEREAS, pursuant to a Purchase and Assumption Agreement dated September 15, 1976, between the FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver, and Bank Leumi Trust Company of New York, all demand, time and savings deposits as and to the extent shown on the books of AMERICAN BANK & TRUST COMPANY at September 15, 1976, have been assumed by Bank Leumi Trust Company of New York and said assuming bank undertook to pay, perform, fulfill and discharge all such liabilities.

NOTICE is hereby given to all persons who may have claims against AMERICAN BANK & TRUST COMPANY, with its main office at 645 Fifth Avenue, New York, New York, and branch offices in the counties of New York, Kings and Bronx, to present such claims to the FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver, and make proper proof thereof, by filing a proof of claim, on the required form, with:

Federal Deposit Insurance Corporation,
as Receiver of American Bank & Trust Company
P. O. Box 5892
F.D.R. Station
New York, New York 10022.

Copies of the required form of proof of claim can be obtained upon written request therefor sent to the Federal Deposit Insurance Corporation, as Receiver, at the address specified above or, after November 15, 1976, at the office of the Federal Deposit Insurance Corporation, as Receiver, 430 Park Avenue, New York, New York. All written requests for the form of proof of claim must be received no later than February 28, 1977.

All claims must be presented, and proof thereof made, no later than March 31, 1977. No claim presented after such date can be accepted. Failure to timely present a claim and make proof thereof may result in waiver of the claim and forfeiture of the right to assert same.

All persons having claims for priority of payment shall make demand in writing for priority in the proof of their claims. Failure to so demand shall be deemed a waiver and abandonment of any right to such priority of payment.

Dated: October 28, 1976.

FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver of AMERICAN BANK & TRUST COMPANY
By: R. H. Hoffman, Liquidator-in-Charge.

EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIV…
SYSTEMS INTERCONNECTION PROJECT

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

All of these Securities have been sold. This announcement appears as a matter of record only.

December 15, 1976.

We are investing in Britain's future.

The Annual General Meeting of the Shareholders of National and Commercial Banking Group Limited will be held in the North British Hotel, Edinburgh, on Thursday, 13th January 1977, at 12 noon. The following is from the Statement by Sir James Blair-Cunynghame, OBE, LLD, DSc, Chairman of the Board.

THE YEAR'S OPERATIONS
Three features of the year's operations were common to the experience of both member banks, Royal Bank of Scotland and Williams & Glyn's Bank. These were wider interest rate margins, almost unchanged volumes of sterling deposits and advances and overall costs rising in line with inflation.

Firstly while the average base rate on a daily basis was lower, the margin between the retail deposit rate and base rate was 4 per cent. for nearly the whole of the financial year. It was reduced to 3½ per cent. in the middle of September. Secondly the total of sterling deposits was only slightly higher at the end of the year than in September 1975 while sterling advances also increased marginally. This reflected the severe recession and absence of the business confidence and prospects of profitability necessary to increase investment. Thirdly total costs rose by around 17 per cent.

Royal Bank of Scotland Group: The operating profit, excluding the share of associated companies, was £31,478,000, or 46 per cent. higher than the previous year. Apart from the element of the rise in the currency lending due to the depreciation of sterling, there has been a further increase in the Royal Bank of Scotland's international business. Included in this activity has been assistance for the financing of exports and oil. The development of North Sea oil operations has continued to provide new business but the pace of expansion has been noticeably slower.

Williams & Glyn's Bank Group: The operating profit, excluding the share of associated companies, of £20,183,000 shows a rise of 82 per cent. Williams & Glyn's Bank has continued as one of the leading providers of export finance under the guarantees of the Export Credits Guarantee Department, including a number of buyer credit facilities.

GENERAL ECONOMIC CLIMATE AND BANKING
British banking and the financial system continue to be under scrutiny. The long-standing debate about how best the financial sector can serve the needs of industry has been focused by the Labour Party's endorsement of the National Executive Committee's proposals to nationalise the four largest London clearing banks, a merchant bank and certain insurance companies. The Prime Minister's firm rejection of this as a part of Government policy has been followed by the announcement of a Committee under Sir Harold Wilson to consider the role of the City and financial institutions, including the possible extension of the public sector, and to make recommendations. The Royal Bank of Scotland and Williams & Glyn's Bank look forward to joining the other London and Scottish clearing banks in giving evidence to the Wilson Committee.

Last year I tried to explain why the United Kingdom lagged so far behind other countries in coping effectively with her economic difficulties, suggesting that this was largely due to deep-seated pressures arising from rapid and sizeable social change within a country dependent for economic progress upon successful international competition in goods and services. Further evidence of this is provided by the widespread failure to recognise the extent of the conflict between widely accepted social objectives and realistic economic prospects. This represents the most serious problem of our time.

The gravity of the situation and the simplicity of the principal underlying reasons for it – that our productivity is much lower than that of our principal competitors and that we are spending more than we are earning – mean however that quack remedies, such as nationalising the banks and insurance companies, are completely irrelevant to the poor economic performance of this country.

THE SCOTTISH ECONOMY
All I have said about the deficiencies of the United Kingdom's economy applies with equal force to Scotland where there must also clearly be painful adjustments to both economic structure and attitudes.

It is difficult to comment meaningfully upon the Scottish economy without referring to devolution. There is a widespread fear that it might lead to independence which, on the basis of all available economic evidence, would be highly damaging to the United Kingdom economy as a whole. If a Scottish Assembly were to be established the time might then be ripe for an early referendum in Scotland on the question of total independence, so as to clear up this issue once and for all.

THE FUTURE
Our poor economic performance, indicated by lamentably low productivity compared with our principal competitors, has been long outstripped by the social and political objectives which we have adopted. Continuing attempts to bridge the gap between what we earn and what we want by borrowing have inevitably resulted in inflation and lack of confidence in the £ sterling. Nevertheless it is the growing recognition of the nature of these difficulties which provides the best hope for the future. People will accept the consequences of severe measures which are bound to reduce standards of living provided they are confident that in practice these will be fairly applied and thus that all will bear the burden equally.

For the future therefore unless we assume that a challenge along these lines will evoke a sufficiently general response to reverse present economic and business trends there is no hope whatever. Such a conclusion is no reflection of the thinking and aims of the next generation at all levels and in all occupations throughout the country. It is fortunate that while older people may be too ready to remember the lessons of history the young believe they are making it. This belief will help to provide the confidence and determination which are critically necessary to tackle the daunting difficulties presently confronting the United Kingdom.

5th November 1976.

BOOKS

POCAHONTAS

The Life and the Legend

By Frances Mossiker. Alfred A. Knopf. 385 pp. Illu. $12.95.

Reviewed by Alden Whitman

WHO does not know the marvelous story of Capt. John Smith of the Jamestown colony, how he was captured by the Indians and how he was saved at the very last second from having his brains bashed in on that January day in 1608 by the comely Pocahontas, the favorite daughter of the Powhatan chieftain, who flung herself on Smith as the bludgeons were about to descend upon him? The story is recounted with various degrees of acceptance in all the history books; and for those who learn their history from fiction, it was brilliantly and wickedly satirized in John Barth's "The Sot-Weed Factor."

The source for the story is John Smith himself in his "General[l Historie of Virginia, New England, and the Summer Isles," published in London 16 years after the event and eight years after the tragic death of Pocahontas. In reciting other aspects of his life, Capt. Smith was not above furnishing a good anecdote or borrowing an adventure and fitting himself to it. Thus, in his own age, he cut a most impressive figure, and his heroic stature was accepted well into the 19th century. At that point, the historians of the Northern victors in the Civil War —among them Henry Adams— began to rewrite the nation's history, and they leaped upon Smith as an impious fraud, suggesting that he had made up his tale.

It was pointed out that he could have borrowed it from Richard Hakluyt's travel books; and that, moreover, the story of the enamored princess is universal. A folk-hero of the South—particularly of proud Virginia—was toppled. Now comes Frances Mossiker, *her Texas origins redeemed* by education at Smith and Barnard, to take a softer view of the Pocahontas affair, and one that appeals to late 20th-century sensibilities.

Summarized all too briefly, Miss Mossiker conjectures that Smith's hair's-breadth rescue has the ring of truth to it, however much he probably embellished a detail here and there. To reach this conclusion, Miss Mossiker calls in the formidable resources of cultural anthropology and modern studies of American Indian history. She contends that even though the Englishman's initial approaches to the Indians were haughty and unctyil, the Indians were nonetheless prepared to follow a policy of peaceful coexistence, with a touch of fraternity for good measure.

In this reading, the capture, near-execution and dramatic rescue of Smith becomes a Powhatan tribal adoption rite, whereby the Tidewater Indians were displaying their goodwill to the tiny band of Britons huddled at Jamestown.

Miss Mossiker presses her interpretation to what I regard as an unlikely length by asserting that the episode "reminds us that at least once in our history there existed the possibility of inter-racial accommodation." "A flicker of hope," she adds, was kindled in that strange and eerie ceremony, a spark that the colonizers proceeded to extinguish—if indeed they ever recognized that it existed.

In reconstructing Smith and Pocahontas, Miss Mossiker has been obliged to act as a detective, for there are no reliable contemporary accounts of the early years of the Jamestown settlement; nor were the British careful observers of Indian politics and mores. By taking the reader with her as she sorts out the most likely facts, the most reasonable possibilities and probabilities, Miss Mossiker gives, in effect, a course in cultural an[thro]. I found it completely for Miss Mossiker is a cated docent who p[ro]prose style of a high

The amount of rese[arch] undertaken is awesome[,] not appear painfully o[n] she is reading from a or displaying her scho[l]arship for the benefit of other [re]s of this emerges a like of Smith in the round[ed] ly detailed one of Poc[a]hontas.

That Miss Mossiker [is] the Indian princess flows from the fact the[y] a good deal about Smith returned to E[n]gland the Indians regard this tion? Did Pocahontas ed?—the princess bec[a]me baptized and married [to] the tobacco planter [John] with him to England, was a nine days' w[ay] died there in 1617. H[e] was not known for ce[r]tain good guess is that she 25.

In any event, Pocaho[ntas] remarkable person. I[t] adaptable, yet rese[rved] dignified, she made he[r] uncommon agility in milieu. The epic qu[a]lities have been conferred legend seem in the [e]xtravagant justified.

Miss Mossiker does [not] high opinion of Europe[an] or adventurers in the[ir] in their relations with [the] dians, whose tribal [so]ciety life were enormously [dis]ed. Almost always [the] Europeans provoked [wars] into unequal armed [con]slaughtered them by [the] and enslaved other tho[se] is not a history to be [read] with pride, and Miss M[os]fers very little to U.S. worshipers.

"Pocahontas" is none[theless] a syllabus of errors so[me] is an attempt to provi[de a] and reasonable picture steps on the American to convey what it must like in Jamestown in 16[07] next few years, to tell culture shocks for the well as for the Indians.

In this, Miss Mossike ceeded brilliantly.

BRIDGE

By Alan

The diagramed deal, featuring a nine-card suit, created a lot of excitement at a recent tournament.

The normal policy with a freak suit is to bounce the bidding immediately to the game level or higher, but there are some who belong to another school of thought. They stay out of the auction altogether, wait until the opponents run out of steam, and then introduce their suit.

This cunning procedure has two motives. The player lying in wait hopes to surprise the opponents with his distributional power, and he thinks that he can judge the right level to which he should push if he listens to the opponents bidding first.

West decided to try this tactic but waited a little too long. He now felt like a general who has found a fresh stock of ammunition just after signing terms of surrender.

From West's point of view the opposing three no-trump was likely to be a lay-down. A diamond king would be a finesse. He knew that the spade king was on his right, but in that case there was no reason to be put the spade ace on [the] and was rewarded. [If] the opponents could [make] six diamonds, he was [sure] to take nine tricks and [so]

Proell Takes Combined

lorerod Wins Slalom o Lead in World Cup

TINA D'AMPEZZO, Italy, 16 (AP).—Swiss star Lise-Morerod won the women's here today and took the the World Cup standings. slalom specialist, 20, clock-fastest times in both heats race, 41.47 seconds and a total of 86.62. Her also gave her second the combined standings ased on results of the and yesterday's downhill, No. 1 spot in the World ith 70 points. She leads Austria's Annemarie Proell Moser by a point.

The Austrian star, making a comeback bid for her sixth World Cup crown, was 23d in the slalom with a total time of 91.11 seconds. Proell Moser, however, won the combined and the 25 points carried her total to 69. She had won the downhill here yesterday.

Morerod had won a giant slalom in Val d'Isère, France, last week and reaffirmed her role as leading slalom specialist of the white circus and Proell Moser's main challenge for the World Cup title.

Today there also was a strong performance from Hanni Wenzel of Liechtenstein, who placed second in the slalom with a total of 87.97 seconds and took third place in the combined. She is in third place in the standings with 51 points.

Morerod said after victory: "The course required a number of changes of pace and it was pretty tricky. I tried to come down as smooth as I could. I pushed hard to outdistance Annemarie and win the combined. I missed but I am World Cup leader."

Proell Moser said she was tired after the tough downhill, and did not want to throw away her chances in the combined with too much haste in the slalom, so she took it easy.

"I have yet to hit peak condition, and I am pleased with the situation as it is now," the 23-year-old Austrian said. "There are two more downhills before Christmas and by then I should have a huge World Cup lead."

The French placed two girls in the top ten, after Fabienne Serrat dropped out in the second heat. Danielle Debernard was fifth in 89.00 and 16-year-old Perrine Pelen, who has been performing steadily in her first World Cup season, was eighth in 89.30.

Americans also had two in the top ten. Cindy Nelson was best, placing ninth in 89.32 seconds. She placed fourth in the combined for another 11 points and moved to sixth place in the overall standings at 27. Abbi Fisher finished 10th.

Women's Slalom

1. Lise-Marie Morerod, Switz. (41.47, 45.15); 86.62; 2. Hanni Wenzel, Liech. (42.52, 45.48), 87.97; 3. Claudia Giordani, Italy (42.87, 45.23), 88.14; 4. Regine Sackl, Austria (42.66, 45.61), 88.31; 5. Danielle Debernard, France (42.58, 46.42), 89.00; 6. Monika Berwein, W. Germany (43.17, 45.93), 89.10; 7. Baseball Season Continues in Court

By Joseph Durso

NEW YORK, Dec. 16 (NYT).—The big baseball lawsuit gets under way today in the Dirksen Federal Building in Chicago, assuring us that the national pastime's year will end as it began: with name-calling, grappling, accusing and no-holds-barred.

In this corner, you have Charles O. Finley, owner of the Oakland A's, a man who hits hard but (like some of his ballplayers) strikes out often. In the opposite corner, you have Bowie K. Kuhn, a man recognized as commissioner of baseball by nearly everybody except Charley Finley. In the middle sits Federal Judge Frank McGarr, a man with no known record in baseball, who postponed the start of the trial one day because he was still occupied in a criminal case.

If you have the feeling that there's more baseball action in courtrooms than in stadiums these days, you are probably right. In fact, this trial arose because of another one earlier this year when an arbitrator and two federal courts ruled that the old "reserve system" in baseball was no longer binding and that players might sell their services in the open market whenever their contracts ran out.

That ruling agitated Charley because eight of his 25 players had refused to sign their 1976 contracts and figured to become "free" when the season ended in October. So, on June 15 as the trading deadline neared, he beat them to the punch. He sold Joe Rudi and Rollie Fingers to the Boston Red Sox for $2 million, then sold Vida Blue to the New York Yankees for $1.5 million. Three days later, the commissioner decided that the sales were "not in the best interests of baseball" and canceled them. Finley countered with a lawsuit that asked triple damages for his "lost" $3.5 million.

Question of Power

Since then, the issue of triple damages has been eliminated from the case, but Finley is still suing because he is minus $3.5 million—and minus his stars. He did take back Vida Blue under a new three-year contract but the others duly became free agents and skipped town, Rudi to the California Angels and Fingers to the San Diego Padres.

"It all boils down to whether the commissioner can sit in a little room and decide what's good for baseball," says Neil Papiano, the designated attorney for Finley, and most people agree that is indeed the issue.

To carry the issue one step farther, can the commissioner decide what's good for baseball even if it's terrible for Finley? Or is baseball a kind of private club that people join when they buy teams, surrendering their right to rebel against later rulings by their elected commissioner?

Passions will be running high in Judge McGarr's courtroom at Clark and Adams Streets because neither Finley nor Kuhn has been winning any popularity contests lately. In 17 seasons as dictator of the team, Charley won five straight divisional titles and three straight world titles, but also hired 14 managers. On three occasions, he was fined by Kuhn and he makes no bones about accusing the commissioner of galloping malice. It apparently cuts both ways. Two years ago, Finley led a palace revolt that nearly dethroned the commissioner. And, when the sales were nullified in June, he compared Kuhn unfavorably with "the village idiot."

"I'm no great admirer of Finley's," says Joe Iglehart, one of the owners of the Yankees, showing the crosscurrents. "But I think he is going to win and I hope he wins. That was his property, his 3 1/2 million bucks that he lost."

Waiting for Bowie

The trial may last three weeks, with time out for the holidays, and the biggest audience will probably be drawn when Kuhn is called to the witness stand—as it was when Curt Flood took the stand in an earlier landmark case in 1969: Curtis C. Flood vs. Bowie K. Kuhn et al. The issue was the reserve clause, which Flood attacked when the St. Louis Cardinals traded him to the Philadelphia Phillies. This is how the testimony went when the centerfielder was questioned by his lawyer, Arthur J. Goldberg, former Associate Justice of the Supreme Court:

Flood: At the end of the 1957 season, I talked to the general manager and he asked me if I would go to South America and learn to play the infield and, of course, when they ask you to do something like that you are inclined to do it.

Goldberg: What kind of infielder were you?

A.—Terrible.

Q.—That is what you learned from your experience in playing in Venezuela?

A.—That I was an outfielder, yes.

Q.—Can you tell his honor and the council what type of year did you have in baseball terms (as a rookie in the minor league)?

A.—I hit .340, I led the league in everything except home runs and I think I hit 30 home runs as well.

Q.—That isn't bad, is it?

A.—That is a very good year.

Q.—Have you ever been fined by the Cardinals?

A.—Well, I was fined $250 by the general manager for missing a banquet. I suffered an injury the day prior to the banquet—a spike wound five or six inches across my foot.

The court—I am somewhat disappointed with that answer. I thought it was because he wanted to avoid the typical banquet food.

But behind the light stuff, some long shadows were cast toward today's trial in Chicago in the era of the free agent:

Q.—Are you prepared to sign a contract with Philadelphia for $90,000 to play?

A.—No, I am not.

Q.—Are you ready and eager to play baseball now?

A.—Yes.

Q.—With whom do you want to play?

A.—The team that makes the best offer.

Curt Flood didn't win that particular battle, dropping decisions right up to the Supreme Court. But now, seven years later, the rest of the ballplayers have won the war—to play for the team that makes the best offer. And that is why Charley Finley is aiming his broadside at Bowie Kuhn: challenging his handling of what's in "the best interests of baseball."

Suppose Rudi is ordered to report to Boston? somebody asked Dick O'Connell, vice-president of the Red Sox, who now have plenty of outfielders but need help in the infield.

"I guess," O'Connell said, laughing and shuddering at the same time, "that we'll wind up with Joe Rudi at second base."

Face Redskins in Playoffs

Vikings Ready to Show They're Still Full of Life

By Paul Attner

WASHINGTON, Dec. 16 (WP).—"News of our death has been greatly exaggerated," said Wally Hilgenberg about the recent play of the revived Minnesota Vikings. The Redskins know what he means.

Washington's playoff hopes seemed finished four weeks ago before a marvelous stretch run salvaged the National Conference wild-card berth. And while the Vikings were never in danger of losing the Central Division title, their play this season had hardly been inspirational—or worthy of a Super Bowl contender—until the final two games, when they slammed Green Bay and Miami.

The teams that play off in Minnesota Saturday are remarkably similar in other ways. Their defensive players are so old they should be paid with Medicare benefits, not playoff bonus money; their quarterbacks were rookies the year Roger Maris hit 61 homers; their best running backs each gained more than 1,000 yards this year; their special teams routinely make big plays, and both squads have played Russian roulette without losing since mid-September.

Minnesota has been a member of the National Football League's ruling class for so long that it just wouldn't be playoff time without Bud Grant standing on the sidelines, expressionless, while his team methodically attacks its opponent.

Falling Right

But the Vikings' lack of rah-rah almost went too far this season, and even Grant finally became concerned that all his cheerleaders had either retired or been traded away, leaving him with a bunch of quiet meditators.

That supposedly is all in the past. The old men performed like rookies in the last two victories, and Alan Page, who is enjoying one of his best seasons, remarked that things were falling into place at the right time. Who could argue with him?

Emotion and motivation are the last things that George Allen has to worry about this week. The Redskins have been riding on emotion so long they don't know what it means to be down for a game. So Allen has time to concern himself about other things, starting with Francis Tarkenton.

Tarkenton has enjoyed one of his most productive seasons (61 per cent completion accuracy, 17 touchdowns, only eight interceptions) despite having to break in two new wide receivers, Ahmad Rashad (53 catches) and rookie Sammy White (51 catches, 10 touchdowns).

Chuck Foreman has been even more impressive than last year. His receptions "fell" to 55 but his rushing yardage climbed to a team-record 1,155. There's a decided drop-off when the ball is handed to Brent McClanahan or rookie Robert Miller.

The Redskins' backfield tandem of Mike Thomas and John Riggins has been more consistent down the stretch, and Grant thinks their improvement is the reason the Redskins get to visit the frigid north this week. While Billy Kilmer is no Tarkenton when it comes to maneuvering, he is just as crafty and probably has just as good a passing arm.

On the Defense

The Vikings have virtually the same defense that carried them to two of the last three Super Bowls. But they are very old, and this may be the unit's last shot at taking that elusive championship trophy.

Carl Eller has lost a step at end and safety Paul Krause isn't as quick as in past seasons. But Page, who has blocked five kicks, and steady Jim Marshall aren't pushed around easily, and linebackers Jeff Siemon, Hilgenberg and Matt Blair are active and aggressive. The secondary, with the Wright boys (Jeff and Nate) and a healthy Bobby Bryant, has allowed opponents to complete only 48 per cent of their passes.

The Redskins' secondary, thanks to the way newcomers Jake Scott and Joe Lavender have blended in, is even more effective. The other defensive veterans have been superb lately, especially the front four, which rediscovered its pass rush.

The key to the Redskins' hopes revolves around how well they handle the Vikings' running game.

Washington has won lately when it has stopped the enemy's ground attack, allowing the front four to concentrate on reaching the quarterback. That in turn has helped the secondary make interceptions.

If Minnesota can run effectively, Tarkenton is left with more options than the Redskins would like. That was obvious when he took the Vikings on a 99-yard march against Miami Saturday. He befuddled the Dolphins with his deft play calling.

Likewise, Minnesota knows the Redskins will try hard to get their rushing machine working in full gear. The Vikings are allowing 150 yards a game on the ground this season, as almost every opponent has attacked their front four head-on.

Both clubs like to play physical games, but Tarkenton's wide receivers have enough quickness so that he can finesse things if he has to; Kilmer does not, so his offensive line must control the line of scrimmage.

It's the kind of game that can even bring out emotion in the Vikings. But don't expect Bud Grant to smile.

Grand Prix Auto Negotiations Continue on a Collision Course

PARIS, Dec. 16 (AP).—The power struggle continued in grand prix motor racing today with the team owners still refusing to negotiate with a group of leading race organizers, and the future of several 1977 world championship races is in doubt.

The heart of the problem is World Championship Racing, formed recently by eight organizers, all European except for Argentina, to negotiate as a bloc with the team owners' Formula One Constructors Association (FICA), led by Brabham owner Bernie Ecclestone.

WCR demands that FICA negotiate an overall deal for 1977 races. FICA says it prefers to negotiate individually. A meeting today of both sides, plus the sport's ruling body and the sponsors who put up large chunks of the teams' money for the multimillion-dollar sport, made no progress.

The situation is confused by a flood of contradictory statements over what contracts have been signed, whether they are valid, and allegations about the motives of all the parties involved.

First, there were contradictory statements about the first scheduled race, in Argentina Jan. 9.

Juan Manuel Bordeu, president of the Sporting Commission of the Argentine Automobile Club, formally denied agreement had been reached with the racing team owners to run the event. But Bernie Ecclestone, leader of the Formula One Constructors' Association, stood equally firmly by his statement earlier in the day that the race was on.

"I agreed by telephone with Dr. Cesar Carmen, president of the Argentine Automobile Club, and his assistant, Hector Stauffer, who told me to go ahead with organizing the race," Ecclestone said.

Bordeu said no such agreement had been made and that Ecclestone refused to negotiate.

It was typical of the long-standing squabbles among the team owners, the group of European race organizers and the ruling body—the International Sporting Commission (CSI).

Pat Duffeler, spokesman for the organizers' group, called World Championship Racing, said they had given an ultimatum to the constructors to agree by tomorrow night to negotiate with WCR, or the organizers would consider other options. They range from negotiations with individual teams to cancelling their grand prix events.

Several other delegates to the meeting, including Pierre Uguex, president of the CSI, said they believed a settlement would be reached in straightforward negotiations. British Royal Automobile Club representatives, who already have a separate agreement with the constructors, were equally confident that most or all of the season's 17 scheduled races would be held.

While WCR claimed there were still eight races, including such classics as Monaco, France, Germany and Italy, to decide, Ecclestone's associate, Max Mosley, said only five were at issue.

"And I'm pretty sure we will finally get agreements. They need us as much as we need them in a case such as Monaco," Mosley said.

Observer

Quality Under Ground

By Russell Baker

NEW YORK—Why does the New York subway have such a bad press? It is dirty, yes, but not nearly so dirty as the typical Manhattan residential street happily tenanted by New Yorkers complaining about dirt in the subways. The subway, in fact, is one of the few places in New York where dogs do not perform their necessities with insouciant abandon. This alone should qualify it as one of the more hygienic sanctuaries in town.

Baker

On balance the subways are no dirtier than the average taxicab, and a great deal more comfortable. Superior comfort results because subway cars all have full sets of wheels, a design innovation which has not yet won wide acceptance in the taxicab industry.

* * *

The New York taxicab often has what appear to be wheels under the rear end, but in fact these are instruments of quite a different nature. Their function is to loosen the passenger's spinal column by transmitting pothole energy up from the street through the rider's vertebrae and into his skull.

By contrast, one need not be an athlete to survive a subway ride intact. The subway is, by New York standards, the clean, comfortable way to go. No one questions its superiority in speed and efficiency. It is to the New York bus system as the airplane is to the buggy.

* * *

The function of buses in New York is a mystery. It is impossible to tell from studying their markings where they go. After long observation of their habits, I have concluded that they do not have destinations. They have rendezvous.

It is time journalists retired that beloved old cliché about "New York's crime-ridden subways." There is no doubt that many criminals ride the subways. Occasionally, criminals even practice their trade in transit. This hardly justifies stigmatizing the subway as "crime-ridden," a term which suggests that the subway is peculiarly distinctive from other New York locales in regard to felonious behavior.

Does anyone ever refer to "crime-ridden midtown" or "the crime-ridden East Side"? It is always "the elegant East Side."

In the section of "the elegant East Side" where I have lived the past two years, we have had three highly publicized murders, not to mention who knows how many lowly publicized murders.

* * *

In the same period, riding the subways, I have encountered nothing more unsettling than a bad boy, and he was at an age still vulnerable to a brisk spanking. There are doubtless bad characters down there enjoying the clean, comfortable advantages of fast, efficient transportation, but "crime-ridden"? All of New York is "crime-ridden," if we are going to fall into colorful talking. Why is the phrase used to disparage only the subways?

Maybe it has something to do with the graffiti, those unofficial paintings which cover so many of the cars and walls, with their reminder that contempt for official decoration flourishes unchecked in dark subway parking lots. Some New Yorkers find the graffiti menacing, omens of the coming of heathens armed with spray-paint cans.

* * *

Still, an attempt at art in the subway would make a splendid New York institution even worthier. Painters, amateur and otherwise, should be encouraged to do their stuff. Ordering new cars with replaceable side panels might be a good idea. Then the painters could be turned loose, and anything terrible could be easily replaced, anything good could be kept on mobile display through the underground, and anything great could be transferred to the museums.

'I have never quite understood the secret of Peter's perennial charm. Perhaps it is because he and his little friends keep on their way, busily absorbed in their own doings.'

Peter Rabbit Marks His 75th Birthday

By Peter J. Shaw

LONDON, Dec. 16 (UPI).—Peter Rabbit turned 75 today, still romping in Mr. McGregor's garden and delighting children of all ages.

Beatrix Potter's "The Tale of Peter Rabbit" was first printed Dec. 16, 1901. Inspired by a real pet rabbit which died shortly before his mistress achieved fame, it has sold uncounted millions of copies worldwide in at least 14 languages.

Carrot sticks and lettuce leaves fittingly accompanied the wine yesterday when a "Happy Birthday, Peter Rabbit" exhibition of Beatrix Potter's original drawings and manuscripts, sponsored by publishers Frederick Warne, began at National Book League headquarters.

"Peter Rabbit has probably achieved more international goodwill than the United Nations," said actress Nanette Newman in opening the exhibition, which continues until Jan. 14.

Beatrix Potter, who went on to create 21 more animal picture-tales for children, died at 77 in 1943. Born into a wealthy London family, she loved pets and in her mid-20s bought a young rabbit in a store on Uxbridge Road—the original Peter Rabbit whose fictional offshoot became perhaps the best-known animal in children's literature.

"The Tale of Peter Rabbit" originated in an eight-page letter, written in 1893, to a 5-year-old sick boy, Noel Moore, eldest child of her former governess. It was illustrated with 16 pencil sketches and began:

"My dear Noel, I don't know what to write to you, so I shall tell you a story about four little rabbits whose names were Flopsy, Mopsy, Cottontail and Peter . . ."

Five years later she retrieved her original letter—carefully preserved with red ribbons by the Moores—and wrote the text into a hardbound copy book. She made 42 new pen and ink sketches and called it "The Tale of Peter Rabbit and Mr. McGregor's Garden, by H.B. Potter."

It bombed.

It was submitted to at least six major publishers, including Frederick Warne, all of whom rejected it ("with or without thanks," she later recalled).

In 1901 she decided to print it privately and commissioned

250 copies which she received from the printers Dec. 16, 1901. The same day, Frederick Warne sent word it had reconsidered and would accept the book if she prepared color illustrations instead of black and white.

The first publisher's edition of 6,000 copies appeared in October, 1902, and 20,000 copies were sold by Christmas. Peter Rabbit had struck gold. But his brown and white namesake was dead.

In one copy of her privately printed edition, Beatrix Potter wrote:

"In affectionate remembrance of poor old Peter Rabbit, who died on the 26th of January 1901 at the end of his ninth year . . . Whatever the limitations of his intellect or outward shortcomings of his fur, and his ears and toes, his disposition was uniformly amiable and his temper unfailingly sweet. An affectionate companion and a quiet friend."

Shortly before her own death, Beatrix Potter wrote to a friend in the United States:

"I have never quite understood the secret of Peter's perennial charm. Perhaps it is because he and his little friends keep on their way, busily absorbed in their own doings."

Publishers Frederick Warne have another theory: As contemporary children's books go, Peter Rabbit simply entertains and amuses and doesn't try to sort out his young readers' psychological wrinkles.

PEOPLE: Nelson Rockefeller Says Some Farewells

Vice-President Nelson Rockefeller was saying some farewells to the press in Washington the other day. The Vice-President dismissed suggestions that he would run for public office again, noting that he is 68. "They say there are three periods in life: youth, middle age, and 'how well you look.'"

* * *

"In connection with their desire to celebrate the anniversary exclusively in the family circle, the Queen and the Prince emphatically requested to omit all public festivities." That's how the announcement issued by the Dutch government Thursday read. Queen Juliana and Prince Bernhard celebrate their 40th wedding anniversary Jan. 2. "The government will not organize ceremonies and neither will the flag fly on government buildings," a spokesman said.

* * *

The National Bank & Trust Co. of Traverse City, Mich., won't say why it gave Stephen Holcomb nearly $40,000 for a near worthless German bill three months ago. But the exchange is the talk of the town. Holcomb, 31, tried to use a 100,000-mark bill to buy a truck in September. The local International Harvester dealer told him he could not accept the bill, and called the bank to ask its value. But the dealer, Don Dooley, failed to tell the bank that the bill was issued in 1923 during the Weimar Republic. Holcomb went to the bank and cashed the old bill for $39,700 —the value of 100,000 deutsche marks at current exchange rates. He bought the truck for $7,000 in cash and set off on a spending spree. He lived it up in Chicago at a posh hotel, tipping the elevator operator $900 because "I thought he was doing a real good job running that elevator." He bought a stereo tape deck, a double-barreled shotgun, a pistol and a new fishing pole. By the time he got back to Traverse City, he had spent half his windfall—and the sheriff was on his trail. "They came busting in my room," Holcomb said. "They took my truck and about $5,200 cash. The two cops hauled me down to the bank and told me to sign something, so I guess that's where I lost the money I had in the bank." No criminal charges have been brought against Holcomb, but the bank is suing him for $18,177. Holcomb says that

Nelson Rockefeller ... no more runnin

the bill in question had around the house for year mother was an antiques d

A bit of monkey business ing an all-girls' dart mat Faversham, Kent, England, go down too well with lan Maggie Ward—and that sp off some gorilla warfare, Ian Waters of Paris—and Hanging in the women's of Mrs. Ward's pub, the Tavern, was a picture of Kong. Underneath were words: "Maggie Ward, pet month." To make it worse, Kong had been given a pi pink lips, a beauty spot, glasses. Mrs. Ward was a noyed by this that she rep the incident to the darts naming the Brents Tavern en's team as the culprits.

She had no proof but backed up her action by sa "There were only these ours, and a couple of men bar that night. It wouldn't been anyone in my tea wh it there have been incide the past which make me that."

Linda Ellis, Brents team tain, said: "It wasn't us, asked all the players and all deny being responsible."

When Mrs. Ward accused of spying about, the Brents en wanted to shout their cence from the treetops. settled for an ad in the paper demanding an apolog

OPEC: 10% Now, 5 Later; Saudis Split Off at 5%

From Wire Dispatches

DOHA, Qatar, Dec. 17—Saudi Arabia today broke ranks with its OPEC partners by refusing to accept a projected 15-per-cent annual increase on oil prices and promised to expand its own production to whatever levels the world market required.

In what was seen as a grave challenge to the Organization of Petroleum Exporting Countries, Saudi Arabia said it would impose only a 5-per-cent increase on its oil exports starting Jan. 1. Saudi Arabia was joined by the United Arab Emirates, in deciding to limit the increase.

The 11 other members of the 13-nation organization decided to boost their prices by 10 per cent Jan. 1 and by 5 per cent more six months later. Saudi Arabia said it would hold its increase to 5 per cent all next year.

The 11 will increase the price from $11.51 per 42-gallon barrel —former price of crude—to $12.70 as of Jan. 1, and to $13.30 as of July 1.

Yamani Denies Aim

Sheikh Ahmed Zaki Yamani, the Saudi Arabian oil minister, said the Saudi position was not aimed against the other OPEC members.

"We have no aims. We decided the price of our own oil, they decided their own," he said.

He also said that a price increase of above 5 per cent "would be harmful to the world economy" and would have caused suffering in industrialized countries such as Britain, Spain, France and Italy.

In exchange he said, "we expect an appreciation from [the Carter] administration for what we have done. And this has to be shown in your efforts toward a peaceful settlement of the Arab-Israeli conflict and in new efforts at the so called North-South dialogue to increase aid from the industrialized nations to the Third World.

Sheikh Yamani did not spell out what he expected the United States to do about the Arab-Israeli conflict but Mana Sayeed Otaiba, the oil minister of the U.A.E. made clear what they have in mind.

No Assurance

He said their contacts with the incoming Carter administration had brought no specific assurance but added that, "we are since 1967 asking the whole world to play a positive role in putting pressure on Israel to pull out of the occupied territories and acknowledge the rights of the Palestinian people. We are ready to use all the weapons and equipment and whatever we have in hand" to achieve that. That means holding the line on the price of oil sold to the Western countries because "we need their cooperation in searching for a peaceful settlement," he said.

At a press conference at the conclusion of OPEC's meeting here, Sheikh Yamani said his country and the U.A.E. believe that the other members were wrong to approve the two-step 15 per cent boost and that this new price could not be maintained in the face of increased production of lower-priced Saudi oil. "Their price will come down to our price," he said.

Saudi Arabia, which literally has more oil income than it knows what to do with, has been under a self-imposed production limit of 8.5 million barrels a day. Sheikh Yamani said his country would "definitely" remove that ceiling and allow production to expand, up to the maximum capacity of 11.8 million barrels a day if necessary, to force the other countries to toe the price line.

If Saudi Arabia and the emirates export to their full combined limit of about 14 million barrels a day, they would be producing nearly half of OPEC's anticipated total demand in the coming months, up from about a third at the moment—thus eroding the market share of the others.

The effect of this on the nations that are applying the 15-per cent increase, Sheikh Yamani said, is that "automatically their production will be reduced," which they reduce their prices or their production will be reduced," which in either case would nullify their attempt to increase their revenues.

Independent analysts here said the Saudi decision is certain to cause a period of turmoil on world oil markets that makes it virtually impossible to judge the full effect on the consuming nations.

Pipelines and storage tanks are full to their highest point since 1939, with oil that was stockpiled in anticipation of the price increase. The demand generated by the belief that OPEC would impose an increase has itself sent spot market prices well over the

Associated Press.

Sheikh Ahmed Zaki Yamani at news conference in Qatar.

EEC Calls Rise Worse For Europe Than U.S.

From Wire Dispatches

BRUSSELS, Dec. 17.—Western Europe will be hit harder by the oil price increases than the United States, according to a spokesman for the European Commission—the European Economic Community Executive.

Figures made available today showed that the nine countries of the European Common Market get about 40 per cent of their supplies from Saudi Arabia and the other regions which are limiting the price increase to 5 per cent.

Last year's figures from the U.S. Bureau of Mines show that oil imported from the oil producing and exporting countries accounts for 60 percent of all petroleum imports to the United States, or a total of 3.6 million barrels a day. Saudi Arabia and the United Arab Emirates accounted for only about 24 per cent of that total. From all sources, including OPEC member Venezuela, the second-highest U.S. supplier (after Saudi Arabia), the United States imported 6 million barrels 2 day in 1975.

The European Commission estimated a month ago that a 10-percent increase in the price of crude oil would cost the nine EEC member countries an additional $4.9 billion a year. The spokesman would not estimate how much this figure would change in view of the two-tier price system.

In Washington, President Ford condemned the decision of 11 oil-exporting countries to raise prices by 10 per cent, declaring it irresponsible and short-sighted.

"Unfortunately, however, the majority of OPEC members, citing artificial economic justifications and ignoring the destructive consequences of their actions, chose to take a course which can only be termed irresponsible," Mr. Ford said in a statement released by the White House.

In Plains, Georgia, President-elect Jimmy Carter praised Saudi Arabia and the United Arab Emirates for holding their price increases to 5 per cent. He withheld comment on the 10-per-cent rise by the 11 other OPEC nations.

Press secretary Jody Powell said Mr. Carter "appreciates the statesmanlike actions of the Saudis and emirates."

At the United Nations, Cyrus Vance, the U.S. secretary of state-designate, said he was "greatly pleased by the courageous and statesmanlike action" of Saudi Arabia and the emirates in holding their price increases to 5 per cent.

"Later today President [elect] Carter and I will be sending a message to them expressing our appreciation for their actions," Mr. Vance said.

Mr. Vance said no commitments were made to the Saudis in connection with the oil-price decision.

U.S. officials estimated the cost of U.S. oil imports probably will climb about $7 billion next year as a result of the price increase. They estimated there will be an increase of about 8.5 per cent in the total price for U.S. consumers.

Treasury Department officials said the oil price hike would increase the U.S. inflation rate next year between a tenth and a fifth of a percentage point.

The Treasury officials said the gross national product, the total output of the nation's goods and services, would drop by $3 billion to $4 billion next year, or 0.3 to 0.4 per cent.

In Europe, EEC experts had calculated that a 10 per cent increase would add about $4.9 billion to the EEC's annual import bill. They said this was probably the maximum the community could bear.

Here was how the price rise

(Continued on Page 2, Col. 5)

U.K. to Be Bound By Votes Over Scot, Welsh Rule

GLASGOW, Dec. 17 (AP).—Referendum results on partial self-rule for Scotland and Wales will be "absolutely binding" on the British government, the Cabinet minister in charge said today.

As a result of the decision, the future of the two territories—either ruled entirely from London or not—now lies in the hands of the Scottish and Welsh peoples.

The statement, by Devolution Minister John Smith, followed yesterday's endorsement in the House of Commons of a proposal to hold referenda late next year on the major constitutional changes that would give Scotland and Wales a large measure of independence within the United Kingdom.

The date for the votes has not been fixed, nor the wording of the referendum questions.

Last night, the House of Commons backed the devolution bill on its first reading by 292 votes to 247. At least 27 members of the Conservative opposition abstained, defying party orders to vote against the bill. Thirty dissenting Laborities alsorefused to vote.

Ordered to Pay Damages

Nixon, 2 Aides Lose Wiretap Case

By Nicholas M. Horrock

ASHINGTON, Dec. 17 (NYT). United States district-court ge ruled here yesterday that ner President Richard Nixon two members of his admination had deprived Morton perin and his family of their stitutional rights by having ir home telephone tapped for months.

a strongly worded opinion, ge John Lewis Smith jr. said surveillance of Mr. Halperin, rmer White House aide, "conted an invasion of plainy privacy and freedom of exsion. For these reasons . . . court finds the wiretap per unreasonable under the Fourth endment and unjustified by y possible exception thereto." e ordered Mr. Nixon, John chell, the former attorney eral, and H.R. Haldeman, Mr. on's White House chief of ff, to pay damages to Mr. Halin and his family. The amount damages will be set by the ge after further information supplied by the parties to the e.

Precedent Set

's was the first time, several al experts said, in which a mer president has been liable court for official actions taken le he was in office. It was apparently the first time a eral judge has ordered that ney damages be paid for an asion of privacy in a wiretapg case.

udge Smith found that Secrey of State Henry Kissinger Gen. Alexander Haig, alugh involved in arranging the etap, had an "inactive role and lack of oversight author-." He cleared them of legal ility for the wiretap.

he judge also cleared of legal ility Robert Mardian, a form assistant attorney general, iam Sullivan, former assis director of the Federal eau of Investigation; John lichman, who was chief of White House domestic coun- the Federal Bureau of stigation agents who manage the tap, and the Chesapeake Potomac Telephone Co.

r. Halperin, reached at an ort near Washington, said he "somewhat overwhelmed. I pleased that my rights have vindicated by the court."

on Shattuck, leader of a of American Civil Liberties n lawyers who pressed Mr. erin's case, said they plan- to ask Judge Smith to set ages in the range provided under the wiretap law.

udge Smith specifically ruled Mr. Nixon's actions were a violation of this law. The tap law provides that a n of an illegal wiretap must paid $100 a day for each his conversations were tied upon.

nce the judge found in favor Mr. Halperin, his wife and three children against three rate defendants, damages d on the wiretap formula d amount to $800,000 to $1 on.

ither Mr. Nixon, Mitchell, leman nor their lawyers could reached for comment. An al of Judge Smith's ruling ed likely.

bert Havel, chief spokesman the Department of Justice, its lawyers had the opinion r study. He said that their al impression was that Judge Smith squarely ruled that the damages must come from the personal funds of Mr. Nixon and his aides.

However, as former government employees, Mr. Nixon, Mitchell and Haldeman may seek to have the government "indemnify" their official actions and pay the claim.

A Justice Department source said its lawyers felt the ruling was a "victory" in that Judge Smith rejected Mr. Halperin's contention that the tap was a violation of the federal wiretap law. This solidifies to some extent the government's right to conduct electronic surveillance.

The Judge noted that no other investigation of Mr. Halperin was conducted and that the tap was retained after he had left his White House position on the National Security Council.

"The wiretap thus appears to have developed into a dragnet which lacked temporal and spatial limitation," he said.

Agents of Chile, Iran, South Korea

Senate Panel Is Said to Probe 'Friendly' States' Spies in U.S.

By Anthony Marro

WASHINGTON, Dec. 17 (NYT). —The Senate Select Committee on Intelligence Activities has begun an investigation into clandestine activities that have reportedly been conducted in the United States by the intelligence agencies of "friendly" foreign governments, committee sources said yesterday.

The investigation, which was described as "delicate" and as being in its preliminary stages, is initially focusing on activities that have allegedly been carried out in this country by agents of Chile, Iran and South Korea. However, the intention is to include eventually the activities of a number of other "friendly" nations as well.

Of particular concern to the committee, the sources said, is the question of whether U.S. intelligence agencies may have developed any informal agreements with foreign intelligence agencies that would permit them to operate here in return for allowing U.S. agencies to operate abroad.

A source said that the committee had been assured there were no formal agreements but was intent on learning the nature of any "informal understandings" that might exist.

'Touchy Matter'

"It's a very touchy matter, because we have our own [intelligence agencies] operating overseas," said an individual familiar with the investigation. "The CIA trained and helped establish some of these agencies, so it's not like going after the operations of a potential enemy."

The sources said that the full committee had not met formally to discuss this investigation, but that it was being conducted at staff level with the approval of the committee chairman, Sen. Daniel Inouye, D-Hawaii, as part of the panel's general oversight function.

Sen. Inouye could not be reached for comment, and a spokesman for his office would say only that "the committee is obliged under Senate Resolution 400 to look into such matters to the extent they relate to United States intelligence agencies."

The 17-member committee was created last summer after disclosures of large-scale and sometimes illegal spying on U.S. citizens by federal intelligence agencies and was given broad powers to monitor the activities of the intelligence community.

The investigation is said to have started last September, after charges were made by opponents of the military junta governing Chile that Chile's secret police may have been involved in the bomb killing in Washington of Orlando Letelier, who had been Chile's foreign minister during the presidency of the late Salvadore Allende.

The Chilean government has denied any involvement.

The investigation is said to have grown with the disclosure of an alleged plan of influence-buying and of harassment of Korean nationals in this country by the Korean Central Intelligence Agency, and after a statement by Shah Mohammed Reza Pahlevi on a television program that Iranian agents were checking on the activities of Iranian students in the United States.

FBI sources have said that agents attempting to conduct break-ins and electronic surveillance of Arab embassies and consulates in this country found evidence that Israeli agents had been attempting the same thing.

And, according to a former intelligence officer, many Third World governments try to monitor the activities of their nationals here.

Cites Arab Positivism

Hussein Says He's Optimistic On Israel Settlement in 1977

By H.D.S. Greenway

AMMAN, Dec. 17 (WP).—King Hussein said yesterday that he is optimistic that "definite progress" toward a peace settlement with Israel can be made in the coming year.

He said he bases his optimism on a new maturity as well as a "positive" attitude in the Arab world, coupled with the advent of a new administration free from election-year pressures and a better understanding of the Arab position in the United States.

"We have been through many wars and each one has been more costly than the one that preceded it," Hussein said in an interview at the palace. Barring the disappointment that might come if all hope toward peace were blocked, "I don't think that any would consider war again," he said.

If there were no visible progress soon, however, the King warned, the Arab world might lose hope. He fears that the Arab world then would "despair" and turn to extremists.

"But," he said, "I believe this area is mature as far as the majority of the people and its leaders are concerned, and I believe that the Arab attitude has been very positive and will continue to be."

The same could not be said for Israel, Hussein said.

The Israelis speak of negotiations, "yet they are holding all the cards and they haven't been half as positive as the Arab side," he said.

The King said the Arabs resented Israeli claims that their peace efforts were insincere and represented only a change of tactics designed to fool foreigners while they continued to plot the destruction of the Jewish state.

When asked whether, in exchange for a return to the 1967 borders, he would recognize Israel as a legitimate state with a right to exist, Hussein said: "Definitely. That was clear to the Arab side when we agreed to accept Security Council Resolutions 242 and 338."

In Hussein's view, "what should be attempted in the near future is a massive effort for a comprehensive settlement."

Hussein said he would not be opposed to an Israeli withdrawal from occupied territories in stages, as long as Israel committed itself to total withdrawal.

He also suggested that something less than total withdrawal might prove acceptable, but that was a matter for the Palestinians to decide for themselves, he said.

Hussein did not consider the plan of Israeli Foreign Minister

Exchange Proposed by Sakharov

Russia to Swap Dissident for Top Chile Red

By Peter Osnos

MOSCOW, Dec. 17 (WP).—The Soviet Union has decided to release imprisoned dissident Vladimir Bukovsky and send him into exile in return for Chile's release of Luis Corvalan, leader of that country's Communist party, dissident and diplomatic sources said today.

The sources said that the exchange—which involved the United States as go-between for Santiago and Moscow—will be completed tomorrow when Mr. Bukovsky, his mother, sister and nephew will be flown to Geneva at the same time that Mr. Corvalan will be traveling to Moscow.

[In Chile, Santiago airport sources said that Mr. Corvalan and his wife today flew to Europe after three years as a prisoner of the military government, Reuters said.

[Mr. Corvalan reportedly was put aboard a Lufthansa airliner which took off for Buenos Aires, Dakar, Zurich and Frankfurt.]

The idea for the trade was first proposed in October by Andrei Sakharov, the Nobel prize-winning Soviet dissident physicist, and discussions got under way last month with the U.S. providing the necessary link between the Kremlin and the Chilean junta, which do not maintain diplomatic relations. Moscow has exchanged spies in the past but there seems to be no precedent for such a move with a political prisoner—particularly since the Soviets have always denied having political detainees.

Mr. Bukovsky, who will be 34 in two weeks, was sentenced in 1972 to seven years in jail and labor camps to be followed by five years in internal exile on charges of anti-Soviet agitation resulting from his activities as one of Moscow's most active dissident intellectuals.

At that time he had already spent nearly seven years in custody and in Soviet mental hospitals. Reports have frequently circulated about his precarious health.

The fate of the young dissident became a symbol of Soviet repression to human rights advocates in the West and Mr. Bukovsky's name led the list of imprisoned Russians whose release was often demanded from abroad.

Most recently his case had been vigorously taken up by the French Communists, eager to demonstrate their support for democratic freedoms. This was a source of extreme irritation to the Soviets who criticized the French Communists and in October produced a Soviet deputy minister of justice who said that Mr. Bukovsky had been jailed for concrete actions threatening the Soviet system, and not his views.

Vladimir Bukovsky

The 60-year-old Mr. Corvalan was arrested after Chile's military overthrew Marxist President Salvador Allende in 1973. Since then, his case has become the focus of a concerted Soviet campaign against the Chilean junta. "Free Luis Corvalan" rallies and posters are a fixture in the Soviet Union and other Communist

People Won't Leave Farms

Moscow Is Facing Problems As Asian Population Grows

By Robert C. Toth

URGENCH, U.S.S.R.—The Soviet Union has an "employment problem" here in Central Asia. The people won't leave the farms. Since the Soviet Constitution forbids unemployment, all are put to work—with up to eight doing the job of one in some cases.

The basic cause of the problem, a Central Asian population growing five times faster than the national average, will have increasingly serious consequences for the whole country.

A fourth of the total Soviet population growth now is in Central Asia, and between 1970 and 1999, fully half will be here.

The five republics in this region are Kirgizia, Tadjikistan, Turkmenia, Uzbekistan and Kazakhstan. If there is no massive migration from farms to cities in these republics and in the Russian Republic itself—where most industry is located and future expansion planned—the economic consequences for the country could be very significant.

And if there is such a movement of Asiatic peoples, the social impact in Slavic Russia could also be significant.

Non-Slavic Tier

Some Western analysts also see political and military repercussions in the buildup of population in the non-Slavic southern tier, a problem summed up here as "East won't go West."

A major reason why Uzbeks don't want to leave the farm is that the living is very good. "People in cities write asking to come here for our good wages and good living conditions," said Bilyl Mavlyanov, director of a cotton collective near here.

The average wage is 165 rubles ($218) a month, which is 75 per

Population Has Risen to 200

Israeli Settlers Holding Out At Illegal Camp on West Bank

By William E. Farrell

CAMP KADUM, Israeli-Occupied West Bank, Dec. 17 (NYT). —About a year ago, the Israeli government told a zealous group of Israeli squatters that they could remain in their illegal settlement here for only three months while the Cabinet decided on the future of its West Bank settlement policy.

The reluctant concession by the government, which some regarded as capitulation, gave the squatters their opening wedge. Today, abetted by government inertia and their own hard work, the settlers of Camp Kadum are *busily forging ahead to give* an aura of permanence to their Jewish community, situated in the heart of a densely populated Arab area.

The evidence of the settlers' digging in, despite continued protests that their action openly defies the Israeli government, is easy to see here. The population of the settlement, which is in a hilly enclave that also holds an Israeli Army camp, has grown from 120 to about 200.

NYT.

Light Industry

The settlers have set up some *light industry, including* a ceramics shop and a small metal plant that turns out parts for the Israeli military under a defense subcontract. An interior road, called Back to Zion Street, is being paved. A number of wooden houses are being built near the house trailers inhabited by the original settlers. And two huge water tanks have replaced an earlier, primitive facility.

The squatters are followers of a right-wing, ultranationalist Orthodox Jewish group called Gush Emunim, or Faith Bloc, which claims the right to settle anywhere in the ancient biblical homeland of the Jews. Much of that ancient homeland is in the West Bank area captured by the Israelis during the 1967 war.

While Kadum is still characterized officially as an illegal settlement, the Israeli government has sanctioned other Jewish settlements on lands taken in 1967. In all, *according to* unofficial figures, there are 70 settlements either built or in the planning stages on the West Bank and the Golan Heights, and all but Kadum have received government approval. In addition, there are 14 settlements in the Gaza-Rafah area.

The officially approved settlements are highly controversial internationally and are expected to be more so next year, when major moves toward an Arab-Israeli accord are expected to get under way.

'Obstacle' Noted

The United States, Israel's ally, is at odds with the government of Prime Minister Yitzhak Rabin over the West Bank settlements. Some months ago, the chief U.S. delegate to the United Nations, William Scanton, described them as "an obstacle to a final peace between Israel and its neighbors."

Most of the approved settlements in the occupied territories are seen here as defining how the Israelis hope ultimately to draw their borders, although officials do not discuss this publicly. Kadum is seen as an intrusion into this scheme since it is near Nablus in a heavily populated Arab area that Israel is said to want to leave unsettled for eventual negotiation purposes.

The Kadum settlers have been criticized by Mr. Rabin, who *presides over a fragile government* that is a coalition of disparate interests, including the National Religious party, which is sympathetic to the settlers. While he and other officials have promised —most recently last May—to take action against the illegal settlement, nothing has been done.

Political Power

The settlers are aware that *they have some political power* and are willing to use it. A spokesman for Camp Kadum, Benny Katzoyer, said on a tour of the community that "we believe the government cannot get a decision" to remove the settlers because of political pressure and public support for the settlement.

"We believe that we are here as a help to the government," Mr. Katzover said.

Asked if the community would relocate if the government provided a settlement for them, Mr. Katzover said that it would only if the new place were in the *present area and not, for* instance, in the Jordan Valley.

"This is the middle of Israel," he said, "the heart of it—much more so than Haifa or Tel Aviv or anyplace else."

Hussein Sees Peace Hope

(Continued from Page 1)

Yigal Allon, under which Israel would return the West Bank minus East Jerusalem and a string of Israeli settlements kept as a security belt in the Jordan valley, as an acceptable solution under any circumstance.

Israel has annexed East Jerusalem and has said the city will never be divided again. The Jordanian position is there should be Arab sovereignty over the Arab part of the city.

At the 1974 Rabat conference, Jordan agreed to hand over responsibility for the lost Jordanian territory on the West Bank to the Palestine Liberation Organization as the sole representative of the Palestinian people. Although he never mentioned the PLO in his interview, he made it clear that he considered Palestine the responsibility of the Palestinians, not of Jordan.

"We would probably attend Geneva," he said, "but we would insist that the Palestinians be represented and that they assume their responsibilities concerning Palestinian rights and territories."

Jordan *would become* directly involved as a negotiating partner with Israel only if all the Arabs, including the Palestinians, asked Jordan to do so, Hussein said.

United Press International.

IS VENICE STINKING?—Growing mounds of garbage due to a sanitationmen's strike answers the question.

Saudis, U.A.E. Resist 15% Rise In Oil Price—Hold to 5% Hike

(Continued from Page 1)

current base price for Saudi Arabian light crude—hitherto the industry's benchmark.

Jamshid Amouzegar of Iran, Saudi Arabia's chief rival for influence within OPEC, disputed Sheikh Yamani's contention that the 15-per-cent increase would crumble in the face of underselling by Saudi Arabia and the U.A.E.

"The world cannot live without" the oil exported each day by the 11 countries, he said.

These nations are: Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar and Venezuela.

Mixed Barrels

Major oil companies that buy in both markets, Mr. Amouzegar said, may be asked to average their costs as a way of keeping their supplies of oil flowing without having to play one country off against another; i.e. mix a barrel of Saudi oil with a barrel of Iranian or Iraqi oil and set a combined average selling price for the two. That would allow each country to sell at the price it prefers and avoid a price war.

He refused to criticize Saudi Arabia directly for its refusal to accept the majority decision. But he said "if any country wants to increase its production of oil without needing the money, if they deliberately want to hurt their colleagues, you can ask them about it." Iran and Iraq led the OPEC bloc that sought major price increases to make up for what they said was inflation in the cost of imported goods and services.

Mr. Amouzegar said OPEC had no intention of trying to harm the economies of the West and the 15-per-cent boost could easily be absorbed.

He said two or three Western nations with economic problems would get special bilateral arrangements to help them, including deposits of surplus OPEC funds to help their balance of payments.

He did not elaborate and did not name the countries, believed to include Italy and Britain.

Rhodesians Again Hit Mozambique

LONDON, Dec. 17 (Reuters).—Rhodesian troops backed by jet fighters, bombers, helicopters and heavy artillery crossed into Mozambique today, killing 8 civilians and wounding 10, according to Maputo radio monitored here.

The Mozambique capital's radio quoted a communiqué from the Ministry of Defense as saying the attack began at 5 a.m. this morning in the Chirara area of Manica Province which borders on Rhodesia.

According to the report, the civilian casualties were caused by bombs. The radio also reported that Rhodesian forces had attacked the Chitanga area in Gaza Province south of Manica yesterday and today, again using heavy artillery. No losses were reported on the Mozambique side.

Vienna Bomb Incidents Seen Tied to Detainee

VIENNA, Dec. 17 (Reuters).—Two bombing attempts apparently aimed against police buildings were reported today while security officers questioned a West German bank robbery suspect concerning possible links with urban guerrillas.

Police said a bomb exploded in a toilet in a police barracks this morning, injuring one person slightly. They said that a small explosive device was found and defused yesterday in a street close to Vienna police headquarters. Security authorities said they suspected a link with the case of the robbery suspect, Waltraud Boock, 26, of Frankfurt.

OECD Strike Ends

PARIS, Dec. 17 (UPI).—Striking employees of the Organization for Economic Cooperation and Development voted today to return to work to test a management salary offer, a spokesman for the strikers announced.

Madrid Gets New Demand In Abduction

Leftists Ask Release In All Political Cases

MADRID, Dec. 17 (UPI).—The kidnappers of a high government official today hardened their demands, sources close to the government said.

Their message was addressed to the newspaper El Pais, which has been used as a "letterbox" by the leftist urban guerrillas who kidnapped Antonio Maria de Oriol y Urquijo, president of the Council of State, six days ago. El Pais confirmed that it had received a new message.

According to the sources the guerrillas demanded that the government free not only 15, but all of Spain's estimated 200 political prisoners and convicted terrorists.

As the deadline for execution tonight neared, two lawyers retained by the Oriol family flew to Paris in a chartered jet, hoping to establish contacts with persons connected with the kidnappers.

Premier Adolfo Suarez prepared to spend the night at his office with key members of the Cabinet, sources said.

The two lawyers who left for Paris, Juan Gonsales Berzosa and Luis Castella, said they were retained by the Oriol family three days ago with a view to establishing contact with the "Anti-Fascist Resistance Group Oct. 1," the obscure leftist group that kidnapped Mr. Oriol.

The two lawyers did not claim that a meeting with representatives of the kidnappers was certain. But they said they will be *in contract with Spanish lawyers* now living in Paris who in the past have defended Spanish leftist extremists in court cases.

Sources said the government has not succeeded in establishing contact with the kidnappers. It has been seeking such contacts through middlemen—Red Cross officials, diplomats and lawyers.

A rightist extremist group threatened "a Night of the Long Knives" if Mr. Oriol is killed. In calls to newspapers, the Apostolic Anti-Communist Alliance of Spain, a mysterious outfit modeled on *Latin American* "death squads," said three groups of guerrillas were ready to kill leftist politicians.

EEC Reaction To Oil Price

(Continued from Page 1)

was viewed in various countries:

France: Government sources had said a 10-per-cent increase would cost France 5.5 billion francs ($1.1 billion). Prime Minister Raymond Barre said this week that a ceiling would be imposed on oil imports next year.

Italy: Financial analysts said the government's austerity program had been based on the assumption of a 10-per-cent rise.

West Germany: Bankers in Frankfurt said West Germany was probably in a better position than any other country to withstand the increase. *They said it* would add about 6 billion deutsche marks ($2.5 billion) to next year's oil import bill, but noted that the country was expected to have a 1977 trade surplus of about 40 billion deutsche marks.

Japan: Government economists estimated the increase would add about $2 billion to Japan's annual import bill but leave the country with a healthy trade surplus.

Australia: Oil-industry sources said the cost of oil imports would rise by about 100 million Australian dollars ($105 million) a year.

The Netherlands: Finance Minister Willem Duisenberg said the increase was not excessive, but he hoped the oil producers would assume responsibility for the world's poorest countries, whose economies would come under severe pressure. He said the effect on the Netherlands, which exports natural gas, would be minimal.

Gilmore Recovering

SALT LAKE CITY, Dec. 17 (AP).—Convicted killer Gary Gilmore, who apparently tried to kill himself yesterday with a drug overdose, has been taken off the critical list, a hospital spokesman said today.

Russian Dissident Bukovsky To Be Traded for Chile Red

(Continued from Page 1)

countries. The best guess as to why Moscow decided to make the exchange now is that Mr. Corvalan's presence in Moscow this weekend will add a boost to the celebration of Soviet party chief Leonid Brezhnev's 70th birthday on Sunday. His release seems certain to be presented as a triumph of Soviet pressure on the Chilean regime—with little or nothing said about Mr. Bukovsky.

Nina Bukovsky, 63, the dissident's widowed mother, said today that two officers of the KGB had come to her apartment on Tuesday to tell her that the deal was arranged. They said that Mr. Bukovsky would be brought to Sheremetuevo Airport Saturday for the Aeroflot flight to Geneva, directly from Vladimir Prison east of Moscow.

Also travelling will be Mrs. Bukovsky's daughter Olga, 36, who is a divorcee, and Olga's son Mikhail, 12, who has suspected cancer of the lymph glands. He will be taken to a hospital in Basle.

Mrs. Bukovsky last saw her son in August when she visited him at Vladimir. He had staged a hunger strike to protest his removal from a labor camp where he said he had been better treated. "He looked terribly emaciated, like a victim of a concentration camp," she said. Pausing from the hectic last-minute preparations for departure, she told reporters who visited her at the family's small Moscow apartment, "My joy is very great."

Many Appeals

It was Mrs. Bukovsky's energetic efforts on behalf of her son, including scores of appeals to word public figures, plus the dissident's

— Luis Corvalan

demonstrated courage over the years, that made his case so well known. Unlike some of the other celebrated Soviet exiles of recent years, Mr. Bukovsky's greatest accomplishment up to now has been that he withstood Soviet punishment for his views.

Gradually the Kremlin's most outspoken internal opponents of the past decade—Alexander Solzhenitsyn, historian Andrei Amalrik, mathematician Leonid Plyushch—are leaving the country. There are other critics still here but none aside from Mr. Sakharov has captured the international limelight the way their predecessors did.

Removing Mr. Bukovsky as a factor in Moscow's relations with European Communist parties, and as a martyr for human rights advocates throughout the West, may well be worth the price to the Kremlin of tacitly, at least, acknowledging that he was a political prisoner after all.

Moscow Is Facing Problems As Asian Population Grows

(Continued from Page 1)

cent more than the average income of a Russian collective farmer, and at least 10 per cent better than the average income of an industrial worker in a city.

More important are the extras provided on a profitable southern kolkhoz, or collective.

In cities, apartments are cramped and badly built. Here, attractive, three-room cooperative apartments with high ceilings and low interest rates can be purchased from the kolkhoz.

"The [Uzbek] villages have rejected the stereotype Russian [apartment] housing of the 1960s and are building roomy and comfortable houses" with touches of traditional architectural style of the region, the noted sociologist Victor Perevedentsev wrote in an article on Central Asia.

No attempt is being made to curb the exploding population here. Quite the reverse. An Uzbek official was apologetic recently over the fact that his republic's birthrate [32.8 a thousand] is second to Tadjikistan. "We would like to be first and will be first in the future," he said.

'Motherhood Medal'

To stimulate births through the country, authorities two years ago, among other measures, created new mother awards—the "Motherhood Medal," second and first class, for five and six children respectively; and the "Glory of Motherhood" order, with three classes, for seven, eight and nine offspring. These supplement the longstanding "Mother-Heroine" award for 10 children. Uzbekistan boasts the largest number of mothers—1,671,507—with these awards.

At the same time, Central Asia dropped its marriage age for girls to 16. "Medicine has established that females mature earlier in our climate than in the north," the Moslem mufti of Tashkent said.

It is necessary to make Central Asia into the prime Soviet "baby factory" because birthrates in the Slavic and Baltic republics are barely sustaining or already less than sustaining their current populations.

These population factors are bound to affect the military. Maintaining the level of the armed forces—roughly 4.5 million men—will be difficult after the mid-1980s.

U.S. to Construct 2 Oil Superports In Gulf of Mexico

WASHINGTON, Dec. 17 (UPI). —Citing the need to provide easier, cheaper access to foreign oil, Transportation Secretary William Coleman today approved the construction of two superports in the Gulf of Mexico—the first such facilities in the United States.

He said the ports off the Texas and Louisiana coasts would be *subject to "tough" environmental* constraints, and actually would provide better protection against future oil spills in the gulf by reducing close-in ship traffic and ending the at-sea transfer of oil from supertankers to smaller vessels.

The result, he said, will be to reduce oil transportation costs by 30 per cent, or about 29 cents a barrel.

Supertankers are unable to enter most U.S. ports because the Continental Shelf makes the bottom too shallow for their deep draught.

The superports, their platforms built out at sea, allow the big ships to pump their oil off shore, where it is carried to land by pipelines.

All Italian Parties Meet on Violence

ROME, Dec. 17 (AP).—Premier Giulio Andreotti called leaders of all major political parties together today to discuss political violence that has resulted in the death of six persons in the past three days.

A bomb went off in an abandoned sack during the rush hour last night in Brescia, killing a woman and critically injuring two policemen. Three police officers and two leftist guerrillas were killed in street battles in Rome and Milan Tuesday and Wednesday.

The all-party meeting was proposed by the Socialists who, along with the Communists, support Mr. Andreotti's minority Christian Democrat government by abstaining on key votes in parliament. Avanti, the Socialist party newspaper, urged "the mobilization of popular masses and political forces against the strategy of tension."

Russia Subs Said Monitored

WASHINGTON, Dec. 17 (UPI). —For the last year the Navy has been monitoring ship-to-shore communications from Soviet submarines, thanks to data gleaned from a sunken Soviet sub partially recovered in 1974, The Washington Post reported today.

The Post, quoting sources said Soviet submarines have recently switched to satellite communication with their homeland and messages are no longer being retrieved by U.S. authorities.

2 U.S. Firms Fire Officials Over Payoffs

3d Firm Reveals Questionable Fees

By Jack Egan

NEW YORK, Dec. 17 (WP). Continental Oil Co. and Jos. Schlitz Brewing Co. revealed yesterday that top officials of both firms had been fired for involvement in payoffs.

And Philip Morris, disclosed, in a filing with Securities and Exchange Commission, that its Miller Brewing Co. unit made nearly $2 million in questionable payments between 1971 and May, 1976, to promote the domestic sales of Miller beer.

In a surprise move, Continental, 16th largest industrial corporation in the United States, Wednesday fired two of its vice-chairmen because, Conoco said, they knew about or took part in questionable foreign political payments but withheld the information from a committee of company directors investigating the disbursements.

Conoco officials who were fired are Wayne Glenn, vice-chairman for petroleum exploration and production and marketing, and Willard Burnap, vice-chairman, petroleum refining and marketing. Mr. Glenn also gave up his seat on the 15-member Conoco board of directors.

Company Probe

Conoco said the firings came in the wake of a company investigation into political contributions and other questionable payments dating back to Jan. 1, 1971.

The investigation is "substantially complete," according to a Conoco statement, and so far has turned up a total of $95 million in company funds used to make unauthorized political contributions to federal, state and local officials in the United States, $148,000 in payments to political parties abroad and $3.4 million in payments to political parties abroad. No names were disclosed.

Schlitz, which disclosed in June, 1975, that the SEC was investigating alleged payments by the company's retail accounts to handle Schlitz products as part of a wide probe of the beer and liquor industry, yesterday announced a major shakeup in its marketing department as a result of its own investigation.

Four marketing executives were put on leave of absence in August and it was revealed that three have been fired and one has resigned.

Philip Morris, in its SEC filing, said that it had uncovered no improper use of corporate funds by Miller Brewing for payments to government officials for political contributions, but that $1.97 million had been paid over more than three years in commercial transactions to promote the sale of Miller beer.

More Payments

WASHINGTON, Dec. 17 (AP). —Foster-Wheeler Corp. says it paid *over $2 million in the last five* years in payments that were legal in the country where the money was spent, according to documents filed yesterday with the SEC.

The filing named neither the project nor the nation or nations involved in the reported payments. Foster-Wheeler is engaged in design, management and installation of power plants, chemical plants and oil refining equipment. It has subsidiaries around the world, including Britain, France, Italy, Spain, Canada, Mexico, Brazil, Iran and Kuwait.

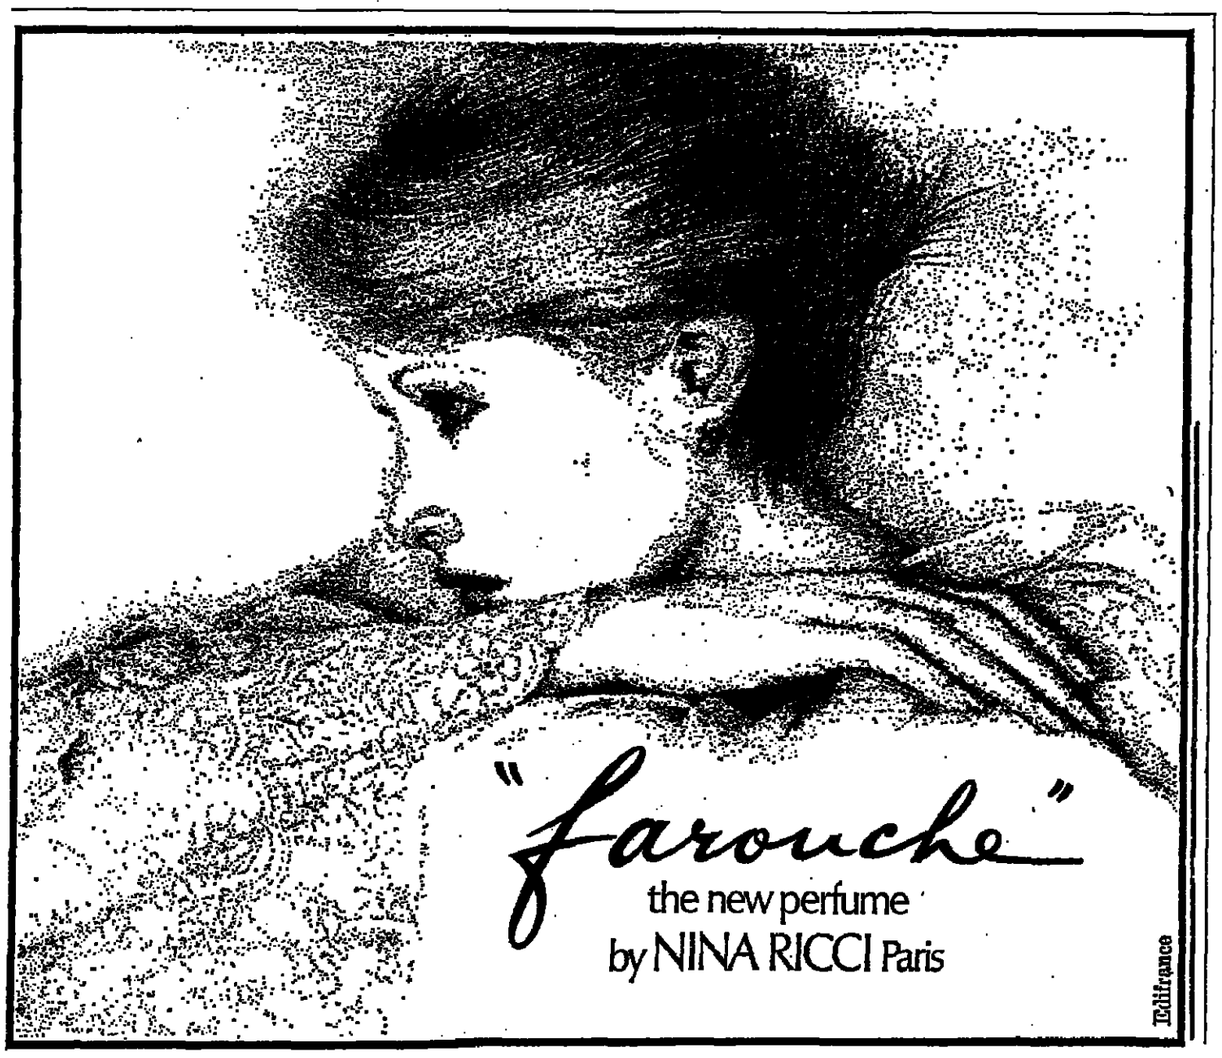
Munich Printer Held in Abduction

MUNICH, Dec. 17 (UPI). Police arrested a 50-year-old printer today, suspected of being the mastermind behind the kidnap a multimillionaire's son for the biggest ransom ever paid in West Germany. Posing as an employee of the Federal Criminal Office, he sought the printer's accomplice and the 21-million-deutsche mark ($8.77 million) ransom.

A police spokesman said the kidnappers treated Richard Oetker, 25-year-old heir to a food and shipping fortune, with extreme cruelty during the 72 hours he was held captive. He was found last night, bound and unconscious in an automobile in a wood outside Munich.

Interviewed in a Munich hospital, he told police he had been held captive in a crate about 1.20 meters cube and tied with a rope attached to an electric cable rigged to give him a shock if he tried to get free.

German A-Plant Halted by Court



KIEL, West Germany, Dec. 17 (UPI). —An administrative court today ordered suspension of work on a controversial nuclear power plant on the lower Elbe River until all doubt about its safety and its need have been resolved.

Thousands of civilian protesters marched on the site at Brokdorf on two recent weekends to prevent construction, and fought police, who evicted them.

A judge said that unless work was suspended now, work on the plant might progress so far that it no longer could be reversed should a tribunal later determine complaints were justified.

Finns Lift Spain 'Ban'

HELSINKI, Dec. 17 (Reuter). —Finland's Social Democrat party has lifted a 12-year-old "moral ban" on travel to Spain.

A real-silk dressing-gown makes a magnificent gift

If you're thinking of giving some lucky man a dressing-gown this year, you won't be able to resist those on offer at Lanvin 2.

They're in different designs of natural silk, woven by the banks of lake Como, and they're made up by hand here at Lanvin 2 (F 1,150).

If you prefer your colors plain, Lanvin 2 has other models in woolen satin (F 1,200). And in the same department you'll find an impressive collection of matching pajamas (from F 320).

Carter Camp Split by Fight For Top Jobs

Labor, Defense Posts Strongly Contested

By Robert G. Kaiser and Murrey Marder

WASHINGTON, Dec. 17 (WP).—The competition for secretary of labor and secretary of defense in the Carter Cabinet has provoked open conflict among the diverse interest groups that united behind Jimmy Carter's campaign for the presidency.

Blacks, women's groups, Ralph Nader, hawks, doves and—most notably so far—the AFL-CIO labor federation are trying to collect the debts they feel Mr. Carter owes by influencing his Cabinet selections.

The struggle for Mr. Carter's mind involving most of these groups may force the Carter administration into a public airing of controversial issues that it might have preferred to defer.

The struggle puts strains on the Democratic coalition, which barely hung together sufficiently to put Mr. Carter in the White House last month.

The dispute over a labor secretary is particularly painful for Mr. Carter, because—as one of his aides acknowledged—there may not be any "middle ground" between the desires of AFL-CIO leaders and the demands of women's groups, black groups and spokesmen for other minorities.

Defense Secretary

The dispute over a defense secretary leaves Mr. Carter more room for maneuver, in the view of many people involved. One of them noted that there is a long tradition of naming outsiders without Pentagon experience to that job, and Mr. Carter could do so again if he felt he had to placate the hawks, doves and occupants of middle ground now urging him to pick or reject their candidates.

The prospect that President-elect Carter might give James Schlesinger an appointment that would involve shaping U.S. foreign policy in any way caused alarm this week among liberal Democrats.

According to congressional sources, numerous members of Congress, who generally declined to be identified, were telephoning Mr. Carter or his aides to express concern about a Schlesinger appointment.

In Cambridge, Mass., scientists who had supported the Carter-Mondale campaign switched to an anti-Schlesinger campaign to block his possible appointment as Mr. Carter's defense secretary.

The substance of the scientists' protest to the Carter transition staff, said Philip Morrison, professor of physics at the Massachusetts Institute of Technology, is that "a fresh look at foreign policy can hardly be expected from Nixon-Ford's secretary of defense."

Many political veterans in Washington expressed strong doubt that Mr. Carter has any intention of risking the alienation of congressional liberals by naming Mr. Schlesinger to the defense post. Instead, these sources believe, Mr. Carter is testing the climate for putting Mr. Schlesinger in a lesser post, either as intelligence coordinator or as energy czar.

In the confused speculation which surrounds Mr. Carter's intentions, there are reports that the leading candidate for defense secretary, Harold Brown, president of the California Institute of Technology, may be squeezed out in the political maneuvering.

Camps for Rehabilitation

Laos Inmates Are Learning New Ways on Idyllic Islands

By Brian Eads

VIENTIANE, Laos (WP).—Once they were known, as Monkey Island and Love Island, but all the monkeys and most of the love are gone.

Now they are called Man Island and Woman Island and they are prison camps where, in an idyllic setting, the new Communist rulers of Laos are attempting to rehabilitate what they see as the riff-raff left behind by the years of U.S. involvement here.

The islands sit behind the Nam Ngum hydroelectric dam, 40 miles north of Vientiane, in a vast manmade lake where petrified trees reach up through the bottle-green water like the frantic fingers of so many drowning giants. It is to these islands that the new rulers of Laos send their drug addicts, prostitutes, hooligans, card sharps and what they characterize as the "victims of the evils of the former regime."

The islands have been compared to lush tropical resorts, and indeed, when a visitor steps ashore, two lines of chubby fresh-faced young women in traditional wrap-around phasarong skirts are there to greet him with swaying hips and the lilting rhythms of denunciation of "American neocolonialist imperialism" and gratitude of the "new life."

The settlements were built in March and the first batch of 1,500 persons was shipped in April 9. Now, they have a population of about 2,000—1,500 on Don Tau, the island for men, and about 500 on Don Nang, the women's island.

It is a long way from the life most of them have known. Gone are the flared denims and the shoulder-length hair. There is no makeup for the young women, no corrupting Western music, no subversive Western music and, as several miles of open water separate the sexes, no promiscuity.

Instead, it is out of bed at 5 a.m. for a day of basket weaving and embroidery, tending the vegetables on the terraced slopes, and, most important, studying the eight compulsory texts.

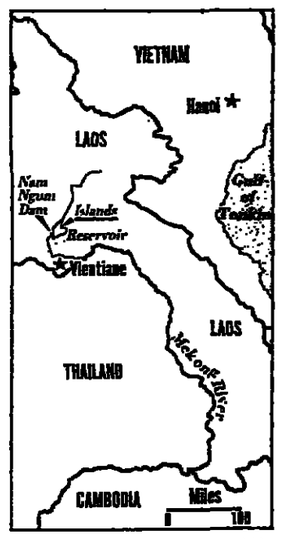
"I know that a lot of what we study is taken from Marx and Lenin," said Kansang, a plain, 23-year-old former teacher who arrived six weeks ago. She says she was brought to Don Nang because she had been only interested in "a life of luxury."

Now she says she is "very angry with the Americans who brought us that way of life which we're having so much trouble getting rid of."

An official from the Foreign Ministry said he had known Kansang for many years. "I warned her to behave correctly under the new regime," he said, "but every night she was going with her boyfriend to restaurants, nightclubs and the movies. It's all right once a week, or once a month, but not every night."

Like the other young people on the island, she will stay until her lessons are learned well. "They can leave any time they like," an official said, "but unless they have papers saying they've understood the 'new life,' they'll be sent back."

The lessons are simple: "The old society's blemishes arose from French colonialism and American neocolonialism and imperialism." They are taught the importance of work and self-reliance, the nature of the class struggle, the cultural and natural wealth of Laos, and the "new way of thinking."



For the opium addicts—who after four months of methadone treatment and three square meals a day begin to look human again—and for the orphans and the girls sold into prostitution by impoverished parents, it seems to be a welcome change.

For many others, it is little more than an idyllic sunbaked prison camp. Sources in Vientiane say that about 70 persons have escaped from the islands since they opened, and many of those considered to have successfully completed their courses have since fled across the Mekong River into Thailand. One young man taken there because of his dealings on the black market is now back in business, albeit more discreetly.

Recruits for the islands are chosen by local authorities and the newly recruited "militia" and there are many complaints that personal vendettas are being pursued, and that, in the case of the women, resentful Lao men are pointing the finger at them simply because they had relationships with foreigners.

There is no doubting the sincerity of the authorities, however. "If you don't work, you don't eat," said a man from the Ministry of Public Welfare, tipping back his straw stetson. He went through 18 months of re-education in Xieng Khouang on the Plain of Jars, an area devastated by U.S. bombing, where people reportedly are still being killed or maimed by munitions that did not explode on first landing.

"We only have 3 million people, but 80 per cent are farmers and it's crazy that we should have to import rice," he said. "We are small and poor, but we have the right to run our own affairs like anyone else. We can no longer afford decadence," he said.

WP.

'Several' Killed In Beirut Fight of Palestinian Units

BEIRUT, Dec. 17 (UPI).—"Several" persons were reported killed as rival Palestinian groups fought throughout the night with rocket-propelled grenades and machine guns.

At least 15 persons were wounded and the pro-Syrian newspaper Al Sharq said, "Several" were killed in the battle that erupted in the south Beirut suburb of Borje Barajni last night and spread to the Chatila refugee camp, lasting well into this morning.

The fighting broke out between members of the pro-Syrian as-Saiqa guerrilla group and radical, rejection front Palestinians who oppose any kind of negotiated settlement with Israel, as well as Syria's intervention in Lebanon.

The Palestine Liberation Organization said that Syrian troops of the Arab peace-keeping force did not intervene in the clashes, which lasted about five hours, although the Palestinian radicals claimed that the Syrians provided Saiqa with artillery support.

Giscard Popularity Off

PARIS, Dec. 17 (Reuters).—The popularity of President Valéry Giscard d'Estaing and Premier Raymond Barre fell this month, according to an opinion poll published today.

Carter's Latest Choices: Brilliant, Wide-Ranging and Energetic Men

Charles Schultze

By Eileen Shanahan

WASHINGTON, Dec. 17 (NYT).—Charles Schultze has wound up with the job as chairman of the Council of Economic Advisers in the Carter administration, but it is a measure of the man that he was also seriously considered for the posts of secretary of defense, secretary of health, education and welfare and secretary of the Treasury.

With his background as director of the all-encompassing Bureau of the Budget in the Johnson administration and his studies during the last eight years of the cost and relative value of virtually every federal program, it is possible that he may know more about more different aspects of the government than anyone else in the country.

In addition, he is an economist who has made at least one considerably original contribution to economic theory. And, at the age of 52, he is still a prolific producer of new ideas about what the government ought (and ought not) to be doing, and how it could do some things better.

Except for the last eight years, when Democrats have been out of executive power, Charles Louis Schultze has spent almost his entire adult life in government.

He was born in Alexandria, Va., a suburb of Washington, on Dec. 12, 1924. He attended Catholic schools and began his college education at Fordham, which was interrupted by three years of Army service during World War II, during which he never rose past the rank of private first class.

Maryland PhD

He resumed his education in 1946 and subsequently received both his BA and his MA from Georgetown and his PhD in economics from the University of Maryland. Both of his advanced degrees were earned while he was also working full time, first at the Democratic National Committee, during the 1948 Congressional campaign, and then at a variety of federal agencies including the Army Security Agency, the Office of Price Stabilization (during the Korean war) and on the staff of the Council of Economic Advisers. His PhD thesis and much of his early research were on the causes of inflation.

From 1959 to 1961, he taught economics at the University of Indiana, and while there formulated a concept that remains to this day a basic guidepost for national economic policy.

This was the thesis that the true impact of the federal budget on the national economy was best measured not by the size of the actual budget surplus or deficit but rather by what the surplus or deficit would be if the economy were operating at "full employment." Within less than two years of the time Mr. Schultze first enunciated this concept, it was adopted as the theoretical underpinning of the fiscal policy of the Kennedy administration and, later on, of the Johnson administration. The Nixon and Ford administrations have been less willing to concede in public the validity of the concept, but their economists keep Mr. Schultze's system of measurement carefully in mind.

Mr. Schultze served the Kennedy and Johnson administrations, first as deputy director of the Bureau of the Budget and, after a short stretch out of government, as its director. He is remembered favorably as the man who inaugurated a more intelligible system of budgeting, by program-objective instead of type of service.

Vietnam Role

He is also remembered, not so favorably, as one of the key participants in a cover-up of the rapidly rising costs of the war in Vietnam, a deception engineered by President Johnson and Defense Secretary Robert McNamara (who has since confessed to it), which involved a $10-billion underestimate of the fiscal 1967 defense budget.

After leaving government, just before the end of the Johnson administration, he returned to teaching at the University of Maryland, and to research in a wide variety of subjects related to national policy as a senior fellow at the Brookings Institution.

He was the prime mover and one of the principal authors of an annual series of studies, begun in 1970, entitled "Setting National Priorities," which constituted, in those Republican years, a sort of liberal counter-budget.

But not a big-spender budget. The Brookings studies were among the first, from a left-of-center perspective, to cast doubt on the effectiveness of many of the Kennedy-Johnson programs for aiding the poor and disadvantaged, and to suggest that too much had been undertaken with too little care. The studies were enormously influential among liberals and Democrats generally.

Defense Cuts

Mr. Schultze and his associates at Brookings also suggested that to release the necessary resources for domestic programs, there would have to be some reductions in defense commitments—not a backing away at the defense budget, but pinpointed changes in force levels and defense outlays, a recommendation which won both praise and criticism.

His other research while at Brookings has covered a huge range of issues, from trends in corporate profits to new statutes for government regulation of industry. On the latter issue, he has recently completed a series of guest lectures at Harvard University in which he has spelled out in detail his belief that economic incentives and disincentives to make businesses do what the public wants them to do are more sensible than pages and pages of regulation. The idea is far from accepted—some say that what he is proposing amounts to selling licenses to business to pollute or operate hazardous facilities.

Zbigniew Brzezinski

By Bernard Gwertzman

WASHINGTON, Dec. 17 (NYT).—For the past three years, Zbigniew Brzezinski has been giving free advice on foreign affairs to Jimmy Carter. More than anyone, Mr. Brzezinski introduced the Georgia governor to the world of international relations, and kept him abreast of current issues through a steady stream of articles, clippings and phone calls.

Yesterday, Mr. Carter acknowledge da debt to his tutor by naming him to the critical job of White House national security adviser.

The designation of Zbigniew Brzezinski (Zbig-nyeff Bre-zhinski) was probably the least surprising of Mr. Carter's appointments. He was close to Mr. Carter, (as close as anIvy League professor, the son of a Polish aristocrat, can be to a man of the Georgian's rural background. And more importantly, Mr. Brzezinski, 48, will come to the White House job superbly prepared, as prepared as his illustrious predecessor, Henry Kissinger, 53, with whom he will always be compared.

Surface Similarities

The two men, in fact, have many surface similarities. They are foreign born (Mr. Brzezinski, Warsaw—Mr. Kissinger, Germany); Harvard-educated (Mr. Brzezinski, PhD in government, 1953—Mr. Kissinger, BA in 1950, MA in 1952, PhD in government, 1954); they both have foreign accents, with Mr. Kisinger's more pronounced; they each turn a phrase well, with Mr. Kissinger the more witty; they each have written numerous books and essays, with Mr. Kisinger's the more weighty and Mr. Brzezinski's the more numerous.

But there are significant differences in background and outlooks. Mr. Brzezinski's father came to Canada as a political exile, a diplomat refusing to serve in a Communist government. Mr. Brzezinski is a Catholic, athletic-looking, energetic, and omniscient in his interests.

Mr. Kissinger's father brought his family out of Germany to escape the persecution against Jews, and Mr. Kissinger's rise has had more of a Horatio Alger twist to it. Moreover, while both men possess considerable egos, Mr. Kissinger seems to take himself less seriously in public than does Brzezinski. But this may simply be the difference between a man in power and one lacking it.

Of considerable interest in Washington is whether Mr. Brzezinski, as director of the staff of the National Security Council, will be limited in his role or whether he expands it to the point where he becomes a rival of Cyrus Vance, the secretary of state designate.

Coordinate Policies

Officially—and Mr. Brzezinski confirmed it yesterday—the White House adviser is supposed to insure that the Pentagon, Treasury, State Department, CIA, and others coordinate their policies, and that the president's decisions are carried out smoothly.

But in the Kennedy administration, McGeorge Bundy outshone Dean Rusk, and in the Nixon administration, Mr. Kissinger almost from the first was a more important policy-maker than William Rogers, the secretary of state. Aware of this recent history, Mr. Brzezinski stressed that he would do his best to support secretary of state-designate Cyrus Vance, the official primarily responsible for foreign affairs.

In the 1950s, influenced by his background, Mr. Brzezinski specialized in Communist affairs in Eastern Europe and the Soviet Union.

In recent years he has written extensively on Japan and Western Europe, and on North-South relations as well.

Israel Honored Father

Mr. Brzezinski was born in Warsaw March 28, 1928, the son of Tadeusz and Leonia Brzezinski. He had a half-brother, George, and a younger brother, Lech. His father, a diplomat in the prewar anti-Communist Polish government, was assigned to France and Germany and was honored by Israel after the war for helping many Jews to escape the Nazis. In 1938, the Brzezinskis were sent to Montreal, where the father was assigned as consul general and remained as the Germans and Russians divided up Poland in 1939.

In 1945, when the Communists assumed control of the postwar Polish government, the father retired and settled in Canada. Zbigniew completed his education in Catholic schools and in 1949 graduated with honors in economics and political science from McGill University, from which he received an MA in 1950.

In the 1950s, Mr. Kissinger and Mr. Brzezinski were rivals for a permanent chair at Harvard—a clash won by Mr. Kissinger, with Mr. Brzezinski going to Columbia University, where he became director of the newly formed Institute on Communist Affairs in 1961.

Until last year, Mr. Brzezinski was director of the Trilateral Commission, set up in 1973 to encourage closer coordination among the United States, Western Europe and Japan.

Mr. Brzezinski married Emilie Ann Benes, the grandniece of Eduard Benes, who was the president of Czechoslovakia when the Communists took over in 1948. They have three children, Ian, Mark and Mika. Mr. Brzezinski was naturalized as a U.S. citizen in 1958.

Swiss Again Delay Expelling Alleged Ex-Dutch Nazi

BERN, Dec. 17 (UPI).—The Swiss government today postponed for the second time this week a decision on Dutch art collector Pieter Menten, wanted by the Netherlands for alleged complicity in the murder of Jews in Nazi-occupied Poland during World War II.

Mr. Menten, 78, was arrested in a small hotel outside Zurich Dec. 6. He left Holland Nov. 15, a day before he was to have been arrested by Dutch police.

The seven-member Swiss Cabinet, which failed on Monday this week to decide on Holland's request for Mr. Menten's expulsion, today again put off a final decision.

The Swiss Justice Department said a decision was postponed because the Dutch government has offered to provide more documents pertaining to the case. These documents were handed to the Dutch by the Soviet government, it said, who then offered to pass them on to the Swiss.

The postponement followed an announcement by Mr. Menten's two Zurich lawyers that they had quit the case "because of the heavy and extremely serious suspicions against Mr. Menten."

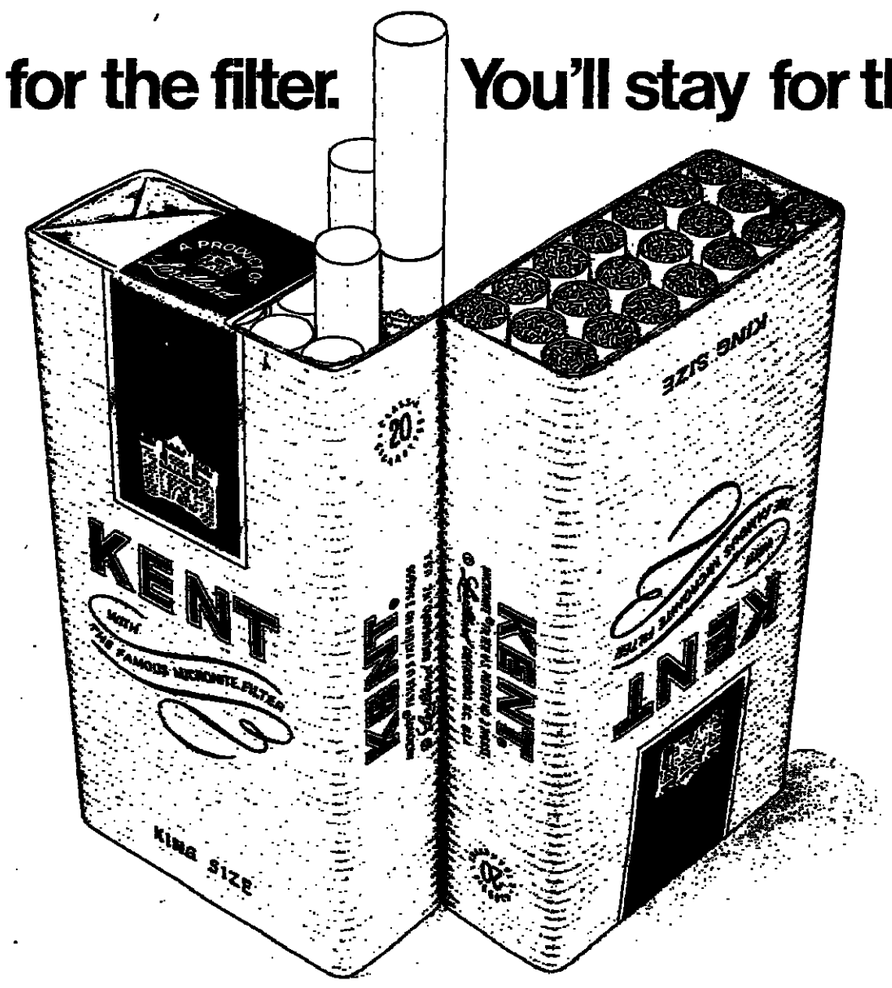
Western Samoa in UN

UNITED NATIONS, N.Y., Dec. 17 (AP).—The General Assembly this week admitted the South Pacific island group of Western Samoa as the 147th UN member. Western Samoa, which gained independence in 1962 from New Zealand, has an estimated population of 150,000.

3 JDL Members Get Prison Terms in N.Y.

NEW YORK, Dec. 17 (AP).—Three members of the Jewish Defense League, accused of transporting guns and gunpowder and harassing Soviet officials, were given indeterminate prison terms of up to six years and castigated by a federal judge this week.

"History's greatest monsters thought they were right," said District Judge Lloyd MacMahon in sentencing Russell Kelner, 35, Jeffrey Weingarten, 21, and Steven Ronbom, 17, for their roles in violent protests against Soviet treatment of Jews.



Unfamiliar Faith

LONDON, Dec. 16 (Reuters).—Three years after being stricken dumb for reasons unknown, London housewife Barbara Newcombe recovered her voice after visiting a faith-healer. The only trouble is that Mrs. Newcombe's new voice has an inexplicable Italian accent.

On Temperature and Winds

Concorde's Sonic Wave Gives Novel Clues on Atmosphere

By John Noble Wilford

NEW YORK, Dec. 17 (NYT).—Sonic waves from the Concorde supersonic airliner, which are being monitored daily by Columbia University researchers, are providing new clues to the nature of temperatures and winds in the earth's upper atmosphere.

The research is an unanticipated dividend of the controversial aircraft. The findings have already surprised scientists by revealing many daily variations in the supposed prevailing winds in the upper atmosphere. They are also expected to provide important information on the dispersal of atmospheric pollutants and the character of the rarefied reaches of the earth's atmosphere.

Dr. William Donn and his colleagues at Columbia's Lamont-Doherty geological observatory have been listening to the jet's sonic shock waves since last May 24, when the British-French Concorde began making its regularly scheduled flights between London, Paris and Dulles International Airport outside Washington.

Inaudible Waves

Although the sound waves are inaudible to the ear, they can be detected by highly sensitive microphones that measure changes in air pressure.

An array of three microphones is set up in the wooded area near Lamont-Doherty's laboratories in Palisades, N.Y.

Another set of microphones, specially implanted for this project, is on property of the University of New Hampshire in Durham.

Slight changes in air pressure are detected by the microphones and relayed by telephone lines to recording instruments at Lamont-Doherty.

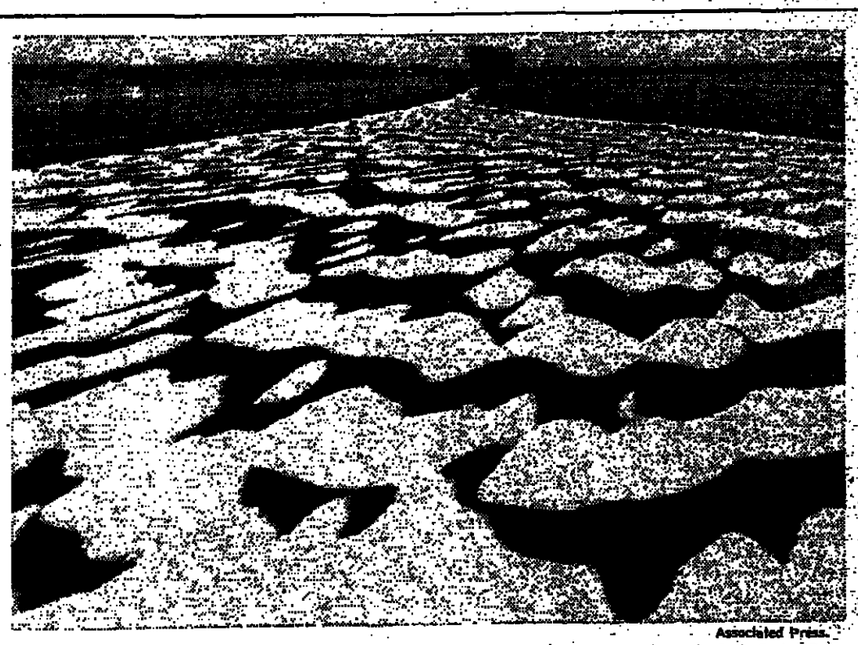
Dr. Donn said that the Concorde's sound signals were distinct because of their high amplitude and characteristic frequency.

"The exact strength and path of the waves depend upon atmospheric temperatures and wind conditions, so we can use the specific characteristics of each wave to interpret these atmospheric conditions," Dr. Donn continued. "This novel use of sonic booms is possible because the elevation and location of the Concorde is known very precisely along the flight path."

Faraway Signals

The plane's flight path takes it past southern Newfoundland and Nantucket Island toward the New Jersey coast. The plane cruises at an altitude of 50,000 to 60,000 feet. Sonic signals as far away as 600 miles have been detected.

Dr. Donn said that the signals contained information about the atmosphere from the height of the airplane up to as much as 75 miles. Some of the signals come directly from the plane, but many others are reflected from the thermosphere, the uppermost layer of the atmosphere, which begins about 75 miles above the earth.



Previous information about these atmospheric regions has come from occasional sounding rocket flights. From these, Dr. Donn said, it had been learned that the stratospheric winds blew west over the Atlantic in the winter and east in the summer. But the new data indicate that the winds are not as prevailing as had been thought. "A complete surprise to us," Dr. Donn said.

Appeal for Concorde

NEW YORK, Dec. 17 (Reuters).—Britain and France have appealed to New Yorkers to save their city as the aviation gateway to America and save the profitability of Concorde at the same time.

In an unusual news conference, the consuls general of both nations appealed for the airliner to be allowed to start commercial flights on a trial basis at John F. Kennedy International Airport.

They confirmed that their governments were pressing a suit against the airport's operator to force it to allow a Concorde trial at Kennedy. A preliminary hearing has been set for Jan. 17 in the federal court here.

WINTRY PATTERNS—Wind-whipped snow on a pond not far from Omaha, Neb.

Pressure of Antarctic Ice Chokes Drill Hole

By Walter Sullivan

ROSS ICE SHELF, Antarctica, Dec. 17 (NYT).—The bold effort to drill more than a quarter of a mile through this apron of floating ice into the "lost world" sea beneath it has been choked to death.

Early Wednesday, with only 27 hours of drilling left before breaking through, the drillers lost their race with inexorable closure of the hole. Like a nightmarish room whose walls close in and crush its occupants, the ice, flowing under the pressure of its own weight to fill the hole, locked the drill assembly in a fatal grip during a half-hour stop for a change of shift.

Thus, for this year, hopes have been dashed for reaching the sunless sea that lies beneath this ice and observing what specialized creatures live there.

Wan Smile

The drillers were working two 12-hour shifts while an international consortium of two dozen or more scientists waited at the main McMurdo base for the breakthrough. McMurdo is 470 miles northwest of here. Having come from as far afield as Japan, Norway, Denmark, Switzerland, Australia, Germany and the United States, they will now have to devise other research projects to justify their journeys or return home.

"We blew it," said B. Lyle Hansen, perhaps the most experienced specialist in ice drilling. With a wan smile that sought to disguise his deep disappointment, he blamed his own "miscalculation" of closure rates.

For the last week, however, it has been clear that the race would be a close one—that drilling of a dry hole, with no fluid inside it to counter the pressure of closure, had emerged as the only way a penetration could be obtained this season. It is now summer in the southern hemisphere.

Since glaciers flow in a plastic manner, they squeeze in on a hole to an increasing extent at greater and greater depths. On continental ice sheets where Mr. Hansen has drilled east of here in Marie Byrd Land and in Greenland, the ice remains cold and stiff at depths.

But here as the drill hole approached the sea beneath the ice, the latter was warmed by the nearness of water and flowed more rapidly. The hole, 12 inches in diameter, was closing Wednesday morning at an estimated three-eighths of an inch per day.

Equipment Lowered

It was unusually large, to permit scientists to lower television cameras, baited traps, nets, a sea-floor coring device and other equipment into the sea. The sea is about the size of Spain and its water depth beneath the ice here is 780 feet. Probably for millions of years this sea has been cut off from sunlight. However, it exchanges water with the Ross Sea—the southernmost extension of the Pacific Ocean.

In plans for coping with hole closure, a variety of strategies were devised. Periodically, the drill bit was used to ream out the hole to its proper width. Also, the bit was collapsible. Normally it fitted together snugly, but when stuck, it could be struck a sharp blow, breaking it up, as chief driller John Rand put it, "like a Chinese jigsaw puzzle." When thus disassembled, each piece could be hauled to the surface by lanyards attached for that purpose. Also detachable were the stabilizers—metal blocks positioned around the shaft to keep the bit centered.

Repeatedly, during the 10 days of intensive drilling, these components came apart spontaneously and had to be fished out with magnets.

Wednesday, the hole got a stranglehold on the entire assembly so tight that nothing could be done. By lowering a charge of dynamite 1,080 feet to the bottom and blasting off the drill assembly, it may be possible to salvage the drill pipe.

Espionage Suspect Is Freed by Sweden

HAPARANDA, Sweden, Dec. 17 (Reuters).—A 56-year-old Swede detained last month on suspicion of espionage on behalf of an unnamed foreign power was released today after a prosecutor told a court he had insufficient evidence to bring formal charges.

The unnamed man, an employee of Sweden's Central Bureau of Statistics, had traveled frequently on official business in restricted military zones of northern Sweden closed to foreigners. He was arrested at his home in the village of Morjaery near here on Nov. 16.

Miki Affirms Intention to Resign Posts

Premier to Quit Afte Successor Is Chosen

By Andrew H. Malcolm

TOKYO, Dec. 17 (NYT).—Pr mier Takeo Miki announced t day his intention to resign th leadership of the governing Lib eral Democratic party next we once a successor has been chose

The move, which has been s pected since Mr. Miki's co servative party suffered seve losses in general elections on De 5 for the lower house of parli ment, also means that Japan w have a new premier.

It will most likely be Tak Fukuda, 71, a former minister finance and foreign affairs. T leadership change, the first two years in the world's seco most populous democracy, w usher in a new political era Japan. The majority party w have to deal and compromise wi Japan's divided opposition pa ties, which now hold more pa liamentary seats than they ha had in more than two decade

Mr. Miki, 69, made his decisi known this morning, first in meeting with top party executiv and then with his Cabinet, the of whose members lost their ow seats in parliament in the ele tion.

The Liberal Democrats won o 249 of the 511 seats in the e panded lower house. But the a dition of 11 conservative ind pendent members gave the pa a slim majority.

Mr. Miki had staked his poli cal life on at least maintaini the 265 seats held in the previo parliament and the losses ma it virtually certain that he wou have to resign or be ousted opponents within his own par

By his resignation, Mr. Mi is accepting responsibility for t Liberal Democrats' poor sho ing. But the opposition to hi within his own party predat the election.

Mr. Miki will remain in offi as a caretaker, both as Premi and party president, until pa liament convenes and a success is chosen.

Blaze in White House Extinguished Quickly

WASHINGTON, Dec. 17 (AP —A small electrical fire bro out near the bowling alley in t White House basement last nig and caused toxic fumes, officia said. One policeman suffer smoke inhalation.

President and Mrs. Ford a their son Jack were at home the upstairs family quarters a were informed of the blaze, White House spokesman said, bu the executive mansion was n evacuated. The fire was extin guished three or four minut after firemen arrived.

After 100 Days in Power

Sweden's Moderate Coalition Scores Well in Contradiction

By John Vinocur

STOCKHOLM, Dec. 17 (AP).— ...e first 100 days since Sweden's ...ialist government was voted ... of office after 44 consecu... years in power have been ...rt on euphoria and long on ...radictions and threats of in...bility.

The moderate coalition that ...eated Olof Palme's Social ...ocrats has kept its promise ... cutting some taxes, toning ... Sweden's often abrasive ... in international affairs ...trying to reduce the bureau... and centralization which ... coalition said was turning ... country into a collectivist ...te with little room for the ...dividual.

But the new Premier, Thor...orn Fälldin, a Centrist, has ...ready broken a campaign ...omise about the installation of ...uclear power stations and ...oved to raise taxes on alcohol, ...bacco, electricity and owning ...levision sets. Additionally, mem...ers of the three-party ruling ...alition have squabbled and ...ntradicted each other in pub... and the country faces the ...l possibility—a rarity in Swe...en—of increased unemployment ...d major labor disorder in the ...ring.

Never a Honeymoon

"There never was a honey...oon," Bernt Carlsson, a Social ...emocratic spokesman, said in ... interview. "The coalition ex...ed its contradictions and ...owed its lack of experience. ... been far from impressive. ...e government has been so bad ... actually gotten away with ...rder not to be in deeper ...uble."

"No, that's not the people's ...titude," replied Lars Tobisson, ... spokesman for the Conserva...ve party, which shares power ...th the Centrists and Liberals. ...So far, they're happy to see ... could get together. People ...y it's easier to breathe now ...d they're happy enough that ...e Socialists and their socializa...ion plans are gone. They're ...oing to give us time for con...rete results."

What has changed, a foreign ...iplomat said, involves the disap...earance of Sweden's strident ...tements on the world scene ...d what U.S. officials regarded ... reflex anti-Americanism.

The government has turned ...round a plan to increase Swed...h aid to Cuba and will probably ...hase out all assistance over the ...xt five years. At the same ...ne, Foreign Minister Karin ...oder has made clear that ...eden will pay more attention ...Nordic problems and Western ...rope, which left Mr. Palme ...nplaining that the ties he said ... developed with the Third ...rld and African liberation ...vements were being aban...ned.

But Mrs. Soder, a member of ...e Center party, refuted Labor ...inister Per Ahlmark, a Liberal, ...en he said that Sweden's pol...y of supporting the presence of ...e Palestinian liberation move...ent in the United Nations Secu...ty Council was changing in ...vor of a more pro-Israeli stance. The argument illustrated the ...visions and confusion in the ...w government, as did a refusal ... the Conservative party to send ... parliamentary delegation to ...ba, an invitation which its ...alition partners accepted.

The government's first piece of ...rd legislation will decrease ...xes for the average wage ear... by about $95 a year, reduce ... planned increase in social ...urity fees for employers from ...o 1.5 per cent and loosen regu...ions on joint tax returns to ...e pressures on small family ...sinesses.

...t leaked reports on the bud...due Jan. 10, which is expect... to have a record deficit of ...billion kronor ($4.2 billion), ...ention increased taxes on alco..., beer and tobacco. A bottle ...scotch already costs about $18, ...beer in a restaurant $2 and a ...ck of cigarettes $1.90.

One of the sharpest contradic...

...nother Ex-Ruler ...f Thais Plans ...o End His Exile

...ANGKOK, Dec. 17 (Reuters). ...ield Marshal Praphas Charu...hien, one of the three top men ... Thailand's former military ...ernment, is expected to return ...e Sunday from a three-year ...-imposed exile in Taiwan.

...nterior Minister Samak Sun...rvej told reporters that the ...year-old marshal, who until ...3 was deputy premier in the ...ernment of Field Marshal ...anom Kittikachorn, would ...rn.

...arshal Thanom is now living ... Thailand as a Buddhist monk, ...r returning in September. ...rshal Prapha's return would ...ve Marshal Thanom's son, Col. ...rong Kittikachorn, as the only ...mber of the former ruling ... still in exile.

...Col. Narong is now living in ...st Germany. Mr. Samak told ... foreign correspondents' lun...eon today that he had no in...rmation whether Col. Narong ...o planned to return.

...All three former leaders were ...used, in a case prepared by ... That public prosecutor, of ...volvement in ordering shooting ...at killed 72 persons during the ...tober, 1973, uprising that ...pled them from power. Today, ... Samak said that the case, ...ich never went to court, had ...w been dropped.

TWO WORLDS—Amish Pennsylvanian makes a call with horse and buggy in tow.

South Vietnam Reds Confirm Plans by North

By David A. Andelman

BANGKOK, Dec. 17 (NYT).—Southern Vietnam's two leading Communist party officials today described their vision of the future of their region—a view that supported and complemented that of the top Northern Vietnamese officials who have for the last four days dominated the fourth congress of the Vietnam Workers' (Communist) party.

Phan Hung, the deputy premier and secretary of the Lao Dong party of South Vietnam, told the thousands of delegates and foreign observers in Hanoi's Ba Dinh conference hall today that South Vietnam would be divided into three distinct producing zones—for agriculture, forestry and fisheries.

And he admitted that the South, which his predecessors at the podium have already clearly relegated to a secondary role in the first five-year economic plan, is "lacking foodstuffs, raw material and capital."

To Expand Trade

Later today, Foreign Minister Nguyen Duy Trinh, in the congress's only foreign policy statement thus far, reiterated the proforma denunciations of the United States, but added that "in the new era, we are also determined to expand our scope of trade with other advanced capitalist countries."

And, he said, "With the Americans, we determine to fight against the neo-colonialist and interventionist policy of the United States. We demand the United States take responsibility for the legal commitments it made with Vietnam and together with us solve the remaining problems. If the United States ceases its hostile policy against Vietnam, we are then ready to resume diplomatic relations with that country."

The first party congress convened in Vietnam in 16 years was packed with well-known speakers. Le Duc Tho, the negotiator with Secretary of State Henry Kissinger at the Paris peace talks, delivered a lengthy political address. Labor leaders and regional cadres followed each other to the podium.

Mr. Hung was followed by Vo Chi Cong, onetime head of the underground People's Revolutionary party—the southern wing of the Lao Dong—during the war and the only other prominent southerner mentioned previously at the congress, whose proceedings are being broadcast live by Hanoi radio and monitored in Bangkok.

Day for the South

It was clearly the day for the south to present its viewpoint. In addition to Mr. Hung and Mr. Cong, Education Minister Nguyen Thi Binh, who headed the National Liberation Front delegation in Paris, delivered a brief address.

All echoed glowing praise of the serious policy statements on politics and the economy presented during the early days of the party congress. None broke any major new ground.

In his presentation, Mr. Hung, continuing to fill in earlier portraits of the new South, said that his region would be divided as follows:

- The Mekong Delta zone "will produce rice and other foodstuffs."
- The Central Highlands "will concentrate on forest cultivation to produce more wood."
- A coastal zone "will produce more seafood, catch more fish, shrimp and other marine life."

"With a fertile land, a long coastal area and a rich tropical forest, we believe we can contribute a large quantity of foodstuffs, wood and other raw material to fulfill the five-year development plan," Mr. Hung observed.

North's Rice Bowl

Earlier other senior Northern Vietnamese officials, including Premier Pham Van Dong, indicated that the South would continue to serve largely as the North's rice bowl, sending workers to the North when needed to develop the heavy industry that would be concentrated there.

Industry in the South, where it is developed, they said and Mr. Hung reiterated, would consist largely of light industry and "handicrafts."

Obituaries

Harvard's Dr. Donald Menzel, Authority on Sun and Corona

NEW YORK, Dec. 17 (NYT).—Dr. Donald H. Menzel, 75, former director of the Harvard College Observatory and one of the world's leading authorities on the sun and its corona, died Tuesday at Massachusetts General Hospital after a long illness.

Dr. Menzel, who had spent nearly 40 years teaching at Harvard, was the author of 26 books, ranging from technical works to popular volumes debunking UFOs. He led a number of expeditions to distant corners of the globe to view total solar eclipses.

Because of illness, he had to remain behind for the last expedition he organized, to view the total eclipse in Australia Oct. 23. However, he remained in communication with the expedition's leaders from his hospital bed in Cambridge.

Recently, the Minor Planet Center of the International Astronomical Union named an asteroid for him in recognition of his contribution to astrophysics.

Significant Findings

According to Harvard University, Dr. Menzel developed the first coronograph in the United States in 1938. With the instrument, scientists could study the corona—the glowing "halo" that comes into view when the sun's face is hidden during an eclipse—even when there was no eclipse.

Dr. Menzel, in collaboration with J.C. Boyce, established in 1933 the presence of oxygen in the sun's corona and, in 1941, with Winfield Salisbury, made the initial calculations that led to the first radio contact with the moon in 1946.

According to a colleague and onetime student of Dr. Menzel's, Prof. Fred Whipple of Harvard, "a large fraction of the best-known astronomers in the country" were taught by Dr. Menzel. He was the Paine Professor of Practical Astronomy and professor of astrophysics emeritus at Harvard.

Dr. Menzel was director of the Harvard College Observatory from 1954 to 1966 when he was named research scientist at the Smithsonian Astrophysical Laboratory in Cambridge. He retired from the posts at the university in 1971 but continued to do research there.

Col. Charles Kerwood

WASHINGTON, Dec. 17 (UPI).—Col. Charles Kerwood, 79, an aviation pioneer who flew combat missions with the air forces of three nations during four wars, died Wednesday after a long illness, the Air Force Association said.

During World War I, he flew with the French Lafayette Corps. During the Greek-Turkish war Col. Kerwood commanded the Greek Air Force. He later organized the volunteer American squadron for the French-Riff campaign in North Africa.

He also flew combat missions with the U.S. Army Air Force during World War II in Europe, Africa and the Pacific.

Economic Adviser...

In naming Charles L. Schultze as chairman of his Council of Economic Advisers, President-elect Carter has chosen an able and experienced economist whose personal qualities of humility and dedication to human values are as worthy of notice as his intellectual ability.

Schultze served as budget director in the Johnson administration, where he was responsible for launching the overhaul of the federal budget to make it more useful both as a management tool for the control of government programs and as an instrument for measuring and influencing the impact of government on the national economy.

Since he left the government, Schultze has been at the Brookings Institution, where he has been the guiding force behind a series of volumes on national priorities that have clarified the choices facing the United States throughout the complex range of domestic and international policy.

Schultze appears to represent precisely those qualities that Carter is looking for—the practicality that goes with his own engineering, farming, and business background; and the social conscience that matches his own moral values. Everyone who has closely observed the two men reports that a strong "chemistry" has developed between the President-elect and his chief economic counsellor.

This will be important to the nation, especially as Carter means to enlarge the job of the chairman of the Council of Economic Advisers to one in which he can play a coordinating and leading role at Cabinet level in developing solutions to the nation's economic, social, and national security problems.

Zeal and pragmatism are essential to that great task—but they are not enough unless they are informed with and shaped by a sense of what is most important to the nation. It is that sense of mission, and the economic skill to discharge it, that Schultze can help bring to the Carter administration.

...Ambassador to UN...

President-elect Carter's appointment of Rep. Andrew J. Young, D-Ga., to be U.S. ambassador to the United Nations may well turn out to be a great boon for everyone but the appointee himself. In naming Young, Carter has indeed departed from predictability and has got himself a first-class envoy to boot. Whether as an aide to Dr. Martin Luther King jr., as an effective young congressman, or as a key and steadfast supporter of the Carter candidacy, Young has displayed an engaging combination of intellect, independence, and good judgment, which he couples with a talent for mediation.

The symbolism of a black American speaking for the United States to all the nations of the world will not be lost either inside our boundaries or across the globe. Both the symbolism and the reality will be particularly important to the increasingly expectant Third World.

The only cloud on this rosy horizon is the fact that this job has been the graveyard for the hopes of political advancement of many former incumbents, but that is a risk that the resilient new appointee has considered and dismissed, clearly to the nation's benefit.

...Security Adviser

In appointing Zbigniew Brzezinski to be his adviser for national security affairs, the President-elect has again turned to a known and trusted supporter. This is a selection that will place long experience and high competence in the White House.

Prof. Brzezinski, like Prof. Kissinger before him, has spent his entire career studying and practicing foreign relations. It is a career ranging from academia to the innermost councils of the Department of State; and it has given Mr. Brzezinski an intimate knowledge of the issues as well as the personalities that are bound to be involved in foreign policy development in the United States and around the globe for the foreseeable future.

The specific needs of the President and of his Cabinet shape the national security adviser's role differently in each administration. However this role may evolve under Mr. Carter, the fact that he has chosen a man of Mr. Brzezinski's background, intelligence and ability is reassuring.

THE NEW YORK TIMES.

Keeping in Touch

Since President Jefferson's day, when he set standards of simplicity that no modern president could hope to equal, the trappings of power that separate the nation's First Citizen from his fellow citizens have grown steadily more forbidding. The guard boxes, locked gates, special passes, and other security measures that began with World War II have increasingly tended to seal off the White House grounds from the rest of the world.

Having been elected as a populist, Mr. Carter is naturally perplexed as to how he can restore easier access and a more informal atmosphere to help him keep in touch with ordinary people. No president today can mingle easily with his fellow citizens.

But if he avails himself of them, three valuable channels to the public exist and can be kept open. First, he can invite persons from every region, profession, and background to meet with him singly and in small groups to face-to-face discussions. Presidents have traditionally made use of such meetings, Mr. Nixon being an exception in the degree to which he isolated himself for long periods.

The President can hold frequent news conferences, even more often than the once-a-month schedule Mr. Carter tentatively envisages. It would re-establish a useful old practice if he made them genuinely open-ended as they were in the days of Franklin D. Roosevelt rather than keeping them to an artificial half-hour limit, established presumably to meet the scheduling needs of commercial television.

No one would contend that the Washington press corps is a perfect mirror of public opinion, but if reporters from news organizations large and small are permitted untrammeled and frequent news conferences, a president can have a rough but reliable guide to what is on the public's mind.

Finally, Mr. Carter can regularly read a random sample of his mail. Citizens write to their president to unburden themselves of many opinions and complaints. If he is a faithful reader of his own mail, a president can keep in touch with the people who chose him as their steward.

Isolation is a relative matter. It is also a matter of temperament. Some presidents are more gregarious than others. But the barriers that seal a president off from the people are not the ropes and wooden-horses erected by the security-obsessed Secret Service. They are the invisible barriers in his own mind and the barriers of access erected by the staff that schedules his visitors and apportions his time. Those latter barriers are within a president's power to control if he has the will to do so.

THE NEW YORK TIMES.

International Opinion

Jamaican Vote and U.S.

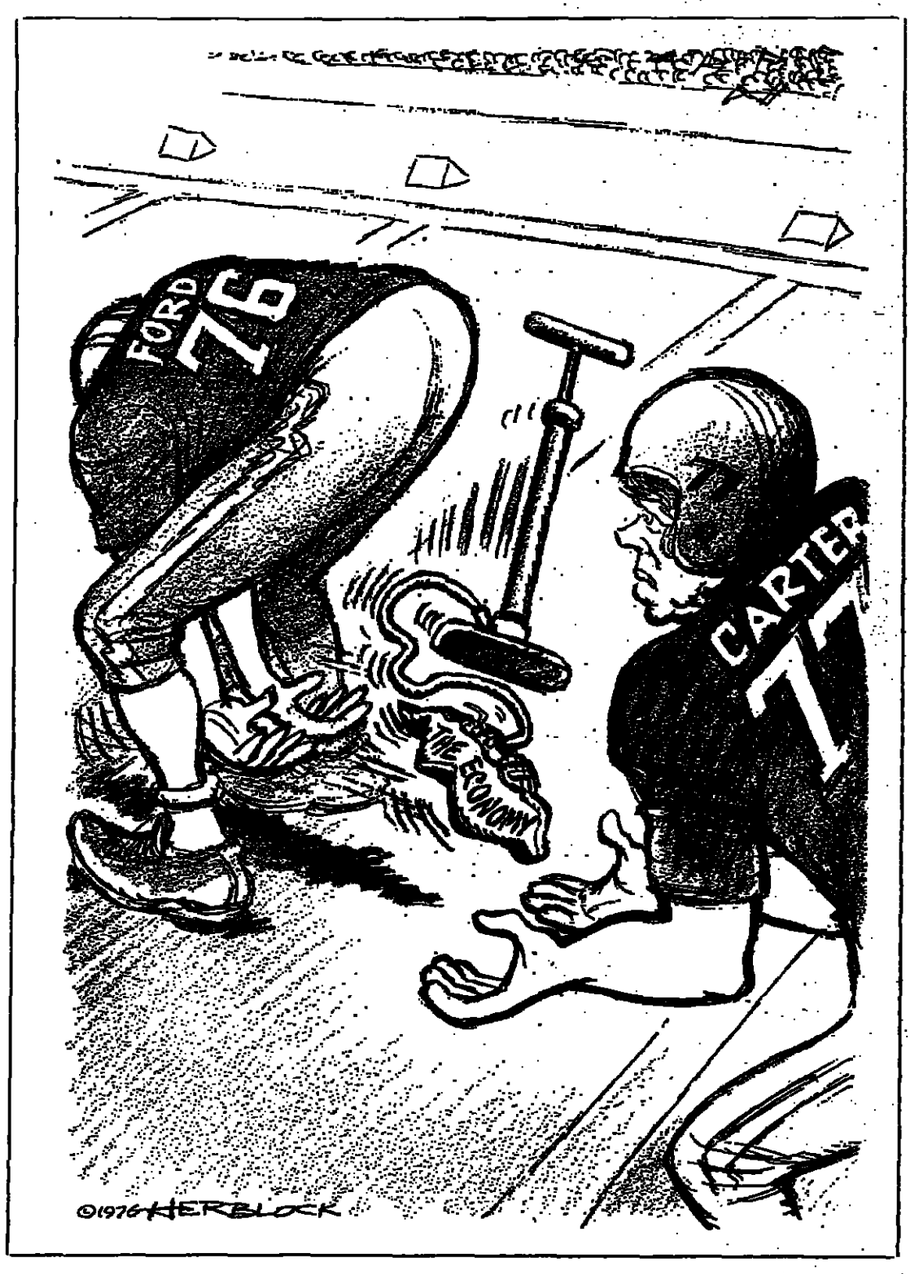
The growing radicalization of the Caribbean, exemplified in Michael Manley's sweeping victory in the Jamaican elections, ought wonderfully to concentrate the mind of the incoming Carter administration in the United States on the subject of Cuba. With Latin America under wraps, stabilized under right-wing military dictators, the Caribbean has now become the most significant zone of potential conflict and instability in the western hemisphere.

Such instability may not be to the advantage of the peoples of the area. There are many legacies of the colonial era which still linger and their removal will cause inevitable confusion. The danger lies not so much in the gradual overturn of the established order—a necessary process—as in the reaction to it that may be made by interested powers. The United States, in particular, has an unhappy record of intervention in the Caribbean . .

—From the Guardian (London).

In the International Edition

Seventy-Five Years Ago



December 18, 1901

PARIS—Le Courrier de France et des Colonies issued its first number yesterday. The new publication, as explained in an introductory note, is intended for Frenchmen residing in the colonies and abroad, and supplies a long-felt want. It gives a weekly summary of events in France and her possessions, thus keeping all citizens of the Republic in touch with affairs at home, no matter how far they may be from their beloved country.

Fifty Years Ago

December 18, 1926

PHILADELPHIA—Many years may elapse before medical science finds an effective cure for cancer, Dr Francis Carter Wood, director of cancer research at Columbia University, said in a conference here on the disease. "I can see no hope of the development of a serum that will counteract cancer," Dr. Wood said. "Once in a while we hear of some cure, but on investigation, we are disappointed. It will take many years to test cures that are now being developed."

Carter's Amiable Computer

By James Reston

WASHINGTON—The young Carter transition team is not only scouring the country for talent, but is bubbling with ideas, some new and some old, and some borrowed from the parliamentary democracies, about how the new administration will deal with its policy and political problems after Jan. 20.

Among the proposals placed before the President-elect by his staff, and now apparently being considered sympathetically by him, are the following:

• Once the Cabinet is completed, there should be a "dual veto" over the appointments of under secretaries and assistant secretaries of the principal departments. That means that Cyrus Vance at State and Mike Blumenthal at Treasury, for example, will be free to select their principal associates, subject to Carter's veto, but Gov. Carter will also respect their right to veto his suggestions at the subcabinet level if they have strenuous objections.

• The Executive Office of the President, which is probably the most inflated institution in town, should be cut by at least 25 per cent, beginning with the elimination of such arms as the Office of Telecommunications Policy.

• The President will face the prospect of a $60-billion deficit in his first year, and perhaps a $75-billion deficit if he decides to nourish the sagging economy, but this will have to be explained to the U.S. people in much greater detail than has been the case in the past.

• In addition to reviving the old Roosevelt fireside chats, which Gov. Carter promised during the campaign to do, his staff is suggesting that he invite experts on the economy and on such problems as the energy shortage to appear with him on national television to help educate the public on the hard choices he will have to make in the first few months of his administration.

• Also, as part of this educational effort, Gov. Carter is being urged to consult with the leaders of the Congress on the advisability of having members of the Cabinet appear periodically before all members of the House and Senate in televised question and answer sessions.

• The Cabinet should be divided into executive committees on domestic and security policy, where interdepartmental problems can be argued out and joint recommendations can be sent on to the President for decision. Also, each Cabinet member should have specific deadlines for getting legislation to the President and the Congress in the early weeks of the new term.

Press Officers

Some critical appointment procedures remain to be settled. For example, will Jody Powell, the White House press secretary, and Frank Moore, Mr. Carter's principal aide on relations with the Congress, have a voice in picking the press officers and congressional liaison officials of the departments and agencies?

This raises the question of just how centralized the Carter administration will be, and while the issue has not yet been resolved, the chances are that the principle of the "dual veto" will be adopted on this issue as on appointments to the sub-cabinet.

It is also being proposed to Mr. Carter by his staff that he retain the services of Patrick Caddell, who tested public opinion for the governor during the campaign, to give him regular reports on what the U.S. people think of his administration as it goes along.

His staff emphasizes that this is not for the purpose of guiding policy by popular demand, but for getting an accurate reading on public grievances, and avoiding the isolation that misled the White House during the Vietnam and Watergate crises.

What is striking about these intelligent and amiable young men around Carter is that they seem more concerned about the mechanics of government than about the policies to be followed. Above all they seem determined to avoid the mistakes of the past, to keep in touch with the Congress and the public, and to use the authority of the White House to educate.

So far, they have been dominating the news by their appointments—so much so that the Ford White House and Cabinet have almost vanished in the shadows—but they have been careful not to talk much about policy lest this seem discourteous to the President.

It has been a long time, however, since there has been such a ferment of ideas around the capital. The staff is not only available but is asking more questions than it answers, and seeing to it that whatever new ideas they can gather outside the Carter team will be discussed and passed on to the governor.

Herbert Hoover had his "Kitchen Cabinet," Roosevelt his "Brain Trust," Nixon his "closed circle," but Carter is casting a wider net. He is building carefully on the "amiable computers" which helped him win the election, and the outlook is for an innovative administration.

Reasons Why Britain Does Not Coalesce

By C. L. Sulzberger

LONDON.—Despite the damp reaction to Chancellor of the Exchequer Denis Healey's deal with world bankers and muted British financial optimism, the chances are this Labor government will stagger well into next year at the very least, hoping for an upward turn. One sure thing, whatever happens, is that this country will not resort to peacetime coalition government again.

Such an idea was voiced this autumn in elegant terms by former Conservative Prime Minister Harold Macmillan who, at 82, is Britain's grand old man, handsome, intelligent, still active and incisive. But it didn't catch on at all. Although Macmillan says he timed the proposal about six months early so people could discuss it amply before applying pressure on their parliamentary representatives, such reaction seems unlikely.

Mrs. Margaret Thatcher, present Tory leader, who regards Macmillan as her political god, nevertheless thinks coalition impossible without common purposes and methods between the two main parties. Since this certainly doesn't exist and their social aims differ widely, the idea appears unthinkable. And I have talked with no Labor tacticians who give it serious thought.

Broad Idea

Perhaps 75 per cent of the British people agree on the broad idea of a mixed economy and veer toward the center of the political spectrum. However, both the Laborites and Tories are to a degree coalition parties themselves.

This can be seen with respect to the latter in divergence of views on the issue of giving autonomy to Scotland and Wales. But Labor is far, far more of a coalition—one whose only cohesive glue is the need to stick together to hold power.

Labor was founded by a mixed bag of Fabian Socialists, Marxists and non-Marxist trade unionists. Moderate social democrats still dominate the parliamentary party but leftist union leaders in the past two years have gained considerable strength in the National Executive Committee. The moderates are reacting vigorously.

Communists of differing shades (Muscovite, Trotskyite, Maoist, etc.) have penetrated some unions as well as constituency machines but the non-and-anti-Marxists are fighting back. So today's Labor apparatus, still controlled by relative conservatives, includes strikingly different varieties of socialism: Owenites, Luddites, Marxists, social democrats, and old-fashioned Christian communitarians.

A Hodgepodge

As a hodgepodge, party originally stemming from latter-day Chartism and 19th-century anti-Corn Law protesters, Labor in itself is more of a coalition than the U.S. Democratic party (with its Southern conservatives and Northern liberals) ever was.

Moreover, when it once tried a peacetime "national" government headed by its own leader, Ramsay MacDonald, the jumble ultimately disintegrated. Both MacDonald and Labor suffered. The implications of this lesson have not been forgotten.

Labor has steadily increased its voting support since World War II but it scarcely dominates. Although it still has a 94-vote edge on the Tories, its overall majority in the House of Commons is only one because of the 13 Liberals and an olla podrida of Scottish Nationalists, Welsh Nationalists, Ulster Unionists, Scottish Laborites plus one Ulster independent and one Ulster social democratic Laborite.

On the Verge

Strangely enough, Labor benefits more than the Tories from this odd-sounding mixture both within their party and on the fringes. It has a habit of bitterly arguing things out and then when a parliamentary vote comes following the leader. The Conservatives break less easily but more seriously.

Labor seems in a far worse condition to even contemplate the thought of a coalition regime, as suggested by Macmillan, because it is always on the verge of breaking apart all by itself although, in the end, it generally doesn't. It would be more subject than the Tories, whose heart a better disciplined mass to lose out in such a formula. After all, even Labor's Trotskyites are at daggers-drawn with regular Communists.

The truth of the matter is that each party believes it can soon win (Tories) or ultimately hang on to control (Labor). The only conceivable thing that might alter such an idea is war, something happily not on the horizon. Churchill ran a wartime coalition (as did Franklin Roosevelt) but Hitler was a more discernible enemy than internal decay or chaos.

I have yet to see on Britain's political horizon any serious sign approving the concept voiced nine years ago by Prof. M. Beloff in the Times that the time was "ripe for considering coalition government as a necessary precondition for tackling the long-term structural problems of British society and the British economy."

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation or space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address.

Reply on Tax Hikes

Congratulations! Your "U.S. Officers Defend Tax Hikes for Americans Abroad" (IHT, Nov. 30) almost ruined my ski vacation. I presume that the editorial intent was to arouse further the passions of overseas Americans by demonstrating the quality and depth of government thinking that went into the recent changes in the income tax law. Returned to the flatland, teeth clenched, I accept your challenge and, with shaky hands, respond.

• To Official No. 1, who said: "Nobody held a gun to their heads" and "Why subsidize overseas Americans and companies?"

Ignoring the redundantly colloquial quality of the first remark let's dwell on the fact that U.S. export performance is very poor. A simple comparison of GNP to total exports for the top 12 industrial nations over a number of years shows the United States seldom in better than 10th position. With high domestic consumption we cannot reasonably expect to be better than maybe third or fourth, but at least that. Regardless, guided by such outrageously puerile understanding of the need to export as expressed by No. 1, I fear we will only sink further. Lamentors of our devalued currency and imbalance of payments and those who would like to work to improve exports and create more jobs, please note.

• To Official No. 2, who said: "It's not like a user's fee" and "That sort of inequity is common in taxation."

As oft repeated: The United States is the only major country that taxes its citizens overseas regardless of income source. At least he admits inequality.

• To Official No. 3 (my favorite) who said: "They're using a lot more services than they admit or perhaps even realize—things we don't think of as federal government services."

Like Watergate, providing plush retirement for the "unindicted co-conspirator" in San Clemente, assisting in Wayne Hayes's gymnastic program, the complete absence of a coherent energy policy or gun-control policy, congressional boondoggle trips, possibly? At least the South Koreans are trying to help the overseas Americans by making direct contributions.

• To Official No. 4, who said: "The guy in New York City pays just as much in income tax as the guy in Pocatello where living costs are a lot lower."

Let's reasonably assume that living costs in Washington are not less than 5 points better than New York City. The Oct. 22 IHT survey shows Geneva costs 53.5 per cent more than Washington. Therefore, quite reasonably, we can say that Geneva is 48.5 per cent more expensive than New York City and, maybe, more than 75 per cent more than Pocatello. Noting my address below, even Official No. 4 could deduce that we have a basic cost of living approaching twice that pertaining in Pocatello and he might even find out that we are paying the price in a dollar devalued 44 per cent relative to the Swiss franc since August, 1971.

Please publish the names of these paragons of progressive civic thinking so that we may salute them as we peer at our 70-cent daily paper over our 65-cent cup of coffee. Let us not sully our minds with the thought that "Never were so many screwed by so few for so much with so little political risk."

ROBERT W. MORRIS.
Geneva.

Slowing Arms Race

It is heartening to read in the IHT that our new secretary of state, Cyrus Vance, will give a high priority to slowing the arms race.

This is a Jack-the-giant-killer job. It involves very big money and very powerful union and business interests. It is as difficult as persuading drug suppliers to go into some other business or cigarette manufacturers to stop production. The old argument will be heard that others will furnish arms if we do not—ignoring the obvious need for international action.

And, of course, if at home arms sales are big business, abroad, arms purchases keep governments in office and tend to impress neighboring countries. In a few cases they may also provide genuinely greater security.

Arms, drugs, and cigarettes are all potentially lethal and highly profitable as few would contest. Maybe Vance could make a start, and mobilize popular support, with a campaign to label every bomb and piece of military equipment with a warning: "This is dangerous to health, life and security" or, as with poisonous medicines: "Keep out of reach of children and the armed forces."

What is good for U.S. balance of payments, jobs, and business may not necessarily be good.

ALFRED E. DAVIDSON.
Paris.

Right to Opinions

The IHT of Dec. 10 reports that the European Court of Human Rights has ruled, after taking five years to do so, that "The Little Red Schoolbook" is obscene. The judges said that they recognized that a fundamental concern was the principle of freedom of expression but found that "restrictions on that freedom must be proportionate to the aim pursued."

Article 19 of the Universal Declaration of Human Rights states: "Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers."

In the IHT of Dec. 11, it is reported that Britain's morals crusader, Mary Whitehouse, has been given court permission to begin blasphemy libel proceedings against Gay News—a magazine for homosexuals.

May I point out to Ms. Whitehouse, the European Court of Human Rights and all judges everywhere that this Declaration of Human Rights was signed by all member states of the United Nations—including Britain. It is explicitly clear: it states that everyone (not just those who agree with Ms. Whitehouse) has every right to hold and transmit information without *any* interference.

What can be done when local judges contravene international declarations?

JIM HAYNES.
Paris.

French Population

Re "France Debates Its Birthrate After Long Period of Decline" (IHT, Dec. 14):

Leave it to the Cartesian mentality of the French to equate national grandeur with population size. The problem of maintaining world political equilibrium will be resolved only if, and when, the industrialized nations are willing to make serious and substantial efforts to help the underdeveloped nations toward economic and political stability. The idea that the solution lies in competing demographically with such nations is simply ridiculous.

If President Giscard d'Estaing and his experts must worry about French "grandeur," let them hold debates on what to do about declining educational standards in France, about the current rate of unemployment (particularly that of French young people), about the plight of immigrant workers, and about the outrageous social and economic discrimination against women that remains common practice in this country.

THE ART MARKET

Rich, Medieval Repository

By Souren Melikian

PARIS (IHT).—France is one of the richest repositories of medieval and Renaissance art. A sale came Wednesday at Hôtel Drouot when Antoine Ader, assisted by expert Charles Ratton, offered sculpture, champlevé enamels, rare wares and majolica. Several pieces were worthy of the great museums.

The prize of the sale was a small, an ivory statuette of the Virgin and Child. The swaying movement of the figure and the almost impish smile are typical of the Rheims school. A certain heaviness in the drapery and the shape of the crown suggest the 14th century. Neither the Louvre nor any of the great French treasuries in France can match the piece. The price of 292,570 francs may seem huge for a small (21 centimeters high) sculpture. But it proves that the value of medieval art now sells high as well—if not better—in France as in London. No such piece is likely to turn up in the near future.

Next in quality was an early 14th-century Virgin (167 centimeters high). A veil covering her head, she looks downward, her hands clasped, in keeping with the traditional iconography of the Virgin mourning Christ.

Champagne School

The figure was clearly part of a group including Jesus on the cross and a second mourner. Both the quality of the drapery and the expression of the face make it a masterpiece of the Champagne school. Faint traces of original paint remain here and there against the dark oak surface, giving the statue an even more austere appearance. It brought 21,450 francs, a good price, given current trends, but laughable in view of its quality.

It would seem that the well-known, long-standing prejudice against "sad" subjects has not lessened and can still affect the price of works of great beauty.

By contrast, two small Flemish reliefs of the same period, carved in high relief, fetched 40,570 francs and 28,750 francs. They were quite good in their own way but neither can be called exceptional. The more expensive of the two, illustrating the Annunciation, is in poor condition. But the other was half as desirable as the far less expensive standing figure.

Prices are still soaring for champlevé enamels made in Limoges during the 13th century. The finest work was a figure of Jesus on the cross—without the rectangular plaque to which it was originally attached. Worse, the figure itself had lost its left arm and right hand—both of which were atrociously restored in the 19th century.

Louvre Parallel

However, it is a marvelous piece of sculpture in the round from a small group, made circa 1220 to 1240. The Louvre has a similar Christ, also in poor condition. No doubt this parallel encouraged bidders, professionals and collectors alike, who fought wildly over the object. Eventually it went to a French collector for a whacking 187,67[illegible] francs.

A small, cylindrical pyxis in champlevé with a conical lid (10 centimeters high) fared nearly as well by making a huge 35,570 francs. Decorated with white enamel roundels enclosing the "monogram" of Jesus, it is academically interesting but has little to recommend it to art lovers.

Prices for 16th-century painted enamel plaques were irregular. This is one of the most splendid forms of late Renaissance art and was immensely popular at the turn of the century. But this is a category which requires a good deal of first-hand study and the number of objects is few.

Two rectangular battle-scene plaques, painted in Jean Penicaud's Limoges atelier about the middle of the 16th century, each 10 centimeters long, were slightly chipped and showed signs of some repainting. They went up to 18,470 francs, twice the estimate. They were superb but expensive, considering their imperfect condition.

Samson

The next plaque was impressive. It showed Samson carrying the doors of Gaza on his back. It had been restored but it is so perfectly painted, possibly by the 16th-century master Martin Didier, that it has a monumental quality. A strong feeling of mystery is created by a slanting perspective and by chiaroscuro. It made 4,624 francs and was unquestionably a bargain.

Just as good was another slightly larger plaque in gray and gold with touches of light peach color. It shows Jesus being taken to Herod. It has a dramatic quality in movement, composition and color scheme—a drama that is seldom equalled in full-sized paintings of the period. At 5,800 francs, Marcel Ségal of Basel got it for a song.

More surprisingly, Italian majolica also varied in price. The best piece, a tall, waisted vase of the type called "albarello," sold for 80,870 francs—just about right for an ungainly but very rare 15th-century piece from Faenza. But two other important vases with large inscriptions were below the estimate at 50,170 and 37,970 francs respectively. Italian dealers were hardly enthusiastic. If the Italian economy continues to falter, this market, largely geared to Italian demand, may suffer further by next spring.

A medieval ivory statuette of the Virgin and Child (21 centimeters high), made in France, probably during the 14th century. It sold in Paris for 292,570 francs.

UNITED STATES

Minneapolis Sets Lively Cultural Pace

By Richard Eder

MINNEAPOLIS (NYT).—This is a Midwestern city of 450,000 people; its twin, St. Paul, makes it 800,000, and the whole metropolitan population is only 2 million. Yet, besides clean air, low crime, good planning and considerable civic decency, Minneapolis manages a cultural life of a strength and diversity surpassed only by three or four other U.S. cities, all much larger.

Why Minneapolis? The answers are both uniform and opaque. They cite the question without quite answering it. They provide a pedestal without a statue.

The city's long isolation made it develop on its own, they say, without cultural swamping by bigger neighbors. The educational bent of the Scandinavian immigrants led to schools first—the huge University of Minnesota campus lies right in the middle of the city—and then to art. Finally, there is the local business tradition of putting money into culture. It dates to 1902, when a lumberman named Elbert Carpenter decided that this frozen outpost needed a symphony orchestra and bullied his friends into providing one.

The Minneapolis Club—brick, wood and worn rugs—looks like a faculty club. But though a spare bean soup and a limp sandwich is the standard lunch—it's hard to imagine someone waltzing in calling for oysters and champagne—its denizens are the city's rich and powerful. Also the illegal. Under the state's public-disclosure statutes, members of a public board are not to transact official business privately, which might be construed as making all the club talk about raising funds for the symphony or the Arts Institute against the law.

Minnesota Standard'

Nobody does construe it that way, and that's how money is raised. Kenneth Dayton, chairman of the board of Dayton-Hudson, a big retailing corporation, goes around the country urging businessmen to adopt the "Minnesota Standard." Twenty-three Minnesota corporations are currently giving 5 per cent of before-tax earnings to public philanthropy. A great deal of this goes to the arts, and is their biggest source of funds.

The local businessmen practice a special form of pyramiding to raise money for culture. They stand the pyramid upside down.

"If you start with a lot of small gifts, it bogs down," Mr. Dayton said at the club the other day. "If you want to raise $14 million, you find someone to give $2.5 million. Then three gifts of one million each, and the rest is easy."

Walker Center

The Walker Art Center, one of the finest modern art museums in the United States, is a lovely assortment of white spaces that manage to change character with each new show. For an exhibition called "Educational Spaces," it became an exhilarating jumble of books, paraphernalia and children. "The children looked like jellybeans," recalled Martin Friedman, the director. (Minneapolis children seem permanently encased in bullet-shaped snowsuits in primary colors.)

Walker has its own collection of modern works, but its emphasis is on assembling shows that later tour the country. Among many others, it has done exhibitions by Claes Oldenburg and Louise Nevelson and a big show of American Indian art.

Mr. Friedman—a mixture of professor, Puck and P.T. Barnum—exhibits art as action, as conversation. He talks of relationships and roots. He uses river imagery. Seizing on the river that obscurely bisects his city—the banks are clogged and difficult to see—he has put on a big show about the Mississippi.

It starts with early paintings and maps, including an extraordinary 300-foot scroll used in the 19th century to illustrate a traveling lecture about the river. It has comparative photographs of St. Louis and Minneapolis riverfronts, taken 50 years ago and now. They were livelier then. It has projects for developing a midriver island, and it ends with a group of contemporary visions of the river. One is a 24-screen video project by Nam June Paik. Another is—or was—four red gas-inflated tubes hung above the chimneys of an abandoned power plant. Snipers shot them down.

Arts Institute

The city's biggest museum, the Arts Institute, has a show by Charles Joseph Biederman. He is a 70-year-old Minnesota artist whose work has not been acquired by U.S. museums, though there are some examples in Europe.

Mr. Biederman spent his first 30 years in a bleak pilgrimage through styles ranging from Cézanne through Mondrian, never really inhabiting any of them. Since 1937, he has been fashioning patterns of aluminum squares and chips in bright colors. They look something like coded radio information from another planet. The show also features a videotape interview in which the artist talks of his work in a fashion that is both didactic and blurred.

The Minnesota Opera, possibly the most dynamic experimental opera company in the country, is temporarily silent while moving to a larger warehouse. (It has no home of its own, and gypsies around.) Its forthcoming season includes "Mahagonny" and an opera version of "The St. Matthew Passion," and it has commissioned a sequel to "The Barber of Seville" by Hiram Titus, a local composer.

The Tyrone Guthrie Theater is doing fairly familiar things—"The Matchmaker," "The Winter's Tale," "The National Health" and others—but its director, Michael Langham, brings such revelation to "Winter's Tale," at least, as to make it seem new. The Cricket Theater, more experimental, has excellent actors, primitive conditions and a lot of life. "We can't light our shows," William Semans, the director, said. "We can only put light on them."

There was plenty of light—from the performers, if not the lamps—in the current run of "Subject to Fits," Robert Montgomery's witty and sometimes extraordinary transposition of Dostoevski's "The Idiot."

Public Money

There are problems. If private support is generous, there is very little public money, and the shortage raises questions for the future of both institutional and experimental arts.

Cultural life in a city of this size tends to be a series of destinations, with very little along the way. There isn't the context of meetings, discussions, places to drop in on that one finds in the biggest cities.

More seriously, Minneapolis produces art, but it doesn't confer value on it. There isn't yet the kind of public and critical response that goes beyond receptiveness and establishes success and failure for the artist. Things often have to succeed elsewhere to register properly.

The city is flinty but openminded. "It reminds me of Glasgow," Mr. Langham, who is English, says. "You get to know it slowly, the way you do a Scotsman."

ON THE ARTS AGENDA

The Hungarian soprano Sylvia Sass will sing the title part in a series of special concert performances of Bellini's "Norma" to be given Dec. 19, 22 and 29 at the Frankfurt Opera. Adalgisa will be sung by Alicia Nafé, Pollione by Francisco Ortiz and Oroveso by Richard Cross, and the performances will be conducted by Michael Halász.

* * *

The Grand Théâtre of Geneva will give seven performances of Offenbach's "The Grande Duchess of Gerolstein" from Dec. 26 through Jan. 1, conducted by Henri Gallois and with a cast including Dany Barraud, Anne-Marie Blanzat, Michel Caron, Jules Bastin and Jacques Loreau. Hans Neugebauer will stage the operetta, with sets and costumes by Roland Aeschlimann.

* * *

The National Gallery in London, as part of its "Painting in Focus" series, will mount an exhibition around "Madame Moitessier" by Ingres, concentrating on the evolution of this late work during the 12 years it took to complete, and sources for the pose—Roman painting, French 18th-century portraiture and contemporary photography. The show will run from Jan. 26 to March 20.

* * *

Continuing the Paris Opéra's new production of Wagner's "Ring" cycle begun earlier this month, "Die Walküre" will have its first performances Dec. 18 and 21 in the new staging by Klaus Michael Gruber, with sets by Eduardo Arroyo and costumes by Moidele Bickel. Sir Georg Solti will conduct, and the cast will be headed by Helga Dernesch as Sieglinde, Gwyneth Jones as Brünnhilde, Christa Ludwig as Fricka, Peter Hofmann as Siegmund, Theo Adam as Wotan and Kurt Moll as Hunding. "Das Rheingold" will return for two more performances Jan. 12 and 14 and "Die Walküre" on Jan. 19, 22 and 25, with Edward Downes conducting, Hans Sotin taking over the role of Wotan and John Macurdy that of Fasolt and Hunding in the two operas.

* * *

After its exhibition in the Marlborough Gallery in New York, an exhibition of 80 photographs of Brassaï—"Das Geheime Paris—Bilder der 30er Jahre" (The Secret Paris of the '30s)—is showing at the Marlborough Galerie in Zurich until Jan. 29. The exhibitions have been accompanied by the publication of a book, under the same title, of the photographer's work by Pantheon in New York, S. Fischer Verlag in Frankfurt and Gallimard in Paris.

* * *

Mstislav Rostropovitch will conduct a concert performance of Tchaikovsky's "Queen of Spades" on Dec. 29 at the Théâtre des Champs-Elysées in Paris, with Galina Vishnevskaya as Lisa, Regina Resnik as the Countess, Hanna Schwarz as Pauline, Peter Gougaloff as Hermann, Dan Jordachescu as Tomsky and Bernd Weikl as Yeletsky. The Orchestra National de France will play for the performance, and the Tchaikovsky Chorus and the French Radio's children's chorus also will participate.

Leading book publisher seeks manuscripts of all types: fiction non-fiction, poetry, scholarly and religious works, etc. New authors welcomed. Send for free booklet: H-S VANTAGE Press 516 W 34 St., New York, N.Y 10001, U.S.A

Around the Galleries in London and Paris

London

Elizabeth Crossley/Cherly Pilsworth, Five Dryden Street Gallery, Dryden Street, London WC2, to Dec. 23.

Difficult to find—Dryden is a short street off left of Drury Lane a little north from Aldwych—the journey is worth the search: It is showing witty, romantic, wistful and fantastic lithographs and etchings by two extremely talented young printmakers. This is their first London show.

* * *

Drawings and Watercolors 1854/1974, Piccadilly Gallery, 16a Cork Street, London W.1., to Dec. 23.

The highlights of this Christmas exhibition include an untypical but fine Georg Grosz "River Landscape at Night"; a crayon drawing for one of the heads in "The Golden Staircase" by Peter Blake-Jones; Klimt's "Woman with a White Shawl"; a flower painting in art nouveau style by Charles Rennie Mackintosh; and groups of drawings by Beerbohm and Gill.

* * *

Decor+Yootha Rose, Campbell & Franks, 37 New Cavendish Street, London W.1, to Dec. 24.

In the lower gallery, Decor, which specializes in theater, cinema and fashion design and illustration, has mounted a seasonable exhibition of pantomime, music hall and revue designs: Beaton, Gesmar, Erté, Berman, Lancaster and Messel. The ground-floor gallery has Yootha Rose's toys, models and theater designs.

* * *

Jenny Cook, Mercury Gallery, 26 Cork Street, London W.1, to Dec. 24.

Working in transparent oils on sheets of perspex (she is a glass painter as well as oil painter by training), Jenny Cook produces a series of "Gardens for a Nomad" which owe something in feeling to Oriental miniatures. Her other works are *Jugendstilisch* compositions in vivid color.

* * *

Patrick Hall / Annette Barcelo, Marjorie Parr Gallery, 285 King's Road, London S.W.3, to Dec. 24.

Recent watercolors by a veteran master of the medium are divided into two series, "Façades," which includes Rouen, Rheims, Venice and Chartres, and "Landscapes," the Loire Valley, Tuscany and the Languedoc. This first London show of Swiss Annette Barcelo consists chiefly of small watercolors of harlequins and circuses.

* * *

Yet Even More Cats of Fame and Promise, Michael Parkin Fine Art, 11 Motcomb Street, London S.W.1, to Jan. 9.

Strictly for addicts, the Parkin annual Christmas cat show has more than 100 cat pictures, from the 18th century through the present day; it includes a fine group of Louis Wains.

* * *

Sporting Pictures, 1976, Nicholas Treadwell Gallery, 36 Chiltern Street, London W.1, to Jan. 22.

This gallery with its specializations in eroticism, fantasy and down-to-earthness, has turned its attention to sport, liberally interpreted. But for sheer technique and painting quality there is no better show in London. And all the artists are young and lively.

* * *

Bill Brandt, Marlborough Fine Art, 6 Albemarle Street, London W.1, to Jan. 15.

Bill Brandt (b. 1904), once an assistant to Man Ray, is the most celebrated of English photographers. The 80 prints in this exhibition celebrate London and the industrial north of England in the thirties; famous persons, nudes of the fifties; and English landscape—forties to sixties.

* * *

Jewelry Through 7,000 Years, British Museum, Great Russell Street, London WC.1, to Ft. . 1.

This is a mouth-watering exhibition of jewelry drawn from all departments of the British Museum. Starting with the Middle East, it works its way through the Phoenicians, Greeks, Etruscans and Persians, the Celts, China, Rome, Parthia, India and Byzantium, to Central and South America and West Africa, with special sections on amulets, cameos and finger-rings.

—MAX WYLES-JOYCE.

Paris

Jean-Pierre Velly, L'Œuf de Beaubourg, 58 Rue Rambuteau, Paris 3, to Dec. 31.

Velly, at 33, is an outstandingly gifted engraver whose work has density, power and roots. The roots are the acknowledgment of a tradition that includes Dürer and Bresdin, whom Velly obviously admires while preserving his own originality. His work is baroque, surreal, allegorical and even apocalyptic in the sense that it suggests a vision of the future that passes through destruction on its way to Utopia. There is an extreme proliferation and at the same time an immense space in many of these works. The artist himself holds the promise of an unusual conjunction of virtuosity and driving purpose. And so one feels authorized to place high expectations and high demands upon him.

* * *

Games and Toys, Maison des Métiers d'Art Français, 28 Rue du Bac, Paris 7, to Jan. 7.

Games and toys made by artists and craftsmen. Much that is charming, much too that would not survive one hour with a child. But who says toys are only for children? There is a splendid tin flying boat straight out of Jules Verne and any 14-year-old's fantasy. A mere 10,000 francs . . . Dolls, puppets, cups and plates for dolls, and rocking horses that are wooden praying mantises, grasshoppers, a ceramic man on all fours, and even horses.

* * *

Yugoslav Naifs, Galerie Mona Lisa, 32 Rue de Varenne, Paris 7, to Dec. 31.

Works on glass by artists of the school of Hlébiné which is a prolongation of a manner created in the thirties by the remarkable peasant painter Ivan Generalic. Because these works mostly respect the canons he established for himself, it would probably be better not to call them naif painters working according to the style of the rather young tradition worked out by Generalic and Ivan Lackovic (who is represented here) among others. There is much real charm, invention and freshness and a diversity of mood that sometimes kindles a real originality, for instance in the work of Mijo Kovacic, within a well established formal approach.

* * *

André Barelier, Galerie Daniel Gervis, 34 Rue du Bac, Paris 7, to Jan. 7.

Bronze sculptures about 2 feet high representing, for instance, a young woman getting out of her bath, a man sitting at a table, a model standing in a studio. Barelier catches a certain grace and intimacy of attitudes and lighting that is attractive. Another new, young talent.

—MICHAEL GIBSON.

LONDON THEATER

Rediscovering 'England's Molière'

By John Walker

LONDON, Dec. 17 (IHT).—After last year's dud entertainment, Graham Greene's fumbling "Raffles," the Royal Shakespeare Company has come up with a real Christmas cracker this year at the Aldwych. John O'Keeffe's "Wild Oats" is a delightful theatrical farce, beautifully played. Clifford Williams's light, dancing production also marks the rediscovery of a talented, popular dramatist whom the greatest of critics, William Hazlitt, somewhat euphorically called "our English Molière."

O'Keeffe, born in Dublin in 1747, was an actor until he went blind when he was in his late twenties, and continued as a prolific writer of farce and comic opera, dying in poverty in England at the age of 85. His collected plays filled four volumes when they were published in his lifetime and his work continued to hold the stage throughout the 19th century. "Wild Oats," written in 1791, was particularly popular, being revived more than a dozen times.

The Royal Shakespeare Company's production is the first this century. If O'Keeffe is far from a great playwright and slapdash in construction, he is nevertheless an inventive and witty writer, a skillful manipulator of individual scenes, piling one absurdity upon another, and a man with a great talent to amuse.

In "Wild Oats," he sees the world in terms of theater. His hero is a strolling player who finds himself impersonating a rich man's son in order to woo a wealthy Quaker and discovers that nearly everybody is playing a role. This assumption leads him into some amusing trouble: He tells a crusty old sea captain, who actually is a crusty old sea captain, that he should redden his nose if he wants people to take him for real. It is an understandable mistake in a world in which even the beggars put on eye patches and peg legs when they see a likely victim approach.

O'Keeffe did not worry about being original in his plotting and his play is full of the stock situations of his time—long-lost heirs reunited with their mothers, false marriages, discarded brides and rapacious landlords. But he creates something fresh from it all, thanks to his delight in human folly and a warm-hearted humanity that shines through even the play's most sentimental moments.

Mr. Williams keeps the pace light and lively and the cast cavorts delightfully in Ralph Koltai's barnlike settings. Alan Howard growls and struts to perfection as Rover, turning the character's chief quirk, his tendency to quote Shakespeare at inappropriate times, into the charming impediment of a shy person. Norman Rodway blusters to splendid effect as a naval man and Lisa Harrow is the very embodiment of grace. The production is popular theater at its best.

At the Hampstead Theatre Club Pam Gems's "Dusa, Fish, Stas and Vi" proved an unexpected pleasure. I admit approaching this feminist play of four women, trying to survive without the men who have misused them, with no great joy. There is enough I should feel guilty about, without having to sit through accusations that I am oppressing half the human race.

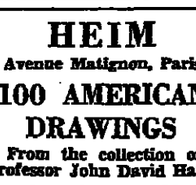
But the play is more complex than simple propaganda. Indeed, it is one of the best new plays of the year, compassionate and funny, nicely directed by Nancy Meckler and well acted by Alison Fiske as the militant Fish, Diane Fletcher as the calculating Stas, Mary Maddox as the withdrawn Vi and Brigit Forsyth as the domesticated Dusa.

The four are all among the walking wounded. Fish has married a man and left him after two days because her boyfriend had ended their long affair. We never hear of her husband again although when her boyfriend marries, Fish follows him around the streets, watches him make love to his wife from a fire-escape outside his bedroom and finally contemplates suicide. Vi has withdrawn from the world, trying meditation and pot and compulsively refuses to eat.

Dusa, after years of being a compliant wife, has divorced the husband who abandoned her for another woman and he has snatched away her children. Stas works as high-class call girl in order to raise the money to take her to University in Hawaii.

They seem an unlikely quartet to share a flat. But their dialogue has an admirable sharpness and humanity. Between the scenes of the play are short interludes of moments from one of London's commercial radio stations. The contrast between the reality of Miss Gems's fictional creations and the fantasy of actual disk-jockeys' mindless drivel or the banality of "phone-in" conversations is savagely satirical.

The play's tragic ending I found dramatically unconvincing, including as it does the reading of a highly sentimental suicide note. But, just as I was the only man sitting in a row of seats, so I was the only one to remain dry-eyed. Maybe intentionally, Miss Gems has written a woman's play, although it certainly deserves a wider audience than it will reach at Hampstead.



* * *

At the Shaw Theatre, Willis Hall's "Christmas Crackers" is a tough and boisterous children's show, a sequel to his successful "Kidnapped at Christmas" last year. It isn't as good. Mr. Hall, although he begins in a playful fashion, juggling with theatrical conventions, soon runs out of invention. Brian Rawlinson's direction is uninspired and the stage is sadly underpopulated for most of the play, coming near to being a one-man show for Michael Robbin's ridiculous and pompous policeman.

EC Industrial Output Recovers After Pause

BRUSSELS, Dec. 17 (AP-DJ).—...strial production in the Common Market staged a recovery ... the summer pause with the ...sally adjusted September rise ...e production index more than ...ating the slight falls recorded ... and August, the EEC ...mission said today.

...s latest report on the EEC ...omic situation, the Commis... noted that the growth in in...rial production was the least ... in the United Kingdom. ... contrast with the perfor...mance of other major industries, activity in the capital goods industry was very sluggish and production failed to exceed the September, 1975 level, the report said. It did not give figures.

Although demand for consumer goods has still been relatively buoyant on the whole and the slackening of demand in the motor industry has been offset by more rapidly expanding demand for consumer durables, the propensity to invest has shown little improvement until now. This, the report said, can be ascribed to a too low capacity utilization.

Except for residential construction, the building industry is showing signs of particular weakness, the commission report said.

Consumer Confidence

Meanwhile, the latest business survey in the EEC suggests that consumers' confidence in the general economic prospects is ebbing a little, the Commission reported.

The survey, conducted in October, showed that the economic outlook is being assessed as being less favorable, with the loss of confidence most marked in the United Kingdom, the Commission's summary of the survey said.

West Germany is the only country where fading confidence in the prospects for the general economic situation has not aggravated public fear about the trend of unemployement, according to the report.

Financial Independence

In another development today, EEC finance ministers laid the basis for making the community financially independent of the nine member governments.

The ministers agreed in principle on a vast range of goods and services to be covered by a value-added tax at the end of a five-year transitional period. The plan is for citizens in EEC countries to automatically pay a fraction of this tax into the community kitty beginning in January, 1978.

As it stands now, community income from duties and levies has to be supplemented by contributions from member states. These contributions are based on an out-of-date assessment of a member's share of the EEC gross national product.

...etail Prices ... U.K. Rise ...4 Per Cent

...NDON, Dec. 17 (AP-DJ).— ...in's index of retail prices in ...mber rose 1.4 per cent from ...ber and 15 per cent from a ... earlier, the Department of ...loyment reported today.

...e index in November was at ... (with Jan. 15, 1974 equals ... compared with 163.5 in ...ber and 144.2 a year ear...

...ember's rise was the fourth ...sitive monthly increase on a ...-year basis and puts Brit...annual price increase above ... per cent for the first time ... May.

...e rise, based on data com... Nov. 16, was mainly at...ted to higher prices for food, ...and gasoline and other goods ...services.

...the three months ended November, retail prices were ...s at an annual rate of 18.4 ...cent. This partly reflected ...effects of sterling's depreciа...earlier in the year. In the ...ous statistical quarter end...mid-August, retail prices were ...g at an 8.5-per-cent annual ...

...other news the Bank of ...land announced today that it ...reducing its minimum lend...rate to 14.5 per cent from ... per cent, effective Monday. ...was the second time the rate ...been cut by 1/4 point since ...7, when it was increased to ...ord 15 per cent.

By Stimulating Their Economies

West Germany, Japan Asked to Aid U.S.

WASHINGTON, Dec. 17 (AP-DJ).—West Germany and Japan must help the United States reach its goals for higher production and lower unemployment, U.S. Senate Budget Committee economists said yesterday.

Otherwise, the U.S. government will have to run annual budget deficits of about $70 billion for the next few years, they said. That would prevent President-elect Jimmy Carter from keeping his "commitment" of a balanced budget in four years.

West Germany and Japan must be persuaded to expand their economies faster and buy more from the United States and other countries, the economists said. More U.S. sales abroad would provide growth and jobs at home without requiring such large budget deficits, they added.

The budget staffers blamed the current slowdown in the world economy partly on higher oil prices and warned that a further price boost of more than 10 per cent could turn the slowdown into a worldwide recession.

This analysis is contained in a study prepared by the panel's two top economists, Arnold Packer and Van Doorn Ooms. The Senate and House Budget Committees must pass on any requests by Mr. Carter, who becomes president Jan. 20, for additional spending or tax cuts to stimulate the economy.

Congress has approved a budget for fiscal 1977, which began Oct. 1, with a deficit of about $50 billion. But a weaker-than-anticipated economy has already reduced federal revenues $5 billion to $10 billion and added that much to the deficit. Putting the economy "back on a 6-per-cent growth path" will require $15 billion to $20 billion of fiscal stimulus and deepen the fiscal 1977 deficit to at least $70 billion, Mr. Packer and Mr. Ooms said.

Deficits of the same magnitude would be required in later fiscal years to keep the economy growing at the same rate, they added, if the U.S. budget is to be the sole means of maintaining U.S. growth. But deficits of that magnitude are "politically unattractive," they said.

"There is no reason why" the United States alone must bear the responsibility for stimulating the world economy, the study says. "Other strong industrial economies—notably Germany and Japan—must share the responsibility to provide the fiscal and monetary stimulus that world economic recovery requires," it adds.

Seek Stimulus

"More economic stimulus in Germany and Japan means that less fiscal stimulus and smaller budget deficits will be required in the United States," the economists say.

In the longer run, international cooperation will also be needed to reduce the dependence of the industrialized nations on foreign oil, they add. Because of this dependence, price boosts by the oil-producing lands have a depressing effect on the world economy, they maintain.

Higher oil prices drain purchasing power away from the oil-importing nations and cause inflation that makes governments hesitant to stimulate their economies, the study says.

What is more, some oil producers do not spend all their enormous income but lend it back to oil consumers. The added burden of debt makes the debtor countries less willing or able to pursue stimulative policies, the economists say.

6% Growth Rate Urged for U.S.

By Jack Egan

NEW YORK, Dec. 17 (WP).—The Committee for Economic Development, a high-level group of business leaders and academics, called yesterday for policies to make the economy grow at a 6-per-cent rate in real terms over the next two year—higher than many forecasters have predicted is in the cards, even with additional stimulus.

The CED, in a periodic national policy statement, said 6 per cent was "a realistic growth target for making headway in reducing unemployment and winding down inflation."

And the group also made its own recommendation for a prompt tax cut and other stimulative actions to spur the lagging economy and bolster sagging consumer and business confidence.

A broad-based permanent tax cut for individuals was preferred by the CED, similar to the recommendation put forward by a group of businessmen in a meeting with President-elect Jimmy Carter last week, but the statement said it recognized "there can be a case for combining more permanent tax reductions with temporary tax reductions or a rebate in order to hold down the size of future revenue drains and achieve prompter results."

Cut Almost Certain

Mr. Carter's economic advisers have indicated that some form of tax cut is almost a certainty, but the debate continues over whether a rebate on 1976 taxes or a reduction in 1977 taxes would be more effective in boosting demand, and there is reluctance to pare taxes permanently because it would erode the overall revenue base, making it difficult for Mr. Carter to keep his promise to balance the budget by 1980 and also fund any new spending programs.

The statement argued, however, that "if permanent reductions in tax rates are properly designed, they need not mean permanent revenues losses because they will generate substantially higher taxable incomes than would otherwise have been realized."

Among the types of measures that the CED says "deserve consideration" are "an increase in the personal exemption, an enlarged per capita tax credit, a rise in the investment tax credit to a permanently higher level, and improved depreciation allowances."

Mr. Carter has set 6 per cent real growth in GNP next year as a goal, but most experts believe that even if this is attained, the rate would have to moderate the following year or it could cause the country to run up against production constraints and renewed strong inflationary pressures.

And Edward Kane, president of E.I. du Pont de Nemours & Co., a member of the research and policy committee of the CED which drew up the statement, in a separate comment said he had "a serious reservation" about the 6-per-cent target because it seems "higher than now seems within our grasp."

Other members of the research and policy committee in dissents said that the policy statement does not pay enough attention to the problem of a possible resurgence of inflation.

The CED statement maintained that "the long-run solution to overcoming inflation lies as much in increasing supply as in restraining excessive demand" and that "only through adopting policies that promote more vigorous growth of capital investment" can there be enough industrial capacity added "to avoid future supply bottlenecks and minimize cost inflation."

The report said "uncertainty about national economic policies and prospects has become the major factor inhibiting the spending and investment decisions and future plans of both business executives and consumers" and therefore recommended some quick stimulation to stabilize things.

But besides policies to stimulate demand through tax cuts, the statement also recommended "a wide range of structural measures, many of them pinpointed to the industrial, population, or geographic sectors where the problems of unemployment, low productivity, or capacity limitations are most serious."

As for monetary policy, the report said the Federal Reserve Board should act to accommodate the fiscal stimulus that is being proposed, but, beyond that, the Fed "has moved about as far toward ease as is productive under current circumstances."

Demand for Short-Term Credit Continues to Gain, Fed Reports

NEW YORK, Dec. 17 (NYT).—Short-term credit demand continues to pick up, data reported by the Federal Reserve Bank of New York yesterday indicated.

Commercial and industrial loans at major New York City banks posted a substantial $479-million increase in the week ended Wednesday, while commercial paper outstanding rose $934 million in the week. Commercial paper outstanding is at a record level of $54 billion.

Though the commercial and industrial loan figure is preliminary, a Federal Reserve spokesman indicated that almost half of the gain was in bankers' acceptances and that, of the $2.9 billion net increase in business loans in the latest 16 weeks, about $2.4 billion was in the bankers' acceptance category.

These trade bills, whose payment is guaranteed by a bank, are money-market instruments classified by the Fed as business loans.

Key short-term interest rates showed very small changes in the latest week. The federal funds rate—a key indicator of monetary policy—averaged 4.68 per cent up 1 basis point, or a hundredth of a percentage point. Some analysts still expect the Fed to ease the funds rate down one more notch to the 4.52-per-cent level.

"The Fed now appears willing to err on the side of ease, and that implies a shift from concern about inflation to more concern for unemployment," Citibank said in its December economic letter. "But the extent of the shift in growth goals will not be known until money begins to rise rapidly again. At that point, what happens to the federal funds target will provide the answer."

The money supply, known as M-1 and made up of currency in circulation plus checking accounts, rose $800 million in the week ended Dec. 8. The seasonally adjusted rate of growth for M-1 is 5.1 per cent in the latest quarter, 4.1 per cent in the latest six months and 5 per cent in the latest year.

While M-1 continues to grow at the bottom of its target range, the broader money supply, known as M-2 and made up of M-1 and consumer type time deposits and savings deposits at commercial banks, is still at the upper range or over its target as a record savings inflow persists.

From the third quarter of 1976 to the third quarter of 1977, the Fed's target for M-1 is 4 1/2 to 6 1/2 per cent and for M-2 it is 7 1/2 to 10 per cent.

In the latest week, M-2 rose $3.3 billion, bringing its seasonally adjusted annual rate of growth to 12.2 per cent in the latest quarter, 10.6 per cent in the latest six months and 10.7 per cent in the latest year.

Japanese Draw Up Additional Budget

TOKYO, Dec. 17 (Reuters).—The Japanese Finance Ministry has drawn up a supplementary budget for the remainder of fiscal 1976 totalling 354 billion yen ($1.2 billion), of which 263 billion yen will be spent on public works programs, ministry officials said today.

The budget will be presented for approval to the Cabinet on Dec. 21, and to parliament in mid January, they said. The fiscal year ends next March 31.

Commerzbank Earnings

FRANKFURT, Dec. 17 (AP-DJ).—Operating earnings of Commerzbank AG in the first 10 months of the year were 15.9 per cent below the average level in the previous year, the management board said in an interim report.

Stock Prices Fall for 2nd Day In Face of N.Y. Profit-Taking

NEW YORK, Dec. 17 (IHT).—Prices retreated for the second consecutive session in the face of profit-taking on the New York Stock Exchange today.

Analysts said the market was consolidating after recent gains. Stocks had been in a sustained advance for several weeks on the basis of advance and decline figures, analysts said.

Downward pressure was also caused by uncertainty about the two-tier price arrangement that resulted from Qatar oil meeting, analysts said.

"A lot of people really don't know what this OPEC thing means," said Michael Metz of Oppenheimer & Co.

The Dow Jones industrial average closed 2.24 points to 979.06. The index stood at 973.16 last Friday. Declines outnumbered advances by about 790 to about 670.

Volume totaled 23.87 million shares, compared with 23.92 million yesterday.

Active General Motors lost 5/8 to 75 1/4. It said it is recalling 100,000 1977 Cadillacs, and GMC and Chevrolet want to correct defects that could cause unexpected acceleration.

Ford lost 1 to 59. Chrysler, which raised its estimate for 1977 capital spending, was unchanged at 18 7/8.

UAL Inc. eased 5/8 to 26 7/8. Its United Airlines unit expects profit of more than $20 million this year compared to a loss in 1975.

Pan American rose 1/8 to 5 1/8, Northwest Airlines 1/4 to 30 1/4 and Eastern 1/8 to 9 3/8.

Du Pont rose 3/4 to 135 1/2, Dow Chemical, among the actives, gained 3/8 to 41 7/8, and Allied Chemical 3/4 to 39. But Union Carbide slipped 3/8 to 61.

On the active list, Occidental Petroleum was unchanged at 23, American Telephone lost 3/8 to 63 1/2 and Tandy 3/4 to 36 7/8. Exxon was unchanged at 52 1/2 and Atlantic Richfield lost 1 3/8 to 58 1/2.

Other losers included IBM, off 2 7/8 to 265 1/2, Fairchild Camera 2 1/2 to 38 1/2, Southern Union 6 1/2 to 34, Standard Oil Ohio 1 1/4 to 76 1/2 and National Semiconductor 1 1/8 to 25 3/8.

Signal Cos rose 1 1/2 to 26 1/2.

Great Western United rose 1 3/8 to 19 3/8. It reported higher net for the four months ended Sept. 30, the end of its new fiscal year.

Warner-Lambert was unchanged at 28 1/4 as was Deseret Pharmaceutical at 37 7/8. Warner-Lambert said it obtained 83.5 per cent of Deseret shares in its tender offer.

Royal Industries was unchanged at 13 5/8. It advised holders to accept a $13.50 a share bid from Lear Siegler. Lear rose 3/8 to 13 1/8.

Aetna lost 5/8 to 34 1/2. It said late yesterday it would take a one-time charge of $49 million in the fourth quarter.

Among some actively traded issues, Royal Industries was steady at 13 5/8, Joy Manufacturing finished the day down 1 3/8 to 43 7/8, and AT&T closed at 63 1/2, down 3/8.

World Auto Demand Seen Rising 3% to '85

BRUSSELS, Dec. 17 (AP-DJ).—Worldwide demand for new cars is likely to rise at an average annual rate of 3 per cent between 1976 and 1985, a study group by the Common Market Commission shows.

The report, released today, said the record level of car demand registered in 1973 will only by matched again in 1979-80. Between 1980-85, the annual growth rate in car demand will slow down again.

PEOPLE IN BUSINESS

John Mulroney

William Semmes

Rohm & Haas has announced the appointment of John Mulroney as director of European operations. He was formerly responsible for the company's interest in Europe in the agricultural chemicals sector. Mr. Mulroney replaces L. Wilson, who has returned to the United States.

* * *

William Semmes has been named vice-president Europe, the Middle East, and Africa of American Express's travellers cheque division. He was previously responsible for the division's activities in Latin America and the Far East. He succeeds Brian Baldock, who has left the company.

* * *

General Foods Corp. announced that James Tappan has been elected a corporate vice-president and named president of its European operations. He had been managing director of Procter & Gamble, Ltd. in Britain. He succeeds James Whitcomb, who is now president of General Foods' Latin American operations. He had previously headed the European operations.

* * *

Charles Johnson has been named as vice-president and treasurer of ITT Europe. He is replacing Edward Lynch who has retired. Mr. Johnson was formerly assistant treasurer for ITT Europe.

* * *

Union Carbide Europe has announced the appointment of Paul Hilton as vice-president for carbon products, metals and engineering products. He will replace Robert Kennedy who will become president of the Linde division in the United States.

Bank of England Aide, Six Others On Fraud Charge

LONDON, Dec. 17 (Reuters).—A senior Bank of England official and six other men were remanded today on charges alleging fraudulent foreign currency dealings.

John Wales, superintendent in the bank's exchange control department, was ordered to surrender his passport.

He was suspended from his job, where he had authority to sign letters replying to exchange control requests, on Sept. 10 following a five-month investigation by Treasury officials.

Mr. Wales, 41, and five others, were accused of conspiring between Aug. 1, 1975, and April 30, 1976, to obtain large sums of money from a bank by deception.

They were alleged to have falsely claimed that foreign currency they intended to sell was investment currency, the proceeds of the sale of foreign securities.

The five other accused were a company director, a commodity trader, two solicitors and an economist.

A solicitor's managing clerk was separately charged with forging a document on April 13 with intent to defraud.

Output Capacity Utilization Falls 2 Points in U.S.

WASHINGTON, Dec. 17 (Reuters). — Manufacturing capacity utilization fell 2 percentage points to 80 per cent in the third quarter ended Sept. 30, the first decline since the three months ended March, 1975, the Commerce Department reported today.

The decline was mainly attributable to a sharp drop in production of motor vehicles which was due in part to work stoppages within that industry.

Industries reporting decline in capacity utilization during the three months included petroleum, primary metals, paper and textiles.

Industries reporting increases in capacity utilization during the third quarter included rubber, which was rebounding from a lengthy strike, the food and beverage industry, and stone, clay and glass manufacturing.

The capacity utilization rate for large firms fell 3 per cent to 82 per cent during the quarter, medium sized companies reported a 1-per-cent decline in utilization to 78 per cent, although small sized companies reported their utilization unchanged at 75 per cent.

Currency Rates

December 17, 1976

By reading across this table of yesterday's closing inter-bank foreign exchange rates, one can find the value of the major currencies in the national currencies of each of the following financial centers. These rates do not take into account bank service charges.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. f—Declared or pid after stock dividend or split up. i—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Your castle in Spain

Selling one? Buying one? We've helped sell a few Spanish castles and German castles and French castles and a lot of other real estate as well.

Some of our readers buy castles, others buy more modest apartments. The thing they have in common is the fact that they can afford to buy and invest in real estate. And since they are international they can come to see it, and find time to live in it.

'International Real Estate' appears every Friday.

Contact our office in your country or write directly to:

Mr. Max FERRERO, I.H.T., 21 Rue de Berri, 75380 Paris Cedex 08.

BOOKS

THE AMERICAN POLICE STATE.

The Government Against the People

By David Wise. Random House. 437 pp. $12.95.

Reviewed by Anthony Marro

ANYONE who still thinks that Watergate or something very much like it wasn't bound to happen eventually would do well to look back to the day in July, 1971, when Robert Mardian, who was then an assistant attorney general, and John Dean, who was then counsel to the president, hopped a military jet to the West Coast. Both men were making hurried, last-minute trips, and both had pressing business to attend to.

Mardian, we now know, was flying to San Clemente to ask what to do with a suitcase filled with unjustified and probably illegal wiretaps—the product of White House-ordered surveillance on Kissinger aide Morton Halperin, Nixon speechwriter William Safire, and 15 others—that an FBI official had dumped in his lap. Dean, we now know, was on his way to San Clemente to try to head off what John Caulfield had said was an order from a presidential aide to fire-bomb the Brookings Institution, and then steal documents during the commotion that would ensue.

It was a minor event in a scheme of things; the author, in fact, relegates it to a footnote. But it nonetheless is a important one, both because it shows the mind-set of the Nixon White House a full year before Watergate, and because what should stand out as an example of executive lawlessness has become almost lost in the long, sorry checklist of buggings, break-ins, wiretaps, mail openings, surveillances, tax audits, harassments and crimes that were carried out in the name of national security. "Somehow," writes David Wise, "the vignette symbolized the Nixon era."

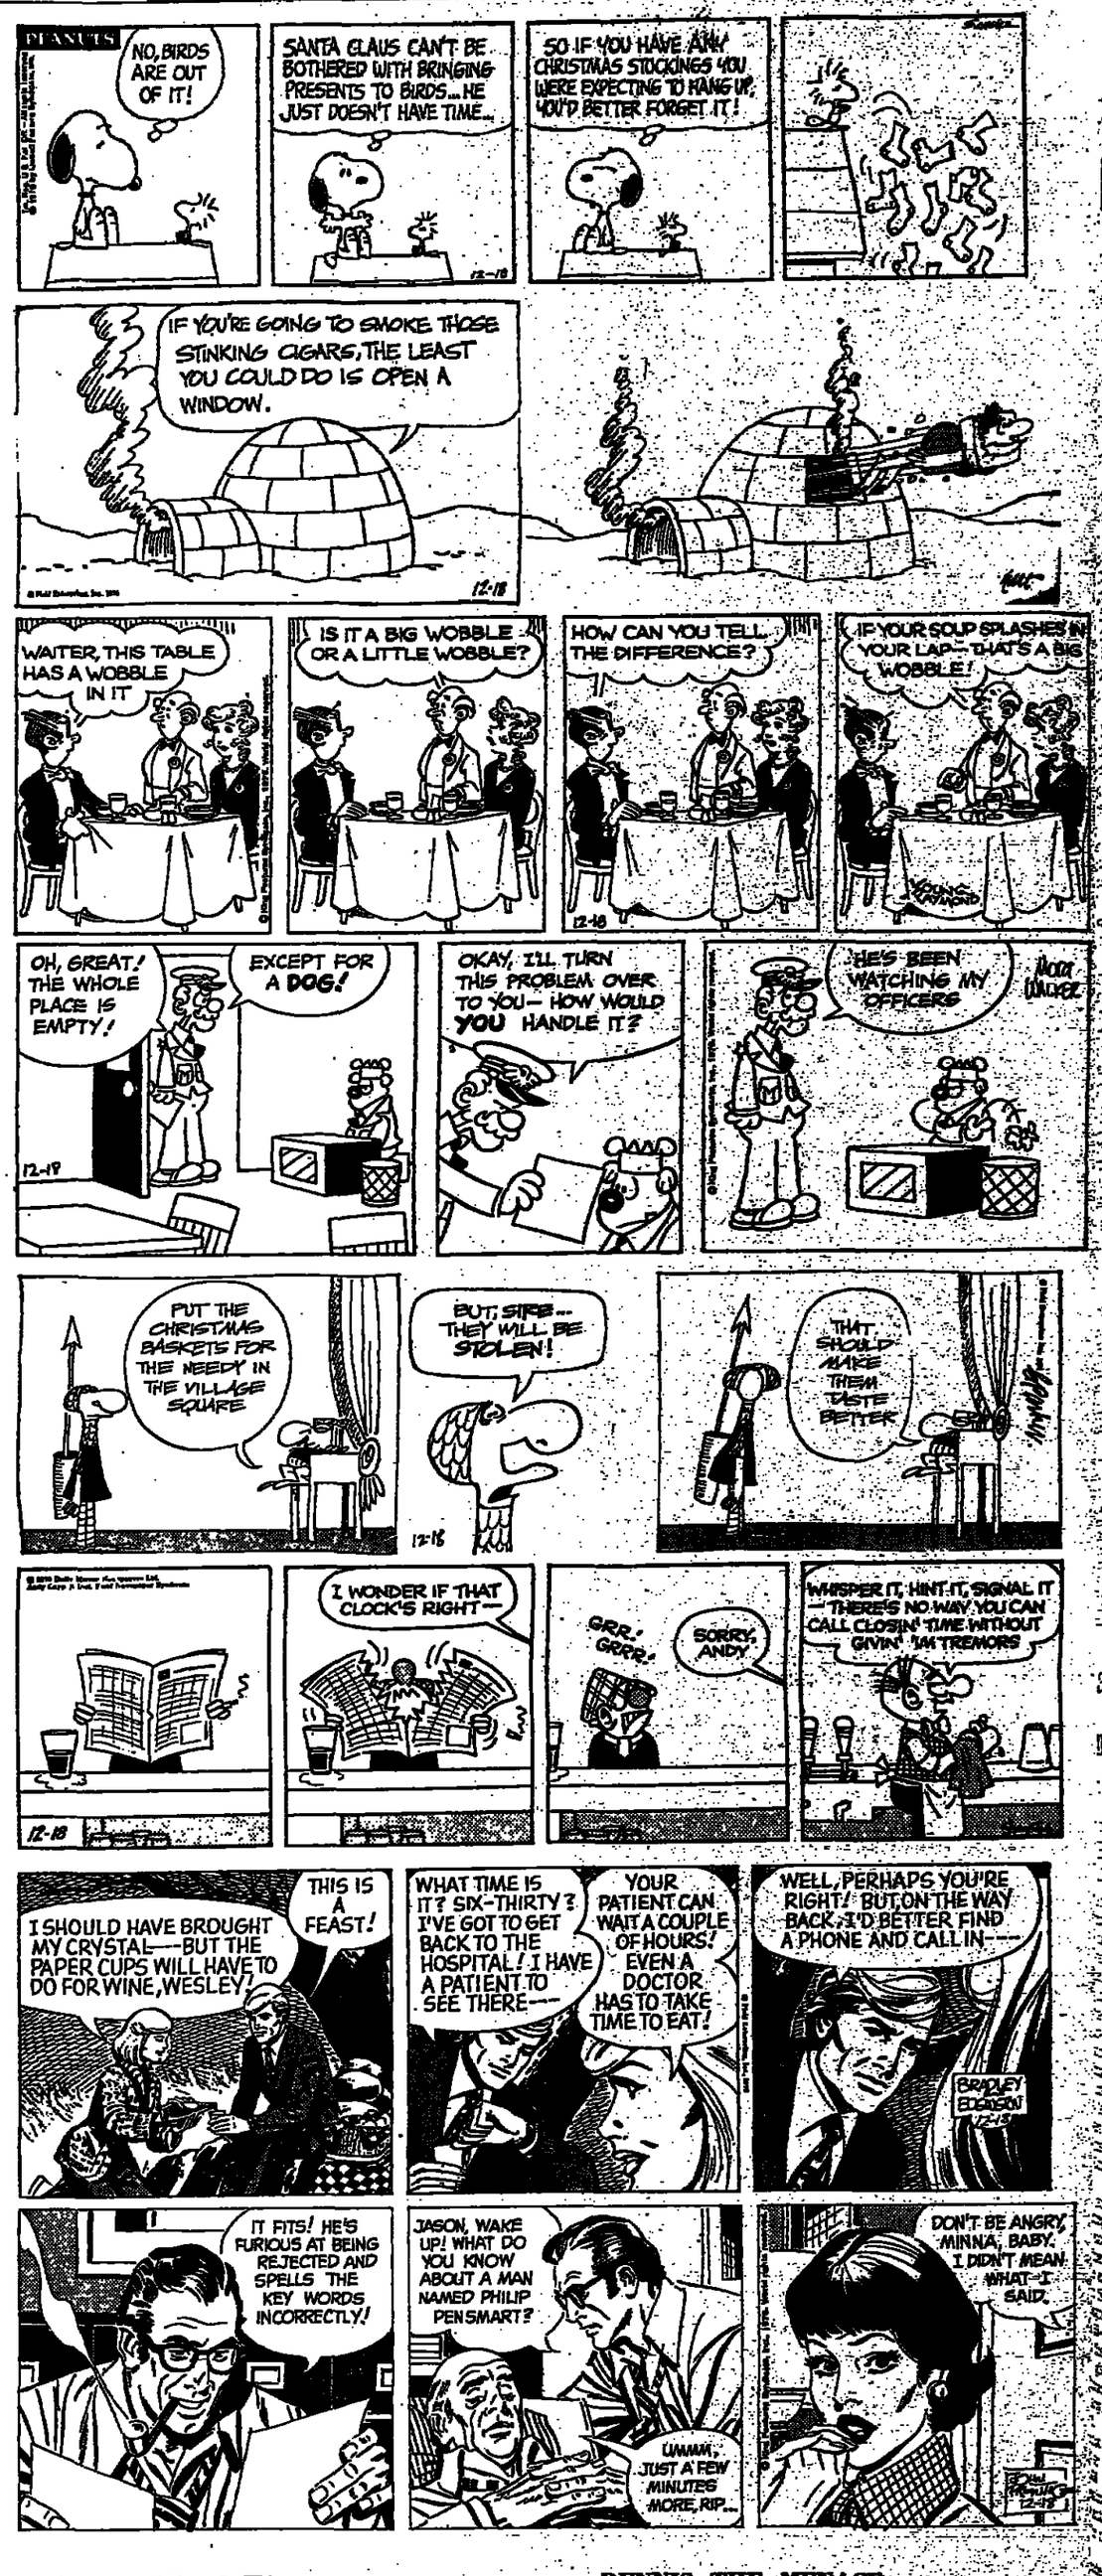
For a number of years now, Wise has been among the leading chroniclers in the United States of all the things the government has been doing that it shouldn't have been doing. He has detailed the massive spying abroad ("The Invisible Government" 1964), pervasive and needless lying at home ("The Politics of Lying" 1974), and now in "The American Police State," the lengths to which recent administrations have gone to suppress dissent, punish enemies, and use the police powers of the federal government to harass their critics.

If you think you've heard this before, you're right. Wise drew heavily from the reports and files of the Watergate and Impeachment inquiries, and also from the House and Senate intelligence probes. Much of the material is familiar, even shopworn, and there is little in this 437-page book that is likely to surprise or shock a nation already numbed by four years of disclosures.

But this is no mere recycling of the familiar. What Wise has done, with considerable skill, is to show in personal and human terms the impact of this lawlessness by the government, to point out the utter worthlessness of much of the spying, and to detail the casual—almost mindless—manner with which much of it was ordered and carried out.

So effective is Wise that by the time he has finished it is almost impossible to feel even a twinge of sympathy or concern for the Mitchells, Mardians, Ehrlichmans and Nixons and others who launched these activities—and who in the process so debased the term "national security" that it has become almost synonymous with criminality and coverup.

Wise, however, is remarkably even-handed and dispassionate in all this. He does not indulge himself in trashing the spear-carriers, and it is only when he gets to the people who he thinks should have known better that his outrage shows through. So where John Ragan, who tapped Joseph Kraft's phone for the White House, is pictured simply as a "professional who did not question the values of his profession," Henry Kissinger is depicted as a man who "fled a totalitarian system to enjoy the protections of constitutional democracy," and then had a hand in the wiretapping of people who thought they were his friends.



There are some who are likely to find fault with the book's title, and Wise himself feels the need to explain it. "Naturally, by Nazi or Soviet standards, America is not a police state," he writes. "But the dictionary definition does not require the extremes of a Gestapo or a KGB; it defines a police state as 'a government that seeks to intimidate and suppress political opposition by means of police, especially a secret national police organization.' The FBI and the CIA have done precisely that."

He is not totally convincing in this, and despite the documentation of massive illegal (or at least stupid and unwarranted) activities by those two agencies, an argument can be made that there was never a widespread climate of fear in the country; if anything, opposition to government policies grew at the time when government lawlessness was at its peak.

If there is a fault with Wise's book, it is that he relies so heavily on the work of congressional committees that he lets them set much of the focus, with the result that the book has some of the same blind-spots as did the investigations. Like the Church Committee, for example, he examines at great length the illegal bugs and taps against political dissenters, but ignores the fact that the FBI has been doing this same sort of thing for years against people suspected of ties to organized crime.

Like the Church Committee, to take another example, he concentrates so heavily on the FBI and CIA, that other organizations such as the IRS (which has long been used as a sort of blunt instrument of federal law enforcement) and the federal drug agencies (which used to keep half the carpenters in New York employed nailing back doors they had busted in) are merely given the once-over. But Wise has made his case without getting into these areas, and this is more a personal quibble than a serious complaint.

In World Cup

irst Downhill s Klammer's

VAL GARDENA, Italy, Dec. 17 (UPI).—Austria owed its supremacy in the men's first downhill es of the World Ski Cup season today by ing first place with Franz Klammer and secur- another 5 positions in the first 10.

Klammer, 22, the Olympic downhill gold- dalist and last year's World Cup downhill ner, was expected to place first. He thunder- down the 3,750-meter run dropping through meters in ideal track conditions but with reduced visibility, clocking 2 minutes, 3.83 nds.

ady's Herbert Plank, also 22 and last year's mpic downhill bronze-medalist, did well to time 4.61, even though it was more than a second ind Klammer in this tough race.

Norway's Eric Haker finished third in 2:05.27. o years ago he was second to Klammer in the orld Cup downhill race at Val Gardena and th overall in World Cup standings.

Only two Swiss placed among the top 10— ernhard Russi, fourth in 2:06.21, and Walter resch, sixth in 2:06.31. Fifth, seventh, eighth, nth and tenth places fell to Austrians.

Russi lost his balance as he k off on the final hump be- e the arrival but his impetus k him past the post. Wincing th pain, he did not use the ls as an excuse, admitting: was slower than Klammer at start and I don't think I ld have made it if I stayed my feet."

Klammer was in fact slower the first part of the course Plank. But he said: "I ght up by taking the runs y well later on. I am delight- at the result but I was ous before the race. You ays are with the first down- of the season. But now it ll be all right."

A possible challenge by the adians failed to materialize Dave Irwin placing 14th, Read 17th, Steve Podborski th, David Murray 29th and Hunter 34th.

The leading American was Karl derson, 24th, followed by David rrier, 28th, and Eric Wilson th.

Red Wings Shine as Coach Changes Role

DETROIT, Dec. 17 (UPI).—Alex Delvecchio, coach and general manager of the Red Wings, has reassumed an active role on the bench with the National Hockey League team, hoping to spark the erratic team into putting on a better show for the home fans.

Behind two goals by Walt McKechnie and a 30-footer by Michele Bergeron that put Detroit ahead for good, the Red Wings scored a season-high seven goals last night in defeating lowly Vancouver, 7-3.

"I'm going to stay behind the bench for the rest of this season," said Delvecchio, who used to assist assistant coach Billy Dea from the press box while Dea guided the team from the bench.

"Dea will now assist me," Delvecchio said.

The Red Wings looked terrible in losing 7-3 to Cleveland on Wednesday, a performance that sparked Delvecchio's decision to swap positions with Dea.

"It's inexcusable to come up so flat for a game that you know you must win," he said. "We have a responsibility to our fans to give them an all-out effort every time we go on the ice. We have good hockey fans in this town; they know when we're not giving it our best."

Detroit raced to a 3-1 lead in the opening period. The Canucks, last in the Smythe Division, came back to tie it 3-3, but at the 13-minute mark of the second period, Bergeron unleashed his blast to put Detroit ahead for good.

The victory left the Red Wings nine points behind third-place Pittsburgh, which beat Cleveland, 5-4, and two points ahead of idle Washington.

Other Detroit goals came from Dan Maloney, Mike Bloom, Dennis Polonich and Buster Harvey.

Chris Oddleifson, Jerry O'Flaherty and Don Lever scored for the Canucks.

Sabres 7, Rangers 2

At Buffalo, Rick Martin scored three goals in the second period and Gil Perreault added two goals as the Sabres embarrassed the New York Rangers, 7-2, for their third straight victory.

Perreault had a goal and an assist in sparking the Sabres to a 3-0 first-period lead. Martin backhanded a rebound on a power play to give the Sabres a 4-1 lead at 4:07 of the second period, then scored less than six minutes later to make it 5-1.

Penguins 5, Barons 4

At Pittsburgh, Pierre Larouche, playing his first full game since breaking a thumb Nov. 20, put a 25-foot wrist shot past Cleveland goaltender Gilles Meloche midway through the third period to break a tie and give the Penguins a 5-4 victory.

Pittsburgh's Jean Pronovost scored two goals and assisted on two others, giving him nine goals in his last eight games. The Penguins now have won five of their last seven, while the Barons had a three-game winning streak broken.

Bruins 5, Blues 2

At Boston, winger Terry O'Reilly scored two goals to spark the Bruins to a 5-2 victory over St. Louis.

O'Reilly, who had scored only one previous goal this season, scored in each of the second and third periods as the Bruins snapped a three-game losing streak and extended the Blues' winless streak to nine games (0-6-3).

John Bucyk, Gregg Sheppard and Rick Middleton netted the other Boston goals while Larry Petey scored his 10th and 11th goals for St. Louis.

Fleyrs 4, Black Hawks 1

At Philadelphia, a pair of goals by Rick MacLeish and Gary Dornhoefer 1:15 apart lifted the Flyers to a 4-1 victory over Chicago.

In Weekend NFL Playoff Games

Analyst Finds Steelers Are Strongest

By William N. Wallace

NEW YORK, Dec. 17 (NYT).—From a statistical standpoint, the Pittsburgh Steelers are the strongest of the eight teams in the National Football League playoffs, according to Bud Goode, the noted sports computer analyst. And he believes they will defeat the Baltimore Colts by more than the betting margin, 3 1/2 points, at Baltimore on Sunday.

Speaking from his base in Los Angeles, Goode said that his numbers also forecast an upset victory for the Rams over the Cowboys, who are favored by 3, and a clear-cut decision for Oakland over New England. As for Washington and Minnesota, his figures see that game as even.

"But I wouldn't bet a dime on any of these games," he said, "because they figure to be so close to the betting line." Oakland is favored by 7 points and Minnesota by 5 1/2.

The momentum generated by the Steelers in the second half of the season, in which they went undefeated, is graphically illustrated by a set of Goode statistics concerning the number of rushing plays per game, the difference between rushing plays run per game and rushing plays allowed by opponents, points scored and given up, yards gained per pass attempt and yards allowed per pass attempt.

It is in these areas that a team defines itself best, according to Goode. The number of rushing plays indicates ball control.

Improved Offenses

Goode notes how much Pittsburgh and Oakland improved their offenses in the second half of the season while the Baltimore and Dallas attacks grew weaker. The league average for rushing plays a game is 36, so the Steeler figure of 51.7 for the last seven games is, in Goode's view, "fantastic."

In the number of rushes, the Steelers were running 23.3 more rushing plays per game in the second half of the season than were their opponents. Goode says that the Dallas figure, 12.6 fewer rushing plays in the last seven games, is a telling one. A championship or Super Bowl team, notes Goode, usually runs 10 more rushing plays a game than its opponent, so the Steeler figure of 23.3 is, again, "fantastic."

A favorite Goode barometer is yards per pass attempt. The average for all teams is 5.4 yards gained and that for champion teams 6.5 or better. So Oakland's 8.1 in the last half of the season is complimentary and reflective of the ability of Ken Stabler and his receivers, Cliff Branch, Fred Biletnikoff and Dave Casper.

Here is how the American Conference and National Conference playoff games line up tomorrow and Sunday.

American Conference

New England (11-3-0) at Oakland (13-1-0).—Patriots handed Raiders their only defeat and it was resounding, 48-17, last Oct. 3 at Foxboro. "That doesn't mean a thing now," says Stabler, the Oakland quarterback. But it does, in terms of confidence for the Patriots, who are all neophytes in playoff action.

"New England on a given day can beat anybody," says O.J. Simpson, Sam Cunningham, the New England fullback, hurt his shoulder again and is questionable. But the Pats got along very well without him for four games as Don Calhoun filled in so ably.

Raiders have seven Pro Bowl players, the Patriots' four, including a rookie, Mike Haynes. He is important as a cornerback who makes interceptions and a punt returner who scores touchdowns. The playoff dictum is to stick with the old, pressure-proven quarterback such as Stabler, over the inconsistent second-year pro, Steve Grogan. Stabler in the past season completed 66.7 per cent of his passes, best figure in the NFL in 31 years. Choice: Oakland by 7 1/2 points. (Saturday.)

Pittsburgh (10-4-0) at Baltimore (11-3-0).—They met in the playoffs last season and the Steelers won easily, 28-10, as Franco Harris rushed for 148 yards. Although the Pittsburgh offense ran over people this past season, with Harris gaining 1,128 yards and Rocky Bleier 1,036, the key in this game will be the Steelers' pass defense. They love the double zone, as a cornerback and a safety take each wide receiver, which eliminates the deep pass. The three linebackers Jack Ham, Jack Lambert and Andy Russell, are so quick they cover the backs. Burt Jones, the Colt quarterback, and Lydell Mitchell, his halfback, must test those linebackers with the pass. Good luck.

Colts were second only to 49ers in rushing the passer, although they were getting fewer sacks per game near the end of the season. If the ends, John Dutton and Fred Cook could drop Terry Bradshaw a couple of times it would make a tremendous difference. They will have to pressure him to save a mediocre Baltimore defensive backfield. Choice: Pittsburgh by 3 1/2. (Sunday.)

Washington (10-4-0) at Minnesota (11-2-1).—Vikings say this is the best team they've had; they are really ready, etc., etc. They have seven Pro Bowl nominees, five on offense, to Washington's three. Furthermore, Viking statistics are better than Redskin, who scored the fewest points, 291, and gave up the most, 217, of any of the eight playoff teams. However, the Redskins have the great clutch quarterback in Bill Kilmer. But his offensive line is poor and this 37-year-old gentleman will have to be rolling out on every play as he did against Dallas to avoid the Viking rush.

In final game against Dallas, Kilmer had his fullback-halfback tandem of John Riggins and Mike Thomas working at last inside and outside. They will gain yards against Minnesota, but it looks like Fran Tarkenton and Chuck Foreman will gobble up twice as many for Minnesota. The good Redskin cornerbacks, Pat Fischer and Joe Lavender, are going to catch a lot of heat from Tarkenton's wide receivers, Sammie White and Ahmad Rashad. Choice: Minnesota by 6. (Saturday.)

Los Angeles (10-3-1) at Dallas (11-3-0).—Although Pat Haden, their No. 1 quarterback, can play, the Rams are expected to go with James Harris, who handled the heavy practice work. Harris was the starting quarterback in the conference championship game against Dallas a year ago, but was pulled after an interception. That fueled the quarterback controversy in Los Angeles. Cowboys won that time, 37-7, the largest margin in a playoff game in six years.

Tom Landry, the Dallas coach, is understandably worried about his offense, which has all but disappeared in the last month, and Roger Staubach. "Quarterbacks won't decide this game," says Tex Schramm, Cowboy president. The teams are just about even everyplace else. Choice: Dallas by 3. (Sunday.)

Minnesota Confident

BLOOMINGTON, Minn., Dec. 17 (WP).—There is a quiet, almost cocky feeling of confidence among the Minnesota Vikings. They are convinced that they finally have the tools to end years of playoff frustration by winning their first Super Bowl.

Tarkenton has called this the best Viking squad he has ever played on. And the Viking middle linebacker, Jeff Siemon, is forecasting victory against the Redskins tomorrow as long as Minnesota doesn't mess things up with untimely mistakes.

Siemon feels that the Vikings have more good players than the Redskins. "If we aren't done in by fumbles or interceptions or something stupid we should win," he said.

Reminded that his prediction certainly would appear on George Allen's bulletin board at Redskin Park, Siemon laughed.

Viking coach Bud Grant can't remember the last time he showed a particularly inflammatory clipping to his players—"I think it was from a Chicago paper, but I'm not sure what it said"—and he is not about to treat this game any differently.

Associated Press.

O. J. Simpson during 44-yard scoring run last Sunday.

Simpson Plans Another Year With Bills 'Electric Company'

BALTIMORE, Dec. 17 (UPI).—O.J. Simpson says he will be back in Buffalo next year unless owner Ralph Wilson trades him. And Simpson's offensive line, "The Electric Company," will be waiting to turn on the "juice."

"Once we saw the season was going to be one long struggle, we turned our goals to O.J. winning the AFC rushing title and maybe the league title," said guard Reggis McKenzie. "We feel we salvaged something."

Simpson gained 171 yards last Sunday in a 58-20 loss to Baltimore to win the NFL rushing crown for the fourth time in five years with 1,503 yards—113 more than Chicago's Walter Payton, who managed just 49 against Denver before leaving with an ankle injury.

"Until O.J., no backs got their linemen due credit for accomplishments," said McKenzie. "He was the first. Now everybody does it."

Simpson, 28, who didn't sign with the Bills until just before the regular season, sees a bright future for the club despite its 2-12 record.

"Despite what's happened, we have the guys up front, the guy who can turn a 2-12 season around. We have the nucleus to do the job," he said.

erez and McEnaney Traded y Cincinnati for 2 Pitchers

CINCINNATI, Dec. 17 (UPI).— n nervous," Tony Perez ex- ined after the announcement terday that he and left-handed ef pitcher Will McEnaney had n traded by the Cincinnati ds to the Montreal Expos for odie Fryman, a 36-year-old ft-handed starter, and Dale urray, a 26-year-old right-hand- relief pitcher.

"I'm happy and I'm sad," Perez d. Happy because he had just ned a multiyear contract with Expos which gives him the urity he had sought for him- f and his family. And sad be- se he is leaving the many ends—players and fans—he has ed since first signing with the ds as a Cuban teen-ager in 0.

Security," said the 34-year-old ez, explaining his primary rea- for not vetoing a trade which es him from a world cham- nship club and places him on am which finished last in the tional League's Eastern Divi- with a 55-107 won-lost rec- worst in the majors this year. Over Threat to Formula-1 Season

Grand Prix Body Offers Anti-Collision Pact

By Bernard Kirsch

PARIS, Dec. 17 (IHT).—The ruling body of the grand prix world tried today to establish rules of the road before there is a crash. But no one is sure if anybody will pay attention to the red and green lights of the Commission Sportive Internationale.

The CSI, acting more as a mediator than a governor, made a big noise at its annual reunion about the threat to the 1977 championship season. President Pierre Ugueux said that there must be one cop ruling traffic, and that all other power seekers must watch his signals. The Frenchman was referring to the constructors, well unionized and formed within the Formula-One Constructors Association, and the race organizers trying to gain recognition under the name of World Championship Racing.

Neither the WCR nor the constructors group like each other much; the constructors refuse to recognize the organizers' union. Both have made threats about banging bumpers until, finally, the CSI said it was going to put a stop to all the nonsense and decreed:

$15,000 Increase

There will be an increase, given by the organizers to the constructors, of at least $15,000 a race over last year. At the last automobile peace treaty, in Brussels in 1975, the constructors agreed to $285,000 for this year. That total now would become $300,000. The CSI said that the two groups will be given two weeks to agree to the new terms, or they will just have to go their own ways.

An American, Chris Pook, an organizer for the Formula-One race in Long Beach, Calif., said, "This whole thing is stupid." That was the only point agreed upon by most of the auto people here for the summit. One man, asking anonymity, said people here for the summit. One man, asking anonymity, said that it is fine that the money figures were reached by the CSI, but money had nothing to do with the problem. The difficulty, he said, is a clash of two organizations wishing to control the grand prix world. For the constructors there was Bernie Ecclestone, chief of the Brabham team, and Max Mosely. For the organizers there was Patrick Duffeler, who believes in the power of unity, ergo that the organizers will have a stronger say if they get together.

Only nine of the organizers have joined WCR, while the auto teams are fully united within the constructors group. Long Beach is among those going alone; it already has a separate contract with the constructors. It must be careful; it lost a tidy sum last year and must start preparations early.

"Auto racing is no longer the gentlemanly game it was once," Mosely said. He said that, to be realistic, the name of the game is money. He also said he is happy with the new arrangements of the CSI, although the group's original demands were closer to $350,000 a race from the organizers, and that "nobody should worry. There's going to be a racing season."

"Each year is the same; it's like pheasant shooting," he said.

Italians Leading Davis Cup Final

SANTIAGO, Dec. 17 (AP).—Italian Adriano Panatta and teammate Corrado Bertolucci beat their Chilean opponents today in the first two matches of the 1976 Davis Cup Tennis final.

Panatta defeated Patricio Cornejo, the No. 2 player on the Chilean team, 6-3, 6-1, 6-3.

Bertolucci beat Jaime Fillol, 7-5, 4-6, 7-5, 6-1.

A doubles match tomorrow and two more singles matches Sunday remain to be played. Italy will take the cup if it wins one more match.

Art Buchwald

A Letter to Santa

WASHINGTON—To: Mr. Santa Claus, North Pole.

From: Occupational Safety and Health Administration, Washington, D.C.

Subject: Violations of OSHA codes.

Dear Sir.

• Our inspectors have just completed a study of working conditions at your toy factory at the North Pole and find you in violation of Section C, Paragraph B of Regulation 1098, Article Seven, Division Four of Safety Factor 3-H and Rule 105, Registration No. 90.087, Appendix Three of Safety and Health Regulations (see items 54, 56, 69 in OSHA Code Book 361), in regard to manufacture of toys and other harmful objects.

Buchwald

• To be more specific, our inspectors have discovered that your wife, who helps you make toys, does not have her own sinks and shower, which must be 43 feet apart from each other with signs clearly marking what they are being used for.

• Our inspectors have also discovered that you were opening mail with scissors. OSHA Regulation 763 specifically says that all business mail must be opened by a mail opener nine inches long and no more than an inch and a half wide. You can get a waiver of this rule by filling out Form 987-A, but since it must be made at least 90 days before inspection it would not apply in your case, and you must pay a fine of $100 per 50 letters not opened in the manner as described in Code Book 19-B.

• I also regret to inform you that we have received a very negative report from Inspector X in regard to the space allotted to your reindeer. Under Section C of Article Four, each reindeer must be tethered in his own stall of 10 feet by eight feet covered with 1.6 feet of hay. In the case of Donner and Blitzen, their stalls were only nine feet long and our inspector measured 1.4 inches of hay in Donner's stall and 1.3 inches in Blitzen's stall in contravention of Reindeer Regulation 43.

You can appeal this charge by filling out OSHA Form 2356 in triplicate and posting it to our branch office in Anchorage. A hearing will be held at which time you will be given an opportunity to explain the shortage of hay in the stall. If the board finds you in error you can further appeal to our office in Seattle, but you may not have the use of Donner and Blitzen until a ruling in writing is handed down from the Seattle office and signed by our chief inspector in Los Angeles.

• It has been brought to our attention that on the evening of Dec. 24 you intend to deliver the toys manufactured in your plant by reindeer sled, climbing on roofs and houses and sliding down chimneys. Our safety coordinator advises me that if you indeed go ahead with this form of delivery you will commit several infractions that would subject you to fine and possible imprisonment. The first is that if you arrive on any roof with a clatter you will be violating our regulation regarding noise. Any clatter over 1.9 decibels cannot be permitted. (See Index Three, Page 14).

• The manner of entering and leaving a house by chimney is of utmost concern to us. You may descend a chimney providing you are not carrying any type of bag with you, and providing the inside of the chimney has steps one foot apart with a safety railing along the side. Once in the house you may not leave any packages that could be tripped over or broken. The packages must be neatly piled with 1.9 feet between them. Filling of stockings is permitted providing they have the strength to hang from the chimney of four pounds per stocking, or twice the weight of the articles to be deposited.

Our inspectors will be out on the night of Dec. 24, and any infractions of the rules will be dealt with severely.

We hope you accept this letter in the spirit it was written, and let me take this opportunity to wish you and Mrs. Claus a very Merry Christmas.

Sincerely yours, E. Scrooge, Director, Xmas OSHA.

When replying please refer to letter No. 135 A 0-190 Z.

Black Arts Festival

LAGOS, Dec. 17 (UPI).—Representatives of various African countries have arrived in Lagos to prepare for the second World Black and African Festival of Arts and Culture that opens Jan. 15. More than 40 countries, including many from outside Africa, are taking part.

Amiable Self-Confidence Of David Carradine

By Bernard Weinraub

MUNICH (NYT).—David Carradine sits barefoot on a sofa covered with movie scripts, gulping apple juice out of a bottle. He points to the poster, barely clinging to a wall, of "Bound for Glory," the film based on the autobiography of Woody Guthrie, the folk singer.

"Woody—that part was me," Carradine said. "I like him better than anyone I've ever played. I played him like me. He was so utterly human, so happy, always ready to get on with the next thing, uncompromising. He liked to ride trains and carry his guitar and he was restless and, well, that's me, that's me."

Although the two-and-a-half hour film seems vaguely ambivalent about the singer—painting, quite unconsciously, a less-than-heroic portrait of a man who neglected his children, cheated on his wife and piously battled radio advertisers who wanted him to mute his protest songs—the performance of David Carradine is striking and earnest. The 39-year-old actor, who gained international fame for his portrayal of the half-Chinese, half-American Buddhist priest in the television series "Kung Fu," is now mentioned as a strong contender for an Academy Award.

Carradine, who is in Munich filming Ingmar Bergman's "The Serpent's Egg," speaks with disarming assurance about himself. He makes it plain that the line between himself and Woody Guthrie is so blurred that he even sounds like Woody Guthrie, or at least like such Guthrie acolytes as Pete Seeger and Bob Dylan.

"I'll tell you," he says. "I've been down and out too. I've been down and out in New York, in Los Angeles, San Francisco, Berkeley and London. I've done a lot of things to make ends meet. I've sold baby pictures and sewing machines and encyclopedias and washed dishes and even mopped the floor of a drugstore on Fire Island one summer."

"I'm like Woody," Carradine said. "About eight years ago this producer, Harold Hecht, was going to make 'Bound for Glory,' based on Woody's autobiography, and my agent sent me to see him. Well, I took my old guitar and my dog and I went to see Harold Hecht in his palatial mansion in Stone Canyon. He didn't like me, and I didn't like him and that was the last I heard of it until recently, when an old girlfriend at a party told me they were casting the film again, and Hal Ashby was the director."

"Hal didn't want me at all," said Carradine, a fervent vegetarian who gulped an apple juice and yogurt mixture during an interview. "I was Kung Fu. I was over six feet tall, whereas Woody was very short, very fragile. I was supposed to play someone who's 25, and I'm 39. Hal didn't want me, but I went in and knocked him flat. He was just very impressed."

Asked, precisely, how he knocked Hal Ashby flat, Carradine replied, "I was just me."

Carradine's acting reputation, which has never been taken too seriously by movie critics, was cemented even further when Ingmar Bergman recently selected him to star opposite Liv Ullmann in "The Serpent's Egg," which deals with two people in Berlin in 1923—during the week of Hitler's attempted beer hall putsch in Munich—and their involvement with a Nazi medical experimenter. The film, Bergman's first outside Sweden, is being made under virtually military secrecy at the Bavaria Studios in Munich.

Initially, Richard Harris was set to play the lead in the film, a man named Abel Rosenberg, 35, Jewish, from Philadelphia, who goes to Berlin to work as a circus trapeze performer with his brother and wife. Later, after his brother's suicide, he becomes involved with his brother's wife, played by Miss Ullmann. Shortly before filming was to start, Harris became ill. Paul Kohner, the Hollywood agent, advised Bergman to see Carradine and arranged for a working print of "Bound for Glory" to be flown to Munich. Bergman promptly offered the role to Carradine and has since called the actor "a gift from heaven."

Ironically, Carradine was stunned at the offer but reluctant about taking the part because Bergman seemed, indeed, from another world, and the one film that he had made with an American actor, "The Touch," with Elliott Gould, was a failure. "I was enormously moved by some of his movies, but it never occurred to me I'd be making a film with Ingmar Bergman," said Carradine, seated in his cluttered hotel apartment in Munich's Schwabing area. "I decided to take the role, finally, without even reading the script. Bergman is wonderful. He's very affectionate and warm. And he's a genius."

Carradine, who speaks with uncanny and amiable self-confidence, terms himself an instinctive actor who takes a role and imprints his own personality upon it. "I just walk up and start acting," he said. "I'm not a mechanical actor. I'm just a natural. I can't do scenes in one take. I don't care much for the trappings, the mummery, and I make no production about the way I act."

The son of the actor John Carradine, David lives in Laurel Canyon, in Hollywood, with a girlfriend, and is the father of two children, a 14-year-old daughter and a 4-year-old son. Both children live with their mothers: Donna Becht, a dancer, who was married to Carradine, and Barbara Hershey, the actress, who is the mother of his son.

Carradine, who is also a singer and concert performer, has gained a reputation as a difficult and rebellious actor, and he doesn't deny it. "I'm difficult to get along with if someone doesn't know what they're doing," he said with a smile. "If someone is acting or directing or producing with sanity, I'm not difficult at all, I'm a pussycat."

There was a time, he adds, when Hollywood viewed him as far out. "I had long hair, I took psychedelic drugs, I walked around with bare feet. There was one point where I was offered every Charles Manson role going. But I simply will not do—will never do—films that are ideologically unacceptable. I won't play a mass murderer who becomes heroic, I won't play things where children are hurt. I like films with happy endings. I hate a movie that doesn't respect itself. These are corrupt movies and there are a hell of a lot of them around."

PEOPLE: Patricia Hearst Talks About Kidnappers on TV

Patricia Hearst

Patricia Hearst, 22, said Thursday on U.S. television that her kidnappers "got exactly what they deserved" when six of them were killed in a May, 1974, shootout with Los Angeles police. "I don't feel sorry for them at all," the newspaper heiress said in an interview, portions of which were shown on CBS evening news. The interview was taped at the San Simeon, Calif., castle built by her grandfather, newspaper tycoon William Randolph Hearst.

Miss Hearst said that she is still trying to understand how she got so "twisted around in my own head" that she never tried to escape from the Symbionese Liberation Army after she was kidnapped on Feb. 4, 1974. "It's crazy. It doesn't make any sense at all." However, she said that she owed her life to her ability to persuade her captors that she was a sincere SLA member. "If no one (had) believed it, I wouldn't be sitting here right now." She also said that the SLA succeeded in making her believe that her family didn't want her anymore, "and that, of course, isn't true."

She said that the SLA forced her to go on the San Francisco bank robbery for which she has been sentenced to seven years in jail. She is free on $1.25-million bail while attorneys appeal the sentence. On April 4 she will stand trial on charges stemming from the robbery of a sports store in the Los Angeles area. Ground rules for the TV interview included no discussion of the latter.

Asked about her family, Patricia Hearst said, "Oh, I love them. They've been so fantastic."

* * *

President Ford flipped a switch Thursday night and lit up the 53d national Christmas tree on the Ellipse, across the street from the White House. A crowd of about 10,000 looked on as 3,000 red balls and 57 yellow ornaments flashed on. The 57 represent the 50 states and seven U.S. territories. "The message of Christmas has not changed over the past 20 centuries," Ford said. "It is still peace on earth and goodwill toward men."

* * *

Movie industry sources are saying that Marlon Brando will get about $3 million for playing Superman's father in a movie to be made in England next year. The sum doesn't come as a surprise to Hollywood. Such actors as Warren Beatty in "Shampoo" and Jack Nicholson in "One Flew Over the Cuckoo's Nest" ma "considerably more" because th had contracts cutting them on a slice of the box off receipts.

* * *

The heir apparent to the Th throne, Crown Prince Vajiralon korn, 23, is engaged to Soms wali Kittiyakorn—they made official at a religious ceremo in Bangkok Friday. They be married Jan. 3.

* * *

"The Best," an internatio committee of 24, met for the fi time in Rome this week and sued a list of the world's b dressed. On the committ designers Irene Galitzine a Pierre Cardin, novelist Alber Moravia. On the lists: act George Hamilton and Rob Redford, French President Val Giscard d'Estaing, the Beg Aga Khan, Dewi Sukarno a Viscountess Jacqueline de Rib The two lists—10 men, 10 wom —were alphabetical. The sel tion, the committee said, designed to create "a new mo of elegance" in line with conte porary life.

Corvalan, in Moscow, Expresses Thanks

Bukovsky, in Zurich, Vows to Fight On

Associated Press.

AFTER EXCHANGE—Vladimir Bukovsky (left) is welcomed in Zurich by Levitin Krasnov, an exiled Soviet writer.

From Wire Dispatches

ZURICH, Dec. 19.—Soviet dissident Vladimir Bukovsky and Chilean Communist leader Luis Corvalan were freed from prisons in their homelands and flown to exile yesterday in an exchange mediated by the United States.

The trade took place at Zurich's Kloten Airport, where a special Aeroflot flight carrying Mr. Bukovsky and his family and a regular Lufthansa flight with Mr. Corvalan and his wife arrived within five minutes of each other.

The two planes parked about 500 yards apart on a runway about two-thirds of a mile from the terminal area. Reporters were kept away.

The Chilean, Soviet and U.S. ambassadors were present while Mr. Bukovsky and his party boarded three limousines that took them through Swiss customs. Airport police said the Corvalans got on the Aeroflot plane and took off for Moscow less than an hour after arriving here.

Wearing a brown fur hat and a gray topcoat, the 33-year-old Mr. Bukovsky later appeared at the terminal, where he told reporters in English, "I am happy but I am very tired." His face was pale and he appeared near exhaustion.

"I am not feeling well," he added when correspondents pressed him for interviews. At one point, he held up his wrists to point out marks left by handcuffs.

"Please leave him alone," his mother, in tears, pleaded. "He is tired and he is sick." She said he suffers from a rheumatic heart condition, a liver ailment and ulcers. Swiss sources said Mr. Bukovsky may go to a hospital for a thorough checkup.

Today, Mr. Bukovsky said his life in the West will be dedicated to fighting for human rights in the Soviet Union.

He told a news conference that he plans to visit Britain soon and then will accept an offer to study at Leiden University in the Netherlands.

"My future in the West will depend first of all on making use of all the possibilities to help the remaining political prisoners in Russia," Mr. Bukovsky said.

"I will put all my energy into this," he said, speaking Russian which was translated into English and German.

"There is no freedom of opinion or beliefs in the Soviet Union," he said.

Mr. Bukovsky said his movements in the next few days depend on the health of his bedridden nephew.

As soon as the 15-year-old boy can travel, he will take up the offer of British actor David Markham to stay for a while at Markham's home at Colesmans Hatch in Sussex.

"Then I would like to study at Leiden University," he said.

"This depends, however, on whether I can study in English, which is the only foreign language I can speak," Mr. Bukovsky said. "But I am deeply grateful for the offer from Leiden University, which reached me while I was in prison."

While the nephew is receiving medical treatment at a Zurich clinic, the family is staying at a hotel. Authorities will not disclose the name of the hotel.

"I have had a medical examination myself and was told that considering all the circumstances my condition is amazingly good," Mr. Bukovsky said.

"I am undernourished but the doctors say there will not be any permanent damage."

Mr. Bukovsky said he is suffering from extreme nervousness and

United Press International.

IN THE CABINET—Gov. Cecil Andrus with Jimmy Carter.

Carter Friend Environmentalist

Idaho Governor Chosen As Interior Secretary

By Edward Walsh

PLAINS, Ga., Dec. 19 (WP).—President-elect Jimmy Carter named Idaho Gov. Cecil Andrus, 45, secretary of the interior yesterday and defended his heavy reliance so far on established Washington figures in filling top administration jobs.

Mr. Carter also confirmed at a press conference here that he will seek consolidation of the federal government's energy functions in a single department. A leading contender for the combined department is James Schlesinger, the former secretary of defense and a former director of the CIA.

Asked why many of his appointees and rumored future selections have been associated with the policies of past administrations, Mr. Carter bristled.

"I thank you for that observation," he replied icily.

Pressed on the subject, Mr. Carter said he has "complete confidence in the attitudes and qualities of the people I have chosen" and that they, like himself, want to be judged on their performance.

Later, Mr. Carter met with Mr. Schlesinger and Theodore Sorensen, who was a White House aide to former President John Kennedy. Mr. Sorensen is under consideration to succeed George Bush as director of the CIA.

Mr. Carter also acknowledged that he is having difficulty finding women to serve in the Cabinet. He said that women who rise to the top of their professions earn "tremendous salaries" that would make government service a severe sacrifice.

Moreover, Mr. Carter said, "Quite often women have a much more difficult time telling other family members they are going to move to Washington." He said that several women he has considered for jobs have told him their husbands were not willing to move to Washington.

Asked whether he still expects to name a woman to the Cabinet, he said, "I can't answer that question specifically yet. I would guess that would be a very good guess."

Mr. Carter interviewed two women Friday for jobs in the administration. They were Joan Manley, a vice-president of Time, Inc., and potential secretary of commerce, and Juanita Kreps, vice-president of Duke University and possible secretary of labor.

In answer to another question, Mr. Carter said he wants "diversity in sources" of foreign intelligence information and that he has devoted considerable time to thinking about a reorganization of the intelligence community.

Undecided on CIA

Calling competition and diversity important for the quality of intelligence, Mr. Carter said that he has not decided whether the director of central intelligence should continue also to head the CIA.

During the press conference, Mr. Carter also said:

- He is considering whether to retain Clarence Kelly as FBI director and called U.S. District Court Judge Frank Johnson of Montgomery, Ala., "another person who I think would serve very well in that position." Mr. Carter said he will allow his choice as attorney general—a post for which Judge Johnson is also being considered—to select the

Carter Bars Move To Tie Saudi Aid, Mideast Policies

By Bernard Gwertzman

WASHINGTON, Dec. 19 (NYT).—President-elect Jimmy Carter said yesterday that he would not let Saudi Arabia's decision to hold down oil prices influence his administration's policies toward the Middle East and in other areas.

In a news conference at Plains, Ga., Mr. Carter again praised the Saudis for limiting their price rise to 5 per cent instead of the 15 per cent of other oil-producing states. But he seemed to reject the Saudi effort—announced on Friday—to link this restraint with the need for the United States to show progress in the Arab-Israeli negotiations and in the North-South economic conference.

Sheikh Ahmed Zaki Yamani, the Saudi oil chief, said Friday that, in return for his government's oil decision at the Qatar meeting of oil producers, "we expect the West to appreciate what we did and especially the United States."

This was expanded upon by Ali Alireza, the Saudi ambassador to Washington, who said in a statement:

"The one point which should be made just as strongly as the economic aspect is the positive need for all parties to get on now with achieving a just and durable settlement in the Middle East. That is the greatest achievable opportunity on the shared horizon of all of us in the period immediately ahead."

Effort to Persuade

These statements were interpreted in Washington as an explicit Saudi effort to persuade the United States to win concessions from Israel when the next round of negotiations occurs.

The Saudis have also indicated

- **Two-tiered OPEC pricing throws world oil business into chaos. Page 2.**

that they would take the lead in promoting moderation on the Arab side.

Translated, this seems to mean that the Saudis want the United States to persuade Israel to give up the territory it still occupies from the 1967 war and to allow a Palestinian state to be created on its borders. In return, the Arabs would respect Israel's right to exist. The Israelis have previously rejected proposals to give up all land and to allow a Palestinian state.

Mr. Carter said in his news conference that in his prior messages to Saudi Arabia urging restraint in oil prices, he and Cyrus Vance, the secretary of state-designate, had given "no insinuations" that "special consideration" would be given to Saudi views "or in Middle East political decisions because of their actions on the oil price levels."

"I don't believe an oil price decision should be a factor in ultimate decisions concerning the Middle East," Mr. Carter said.

Same as Ford Policy

This refusal to link publicly oil prices with negotiating progress has been the policy of the Ford administration and Mr. Carter seemed to be adopting it as well.

The State Department said Friday there was no linkage between the two. But State Department officials said privately that inevitably the Carter administration will have to take account of

(Continued on Page 2, Col. 5)

Iraq and Iran Call Saudis a Tool of West

OPEC's Rift Widens After Price Discord

From Wire Dispatches

DOHA, Qatar, Dec. 19.—An expected war of nerves between Saudi Arabia and other oil producers opened yesterday, immediately after their Organization of Petroleum Exporting Countries finished a meeting here with a split over oil prices.

On his return to Baghdad, Iraq's oil minister hinted that his country would back a campaign of sedition as well as propaganda against Saudi Arabia, which he accused of acting "in the service of imperialism and Zionism."

The minister, Tayeh Abdel-Kerim, said at Baghdad airport that his delegation here had "unmasked Saudi Arabia as a defeatist and compromising reactionary cell working inside and outside OPEC against the interests of its people and against the interests of the oil-producing and other developing states."

"We are confident," the Iraqi minister said, "that the Saudi plans will not succeed and that Saudi Arabia will be forced to follow the overwhelming majority of the OPEC states under the pressure of the liberated world and Arab public opinion and under the pressure of the liberation forces of our people in Saudi Arabia and the Arab homeland."

'The Oil Weapon'

He said that Saudi Arabia was trying to "render the oil weapon ineffective" and sought to make OPEC "succumb to pressures from the oil [firm] monopolies and imperialist forces by perpetuating a price freeze."

Saudi Arabia, the world's largest oil exporter, and the United Arab Emirates broke the OPEC's solidarity Friday by refusing to accept the two-stage, 15-per-cent price increase adopted by the 11 other oil-exporting nations at the OPEC meeting here. The two dissident members will raise the price of crude oil by 5 per cent.

In Tehran, Iran today accused the Saudi oil minister, Sheikh Ahmed Zaki Yamani, of serving the United States and disobeying the wishes of Saudi King Khaled in holding down his country's oil prices.

The government newspaper, Rastakhiz, said in an editorial: "The truth of Sheikh Yamani's action was that he was not obeying his monarch's wishes nor serving the poor nations but coordinating policy with the United States."

Iranian experts had said yes-

Early Elections a Possibility

Rabin Ousts Religious Party From Coalition

By William E. Farrell

JERUSALEM, Dec. 19 (NYT).—In what was considered by some to be a reprisal, Prime Minister Yitzhak Rabin today ousted the National Religious Party from his shaky coalition government and ended his tenuous majority control of the Israeli Knesset (parliament).

Mr. Rabin's move, which stunned politicians here, led to widespread predictions tonight that parliament would soon be dissolved and that elections—scheduled for next November—could be held early.

With the approval of his predominantly Labor party Cabinet, Mr. Rabin removed from office the three members of the National Religious party who held ministerial posts in his administration. They were Yosef Burg, minister of the interior; Zeyulun Hammer, minister of welfare, and Yitzhak Raphael, minister of religious affairs.

Mr. Rabin took the action less than a week after 9 of the 10 members of the National Religious party holding seats in the Knesset abstained on a vote of no-confidence that sought to topple his government.

The no-confidence motion was initiated by members of another religious bloc in the parliament, the United Torah Front. The furor concerned charges that Mr. Rabin had "desecrated" the Jewish sabbath by holding a welcoming ceremony late on the previous Friday afternoon for three U.S.-made F-15 jet fighters sent here in an arms deal.

A number of other parliamentary splinter groups—some of them vehemently opposed to the orthodox religious representatives in the Knesset—voted for the no-confidence motion for political reasons of their own.

Mr. Rabin weathered the motion by seven votes after a frantic day during which his supporters rounded up absentee members. All but one of the 10 National Religious party members of his ruling coalition government abstained.

In urging the expulsion of the National Religious party today, Mr. Rabin told his Cabinet that the government "could not compromise on its honor" even if the action meant increased difficulties in passing legislation in the 120-member Knesset.

The ouster of the religious bloc from the Labor party coalition meant that the number of Mr. Rabin's assured votes declined from 67 to 57, with 61 votes needed for a majority.

1962 Law

Mr. Rabin invoked for the first time a 1962 Israeli law permitting a prime minister to dismiss representatives of a coalition government from his Cabinet if they have voted against the government or abstained from voting in a test of confidence.

Mr. Rabin's government is faced with a decision on whether to try to retain power as a ruling minority government, seek a new political alignment or call for the dissolution of parliament and schedule early elections, possibly in May.

There were also suspicions that Mr. Rabin's move was a planned political one aimed at holding early elections because of a growing threat posed by Yigal Yadin, an archaeologist.

Mr. Yadin, who is gaining popularity, recently formed a new political party, the Democratic Movement for Change, that calls for a drastic revamping of the Israeli political system to make it more representative.

Being Organized

Early elections, in the view of some politicians, would tend to thwart Mr. Yadin's effort. The archaeologist's party is still being organized and formulating a platform.

The architect of Mr. Rabin's move, Minister of Justice Chaim Zadok, said that it was necessary in order to avert a precedent "of the government acquiescing to members of the government voting against it."

Menahem Begin, leader of the Likud party, the major opposition bloc, said he would seek a no-confidence motion against the Rabin government in the Knesset on Tuesday if the Prime Minister did not tender his resignation.

Madrid Hopes Pardon 'Plans' Will Save Kidnapped Aide

MADRID, Dec. 19 (UPI).—Hopes grew today that the leftist kidnappers of a high government official will release him in exchange for the prospect of a Christmas pardon for political prisoners.

The hopes—expressed by government sources and newspapers were founded on unexpected developments in the week-old case of Antonio Maria de Oriol y Urquijo, the president of Spain's Council of State. He is being held by urban guerrillas as a hostage for the release of the prisoners.

In a letter to a newspaper, the kidnappers announced yesterday that they have "canceled" Mr. Oriol's threatened execution because of indications that the government was considering a pardon.

They also produced a letter in Mr. Oriol's handwriting to prove that he was still alive. Mr. Oriol said that his "only serious worry is that my wife will not be able to endure the ordeal" because of her heart ailment.

The government immediately reacted with a statement saying that it has indeed been considering the freeing of an undetermined number of prisoners but could only act once the kidnapping had ended their "blackmail." Government sources said they hoped that the kidnappers will accept the government's hint and release their victim in exchange for the prospect of a pardon.

"We hope that reason will win out and that the announcement [of the pardon] can be made on Christmas Eve," the newspaper ABC said.

The newspaper El Pais said that a growing number of members of the Cabinet of Premier Adolfo Suarez believed that such a pardon should involve not just some, but all of the political prisoners that were not freed under a partial amnesty declared by King Juan Carlos in July. The number of remaining prisoners is estimated at nearly 200.

'Real Integration'

In yesterday's statement, Interior Minister Rodolfo Martin Villa said that the government—with the aim of "obtaining a real integration of all Spaniards" and of healing "old wounds"—has been preparing the "application of measures which could widen the possibility of unifying Spaniards."

In an apparent reference to the Basque region, from which most of the prisoners come, the minister said: "We are especially keen that this possibility work in that region of Spain in which there has been the biggest difficulty in applying the amnesty."

Officials sources said that efforts by the government to establish contact with the kidnappers have produced no result. The same was reported for two Madrid lawyers retained by the Oriol family. The lawyers went to Paris to seek contact with exiled Spanish leftist extremists.

The increased prospects for a solution of the Oriol case were reflected in an announcement late yesterday that Mr. Suarez will visit Barcelona tomorrow for talks with local politicians. The Premier had planned that trip for last week but put it off because of the kidnapping.

Soviet 'Killer' Satellite Test May Be a Warning to China

By Thomas O'Toole

WASHINGTON, Dec. 19 (WP).—The Soviet Union has launched and recovered two satellites that U.S. intelligence experts said are larger and newer versions of the "hunter-killer" satellites that the Russians have had under development for the last five years.

Some intelligence experts said they think the two satellites put into orbit and returned to earth Wednesday were warnings to China, which two weeks ago orbited a two-ton satellite called China-7.

This was the largest satellite the Chinese have put into orbit. It is believed to be the precursor of a Chinese reconnaissance satellite.

The "hunter-killer" satellite is the Pentagon's description of an unmanned spacecraft that is designed to destroy another country's satellite. The Pentagon believes the killer satellite can fire a beam of high-intensity laser light to burn holes in an orbiting satellite and disable it.

The two satellites launched by the Soviet Union were "piggy-backed into space by the same booster rocket and were brought out of earth orbit and back to the Soviet Union after circling the earth once.

What Cosmos 881 and 882 did in their brief flight is still a secret, but intelligence experts hinted that one served as the "target" vehicle while the other tracked it and took pictures of it.

The Soviet Union is believed to have conducted 16 experiments in the last nine years in which unmanned killer spacecraft followed target satellites into space, maneuvered close enough to inspect them and then blew themselves up. The Soviet Union stopped these experiments in 1971, but resumed them in February after the Chinese orbited China-5 and China-6.

Cosmos-881 and Cosmos-882 were put into a northeasterly orbit similar to the path taken by manned Soyuz spacecraft, tilted about 51 degrees to the earth's equator.

Some intelligence experts think this might mean that the Soviet Union has begun development of a manned version of the killer satellite.

Syrian Soldiers In Beirut Occupy 4 News Offices

BEIRUT, Dec. 19 (UPI).—Syrian paratroops today occupied the offices of the independent daily newspaper An Nahar, the French language L'Orient-Le Jour, United Press International and Newsweek.

"They told us we're not working tonight," one of An Nahar's editors said as soldiers carrying machine guns hustled him out of his office.

About 25 Syrian paratroops, apparently members of the Arab League peace-keeping force, tonight burst into the press cooperative building, which houses the news organizations.

"They told us they had information that someone wanted to place explosives in the building and we couldn't come back either today or tomorrow," François Akl, An Nahar's managing editor, said. He said the newspaper would not appear tomorrow. Syrian troops had already occupied four leftist Beirut publications, An Nahar and L'Orient-Le Jour, two of the Arab world's leading newspapers, are both considered independent and moderate.

Impetus to Peace Drive Seen

Sadat and Assad Meet on Talks With Israel

CAIRO, Dec. 19 (AP).—President Hafez al-Assad of Syria and Egyptian President Anwar Sadat began talks here today aimed at removing major obstacles to a peace conference with Israel.

The talks are expected to give impetus to the Arab peace drive begun by Mr. Sadat last month following Arab agreement on ending the civil war in Lebanon, Egyptian news media said.

Formerly opposed to new negotiations with Israel, Mr. Assad now has said that a peace conference should be convened in Geneva early next year to settle the 28-year conflict with the Jewish state.

Much of the diplomatic activity now going on in Arab capitals focuses on getting the Palestinian guerrillas into the peace talks. Mr. Assad postponed his trip to Cairo for a week, ostensibly because Mr. Sadat was suffering from a bad cold. Diplomatic sources, however, said the delay was meant to allow the Palestinians to hold their own consultations in Damascus.

Associated Press.

Presidents Assad and Sadat meeting Saturday in Cairo.

The meeting of the Central Council of the Palestine Liberation Organization on Tuesday appeared to end inconclusively. Guerrilla leader Yassir Arafat was reported in Damascus to have failed to get unanimous Palestinian support for the "negotiations track" with Israel and the council meeting was boycotted by radical groups.

But coincident with Mr. Assad's arrival here, the newspaper Al Ahram reported that the Palestinian council agreed to the following:

- Establishment of a Palestinian state on the occupied West Bank of the Jordan River and in the Gaza Strip.
- Establishment of a Palestinian government-in-exile.
- Palestinian attendance at the Geneva peace talks.

These points are to be endorsed by the Palestine National Council, a sort of parliament-in-exile, at a meeting in Cairo in February, Al Ahram said.

Mr. Assad, in an interview carried by the Egyptian state radio, said he believed the Arabs

Pledge Made at Party Congress

Vietnam Leaders Aim to Raise The Nation's Living Standards

By David A. Andelman

BANGKOK, Dec. 19 (NYT).—Gen. Vo Nguyen Giap, Vietnam's defense minister, yesterday told delegates at the fourth congress of the Vietnam Workers (Communist) party in Hanoi that the nation's leaders intend to emphasize human needs despite their far-reaching plans for the overall economic and political development of the country.

Gen. Giap made his pledge on the fifth day of the congress as the party apparently prepared to select its ruling Politburo and Central Committee.

During the morning session, a Hanoi radio commentator referred in passing to the election of the Politburo and Central Committee. The radio, which had been carrying "live" and complete coverage of the proceedings, did not return to the air for an afternoon session.

Western experts here, who have been monitoring the broadcasts, speculated that the balloting was taking place yesterday afternoon and said it was not known when the results might be announced.

The composition of the Politburo, which now consists of 11 men, and of the Central Committee is expected to provide significant indications of the future direction of the party and the nation.

Western specialists in Indochinese affairs here do not expect any significant additions or deletions from the Politburo, which has remained virtually unchanged for nearly a decade, but shifts on the much larger Central Committee could indicate whether Vietnam was trying to give more of a voice in national affairs to the south or to younger technocrats.

Living Standards

A key element in Vietnam's economic planning, which has been the centerpiece of this first party congress since 1960, has been a concern with improving living standards.

"We are starting from rag and ruin, but we are determined to obtain enough cloth to make us warm and finally wear beautiful clothing as people in an advanced society," Gen. Giap told the 1,008 delegates and observers from the Communist parties of nearly 30 countries.

Earlier presentations by the party's first secretary, Le Duan, and Premier Pham Van Dong emphasized large-scale development, the movement of populations, foreign trade and investment.

New Delhi Puts A 3d State Under Direct Control

NEW DELHI, Dec. 19 (Reuters).—The drought-stricken state of Orissa was placed under direct central-government rule last week after the resignation of its chief minister, 45-year-old Nandini Satpathy.

Mrs. Satpathy, once a close confidante of Prime Minister Indira Gandhi, quit after weeks of bitter feuding among factions of the eastern state's ruling Congress party.

Orissa, one of India's most backward areas, is the third state to be placed under presidential rule from New Delhi this year, after Tamil Nadu in January and Gujarat in March.

More than half of the state's 22 million inhabitants live below the poverty line.

Mrs. Satpathy's opponents attacked her for alleged political vindictiveness.

Mrs. Satpathy said in her letter of resignation she was anxious that there should be cohesion and businesslike government so that the state's drought victims could receive proper relief.

Exit Rate Rises For Soviet Jews

GENEVA, Dec. 19 (Reuters).—The Soviet Union has allowed about 13,750 Jews to emigrate through Vienna so far this year—about 500 more than the total for last year—according to a spokesman for an international resettlement organization based here.

The spokesman for the Intergovernmental Committee for European Migration said that about half the emigrants went to Israel and most of the others to the United States and Canada. He added that, at the present rate, this year's total was expected to go above 14,000.

This year's total would thus be lower than the 1974 tally of 16,913, and less than half the totals of 30,604 for 1973 and 31,176 in 1972.

13 U.S. Women Given Rhodes Scholarships

MIDDLETOWN, Conn., Dec. 19 (AP).—Thirteen women are among the 32 U.S. college students who have won Rhodes scholarships for study at Oxford University in England, the Rhodes Scholarship Trust announced today.

It was the first time since the scholarships were established in 1902 that women were eligible to compete for the awards. The U.S. students will join an international group of scholars from 16 other countries.

Soares, in Brazil, Asks Portuguese To Return Home

RIO DE JANEIRO, Dec. 19 (UPI).—Portuguese Premier Mario Soares today called on members of the Portuguese community in Rio de Janeiro to return to Portugal to help rebuild the country.

For the last two days Mr. Soares has been urging Portuguese doctors, engineers, businessmen and other highly trained persons to return to Portugal, where, he said, the revolution has quieted down and private enterprise will be protected under the Socialist administration.

At an airport news conference shortly after his arrival here from Sao Paulo, Mr. Soares said, "All Portuguese are welcomed home."

Earlier, noticing a certain hostility in a crowd of immigrants who told him how things were better in Portugal before the April 25, 1974, revolution, Mr. Soares said, "We will not go back to the same situation that existed on April 24, 1974. If any of you harbor such hopes, then let me warn you that we will not push the clock back.

"The Communists are under control ... The danger of a Communist dictatorship in Portugal does not exist. At the same time, I'll tell you that no right-wing dictatorship will be installed in Portugal. There will be no Pinochets in Portugal," he said.

U.S. Aided Russia On Crop Check

WASHINGTON, Dec. 19 (UPI).—The Soviet Union asked the United States to check the size of its wheat crop this year, and U.S. experts confirmed the probable record harvest in a satellite reconnaissance program, a White House official said last week.

The existence of the U.S. satellite program has been reported previously. It is operated on an experimental basis by government agencies, including the Agriculture Department, and produced estimates of this year's wheat crop in parts of the United States and in other major producing countries, including the Soviet Union.

The program uses two Landsat satellites which provide basic data for wheat production estimates by measuring the number of acres of wheat in pre-selected "indicator" regions. This information is then combined with per-acre-yield estimates, based largely on weather data, to produce production estimates.

President Nikolai Podgorny pins an Order of Lenin medal on Leonid Brezhnev.

Brezhnev Is Glorified on 70th Birthday

By Peter Osnos

MOSCOW, Dec. 19 (WP).—Soviet Communist party chief Leonid Brezhnev celebrated his 70th birthday today amid an outpouring of tributes to mark an occasion that has been turned into a remarkable display of personal glorification.

At a ceremony this morning, where Mr. Brezhnev was surrounded by Kremlin colleagues and Eastern European allies who had gathered to pay respect to a man with proven power over them all, he received the state's highest awards: a second gold star as a Hero of the Soviet Union, his fifth Order of Lenin and the right to bear personal arms, a sword embossed with a gold hammer and sickle.

The birthday has been promoted into an event the likes of which had been seen here only twice before in modern times: when Mr. Brezhnev's predecessors, Stalin and Nikita Khrushchev turned 70—and even the accolades for Khrushchev now look modest in comparison.

Beginning last spring when Mr. Brezhnev was named a marshal of the Soviet armed forces, he has been gathering awards and titles one after another. In the last few weeks he has received top state medals of all the Soviet-bloc countries, Cuba and North Korea. (Only Finland among non-Communist states has followed suit so far.)

Monumental Figure

Illustrated biographies and films extolling Mr. Brezhnev have been released—Khrushchev was never so enshrined—and throughout he is portrayed as a monumental figure surpassed only by Lenin himself as the bearer of Communist principles.

"For more than 12 years," said a 2,000-word message by the party and government leadership which set the tone for dozens published today, "all the main events in the life of our party and people, the successes of the Soviet Union's Leninist domestic and foreign policy have been associated with your fruitful activities."

The jubilee is a curious one because, although presented as being of the greatest importance, it has no real meaning or impact on ordinary Russians. It is not a holiday or the anniversary of an event such as the end of World War II in which all can rejoice. The whole purpose of the day is to show how important Mr. Brezhnev has become. And in that, it has been enormously successful.

OPEC's Two-Tiered Price System Puts World Oil Business in Chaos

By Steven Rattner

NEW YORK, Dec. 19 (NYT).—The international oil business has been thrown into chaos by the announcement by the Organization of Petroleum Exporting Countries of a two-tiered pricing system that is expected to cost the world an additional $10 billion annually for crude oil.

Economists and industry officials predicted that the lower price for oil by Saudi Arabia and the United Arab Emirates would create an enormous demand for their petroleum and sharply reduce purchases of oil produced by the 11 other OPEC members.

But despite Saudi Arabia's decision to expand production to full capacity, experts cautioned that the world's largest exporter of oil might still not be able to produce enough crude petroleum to force the 11 other countries to lower their prices.

OPEC's lack of unanimity and moderate stance, meanwhile, cheered business and government leaders, sending stock prices higher in most cities around the world and strengthening the dollar and the pound in currency markets.

"This is the first sign of open disagreement in the cartel," a Zurich banker commented. "It is a good pointer for the West."

Nonetheless, the new pricing scheme will cost the world about $10 billion a year more for oil, and probably result in slower economic growth, higher unemployment and higher inflation. The Organization for Economic Cooperation and Development projected that, if the full 10-percent increase were felt, world economic growth would be cut by one half percentage point and the cost of living would rise by up to 1 per cent.

The impact of the new prices, however, is likely to vary widely. In the United States, which imports about half of its oil—much of it from Saudi Arabia—the effect is expected to be very modest. Gasoline prices, for example, should rise by between 0.7 and 1.4 cents a gallon, the Exxon Corp. estimated.

But industry and government officials are more concerned about the imminent shifts in the structure of the oil business. To date, Saudi Arabia, as OPEC's wealthiest member, has absorbed the bulk of excess producing capacity, allowing other members more in need of revenue to earn more.

Although long-term arrangements are the general rule, oil companies are technically free to buy from any country they choose, and in Saudi Arabia's announcement that it will lift production ceilings is the hope that excess capacity will shift quickly to Iran, Kuwait, Iraq and the eight other countries, thereby forcing a price cut.

Spare Capacity

But a number of oil experts question whether Saudi Arabia is strong enough to unilaterally set prices.

Saudi Arabia, according to most estimates, could comfortably increase its oil shipments by about 2.5 million barrels a day and the United Arab Emirates, which have not yet said whether they would increase output, have about 300,000 barrels a day of spare capacity.

Distributed among the 11 other OPEC nations, that represents about 15 per cent of their production, so that with the addition of the 10-per-cent price hike, the average net revenue loss might be about 5 per cent.

"It will take at least a year or two for this to seriously affect those OPEC countries," maintained Walter Levy, an economic consultant. "The easiest way for them to cope with it will be to increase prices further. If they really stick together, their oil will be indispensable."

Instead of price cutting, Mr. Levy and other prominent economists expect that Saudi Arabian oil will gradually be bid up in price as it moves from the well to the consumer, until comparable grades of the lower and higher-priced oils reach the same price.

"You can't have the same commodity selling for two different prices," another industry official said. "As long as Iran and the other countries remain firm, the cheaper oil will be bid up."

This will mean a windfall profit of up to $2 billion annually for the companies permitted to buy the less expensive crude. Currently, the Arabian American Oil Co., whose four partners are Exxon; Texaco, Inc.; Mobil and the Standard Oil Company (California), own 40 per cent of Saudi production and are permitted to buy nearly all the rest.

"We will be forced to go to our non-Saudi suppliers and point out that they are going to lose business," said William King, a policy and analysis spokesman for the Gulf Oil Corp. "There's going to be a tremendous amount of negotiating between buyer and consumer to try to get the best price. This means a lot of unsteadiness in the marketplace."

Other industry sources contended that the impact on the 11 nations would not be universally moderate, but instead harsher on some. For example, an official said that most of Saudi Arabia's excess capacity is in grades of oil most similar to those produced by Iran, Kuwait and Venezuela.

Saudis Target Of Iraq, Iran

(Continued from Page 1)

terday that the Saudis' decision to undercut other OPEC members coincides with the opening of their gigantic oil export terminal at Ras Tannurah on the Gulf. Saudi Arabia now pumps 8.5 million barrels daily. Through the new line, Iranian experts claimed, Saudi Arabia could boost its exports up to 20 million barrels daily.

Saudi Arabia has said that it will increase its oil production to dilute the market effect of the 15-per-cent hike. Saudi oil presently accounts for 30 per cent of all OPEC output.

Sheikh Yamani has said that world economic conditions are too precarious to withstand a large oil-price rise.

Iraq and its 10 allies in the 16-year-old OPEC said they need a substantial price increase now to offset their purchasing power's erosion—caused by inflation in industrial countries supplying them with goods.

Carter Bars Influence Bid

(Continued from Page 1)

the moderate Arab position when it makes its policy decisions on the Middle East.

New appeals for an early Geneva conference on the Middle East have been made by Egypt and Syria, and the Israelis have endorsed the idea of a conference. Secretary of State Henry Kissinger has said he believes there is an unprecedented opportunity for progress toward a settlement in the Middle East, given the support of all sides for a negotiated settlement.

The Saudi decision to hold prices will have to be considered as one of the factors in deciding how much support the United States should give to the Arab views on the Middle East, an official said yesterday. "No administration will ever say: 'Yes, if oil prices are low, we will push the Israelis,'" he said. "But it will be on everyone's mind anyway."

In discussions with the Israelis, an argument made by Mr. Kissinger in the past was that, if they made concessions, it helped moderate elements in the Arab world who had risked the scorn of radicals by negotiating with Israel. Mr. Kissinger believed that Israel's security was enhanced more by a negotiated peace with moderates than by military arms alone.

Mr. Carter and Mr. Vance have avoided saying how they believe further progress should be made in Middle East negotiations although Mr. Vance has said that he believed the window was open now for a solution and that all parties should take advantage of the situation.

Colombia Identifies 3 In Lockheed Probe

BOGOTA, Dec. 19 (AP).—A military investigation has named two former air force generals and an ex-justice minister in its probe of allegations involving payoffs from the Lockheed Aircraft Corp.

The attorney general for the armed forces said Friday that the alleged payoffs were made about seven years ago to promote the sales of two Lockheed C-130 planes and spare parts to Colombia. He identified the three men as former Gen. Juan Ramon Calderon, former Gen. Federico Rincon and Samuel Hoyos Arango.

Military Regime Divided

Shouts of 'Viva Isabel' Heard As Argentina Grows Restless

By Joanne Omang

BUENOS AIRES, Dec. 19 (WP).—The chant was faint at first floating out of the soccer stadium, and it was hard to believe the words. Then, fans of the Boca team shouted it out: "Viva Boca, Isabel. Viva Boca, Isabel."

Nine months after the armed forces overthrew the government of President Isabel Peron, accusing it of incompetence, her name is once again being invoked by working-class Argentines angry over rising prices.

Referring to Mrs. Peron's former close adviser and social welfare minister, Jose Lopez Rega, the soccer crowd chanted, "With Isabel and the sorcerer, we used to live in luxury."

Argentina's harried military rulers have accepted this as an understandable protest against the belt-tightening they have imposed rather than as a real demand to have Mrs. Peron back. There is general agreement even among supporters of the late dictator Juan Peron that his widow's mismanagement was so total that her restoration to popular favor will be long in coming, if it comes at all.

Meanwhile, the armed forces are asking Argentines to do something they have never done: accept a period of austerity for the sake of the economy.

Peso Devalued

The peso was allowed to drop to its lowest point in eight months —365 to the dollar.

While the 9-million-member work force has been protesting through strikes, slowdowns and sabotage, the Argentine middle class is playing the familiar game of trying to widen divisions within the military ranks.

"I recognize the problem but I still don't have the solution," said President Jorge Videla in an interview with visiting U.S. journalists. "Our history ... shows a pendulum swing between weak political governments that give way to strong military governments, which become unpopular and generate weak civilian governments."

Regarding the alleged splits between the navy and air force on the one hand and the army on the other, Gen. Videla said, "We may speak of unity, but not uniformity," among the military and of "shades of opinion" normal among thoughtful people.

Most observers would regard that as understatement. Navy officials openly complain to friends that Gen. Videla lacks decisiveness, that things are moving too slowly, that problems fester while he seeks consensus on possible solutions.

Warning of Dialogue

In a speech Dec. 1, junta member Adm. Emilio Massera warned against those "who believe that dialogue is an end in itself ..."

Gen. Videla's main worries continue to be economic ones.

A group calling itself the "General Labor Confederation in Resistance" claims responsibility for the sabotage that is nibbling away at production levels.

Peronists who express contempt for the group still join it in attacking Economy Minister Jose Martinez de Hoz, saying he is driving the urban work force into poverty for the sake of fattening wealthy rural farmers. The rural-urban split is an old one in Argentina and Mr. Martinez de Hoz has staked everything on stimulating farm income.

Urban workers bear the brunt of rising food and other prices, which have more than doubled since the March coup. Purchasing power has dropped more than 40 per cent. An anxiously awaited general salary increase in September turned out to be only 12 per cent and was followed by strikes and slowdowns.

Mr. Martinez de Hoz, firmly backed by Gen. Videla, has maintained that the situation will improve next year if only everyone can be persuaded to endure things now.

Peron's Body Buried

BUENOS AIRES, Dec. 19 (AP).—The body of Juan Peron was finally buried today in a local cemetery, almost 2 1/2 years after his death.

The dark wood coffin, with his army general's cap and sword resting on top, was taken out of the presidential residence on the outskirts of the capital and transported to Chacarita Cemetery in an ambulance escorted by four automobiles filled with security agents.

The body of Peron had been resting in a special crypt within the grounds of the residence since his death from a heart attack in July, 1974.

Gen. Jorge Videla.

Bukovsky Arrives in Zurich Corvalan Goes On to Mosco

(Continued from Page 1)

accelerated heart activity and requires "complete rest."

The exchange was thought to be the first involving political prisoners in the history of East-West relations. Previous prisoner exchanges have involved captured spies.

The exchange was first proposed generally by Chile President Augusto Pinochet in September and refined by Andrei Sakharov, leader of the dissident Soviet human rights movement. It took more than a month of secret negotiations before Soviet approval was obtained, according to diplomatic sources in Moscow.

The United States acted as a go-between for Chile and the Soviet Union. The Soviet Union severed diplomatic relations with Chile after a military coup toppled President Salvador Allende in 1973.

Mr. Corvalan, 60, had been held since shortly after the coup. He was reportedly released Friday night from the Tres Alamos detention camp near Santiago. He was flown out of the Chilean capital with his wife, Lide.

Mr. Bukovsky, his mother, sister and the nephew boarded the Aeroflot plane at a Soviet military airfield north of Moscow. Mr. Bukovsky was brought to the field from a prison camp. A former university student and civil rights activist, he had been sentenced in 1972 to a seven-year prison term for "anti-Soviet activities."

He gained recognition in the West for pointing out the Soviet practice of confining apparently sane dissidents in mental hospitals. He himself was held in psychiatric clinics.

His nephew, Mikhail Ivanov, was operated on Thursday for a blood disease. Published reports said he was suffering from leukemia.

Mr. Markham, with whom Bukovsky would stay in Engl campaigned privately for the R release by trying to a him. Mr. Markham said Mr. kovsky did not know until arrival that he was being changed for Mr. Corvalan.

Corvalan Thanks Brezhnev

MOSCOW, Dec. 19 (AP).—Mr. Corvalan arrived in Mo last night and thanked So Communist party chief Le Brezhnev for helping to arra his release.

Tass said that "full hospital would be extended to the Chil Sources said Mr. Corvalan staying in a country house side Moscow with his wife two of his three daughters.

Chilean sources here said Mr. Corvalan was not expe to take part in today's celeb tion of Mr. Brezhnev's 70th bi day but that a large recep and motorcade was planned him tomorrow.

A late-night broadcast by Ra Moscow carried a message f Mr. Corvalan to Mr. Brezh It quoted him as saying:

"Having stepped on Soviet soil I address you from the bott of my heart to congratulate you on the occasion of your birthd to wish you good health and many years of life for the b of the great Soviet people and the cause of freedom and so progress."

Carter Picks Interior Aide

(Continued from Page 1)

FBI director, subject to his approval.

• He will not consider altering his pledge to grant a blanket pardon to Vietnam-war draft evaders despite calls not to grant such a pardon or to broaden it to include deserters.

• During a meeting with members of the Congressional Black Caucus here Thursday, he made no commitments to appoint a specific number of blacks to the administration. He said they did discuss having a special White House assistant for blacks.

Mr. Carter's announcement that Mr. Andrus, a Democrat, was his nominee for secretary of the interior, deeply satisfied one of his constituencies, the environmentalists. Mr. Andrus is widely regarded as a friend by environmentalists, who have a big stake in who runs the Interior Department, with its vast powers over wilderness areas, parks and natural resources.

"A very good man," said Brock Evans, director of the Sierra Club's Washington office, who added that most conservationist and environmentalist organizations would be pleased with Mr. Andrus.

A hearty, easy-going outdoorsman, Mr. Andrus was one of Mr. Carter's earliest supporters. He and the President-elect have been good friends since the early 1970s when both were members of the National Governors' Conference. Mr. Carter said yesterday that Mr. Andrus was the only person he had considered for the job.

His public record gives few hints as to how he would administer the department on the major oil and coal questions confronting it. Oil companies have traditionally looked to the Interior Department for protection in such areas as drilling and leasing rights. A major battle is shaping up next year over the companies' leasing of offshore drilling rights on the outer continental shelf off the U.S. East Coast.

His position on mining Western coal, another key issue, is unknown.

Sadat, Assad Hold Talks

(Continued from Page 1)

should go to Geneva as one delegation, including the Palestinians. This has been rejected by the PLO and Israel.

Mr. Assad and Mr. Sadat are expected to discuss how to nudge the Palestinians along and get Mr. Arafat to come out unequivocally for negotiations and the West Bank-Gaza Strip state. The Syrian President, whose 30,000 troops in Lebanon have neutralized the guerrillas, is in an excellent position to exert pressure.

PLO Rejects Talks

BEIRUT, Dec. 19 (AP).—The PLO refuses to attend the Geneva conference or to negotiate with Israel, Farouk Kaddoumi, head of the group's political department, said today.

In an interview with the Lebanese weekly magazine Monday Morning, Mr. Kaddoumi also dismissed speculation the next year would prove to be the year of peace in the Middle East.

"The chances of a war are greater than those of peace in the region," he said.

WHO Asks Reports On Gonorrhea Mutant

GENEVA, Dec. 19 (AP).—The World Health Organization has called on the health services of its 145 member countries to report any case of penicillin-resistant, mutant gonorrhea bacteria that appear to be spreading throughout the world.

The mutant organism, which in effect eats up the penicillin inside the body, was first discovered in the U.S. Center for Disease Control at Atlanta earlier this year and has since been reported from 10 other countries, WHO said.

Carter Discloses Blacks Refusing Government Job

WASHINGTON, Dec. 19 (NY —President-elect Jimmy Car disclosed last week that a num of prominent Americans, many them black, had declined hig level positions in his administ tion.

Persons close to several bla who have been mentioned government positions have s in recent days that their frie would take top economic or f eign policy jobs but that th saw no future for themselves the giant agencies that deal w social problems.

There seems to be some reser ment among many blacks to be solved in politics that Mr. Car apparently gave little consid tion to nominating a black to posts such as treasury secreta Some said that they were disturbed that Mr. Carter seem ed to be looking only at bla in highly visible positions and at those who were equally qua ified but less well known.

Mr. Carter made known names of three black Democ who, he said, had declared th selves unwilling to accept a jo the next administration. three were Mayor Coleman Yo of Detroit, Mayor Thomas Br ley of Los Angeles and Ver Jordan, executive director of National Urban League.

All were known to have b under consideration to be sec tary of housing and urban de opment.

Plea to Free Dissider Sent to Soviet Envoy

PARIS, Dec. 19 (UPI).—A p tion in which 150 authors fr 14 nations call for the release dissident Soviet author Edu Kuznetsov, who is serving a year sentence at forced labor, presented to the Soviet Embe here last week. But the deliver French Academician Pierre J mansel and West German aut Heinrich Böll, were unable to Ambassador Stepan Tcher nenko.

Mr. Kuznetsov was sentence death in 1970 for planning to the Soviet Union aboard a hija ed plane. Earlier, he had b jailed twice for possessing ban books. At the request of vari Western governments, his de sentence was changed to a year term at forced labor.

Thai Ex-Strongman To Prolong His Exile

BANGKOK, Dec. 19 (Reute —The former Thai milit strongman, Field Marshal P phas Charusathien, will not ret here from exile in Taiwan the time being, according to wife. Thai officials had said F day that Mr. Praphas was pected back today.

Mrs. Sawai Charusathien, arrived in Bangkok from Tai yesterday, said: "He will defini ly come back but not for the ti being." Marshal Praphas, former Premier Thanom Kitti chain, left the country after student-led demonstration agai them in October, 1973, in wh 72 persons were killed.

Business Report in U.S.

Worldwide Bribe Disclosures Termed Only 'Tip of Iceberg'

NEW YORK, Dec. 19 (NYT).—A study of "Questionable Corporate Payments Abroad" recently completed by Business International, a private firm, for its corporate clients provides a penetrating look into the shady side of worldwide business—bribery.

For example, although the Arab Boycott Office in Damascus denies it, a company can have its name removed from the list by a payment of $25,000 to $40,000—provided its contacts with Israel are not too visible, according to the study.

Based on confidential interviews with executives of 55 multinational companies in the United States, Canada and Western Europe, the study also discloses that:

• Officials of the state trading organizations of the Soviet Union and other Eastern European countries have received substantial payments from multinational corporations, placed in numbered Swiss bank accounts. In Italy the Communist party as a matter of course collects a percentage from commercial transactions between Italy and East European countries.

• In some countries, the ruling political party receives a major portion of its financing from payoffs by foreign construction companies.

• Other countries have an unwritten code stating which persons are "entitled" to receive irregular payments and setting out the proper amounts. If a "qualified" recipient requests too much, he risks a trip to jail.

• In parts of Latin America, the bribing of customs officials is so prevalent that companies routinely set up special accounts, called the "black box," to handle this expense. Funds for these accounts are obtained by overbilling various service agencies and consultants.

The Business International study shows that the pattern of corporate bribery and payoffs of foreign agents and officials is deeply imbedded. A similar conclusion is reached by another study—of U.S. corporate payoffs—that was released last week by the Council on Economic Priorities, a nonprofit research organization.

This report, based on information obtained by the Securities and Exchange Commission through its voluntary disclosure program, shows that in U.S. industry more than 175 companies have disclosed questionable payments of more than $300 million during the last six years.

These discoveries are only "the tip of the iceberg," according to Gordon Adams, a political scientist and author of the report.

"Since the SEC program is voluntary, no one knows how many companies have failed to conduct internal investigations or are concealing a large number of questionable payments," Mr. Adams said. He pointed out that the SEC has said that as much as $200 million in fees and commissions paid by the Lockheed Aircraft Corp. alone still need to be investigated, in addition to the $25 million in bribes the company has already admitted.

Ubiquitous Practice

The ubiquitous practice of payoffs is by no means confined to U.S. corporations, as the Business International study shows. The most important element by far in setting payment patterns is the attitude of the host country," its report said.

Apparently China, this report concluded, is the only developing nation where payoffs are unknown. At the other extreme is Gabon. Its President, Bernard Bongo, took $150,000 from Ashland Oil, Inc., in 1972, according to the company's disclosure statement.

Saudi Arabia and Kuwait emerge in the study as the two countries most tolerant of bribes. In Kuwait, the interviews disclosed, payoffs have been institutionalized by requiring that companies wanting to do business there hire local "agents," who often perform no services. In Saudi Arabia, apparently a 5 to 10-per-cent payment off the top is customary for everything from sales of aspirin to a contract for building a new port.

More informal persuasion is also common in the Middle East. A multinational corporation reported declaring a tax obligation there of $200,000, only to be told by the tax agent that it owed $500,000—unless the agent's bank account in Switzerland could be replenished by $50,000.

When the company's executive protested, the agent pointed out that a lengthy legal challenge to his ruling would cost the company $400,000, considerably more than his proposition. The company fought the case and in so doing it did spend $400,000.

The report noted that in Indonesia "very little happens, at almost any level, without some kind of payoff to someone." And in Mexico payoffs, even in amounts of more than $100,000, occur "with distressing and unsettling frequency" in spite of laws against bribery.

Customs officials in Latin America are so corrupt, executives said, that in one country organizations exist whose sole business is to sell fake invoices for goods or services. Companies buy them, enter them on their books and use the money to pay customs agents and other government employees.

In parts of Europe attitudes can be quite cynical. A company took a case to court when a tax agent demanded $5,000 on top of the company's tax bill of $30,000. The judge told the company's lawyer that the case was "ridiculous," saying: "I am a busy man. This is a busy court, with no time for such idiocies. Go take care of your tax man."

After the host country's attitude, the No. 2 determinant of questionable payment patterns is the nature of the industry involved, the studies indicate. According to the council report, bribery on a large scale is particularly common among companies dealing in drugs and health care, oil and gas, aerospace and chemicals. The Business International report adds the construction, communications, automobile and shipping industries to the list.

Associated Press.

AFTERMATH OF EXPLOSION—The Liberian tanker Sansinena lies in two pieces in Los Angeles Harbor following a blast and fire Friday that killed five persons. At least 50 were injured in the mishap, the cause of which was being investigated.

A Fundamentalist Preacher and Rightist Armies

California Arms Dumps Mystery Deepens

By Bill Richards

SAN BERNARDINO, Calif., Dec. 19 (WP).—A decade ago a gaunt, white-haired fundamentalist preacher named Wesley Swift roamed the desert towns here, preaching a doctrine of earthly fire and brimstone and preparing his followers for the Armageddon of a coming Communist take-over.

Mr. Swift eventually died in Tijuana, Mexico, and the Communists never arrived.

But a bizarre legacy is beginning to turn up as swarms of federal, state and local police work on what many of them call the strangest case encountered here in years.

Since two hikers accidentally stumbled on a box of .30-cal. machine-gun ammunition in the desert near here two weeks ago, police raiding squads have discovered nearly 20 tons of military supplies—from a half-track troop carrier to machine guns and rocket launchers to emergency supplies of food, clothing and even condoms—all carefully packed and inventoried in a series of backyard bunkers and desert hideaways.

Largest Illegal Cache

The discoveries comprise what investigators believe is the largest store of illegally hidden arms ever found in this country: enough guns, explosives and ammunition to equip several hundred troops, worth $100,000, according to Los Angeles County Sheriff Peter Pitchess.

Mr. Pitchess's department is coordinating the search efforts of more than a half dozen law enforcement agencies. Last week, after his raiders found 8 tons of arms in two separate locations, he suggested to reporters that the culprit might be "a paramilitary organization ...a group who hoped to overthrow our form of government."

Now authorities are not so sure what they have found. Of the five suspects they have arrested on illegal weapons charges, one has dropped dead—only moments after investigators led him out of a bar where they picked him up—and the rest have not offered much of a convincing story.

"I've been in police work a long time and seen just about everything," said a puzzled lieutenant "but this thing is absolutely mind-bogging."

The police investigating the case concede it is probably Mr. Swift—were he alive—who could provide the information on where the weapons came from and what they were to be used for.

He died in 1970, nearly blind, enfeebled by illness and old age. But not before he organized a network of paramilitary groups in the 1960s around the desert towns east of Los Angeles.

A former state attorney general's office investigator last week recalled Mr. Swift and described him as "extremely emotional."

"He could move people against Communists, Jews, blacks or anything else he wanted to," said Eugene Price, now retired, who kept track of Mr. Swift's activities during the mid-1960s.

"I don't think he ever had more than 100 hard-core followers but he would travel through the churches around Los Angeles preaching anti-Communism, and he was absolutely dedicated," Mr. Price said.

A 1965 intelligence report Mr. Price helped write described the California Rangers, which Mr. Swift organized here, as "a secret guerrilla warfare unit."

Groups Disappeared

Mr. Swift, once a rifle instructor for the Ku Klux Klan, was a prolific organizer, the police said, putting together such groups as the California League Against Communism, the Anglo-Saxon Christian Congregation and the Christian Defense League.

Most of the groups, including the California Rangers, have disappeared. State intelligence sources said they believe the groups folded after Mr. Swift died.

No one, including the police, is believed to know whether Mr. Swift was responsible for the weapons caches. But the police have turned for some answers to Donald Wiggins, 41, the owner of a foundry supply business who was the first suspect arrested in the case. Mr. Wiggins's family has linked him to Mr. Swift in the 1960s.

After the discovery of the first store of weapons, in a series of desert bunkers near the town of Lancaster, investigators traced the ownership of the land to Mr. Wiggins. When they searched his home and business they found tons of arms and equipment, all painstakingly packed away in 30-gallon drums and meticulously inventoried.

All-Points Bulletin

Mr. Wiggins, now charged with 20 counts of possession of explosives and illegal firearms, said he was just the caretaker for the arms and said they came from a mysterious man named "Jeff Martin."

Mr. Wiggins also gave authorities the name of "William Weaver," whom he said he met at a meeting in the 1960s and who was the original owner of the Lancaster land. He said both Martin and Weaver disappeared in 1974.

The police said they believed that Weaver never existed and they have their doubts about Martin as well, although an all-points bulletin has been put out for Martin.

Mr. Wiggins's mother, Edna Methe, said last week that Mr. Wiggins had attended one of Mr. Swift's gatherings in the mid-1960s. But Mr. Wiggins has stopped talking and authorities do not know whether the meeting was where he supposedly met Weaver and Martin.

Edna Methe, 64, her husband, Arthur Methe sr., and Arthur Methe jr.—Mr. Wiggins's stepfather and 20-year-old half-brother—were arrested Wednesday on illegal weapons charges. The elder Methe, 55, collapsed and died of a heart attack after he was seized at a bar.

Authorities now believe that what they may have on their hands are the remnants of a once active rightist army. Mr. Wiggins, a federal investigator said, may indeed have been a caretaker, entrusted with an arsenal for an army that no longer exists.

Historian Disputes Moynihan Theory

Book Says U.S. Slaves Kept Family Unit

By Hollie I. West

WILLIAMSBURG, Va., Dec. 19 (WP).—Two months after its publication, "The Black Family in Slavery and Freedom, 1750-1925," by Herbert Gutman, is being hailed as the book that will force a rethinking of the slave experience and its meaning to contemporary Afro-American families.

The book's thesis is that two-parent families were the rule in slave society and that a stable family pattern continued among freedmen after Emancipation.

Nine years in the making, the book is an example of the historian as painstaking detective, sifting clues, exploring uncharted territory and drawing fresh conclusions from old evidence.

John Franklin, professor of history at the University of Chicago and an authority on black American history, wrote: "In this extraordinary work, Herbert Gutman has successfully challenged the traditional view that slavery virtually destroyed the Afro-American family."

And Prof. George Frederickson, writing in The New York Review of Books, said: "Gutman's discoveries enable him to challenge explicitly some of the central assumptions of previous scholarship on Afro-American slavery."

Moynihan Theory

The book confronts head on the controversial thesis of Sen.-elect Daniel Moynihan, D-N.Y., that a deterioration in the black American family could be traced to slavery. Mr. Moynihan wrote in a 1965 study for the Labor Department that white America had broken the will of Afro-Americans by destroying the black family.

Mr. Moynihan's critics responded that unemployment, poor education and racism were causing the breakup of the black family—not the effects of slavery a century after Emancipation.

So Mr. Gutman, on leave from his post as professor of history at the City University of New York, finds his book in the thick of what some say is the demolition of the Moynihan thesis.

Mr. Gutman, 48, said in his office at William and Mary College, where he is a visiting professor of history, "This book tells very little about recent history. But it does make it clear that the explanations that were so common and so prevalent in the popular mind and the academic world were unbelievable."

Mr. Gutman, author of four other books, prepared this one with research in the National Archives, university libraries and out-of-the-way county offices for census records, birth registers and marriage documents that had gathered dust for generations.

A Case Study

The search started in Buffalo, N.Y., in 1967, when the Moynihan controversy was at its height and Mr. Gutman was teaching at the University of Rochester. He and a graduate student, Laurence Glasco, deciding to make a case study, examined records of the Buffalo black community for the period from 1850 to 1920 and found that between 82 and 92 per cent of the Afro-American households were headed by two parents then.

Several scholars told Mr. Gutman that they would like to see more results of such research.

Mr. Gutman recalled: "I had no slave material, so I had to expand. I started looking through Freedmen's Bureau records and I found the remarriage records for Mississippi. These were wartime remarriages—slaves married by Union chaplains during and after the war.

"I came across the records of 5,000 marriages. That's 10,000 slaves. And many of these people were remarrying. In any case, they answered questions about their previous history—their mothers, fathers, even the skin color of their parents.

"I read all the freedmen's magazines. I think it was in the Freedmen's Record, a missionary magazine, that I read a letter from a woman to her home office, telling about how people were coming in and buying marriage tickets. This was 1866. Couples paid a quarter for what was called a 'Negro cohabitation certificate.' Marriage was considered too dignified a term."

Dulles Family Holdings

Mr. Gutman looked over a marriage registration book for 16 counties in North Carolina. He then studied the birth register for the Good Hope Plantation—owned by the ancestors of the late John Foster and Allen Dulles, near Orangeburg, S.C.—and this document showed blood relationships between slaves for a period of almost 100 years.

Mr. Gutman also studied the history of the John C. Cohoon jr. plantation in Nansemond County, Virginia, an estate where there was black family breakup and separation. Still, family structure grew and stayed alive and cultural patterns formed there, he said.

That and other cases, he said, helped to discredit the idea that slave behavior and culture were predetermined by the kind of treatment the slaves received from whites.

How did he reach these new findings? Why didn't other scholars uncover them? Mr. Gutman said he studied documents that had been available to other scholars but not used fully.

"The right questions hadn't been asked," he said. "The question that has dominated Afro-American history is, what did slavery do to black people? Framing the question that way assumes the disposition of the answer. It's not what slavery did to black people but what did Afro-Americans do as slaves?"

Slaves, Mr. Gutman wrote, developed their own cultural patterns, often independent of their masters. Slave parents named their children for forebears, showing an awareness of bloodlines and kinships that went unnoticed by whites. Slaves wrote anguished letters, or had correspondence written for them, inquiring about family members and kin left behind after being sold from the upper to the lower South, thus demonstrating a family consciousness. Slave women, Mr. Gutman wrote, frequently bore children to one or more fathers before settling down into long marriages. His conclusion was that no stigma was attached to children born out of wedlock but marriage was marked by strong fidelity.

Explosion Hurts 32

SIERRE, Switzerland, Dec. 19 (Reuters).—Thirty-two singers in a village choir suffered burns and cuts last week when a gas explosion wrecked a hall where they were practicing Christmas carols, police said.

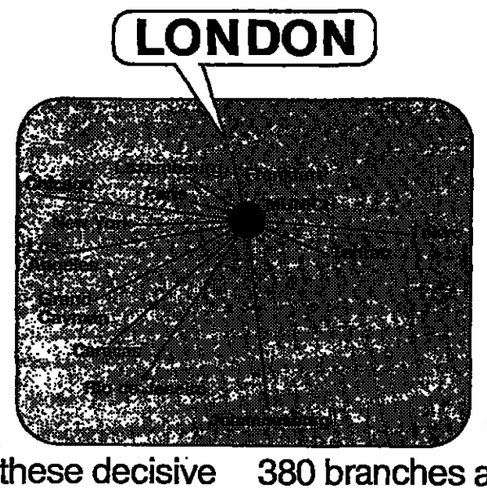
Ottawa Proposes Guidelines for Sales Agent Fees

OTTAWA, Dec. 19 (Reuters).—The Canadian government has proposed guidelines on the payment of sales commissions following an official report that an unknown agent received $2.4 million from a government body.

The payment, by the Atomic Energy Company of Canada, Ltd., was to promote the sale of a nuclear reactor to Argentina. It is being investigated by police.



The guidelines were announced in Parliament last week. They were criticized by the opposition as unenforceable.

The guidelines ban bribes and improper payments and lay down rules for state agencies in the hiring of sales agents to promote the sell products abroad.

The $2.4-million commission was disclosed in a report by the auditor general earlier this year. The Canadian firm was in partnership with Italimpianti of Genoa in the reactor deal.

The Italian company asked for the money as the Canadian firm's share of the fee for the agent whose identity was never disclosed, according to the Canadian firm.

There are more foreign banks in LONDON than in New York, Paris, Frankfurt, Tokyo...

Bayerische Vereinsbank, one of Germany's major banks, is active in all of these decisive financial centres. And in Luxembourg, Caracas, Chicago, Grand Cayman, Johannesburg, Los Angeles, Rio de Janeiro and Tehran.

Headquartered in Munich, Bayerische Vereinsbank has 380 branches and consolidated assets amounting to DM 55 billion.

Major Shift in Attitude

Carter Latin American Policy Indicated by Panel's Report

By David Binder

WASHINGTON, Dec. 19 (NYT). —A high-level private commission has prepared a policy blueprint urging that the administration of President-elect Jimmy Carter break new ground in relations with Latin America.

The report by the Commission on U.S.-Latin American Relations includes recommendations for early completion of a new Panama Canal treaty, a new diplomatic dialogue with Cuba, a stronger emphasis on human-rights issues, restriction of arms sales and an economic policy geared principally to the needs of the poor.

The presence on the commission of seven persons closely associated with Mr. Carter gives the report considerable weight in terms of the direction and priorities of the next administration's Latin American policy, officials of the Ford administration and supporters of Mr. Carter said.

The report states: "Most issues in U.S.-Latin American relations can be resolved only in a global context."

Global Implications

Members of the Carter camp said the commission report was probably the first indication of the way the new administration would address foreign policy problems and added that the positions taken on human rights and economic issues would undoubtedly have implications for administration policy in other parts of the world.

If the recommendations were accepted, it would be a sharp change from the principles of the Monroe Doctrine; it favors treating Latin America in the context of global issues rather than as a region with a special relationship to the United States. The Monroe Doctrine, proclaimed in 1823 by President James Monroe, said the United States would resist European efforts to dominate or colonize Latin American countries.

The report, which says that all of its recommendations were not approved unanimously, makes it clear at the outset that the most important point is for the United Sates to "pledge its full respect for the sovereignty" of each country and to make a commitment not to intervene militarily or by covert means.

No Longer Vital

On Panama, the report says the canal is no longer of vital strategic interest to the United States but that good relations with Latin America depend on swift conclusion of a treaty giving Panama eventual sovereignty over the waterway.

It says the new administration should promptly negotiate a pact replacing the 1903 Panama Canal Treaty under which the United States runs the canal and the 533-square-mile Canal Zone.

On human rights, the report says the Ford administration, while vigorous in dealing with humanitarian problems in the hemisphere, was still laggard with regard to *Chile* and *Brazil* in particular. It recommends that limits be placed on arms sales to Latin American countries found to have abused human rights. Economic aid to such countries should be limited to assistance to the needy, the report said.

On Cuba, the report notes a continuing hostility between Havana and Washington but "reaffirms its judgment that the basic interests of both the United States and Cuba would be well served by moving to end their long estrangement."

Anti-Terrorist Policy

It says Mr. Carter should pave the way for normalizing relations with Cuba by declaring an anti-terrorist policy to deal with elements in this country opposed to Premier Fidel Castro and by lifting the 16-year-old U.S. embargo.

In return, it recommends that Cuba release political prisoners, order its 15,000 troops in Angola not to intervene "anywhere," and respect the political sanctity of Puerto Rico.

On transfers of arms, the commission notes that the United States remains the largest supplier of weapons to Latin America and urges this country not to compete with other suppliers. It recommends new limitations on arms in the hemisphere as well as new restraints on the spread of nuclear weapons-making capabilities.

Kissinger Rated Highly by Poll

NEW YORK, Dec. 19 (AP).— A majority of persons interviewed approved of the way Secretary of State Henry Kissinger handled his job, the Harris survey said.

Mr. Kissinger got a positive rating from 58 per cent of 1,330 adults interviewed last month, a negative rating from 33 per cent, and 9 per cent declared themselves unsure, the research organization said.

But on the question of whether Mr. Kissinger would be missed or that it is time for a change, 36 per cent thought his departure a loss, 50 per cent said it was time for change an:: 14 per cent said they were not sure. The poll said Mr. Kissinger was one of the few public officials surveyed in recent years who never received less than majority support.

Washington Post/Douglas Chevalier.

S. Koreans Said to Offer Deal To U.S. to Ease Bribe Scandal

By Richard Halloran

WASHINGTON, Dec. 19 (NYT). —The South Korean government has begun negotiations with U.S. diplomats in an effort to settle the scandal generated by allegations of South Korean bribery of U.S. congressmen, according to Korean sources here.

President Park Chung Hee's government, the Korean sources said, is eager to prevent further damage to South Korea's relations with the United States, on which it is dependent for military and economic aid. "There are no winners in this thing," a Korean said, "only losers."

The South Korean sources, who said that they had fresh information from Seoul, reported that the South Korean government had proposed that it admit to some wrongdoing, with the admission carefully phrased to keep Mr. Park from any involvement.

In return, the sources said, the South Korean government wants the State Department to get guarantees from the Justice Department that Kim Sang Keun, a Korean Central Intelligence Agency officer who defected three weeks ago, would not be called before a grand jury and would not be asked to testify in open court.

Pledge Is Sought

The South Korean government was also reported to want a pledge that none of the information that Mr. Kim is believed to be giving federal investigators would be disclosed to the press.

In effect, the South Korean government appears to have asked the United States to quash Mr. Kim's testimony, although not to halt other lines of investigation. Federal investigators here have indicated that Mr. Kim's information is the best that they have had in the 18-month inquiry.

State Department officials said that the proposal, as outlined, had not been made.

Officials at the Justice Department said they had not received the Korean proposal from the State Department. Officials in both departments indicated privately that, in any case, no deal of this sort was likely to be made.

The Korean sources said that the proposal for settling the bribery scandal was broached in a recent meeting between Foreign Minister Park Tong Jin and the U.S. ambassador in Seoul, Richard Sneider.

Never Count On a Computer

ST. OMER, France, Dec. 19 (AP).—A computer helped put its operator in jail last week for five years.

Michel Munier, 26, said he "never left the office" last Feb. 25 when his employer, Christian Apel, was stabbed five times and hospitalized.

But Munier's computer showed no input between 8:11 p.m. and 8:38 p.m., the period during which the crime was committed.

Confronted with the evidence, police said Munier confessed he stabbed his boss because of dissatisfaction with job conditions.

Sleeping Pills Are Discounted In U.S. as Cure for Insomnia

NEW YORK, Dec. 19 (NYT).— Well over $100 million a year is spent in the United States on prescription sleeping pills to fight insomnia, yet, accordin- to new research, most of these prescriptions are a total waste of money.

The research was described at a symposium here on sleep disorders, which afflict 25 million American, every night and millions more some of the time. The insomniacs were told not only that they are wasting their money on pills, but that in many cases the drugs actually cause, rather than cure, insomnia.

Doctors at the sleep disorder clinic at Stanford University report that about 40 per cent of patients who complain of insomnia actually lose sleep because they have become dependent on the very drugs they were taking against it. When these patients are gradually withdrawn from the drugs, they sleep on the average of 20 per cent more.

Insomnia can take different forms and have many causes. Insufficient sleep for one or two nights is not debilitating, according to Dr. Sidney Cohen, psychiatrist at the University of California at Los Angeles. "The major debilitating factor," he said, "is related to the worry about not having slept."

One of the most common causes of insomnia is no cause at all. The person simply thinks he has insomnia, but, in fact, all-night recordings of his sleep show no problem. The treatment in these cases is education and reassurance.

"Pseudoinsomnia," as this condition is called, may result from ignorance of the fact that sleep requirements normally diminish with age. A newborn baby sleeps 18 hours a day, young adults need on the average seven to eight hours a night and elderly people require only 4 1/2 to 6 1/2 hours.

Thus as people get older, they may continue to go to bed at the same time and lie awake for hours or else wake up in the early hours of the morning and be unable to go back to sleep, simply because they have slept all they need to.

Often, sleep specialists have found, patients complaining of insomnia simply underestimate how much sleep they actually get. This can be documented by recording the person's sleep pattern in a laboratory.

Reassuring the patient that his sleep is normal is usually all the treatment necessary. Prescribing sleeping pills for patients with pseudoinsomnia is useless and may actually be harmful, leading to drug tolerance, escalating dosages and drug-induced insomnia.

Medical Factors

Real, chronic insomnia may be caused by a variety of medical disorders, psychological problems or behavioral factors, such as drinking large amounts of caffeine-containing beverages.

Insomnia may be secondary to such sleep-disrupting diseases as asthma or ulcers or the pain of arthritis, migraine or angina. In these cases it is necessary to treat the underlying cause to cure the insomnia. Perhaps 20 per cent of insomnia patients are afflicted with so-called primary sleep disorders—problems that happen only in relation to sleep.

In some cases of insomnia the patient's sleep is disturbed by muscular twitching in the legs (called nocturnal myoclonus). Other insomniacs have "restless leg syndrome"—a crawling feeling inside their legs that disappears with motion and often forces them to get up and walk around many times a night. There are no known treatments for these problems, but several drugs are under study.

Some patients have disturbances in their biological rhythm, finding themselves wide awake at bedtime and sleepy when it's time to get up—a kind of permanent "jet lag." If the person is unable to adapt his daily life to when his body wants to sleep, it may be possible to reprogram his body, one hour at a time, to a more normal rhythm.

Anxiety and depression are probably the most common psychiatric causes of sleep loss and in severe cases anti-depressant medication or a sleeping pill may be prescribed until psychotherapy takes effect. About 20 per cent *of insomniacs need psychotherapy* for emotional problems, a doctor estimated.

Poor bedtime habits, such as drinking too much coffee, eating a big meal close to bedtime, discussing upsetting topics or going to bed hours before feeling sleepy can also cause insomnia.

Japanese Accord Is Still Sought on U.S. Fishing Zone

WASHINGTON, Dec. 19 (AP). —Japan and the United States on Friday ended five days of fisheries negotiations but fell short of final agreement on Japan's fishing operations within the prospective 200-mile U.S. limit, officials said here.

They said a substantial amount of progress was made but "we still have differences." The officials declined to specify the areas of disagreement, saying only that the two sides hope to reach an accord as soon as possible.

The United States is seeking Japanese compliance with new U.S. legislation extending the American fisheries limit from 12 to 200 miles on March 1.

Japan is one of six foreign nations whose fishing fleets operate off the Pacific northwest coast of The United States but it is the only country that has not yet accepted in principle the expanded U.S. jurisdiction. The Soviet Union is among those that have accepted it.

If Japan refuses to accept the new limit and attempts to fish inside the 200-mile zone after March 1, Japanese vessels will be subject to arrest by the U.S. Coast Guard.

Poland Approves Five-Year Plan

WARSAW, Dec. 19 (UPI).— The Polish parliament approved a five-year economic plan yesterday calling for a 502-per-cent overall increase in industrial production and an improvement of supplies to the shops.

Premier Piotr Jaroszewicz told the parliament there would be a slowdown of industrial investments but that wages would grow by 18 per cent. He said there should be an improvement of market supplies and services.

The government earmarked a record 715 billion zlotles ($33 billion) for development of the food and agriculture industries during the next five years.

Bomb Hoax at Fiumicino

ROME, Dec. 19 (AP).—A bomb alert led to the evacuation of 4,000 persons and the suspension of all activities for 15 minutes at Fiumicino Airport yesterday morning. No bomb was found, police said.

Paris Honors Malraux

PARIS, Dec. 19 (Reuters).—The city council has decided to rename the square outside the Comedie Française theater after author André Malraux, who died last month.

Royalist Resistance Grows in Laos

By Brian Eads

VIENTIANE, Laos, Dec. 19 (WP)—In the southern panhandle provinces of Laos resistance to the government is now so widespread that uniformed Pathet Lao dare not venture more than 10 miles outside the main towns and officials said they expect the situation to deteriorate even further.

In many cases, they said conditions before the Pathet Lao take-over a year ago have been reversed, with villages previously under Communist control now in the hands of former royalist forces.

When the authorities attempted to conduct a census in Savannakhet Province last month, they were unable to visit outlying villages and village headmen were instructed to collect population figures before being accompanied to the provincial capital under heavily armed military escort.

The Shell Oil depot at Savannakhet, 200 miles south of Vientiane, came under attack on Nov. 14 by resistance forces armed with grenade launchers, recoilless rifles and automatic weapons. No casualties were sustained.

Resistance in Mountains

Resistance is also continuing in the mountains to the north of Vientiane around the former stronghold of the CIA's clandestine army of Meo hill tribesmen at Long Tieng and in the western province of Sayaboury.

Reliable sources said that tribesmen tempted into permanent settlements earlier this year have begun to filter back into the mountains and that their fears have been aroused by stories that Meo leaders undergoing reeducation in the far north of the country have been executed.

"They buried five years worth of arms and ammunition," a Western diplomat said, "and there's no sign of their buckling under to the new regime."

Both resistance movements are being given "moral, material and financial support by the Thai reactionaries and the CIA," a Foreign Ministry official said. The official said that CIA operatives were coordinating the resistance from the former U.S. air base at Udon Thani, about 45 miles south of Vientiane in northeast Thailand.

"Their aim is to overthrow our new regime," the official said, "and they are recruiting reactionaries who have crossed into Thailand."

View Is Shared

The view is shared by former royalist soldiers, some of whom talk of crossing into Thailand, settling their families in refugee camps and offering themselves to the resistance.

Just how serious ' ngs have become is difficult . now because foreigners are restricted to the province of Vientiane unless official permission for travel is given. Invariably it is refused for "security reasons."

But Soviet pilots flying the southern route for Lao Aviation, the domestic airline, report frequent sightings of ground fire and Communist diplomats say government convoys and Pathet Lao patrols are often attacked.

Route 13, the country's major north-south artery, has been cut on several occasions and the distribution of foodstuffs and medicines entering the country at Vientiane is being seriously hampered.

Cautious Government

"The problem is more difficult to solve because we don't want to upset the local population," a government official said. "We could use helicopters and conduct sweeps against the patikaan [reactionaries], but that is the way the Americans lost the war."

Pathet Lao officials said they expect the new military regime in Bangkok to step up support for the resistance forces and that the problem will get worse before it gets better.

The fact that neither President Souphanouvong nor Prem Kaysone Phomvihan appeared the first anniversary celebratic two weeks ago is explained the comment, "we can't affo to lose them." After dusk to man Pathet Lao patrols walk t empty streets of the capital-a soldier, AK-47 slung over shoulder, is stationed at ev main road junction.

The major motivation of resistance groups seems to be large part ethnic and regio The Meo, a nomadic, fiercely dependent minority, numbe about 200,000 of the 3 mill Laotians, have always resis central authority, while southern provinces were o part of an independent kingd

Adoption Provides Respectability For American and His Girlfriend

WESTERLY, R.I., Dec. 19 (AP).—They did not want to get married but they wanted to live together respectably. So Joseph Comoli 3d, 38, adopted Elaine Tattersall, 32, as his daughter.

"The daughter can use the name of the father," said their lawyer, Aram Berberian. "People will believe they are married because they use the same name. They obtain respectability in the eyes of their peers."

According to town records, Miss Tattersall's parents are still alive. A spokeswoman at the town clerk's office confirmed that the adoption had taken place and said it was legal because Miss Tattersall "is of age and can be adopted by whomever she chooses."

"The major factor is here we have two people living in sin,'" Mr. Berberian said. "To legitimize the cohabitation, they became related."

Mr. Berberian said he used the tactic himself three years ago and later married the woman he adopted as his "daughter." He said the arrangement can offer benefits other than respectability.

For example, he said, in the event of a breakup, "the daughter can never force the father to pay alimony." And the "father" gets an added tax deduction if he pays more than half the cost of supporting the "daughter," Mr. Berberian said.

He said that, when he used the adoption process with his girlfriend, it protected him from charges of immorality leveled by his wife.

U.S. Swine Flu Drive in Peri

WASHINGTON, Dec. 19 (AP). —The swine flu immunization program may be over, even if the vaccine is cleared of any connection with a paralytic disease that has led to the second suspension of the program in two months, federal health officials indicate.

Shaken public confidence in the vaccine and the fact that restarting the program may come too late in the influenza season for effective immunization cloud the program's future, Dr. Theodore Cooper of the Department of Health, Education and Welfare said last week.

He said he would not yet end the program, but he conceded that it would be difficult for it to go on. "It will be very difficult to convince the public," said Dr. Cooper, HEW assistant secretary for health.

Federal officials suspended the program last week to investigate reports that some vaccinated persons have developed Guillain-Barre syndrome, a disease affecting the nervous system.

Officials stressed that there was no proven association tween the vaccine and disease, but that the suspens was "prudent" until the p ability of such a link was che ed out. The Center for Disc Control in Atlanta said 107 ca of the syndrome were repor from 18 states. Of these, at le 58 had been vaccinated agai swine flu.

Nkomo Rejects Role in Rhodesia For Muzorewa

SALISBURY, Rhodesia, Dec. 19 (AP).—Joshua Nkomo said today that a rival Rhodesian nationalist leader, Bishop Abel Muzorewa, has no part to play in Rhodesian settlement talks. He rejected the idea of Bishop Muzorewa participating in a Rhodesian government.

Mr. Nkomo, who together with another nationalist leader, Robert Mugabe, heads the militant Patriotic Front, also said he does not intend to hold talks with Prime Minister Ian Smith during the adjournement of the Geneva conference on Rhodesia.

Asked if the conference could be effectively continued without *the participation of Bishop Muzo*rewa, who leads a faction of the African National Council, Mr. Nkomo replied: "We are not discussing church matters; we are discussing politics. He may be well-meaning but it is not meaning-fulness that matters."

Zambia Penalizes Bishop

LUSAKA, Zambia, Dec. 19 (AP).—Zambia announced today that it has suspended relations with the wing of Rhodesia's African National Council led by Bishop Muzorewa, Mark Chona, special assistant to President Kenneth Kaunda, said the step was taken after Bishop Muzorewa's group accused Zambia of conniving to install Mr. Nkomo as prime minister of an interim government in Rhodesia.

New York Times Expands Its News Management Unit

NEW YORK, Dec. 19 (NYT).— An expansion of the news management group of The New York Times, involving the promotion of several senior editors, has been announced by Arthur Ochs Sulzberger, publisher of The Times.

"The New York Times is in the midst of a major developmental program that will accelerate in 1977," Mr. Sulzberger said on Friday. "The resulting expansion of news operations and the need to handle new publications of the paper require a larger management team. The changes we are announcing today, effective Jan. 1, also complete the integration of the news operation into a single staff, a process that began last April with the merger of the daily and Sunday news staffs."

A.M. Rosenthal, the present managing editor, will continue to direct all news operations with the title of executive editor. Seymour Topping, deputy managing editor, will become managing editor. He will act as Mr. Rosenthal's deputy in all news operations.

Arthur Gelb, now an assistant managing editor, will become deputy managing editor. James Greenfield, now the foreign editor, will become an assistant managing editor. Louis Silverstein, now corporate art director, will become an assistant managing editor responsible for the art department.

Peter Millones continues as assistant managing editor for administration and personnel. Robert B. Semple jr., the London bureau chief, will return to the United States as foreign editor. R.W. Apple jr., national political correspondent of The Times, will succeed Mr. Semple in London.

Palestinian Is Hanged

AMMAN, Dec. 19 (Reuters).— The only Palestinian guerrilla to survive an attack on the Intercontinental Hotel here last month was hanged here yesterday, it was official announced.

Greek Tests Link 2 Assassinations

ATHENS, Dec. 19 (AP).—Ballistics tests show that the 45-cal. pistol used to kill a former top security police official last week was the same weapon used to assassinate CIA station chief Richard Welch a year ago, police announced yesterday.

An otherwise unknown leftist group calling itself the "Revolutionary Organization of Nov. 17" claimed responsibility for both assassinations. Nov. 17 is the day observed here for an anti-dictatorship uprising by students at the Athens Polytechnic Institute in 1973.

The slain former Greek official, Evangelos Mallios, had been free on bail after appealing a conviction and 17-month sentence for torture of opponents of the 1967-74 dictatorship.

Simon's Request To Keep Gifts Is Rejected by U.S

WASHINGTON, Dec. 19 (W The State Department turned down Treasury Secret William Simon's request that be allowed to keep a half-do gifts received from foreign ernments or officials.

Mr. Simon had proposed Ambassador Shirley Tem Black, head of the departme Protocol Office, that he be *invited to purchase the gifts* a an appraisal. Under normal cedures they would be displa by the government or sold auction.

All of the gifts, including Russian shotgun and a wi watch given him by Soviet C munist party chief Leonid Br nev, are valued at $50 or n and as such are supposed to turned over to the governm for disposal, according to a law. But pending action on request, Mr. Simon has kept items at his home in Virginia

Mrs. Simon has said that wanted to keep the six pres as mementos of his trips ab and that his proposal to buy t would produce more revenue the government than an auc sale.

Mrs. Black is known to that to make such an arra ment for Mr. Simon would convey a special privilege fair to others who turned in that they, too, may have wa to keep.

"I told him I couldn't issue ulations to comply with his gestion," she said Friday.

U.S. Doctor Win Abortion Case

BOSTON, Dec. 19 (UPI).— Massachusetts Supreme C has reversed the abortion-rel manslaughter conviction of Kenneth Edelin.

The obstetrician was convi on Feb. 15 of last year in death of a fetus which he abo at Boston City Hospital. He sentenced to a year's proba by Suffolk Superior Court Ju James McGuire. Dr. Edelin's week trial brought to nati attention several abortion is left unresolved by the U.S. preme Court's 1973 Roe vs. W decision, which pushed asid number of state abortion law In a unanimous decision week the six justices said t was "insufficient evidence wanton or reckless conduct" Dr. Edelin.

Russians Viewed as Liberators

Close Soviet-Bulgaria Ties Make Sofia a 'Mini-Moscow'

By Murray Seeger

SOFIA, Dec. 19.—Near midnight, when a pedestrian's footsteps clearly echo across the empty square, the two young soldiers guarding the square mausoleum were more than a little bored with the job.

They broke their stolid stance and turned their heads, crowned with round caps and long feathers, to see who was walking past. Across the clean bricks of the square, unsoiled by ordinary city traffic, the handsome 19th-century yellow facade of the National Art Gallery glowed in the moonlight.

For many Western visitors, the scene resembles Red Square in Moscow, another vast square barred to ordinary traffic and dominated on one side by a mausoleum of a Communist prophet guarded perpetually by highly disciplined young soldiers.

In Sofia, however, the bricks are yellow, not red, and the mausoleum is smaller, for it houses not the remains of Lenin but those of Georgi Dimitrov, the Communist leader who brought Bulgaria into "permanent" alliance with the Soviet Union.

The close association between the biggest Eastern European power and the smallest, in the view of Western analysts, has proved beneficial to the junior partner, helping it evolve from a poor, backward agricultural country into a more prosperous one with a mixed economy. In the process, Sofia has become a mini-Moscow.

In addition to being practical, the ties that bind Sofia to Moscow are popular with most Bulgarians, a situation that contrasts sharply with other Eastern European capitals, where pervasive Soviet power is resented.

"The Russians here are the liberators both from the ancient enemy, the Turks, and the modern enemy, Nazi Germany," a Western source observed.

Bulgarian government and party officials resent the suggestions of outsiders that their country is a "slavish" or "docile" follower of the Kremlin. The Bulgarians insist that their association with the Soviet Union is voluntary and of great benefit to Sofia.

"The Soviet Union is our colony," Todor Zhivkov, the 65-year-old chief of party and state, told a recent Western visitor. "They sell us raw materials and we sell them manufactured goods."

Bulgaria is so closely integrated with the Soviet-dominated Eastern European economic group, Comecon, that only 24 per cent of its trade is with the rest of the world. The Moscow presence is seen in the profusion of Soviet-made automobiles, the color and style of policemen's uniforms and even the color and size of Bulgarian money.

In the city center, workers hose down the streets daily, rain or shine, just as they do in central Moscow. The main street which enters the yellow square that so closely resembles Red Square is called "Russki" and its extension is named for Lenin.

There is a monument to the Russian liberators of the 19th century and another to the Red Army of the 20th century. There is the most active Soviet cultural center in Eastern Europe and perhaps the most luxurious Soviet Embassy compound.

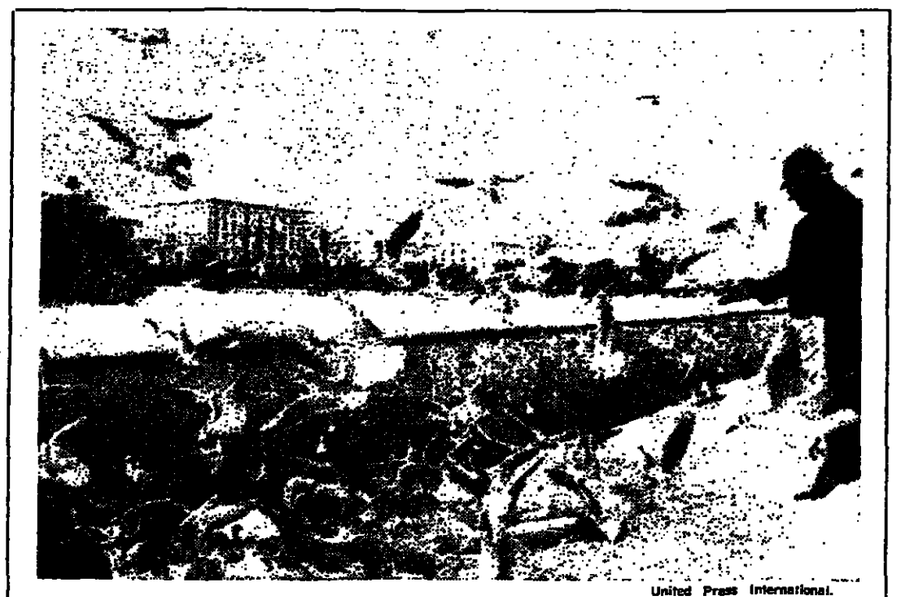
Most impressive of all, the most beautiful structure in the city is a church named in honor of Alexander Nevsky, the Russian admiral whose victory over the Turkish Empire assured Bulgarian independence.

The affinity between Sofia and Moscow is so close that Bulgaria's neighbors, Yugoslavia and Romania, have at times suggested that Bulgaria would become the 16th republic of the Soviet Union.

In both external and internal policies, Bulgaria adheres to the Soviet model. Cultural controls are tightly enforced so that very few outside influences are permitted.

Westerners living in Sofia are carefully watched by security police and any Bulgarian visitors to their homes are likely to be questioned by officers.

But then, according to Westerners, there are few intellectual dissidents such as in most other European Communist societies, no underground press and no visible political unrest.



What social unrest there is comes from ethnic minorities and from the development of a younger generation which is willing to challenge some establishment controls.

Soviet Transmitter Interferes With BBC

LONDON, Dec. 19 (Reuters).—The BBC has asked the government to complain officially that a new powerful transmitter in the heart of the Soviet Union is interfering with some of its broadcasts.

A BBC spokesman said the transmitter, nicknamed "the Woodpecker" for its irritating speed-pecking sound, comes in during the middle of its Russian and English-language programs. It operates for five minutes three to four times every 24 hours. NATO experts have traced the "Woodpecker" to Gomel, in Belorussia, southeast of Minsk.

Kissinger Namibia Proposals Run Aground

WASHINGTON, Dec. 19 (NYT).—A behind-the-scenes effort by the Ford administration to bring about a Geneva conference for the independence of South-West Africa (Namibia) has stalled and probably cannot be revived before Jimmy Carter takes office next month.

Administration officials and diplomats who three months ago were optimistic that a solution could be found to the Namibia problem have grown gloomy. Namibia has been controlled by South Africa since World War I and its independence has been repeatedly urged by the United Nations.

Moreover, the current stalemate at the talks in Geneva on ending white minority rule in Rhodesia has added to the sense that the major initiatives carried out by Secretary of State Henry Kissinger for most of this year have fallen short of achieving their goals.

Proposal Outlined

To achieve a solution on the Namibia question, Mr. Kissinger secretly circulated a seven-point plan to black African leaders, and to Sam Nujomo, the head of the South-West African Peoples Organization. SWAPO is recognized by the United Nations as the representative of the majority blacks in Namibia but is not recognized by South Africa. The New York Times was briefed on the contents of the Kissinger proposal.

The proposal said that the United States had reason to believe that South Africa would agree, if the blacks agreed, to the following: A Geneva conference to settle outstanding questions; an early date for the independence of Namibia; participation in some way by the UN in the conference; a "presence" by South Africa in Geneva as a contact point; acceptance that Namibia would be united and free of segregation practices; negotiations by the parties to settle political questions, and withdrawal of South African forces upon request of a new government.

According to diplomatic sources, Presidents Julius Nyerere of Tanzania and Kenneth Kaunda of Zambia showed interest in the plan, but informed Mr. Kissinger that they could not speak for Mr. Nujomo's group.

That group, according to the sources, has not accepted the U.S. suggestions for getting a conference going. SWAPO has insisted that the meeting be held under UN auspices—not just have a UN presence. It has insisted that it should be the only nationalist group negotiating for Namibian independence and that any other Namibian groups should be represented as part of a South African government delegation.

Talks in Windhoek

But the South Africans have refused to negotiate directly with SWAPO and insist that the groups currently discussing a future independence for Namibia at Windhoek, the capital of the region, should decide their own fate. SWAPO is not taking part in the talks.

An additional complication, officials in the Ford administration said, is that Mr. Carter's views on southern Africa have not been detailed.

It is unclear for instance if he wishes to follow basically the Ford-Kissinger course of working cooperatively with the government of Prime Minister John Vorster to put maximum pressure on the Rhodesian whites and to move toward a Namibian solution.

Another course advocated by some Democrats would be to take a much more hostile view toward the South African government for its apartheid policies and give lower priority to Rhodesia.

A Black at the UN

The appointment of Rep. Andrew Young, a black, as the next delegate to the UN, is sure to raise expectations among black governments of a more anti-racist policy in southern Africa and simultaneously to create problems for Mr. Vorster.

But Rep. Young has so far refused to be drawn into a policy discussion, making it clear that as UN envoy he did not make policy but only participated in its evolution. He has stressed, however, the need for the United States to show "moral leadership" in the world, shorthand for more open opposition to apartheid policies.

Mr. Kissinger, who was voicing considerable optimism on Namibia in September, has said nothing about it recently. He believes that the Carter victory was particularly costly for his African policy since it cost the United States leverage at a crucial point.

Hunt for Antarctic Minerals Is Under Way

By Walter Sullivan

McMURDO SOUND, Antarctica, Dec. 19 (NYT).—In the Prince Charles Mountains, near the Antarctic coast facing the Indian Ocean, Soviet explorers have found what a U.S. geologist here described as "a mountain of iron."

Discoveries have been reported elsewhere, chiefly by Soviet reconnaissance parties.

Meanwhile, an airlift from this base has landed a U.S. Geological Survey party of six at a site known as the Enchanted Valley to study a formation that, it is suspected, may prove to be one of the most important ore-bearing structures in the world.

It is a body of rock in the Pensacola Mountains and is estimated to cover at least 13,000 square miles, with a thickness of four miles. While it is partly covered by ice, it is extensively exposed in that part of the mountains known as the Dufek Massif.

Layered Structure

The formation was first reached by explorers in 1957 and proved to be a layered structure produced by eruptions from the earth's interior, with striking similarities to the Bushveld complex in South Africa, the Stillwater Formation in Montana and the Sudbury region of Ontario.

These areas have yielded important deposits of platinum, nickel, copper and chromium. The Bushveld has also produced lead, zinc, vanadium, iron, cobalt and some tin and gold. The Dufek Massif is now considered one of the largest such layered complexes in the world and is the chief focus of the current U.S. geological effort in Antarctica. The party there is led by Arthur Ford of the Geological Survey.

While no important uranium deposit has yet been found in Antarctica, the Japanese have found a small amount of uranium ore (euxenite) near Lutzow-Holm Bay. Radiation detectors are also being carried by helicopters from the U.S. base here to search nearby mountains for radioactive deposits.

These developments are bringing about a profound change in the status of Antarctica. The possibility that, as some had hoped, it might be preserved as forever pristine—a "world park"—becomes increasingly unlikely. International agreement on management of its resources has at the same time become more urgent than ever before.

Details Not Known

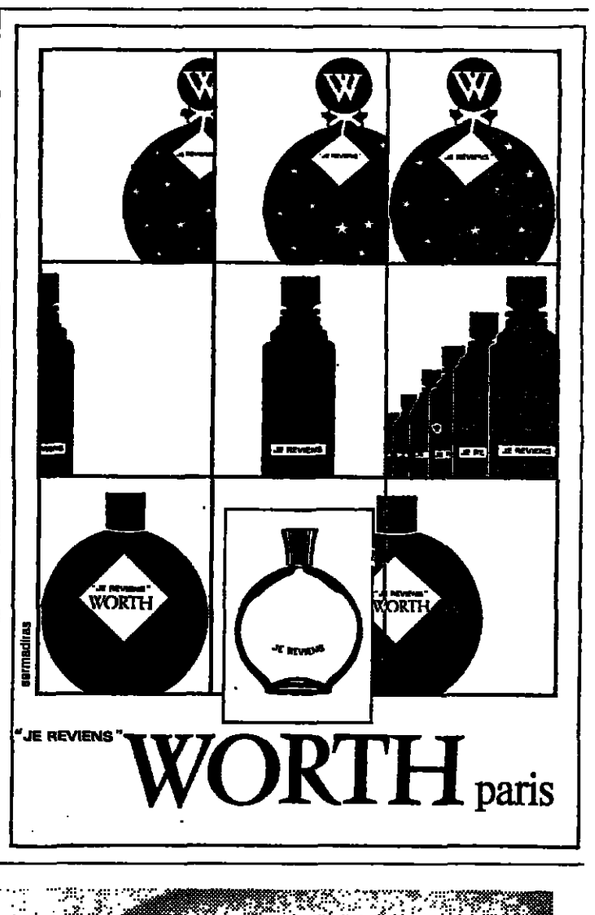
Details of the Soviet-reported iron deposit in the Prince Charles Mountains are not yet available. However, Edward Grew of the University of California at Los Angeles is working with the Russians and, through him, more should eventually become known.

Exploration of the Prince Charles Mountains was conducted from a temporary camp on the Amery Ice Shelf where the Lambert Glacier, the world's largest such feature, reaches the sea. To the east of there, scattered along 200 or 300 miles of the Leopold and Astrid Coast, are boulders as much as six feet in diameter formed of iasplite, a banded iron ore. They clearly have been carried there by ice flowing over a large ore body buried somewhere inland.

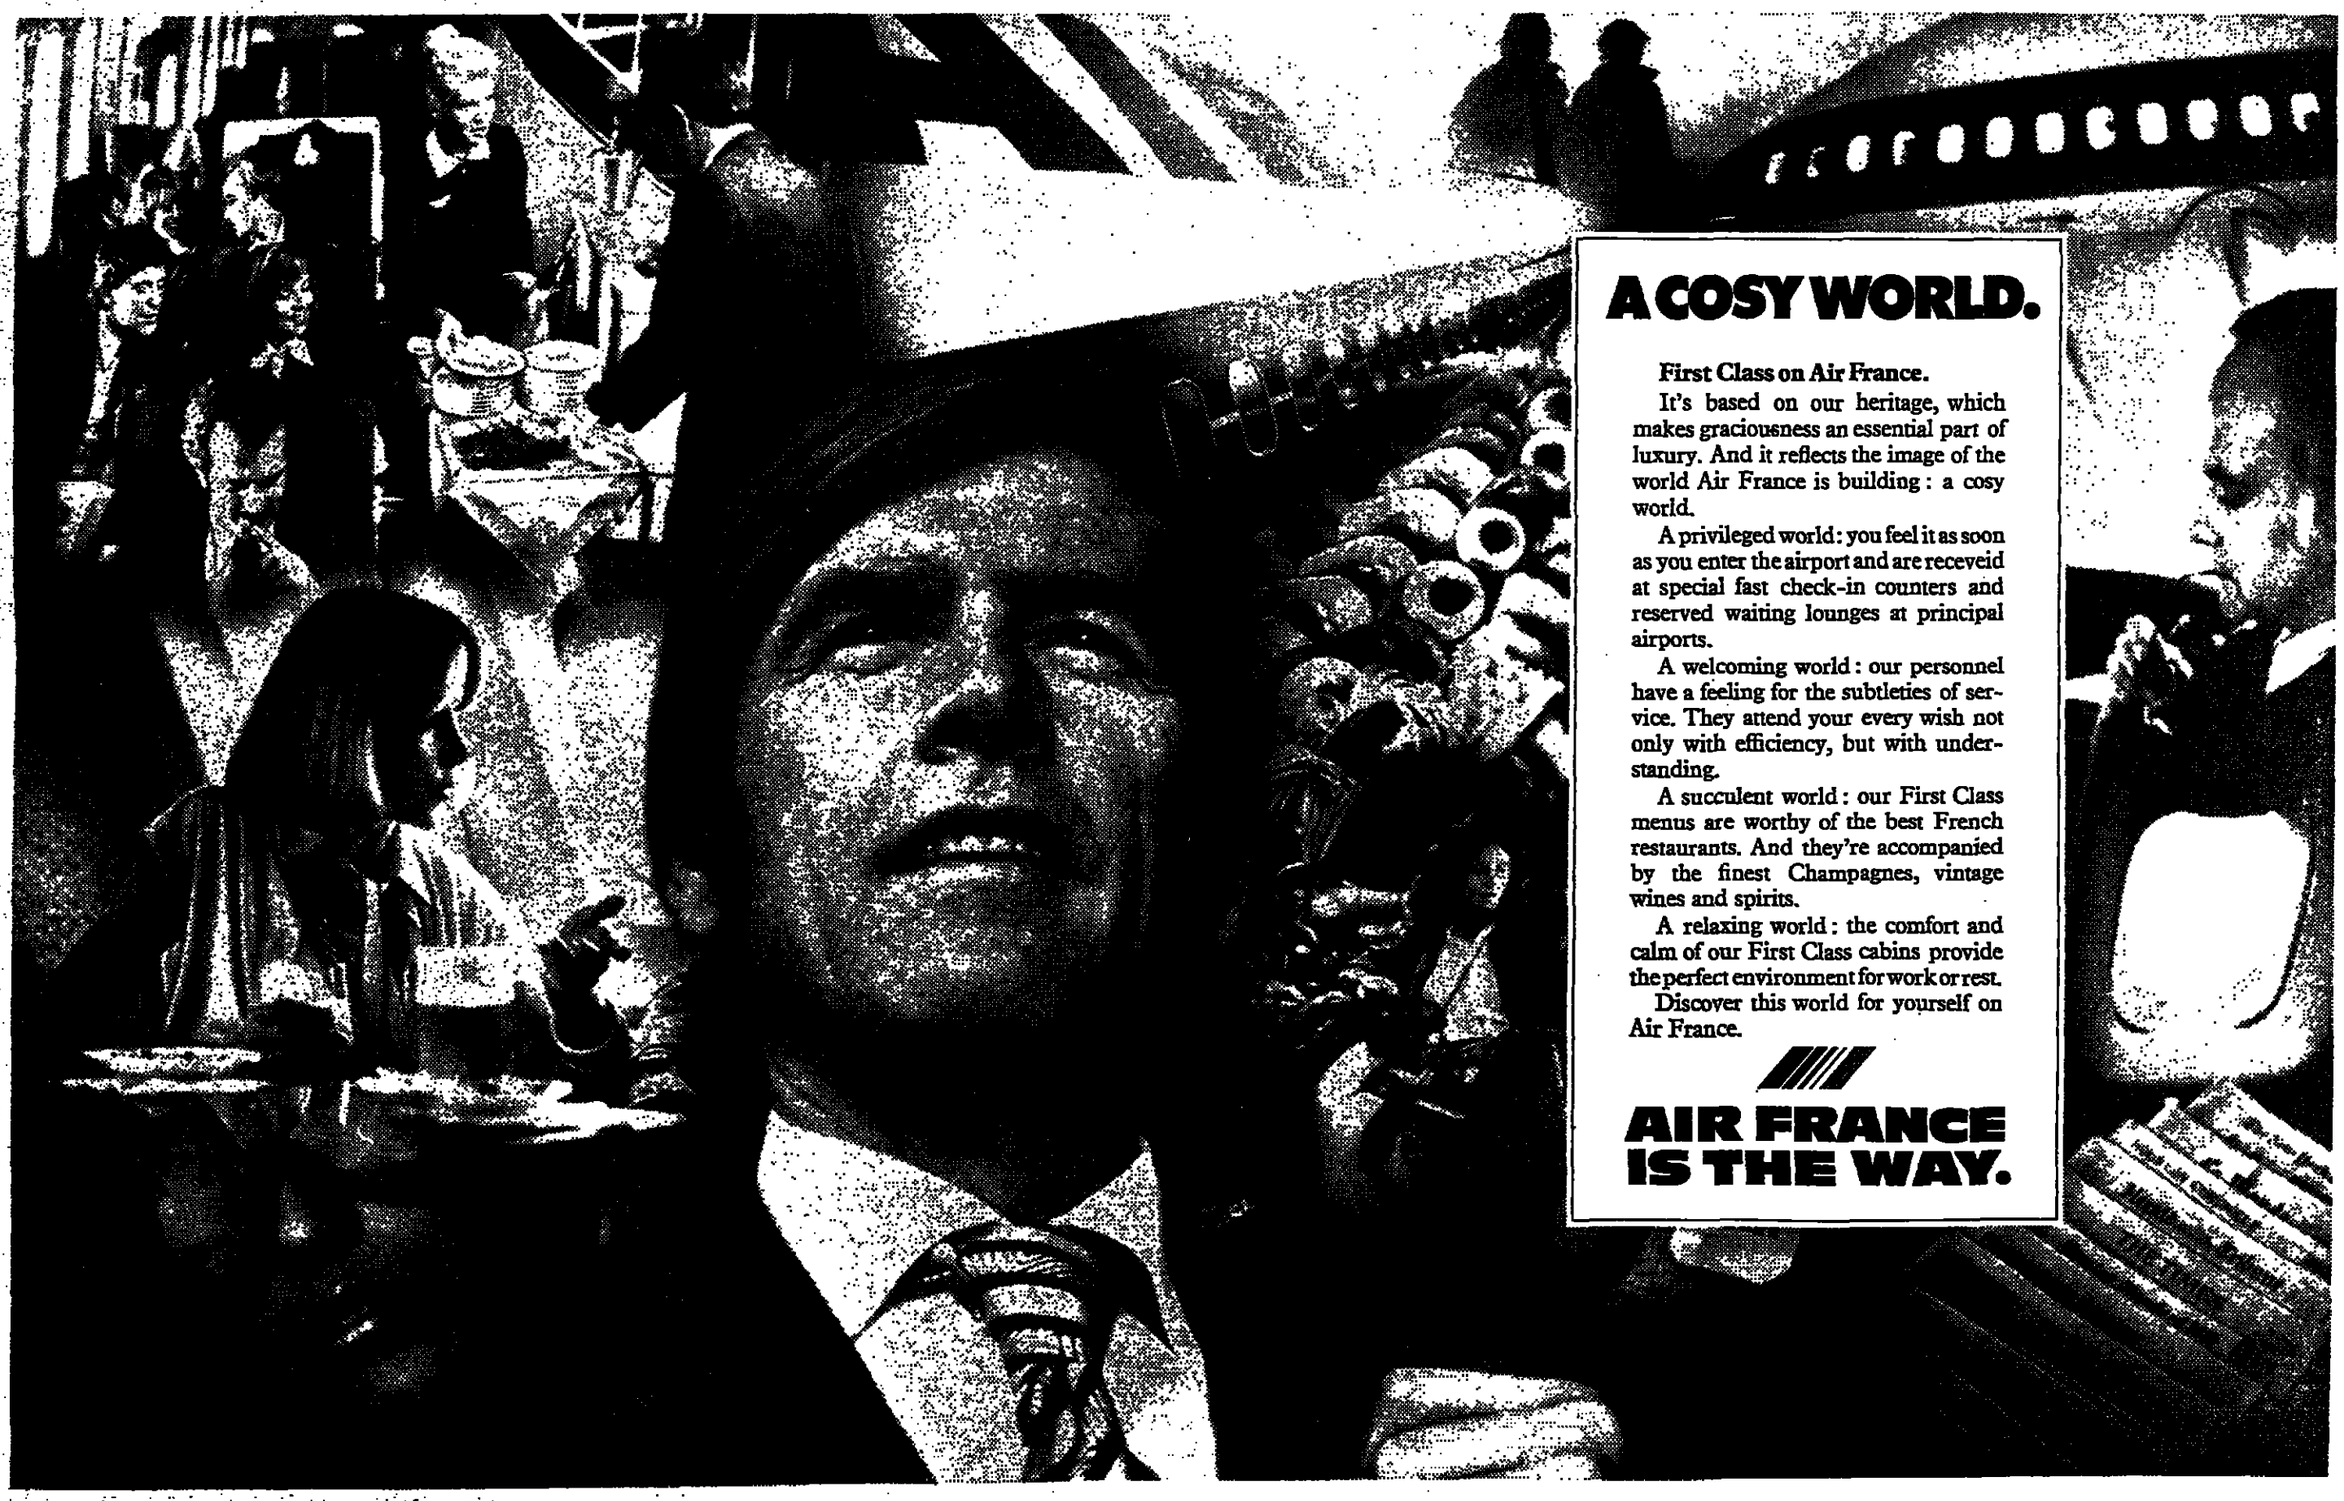
At several places in Queen Maud Land, such as at Mount Humboldt, iron ore (25 per cent or more magnetite) occurs in pods more than 300 feet thick. Such finds have led Soviet geologists to be optimistic about discovering a major deposit. Mr. Ford has reported layers of rock in the Dufek Massif several yards thick and containing 70 to 80 per cent of magnetite.

Mining Problems

In a study done for the U.S. Geological Survey, N.A. Wright and P.L. Williams emphasized the obstacles to exploitation of minerals in Antarctica. About 98 per cent of the continent is covered with ice. Access to its coasts typically is blocked by pack ice. Since the continental ice is usually in motion, a shaft sunk through it would soon be displayed from a formation in the rock below.



Because the Antarctic Peninsula—the longest such feature in the world—is clearly a continuation of the Andes, it is suspected to be a potential source of the minerals exploited in those South American mountains, notably copper.



No major deposits have yet been found, however, and Mr. Wright and Mr. Williams therefore doubt that any as rich as those of Peru and northern Chile will be discovered.

Finland Is Leader On Smoking Ban

LONDON, Dec. 19 (Reuters).—Finland leads in providing no-smoking areas in public places, an anti-smoking organization said in a survey of Europe published today.

Second is Italy and third Poland, said Action on Smoking and Health, known by its initials as ASH. The list was compiled from replies to questionnaires sent to embassies and health ministries in 20 European countries. Britain compares particularly badly in allowing smoking in hospitals, movie houses and buses, ASH said.

The Latest From OPEC

It's a bit too soon to turn up the heat, or to trade in your compact car for that 400-horsepower item with the power driven this-and-that. OPEC, the oil exporters' cartel, does indeed seem to have split over pricing. That interesting development has led a few incautious souls to suggest that the cartel is now breaking up, cancelling any need for uncomfortable thoughts about energy conservation. But chemical analysis reveals those cheery forecasts to be 99.9 per cent wishful thinking.

Regarding this alleged weakening of the cartel, there are several points to be kept firmly in mind. First, all the pricing decisions are still unilateral. The sellers announce their prices, and that is that. Second, the dispute among the sellers was not whether to lower prices, or even whether to freeze them, but only how much to raise them. Third, the display of relative moderation on the part of the Saudis is explicitly tied to future concessions by the United States in current international policies. "We definitely are waiting for appreciation from the West for what we did,' Saudi Arabia's Sheikh Ahmed Zaki Yamani said in an interview with NBC. And this appreciation has to be shown in two forms, in the Middle East dispute and in the North-South dialogue concerning economic concessions by the industrial nations to the others.

The Saudis, incidentally, intend to review pricing again in six months. If American behavior does not measure up to their requirements by June, the United States can presumably expect to pay for it.

There is always a lot of theater in OPEC meetings. What messages are the Saudis delivering? They are a thinly populated country of enormous wealth, with little military strength; they are not very far from other countries that are heavily populated, poor and, in some cases, well armed. The Saudis believe that the surest guarantor of stability in the Gulf is probably the United States—and they are probably right.

But reluctance to raise oil prices is considered by some of the red-hot nationalists to constitute betrayal of the Arab cause. The antidote is to link this restraint to progress toward a favorable peace settlement with Israel. For the non-Arab members of OPEC, there is a further link to the North-South conference. It this whole series of contingencies is stated in general terms, with nothing closely defined it leaves the Saudis committed to very little and in a position to claim credits from everybody.

The Saudi's tactics have now produced the anomaly of a double price for oil. They say that they will charge $12.08 for the standard barrel, an increase of 5 per cent. But most of OPEC intends to go up a bit more than 10 per cent, to $12.70 for the same barrel. That, of course, won't work.

In a seller's market, the middlemen would simply resell the cheaper Saudi oil at everybody else's higher price. To prevent that from happening, the Saudis say that they will increase production sufficiently to create slack in the market. They—and they alone—certainly have the physical capacity to do it. Whether they will actually carry out the threat remains very much to be seen. But merely suggesting it serves to remind the world—including the incoming President of the United States—what a valuable friend they can be.

As for the United States, even at the old prices it would have spent nearly $40 billion on imported oil in 1977. A 5-per-cent increase is $2 billion. As the country learned in 1974, raising the price of imported oil has the same effect as raising taxes—unless the money is spent immediately, a thing that rarely happens. The Nixon administration failed to perceive that truth in time. The massive 1973-74 oil price increases were a major cause of the recession of 1973-75. In 1977, the first $2 billion of any tax cut by the Carter administration will merely offset the fiscal impact of the higher cost of foreign oil. As for the long roll of nations already desperately strained to pay for fuel, the new prices make the trouble 5 per cent worse.

OPEC's meeting only confirms an obvious truth. As long as the United States keeps increasing its oil imports, it can expect to be reminded every few months of the gratitude it owes to the oil exporters for the restraint and moderation with which they keep raising their prices.

THE WASHINGTON POST.

Wiretaps and the Constitution

One of the greatest legacies of the Nixon years is something that former President Nixon hardly meant to promote. That is the growing body of law affirming that no public official, including the President himself, may violate the Constitution with impunity.

The latest decision bolstering this basic tenet of restrained, accountable government was handed down the other day by U.S. District Court Judge John Lewis Smith jr. The case involved one of the 17 warrantless wiretaps that the Nixon administration carried on, ostensibly in search of security leaks, in 1969-71. Judge Smith upheld the claim of Morton Halperin, a former National Security Council staff member, that Mr. Nixon, former attorney general John Mitchell and then-White House chief of staff H.R. Haldeman had violated the constitutional rights of Mr. Halperin and his family by allowing the tap on their home phone to continue without justification for 21 months. Besides finding a President's conduct unconstitutional—a landmark ruling in itself—Judge Smith also ruled that Messrs. Nixon, Mitchell and Haldeman must pay damages to the Halperins for invading their privacy. This is apparently the first time that a President has been held personally liable as a result of improper conduct in office.

The ruling, which is bound to be appealed, is equally noteworthy for what the judge did not decide. Because of "the confused state of the law" on national-security wiretaps in 1969, Judge Smith declined to hold that Mr. Nixon and his associates, including Secretary of State Henry Kissinger, had acted illegally by initiating the Halperin tap. In an ingenious step around a legal morass, the judge found that the *continuation* of the tap was clearly unconstitutional. Even in national-security cases, he ruled, a president and his associates are bound by the Fourth Amendment's requirements that wiretaps must be carefully limited, reviewed and justified. The tap on the Halperins was just the opposite. It became a "dragnet," conducted with no regard for proper procedures and continued for political purposes long after Mr Halperin had left the government.

In accord with this approach to the case, Judge Smith dismissed Mr. Halperin's suits against Mr. Kissinger and several others who —whatever their roles in initiating the wiretaps or concealing the records—were not directly responsible for how the tap was carried on. The decision is thus something short of a total judgment on the whole shameful episode. That is not grounds for criticism, though. The law was extremely murky at the time. As the record of this long controversy shows, the facts of the matter were so difficult to get at that they may never be entirely straightened out.

For all of that, Judge Smith's decision is another blunt reminder that even when national security is invoked, the nation's top officials do not enjoy a general exemption from constitutional constraints. It is a good reminder, too, of the importance of subjecting all surveillance—especially electronic types—to strict statutory controls and dispassionate judicial review. As Associate Justice Lewis Powell wrote a few years ago, "the historical judgment, which the Fourth Amendment accepts, is that unreviewed executive discretion may yield too readily to pressures to obtain incriminating evidence and overlook potential invasions of privacy and protected speech." That is exactly what happened here. While the courts may impose damages for past abuses, it is still up to Congress to decide what the future controls should be.

International Opinion

Schmidt's Hold on Power

People are liable to rub their eyes in disbelief when they read of the West German Chancellor being elected with only one vote to spare in the Bonn parliament. Surely West Germany is supposed to be the one stable point in a wobbling Europe. Is its leader's hold on power after all so precarious? Not really.

He [Helmut Schmidt] has a nominal majority of 10 with the support of his coalition partners, the Free Democrats. This ought to be quite sufficient for four years of effective government, especially as West Germany has no by-elections (vacancies are filled by the next candidate on the party list). On the other hand, it is as well to be aware that even in West Germany there are stresses which will make life difficult for Mr. Schmidt and which could—though the likelihood is still small—unseat him before his term is up . . . Mr. Schmidt's position is by no means as perilous as the voting might suggest, but he is not in for an easy time

—*From the Times (London).*

Seventy-Five Years Ago

December 20, 1901

ROME—According to informed sources, negotiations will shortly be opened between the Holy See and the United States with a view to the appointment of an American representative at the Vatican. Now that Cuba and the Philippines form part of the Union, the number of Catholics under the Star-Spangled Banner has considerably increased. The chances are in favor of the successful conclusion of these negotiations.

Fifty Years Ago

December 20, 1926

LONDON—A method for taking X-ray films of the processes of the human body has been discovered by three British scientists, it was disclosed today. As a result of this new invention the medical profession and the public will now be able to see films showing the beating of the heart, the respiratory movements of the lungs and various stages in the digestion of food. The new method is held to be of the greatest importance.

'Talk About Gifts That Keep on Giving!'

The Return of Confidence

By James Reston

WASHINGTON—The signs of change now dominate the capital. The inauguration stands are going up on Capitol Hill. President Ford is sending his official papers to the national archives. The book publishers are throwing money at Henry, and the new boys in town are whistling Dixie.

In the few short weeks since the election, the mood of Washington has been transformed. Somehow the town seems younger and livelier. All the old problems remain at home and abroad, but with the innocence of inexperience, the newcomers have revived the spirit of hope.

The transfer of power from one government to another has been turbulent in China, Japan, Spain and Portugal in recent months, but in Washington, after a bitter war, a constitutional crisis and a very close election campaign, the political system has worked in good order and even with amiable good humor.

Lost by Whisker

Much credit for this must go to Ford. Here is a caretaker who has really taken care. Though he became increasingly eager for victory as the election campaign went on, and though he lost by a whisker, he has not uttered a single grudging word of criticism or even regret.

Unlike Nixon, who is still fighting in the courts for personal control and exploitation of his government papers, Ford handed over everything except his pipes, photographs and a few other mementoes. The first thing he said when he came into the White House was that "our long national nightmare is over." If this is true, he can leave knowing that he helped lead us out of the tunnel.

The condition of the nation at the end of the old administration and the old year is far from ideal but in relative terms it seems manageable. The economy still has the hiccups, with both unemployment and inflation higher than Jimmy Carter expected during the campaign, but more Americans are employed today than ever before, and the United States is leading the world out of the recession and the economic indicators promise more progress for the coming year.

Close to Home

Elsewhere in the world, there are obvious problems. Beginning close to home, there is some anxiety here about the financial crisis in Mexico, which is exporting its unemployed to the United States, and in Canada, whose unity is threatened once more by the separatist movement in Quebec. Accordingly, the outlook is for some anxious days along our two great borders in the Carter years.

Nevertheless, the worst fears of a few years ago have been avoided. The defeat in Vietnam did not destroy the world's confidence in the United States, as often predicted. Washington still has better relations with China and the Soviet Union than they have with one another. The Western alliance is a little shaky, and the political weather is stormy in Japan, Britain, France and even West Germany, but the calamitous predictions about the mounting cost of oil have not come to pass in the industrial world, and there is even new hope for another step toward peace in the Middle East.

There are, of course, fundamental differences about the relative military strengths of the United States and the Soviet Union. Also, the big U.S. labor unions are increasingly worried about the importation of illegal foreign workers and the exportation of jobs by the multinational corporations, and these problems, along with the energy crisis, are likely to test the new administration before its first 100 days are over.

Still, Carter's approach to his coming responsibilities has added to the growing confidence in Washington. He has not been as populist or as conservative as his opponents feared during the campaign. He is putting together a Cabinet of energetic, pragmatic non-ideological problem-solvers, and recruiting under them the youngest and most enthusiastic team seen around here since the early days of the New Deal.

All this is contributing to the new sense of bustle and optimism, and of course it may be a temporary and deceptive phase, but the psychological and political atmosphere is obviously different, not only downtown in the big executive departments but in Congress as well.

The fight over the majority leadership in the House, resulting in the narrow victory of Rep. James Wright of Texas, has left some open wounds.

Also it seems likely now that Sen. Robert Byrd of West Virginia will defeat Hubert Humphrey for the majority leadership of the Senate, but in both houses it will be a new beginning under different men who are likely to give Carter more support than they gave Ford during the last two years.

One other point: the element of luck in this superstitious town is a big factor in politics, and the impression is getting around that Carter is not only a capable and confident, but a lucky man, and his confidence is obviously infectious.

Thus the mood has changed here for the better, not because the problems have changed, but because the new men believe they can change things, and the rest of the capital is eager for change. In general, things are seldom quite as good or as bad as they seem here in Washington, but for the moment, people seem to feel better, even if they don't quite know why.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address.

Word to Brown, Kelley: Follow Bush Example

By Joseph Kraft

WASHINGTON.—By resigning as director of the Central Intelligence Agency, George Bush has set an example that should be followed by two other similarly placed officials, I have in mind Gen. George Brown, chairman of the Joint Chiefs of Staff, and Clarence Kelley, director of the FBI.

Like Bush, both men head troubled institutions which can only be rebuilt in an atmosphere of confidence over a long period of time. Like Bush, both men have reason to know that they lack the confidence of the incoming administration to the point where they can no longer serve effectively.

Consider, first, the case of Bush. He became director at a time when the CIA was under widespread public attack because of its ambiguous role in Watergate, Vietnam and a number of other unsavory episodes.

Reformer

Bush took the post as a reformer, determined to continue the cleanup of the agency. He believes he has made some progress. But he knows that reform still has a long way to go.

During the campaign, comment by various associates of Jimmy Carter made it plain that Bush, as a once-prominent Republican politician, would not easily be accepted by the new administration. Bush realized he would not be able to continue the work of rebuilding the CIA, and he simply stepped down.

Gen. Brown is in a similar position—though with a much larger personal responsibility for the troubles of his institution. The basic problem with the Joint Chiefs lies in their relationship with the civilian authorities in the Pentagon and the White House.

Short Circuit

Gen. Brown's predecessor, Adm. Thomas Moore, participated in the establishment of a separate communications line (wrongly called the "Pentagon spy ring") between the Joint Chiefs and the President's national security adviser, then Henry Kissinger. The purpose of that communications link was to short-circuit the civilian authority in the Pentagon. The Joint Chiefs, in other words, violated on a continuing basis the principle of civilian authority.

Gen. Brown has carried that violation a step further in a series of off-the-cuff comments on, among other things, Britain, Iran and Israel. In making these comments, Gen. Brown has not been acting as the agent of military policy which is his true role. On the contrary, without any authority, he has been saying things damaging to the foreign policy of the President he was supposed to serve.

Jimmy Carter and even more his running mate, Walter Mondale, both made it plain during the campaign that they have no use for Gen. Brown or his notions. By hanging on to his post now, Brown can only make matters worse for the President-elect, for himself and for the Joint Chiefs.

Kelley Case

Mr. Kelley is, if anything, even more visibly the author of his own troubles. He came to the FBI at a time when it was reeling under revelations of improper —and in some cases illegal— behavior in several different areas. His aim, undoubtedly, was to refurbish the bureau. But it has become apparent to almost everybody that Kelley has not been able to assert himself and his views over the FBI. Indeed, at one point he himself acknowledged that he did not know whether or not the bureau was currently engaged in burglaries.

President-elect Carter used some of his toughest campaign language against Kelley, and his acceptance of minor personal services from the FBI. Though Carter has not said he would fire Kelley, it is common knowledge that associates of the President-elect are conducting an active search for a new FBI director. Indeed, several leading candidates—including former Asst. Atty. Gen. John Doar, and Tom Bradley, the black mayor of Los Angeles—have already emerged. So if Kelley doesn't jump, he is certain to be pushed.

Professionals

No doubt the three cases are not entirely similar. Unlike Bush, an outsider who has not come under criticism for the CIA misdeeds, Gen. Brown and Kelley are professionals in military and police work. They are under fire, and apparently feel the need for vindication.

But personal self-indulgence cannot apply to positions as sensitive as the leadership of the Joint Chiefs and the FBI. What applies especially—as partisans of the bureau and the professional military are the first to insist—is honor. The honorable thing is to do the selfless deed of resignation so that new men can get on with the necessary job of rebuilding institutions vital to the national health.

A Different Cup of Tea Leaves

By C. L. Sulzberger

LONDON.—More than nine years ago, on a visit to Montevideo, I wrote: "Contemporary England... might well take a long southwesterly look at Uruguay while murmuring: 'There but for the grace of God go I.' For Uruguay is the welfare state gone wild... The system maximizes rights of the citizen and minimizes his obligations... Pragmatic socialism knows that charity costs money—and now the bill has been presented."

It is absurd in many respects to compare with a small, young South American state the remarkable British nation which long ago established successful democracy and one of the mightiest empires ever known. But the habit has tempted others.

Just last month, Prof. Milton Friedman, the Nobel Prize economist, singled out Chile (first under Allende and then under the subsequent military junta) as "highly relevant" and added: "That's the road Britain is going down."

'British Disease'

One symptom of what Friedman calls the "British disease" was detected long ago by French President de Gaulle who, while keeping Britain out of the European community, remarked that its workers had become "lazy."

Any imperial agglomeration creates in its center economic structures that become disadvantageous when its colonial domains are lost. The pattern of home manufacture linked to raw materials abroad soon gets distorted.

Moreover, even if old "class" systems are dislodged as new power groups move in to control, this does not mean automatic establishment of equality among all. As Vilfredo Pareto wrote 75 years ago: "It will merely be one form of the class struggle that has disappeared, and it will be replaced by others."

To some extent this is discernible in Britain. While old aristocrats who won battles or governed colonies abroad sell off their possessions and grumble about incipient poverty, many trade union leaders display nouveau riche appetites and seek to accrue (at least in a political sense) some of the premises they considered outmoded when pertaining to those dislodged.

Union Power

At the same time the impetus of applied power seems to be shifting away from the legislative and executive branches toward the feistier unions. But one does not yet detect adequate awareness of this shift. There is less worry about profound reality than about superficial symptoms such as a hitherto minor infiltration of disorganized Marxist elements on the fringe of the altering political structure.

The present Labor government is gravely aware that national productivity is lower than it should be, that British enterprises (private as well as nationalized) suffer from over-manning, that much management is inferior, and that the gross output is unsatisfactory because (as one Cabinet minister confesses) "too many workers are always standing by idle."

These fundamentals are recognized not only by an angry opposition, hovering on the brink of possible return to power, but also by many Labor leaders, opponents, probably within its widely regarded as considerably next 12 months.

Egalitarian Goal

No doubt the Labor regime has exaggerated on its rush toward a fancied egalitarian goal, both social and economic, and here we can reach back to Tocqueville's prediction that "equality singularly facilitates, extends and secures the influence of the central power."

When the limits of egalitarianism are exceeded, a nation is threatened either by chaos (such as came to Uruguay with the Tupamaros terrorists or to Chile with the Miristas Allende couldn't control); or by dictatorship such as that applied by Moscow so cynically in the name of a muted proletariat.

Stalin once assured De Gaulle that the dominant factor in which men could be brought to achieve things was fear. The general disagreed and said it was ambition. The British character, shaped and expressed over long historical periods, is not given either to accepting fear to produce compliance or to exerting it as a political method. The British character is, however, given to encouraging volunteers, talent and ambition by incentive.

Stimulus of such inherent aspects of these remarkable people cannot be accomplished by stop-gap measures or mini-budgets or panhandling abroad; only by wise analysis and inspired leadership. There is still time for the existing government to acknowledge this quintessential fact. If it doesn't, it is probably doomed to be replaced by those to the left of Prime Minister Callaghan. Furthermore, I don't think the answer can be oversimplified by monetarists like Friedman, who forecasts: "Within the next five years British freedom and democracy, as we have seen it, will be destroyed."

Letters

France's Future

It seems to me now that the parties of the left are gathering momentum in their bid to take over from the present French government; we should try and understand what is at stake.

Governments do not provide enterprise, they provide controls. The example of Socialist governments throughout Europe has shown this. Socialism means high costs, inefficiency, the constant intrusion of political considerations, the damping down of enterprise, the overlordship of routine. None of these elements can produce real progress, and without progress security will turn out to be a delusion.

Increasing production demands increasing markets. Increasing markets can be won if production of commodities is both good and cheap. It is often forgotten that cheap production depends upon effort and efficiency, not upon wage cutting. High wages and high production are natural allies.

Do we want a Socialist state, with its subordination of the individual to the universal officialdom of government, or are we going to remember that governments are the servants of the people? The real freedoms of a country are to worship, to think, to speak, to choose, to be ambitious, to be independent, to be industrious, to acquire skill, to seek reward. These are the real freedoms, for these are of the essence of the nature of man.

I believe this is what President Giscard d'Estaing is trying to put over to the electorate, and I hope he is successful, as France is one of the few countries where the real freedoms still exist.

NEWSLETTER ON THE SPANISH ECONOMY

Jerez — Xeres — Sherry: A case history of quality control

For many centuries Sherry, a wine endowed with special features and unique qualities, has been produced in southern Spain; apart from its own merits, it is thanks to the commercial ability of the sherry traders that it has acquired a high-ranking place in the world's wine markets. This was followed by an important step that only products graced by a strong individuality can take: that of dispensing with the need to name the product by a distinctive designation to make it recognizable. Soon, it became sufficient to ask for sherry for all the world to understand that a wine of very special characteristics was demanded which could only be produced in the very restricted area from which it takes its name. From that moment onwards, sherry has a double meaning: a place of origin and a name of appellation, a name known throughout the world as Jerez, Xeres, Sherry.

Unfortunately, it is common occurrence that a product enjoying world reputation immediately breeds two kinds of competitors: imitators and adulterators. Both take advantage of the name and prestige surrounding the original product.

To fight against this kind of competition is nothing new in the sherry grower's experience, as the records of the Jerez Wine-Growing Guild of the 18th century testify. On an international level, it is much later (1883) that the Spanish government was to protect "the commercial name and appellation of origin" of products made in the signatory countries.

A few years later, in 1891, the Madrid Agreement was signed; its statutes were revised in Washington in 1911 and ratified in The Hague on November 30, 1925.

A law in force since May 26, 1933 embodied all the principles contained in the aforementioned agreements under a Wine Statute. Definitions were given therein of what must be understood by appellation of origin, and two councils controlling such appellations of origin were established. This legislation protects the appellation Jerez or Sherry, and gives legal existence to the Control Council, first set up in Spain by ministerial order of September 15, 1933 and to its first code approved in January of 1935.

The code has since been slightly altered, though in substance it still remains unchanged. Its purpose is to uphold the characteristics and maintain the high standards of sherry-making, as well as to protect its markets, bearing in mind the interests of both producers and consumers.

Apart from defining the production area and the types of grapes, the code also deals with cultivation methods—in particular, with the pruning which has such a great influence on the quality of the musts produced—and with the vintage. The particular qualities of sherry derive from the conditions of the production area, the varieties of grapes used and the maturing techniques applied. It is therefore compulsory for a wine to bear the Sherry appellation, to have matured in oak casks and undergone the biological (flor) developments, etc., which lend sherry wine its unique taste and flavor. Maturing must take place in the area specified in the code, namely the wine cellars of Jerez, Puerto de Santa María or Sanlúcar de Barrameda: this excludes even other municipalities within the production district.

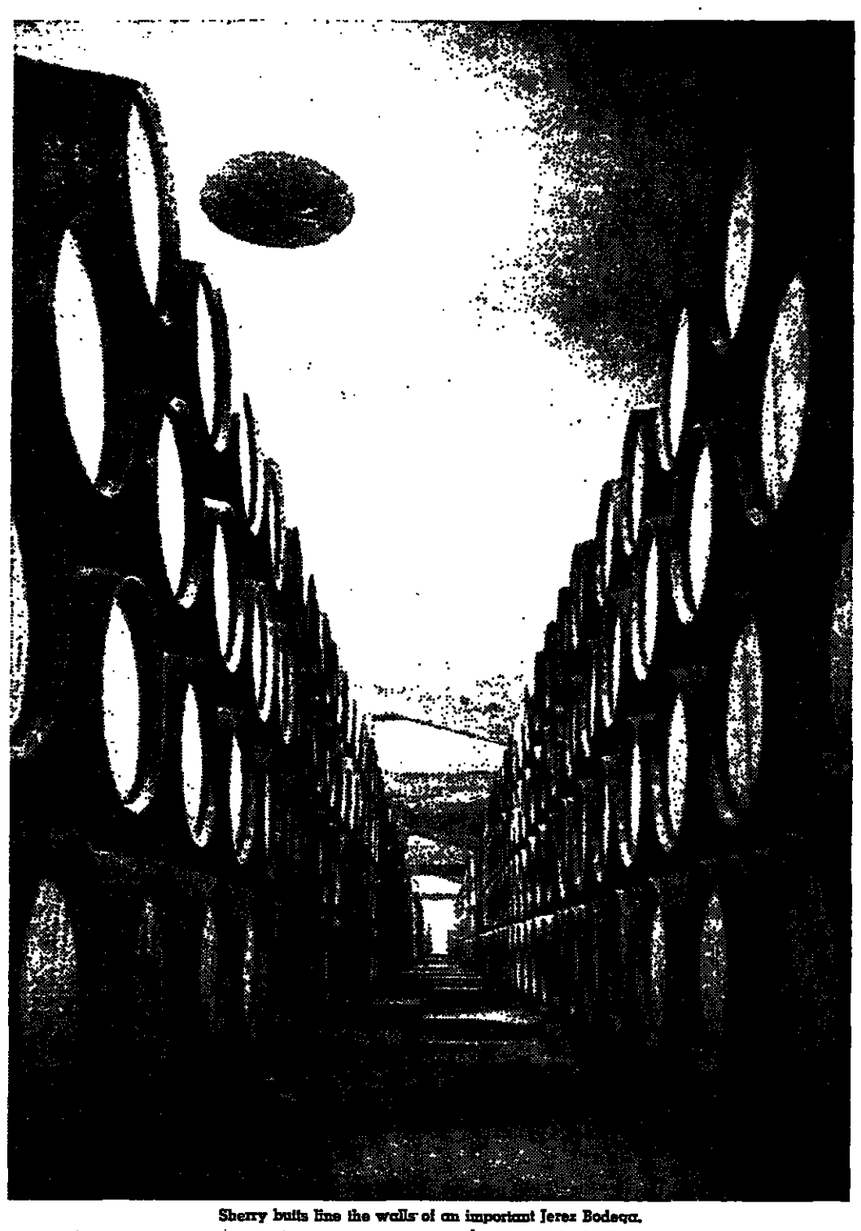
It is not permissible for a wine to be called sherry merely because it originates from a vine of the correct variety grown in the production area; it is also essential that it has been subjected for years to the processes of developing and maturing in the zones defined for the purpose. Only then can a wine bear the Jerez-Xeres-Sherry appellation on its right.

To control all this, an organization is needed, such as the Control Council formed by six members: three representing the vine-growers and three the winemakers and shippers. The president of the Council is the director-engineer of the Viticulture and Oenology Station of Jerez de la Frontera, an agency of the Ministry of Agriculture; the vice-president of the Council is the tive of the Ministry of Commerce.

The Council's activities are very important and include the issuing of certificates and guarantees as evidence of the genuineness of the product.

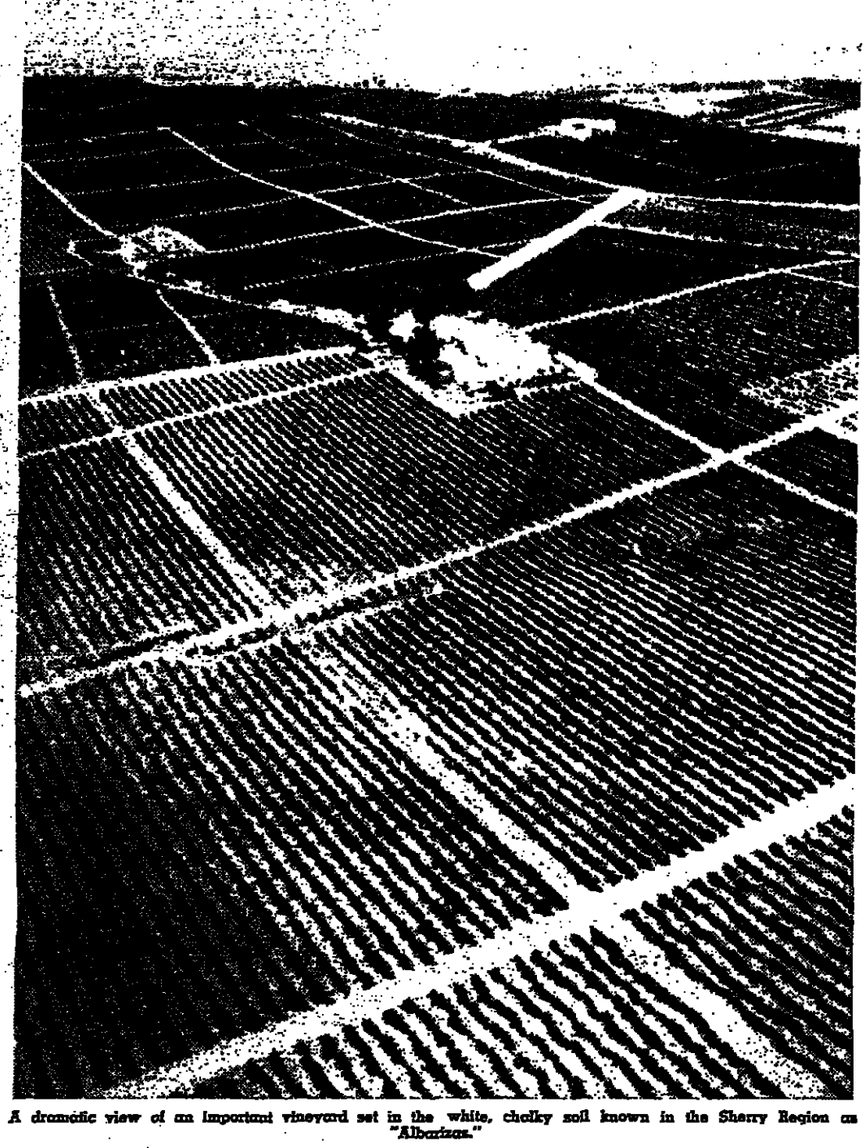
For this purpose, the Council keeps a Vine Record showing the area of the vineyard, the date of planting, the varieties used, etc. The Council provides the classification and specifies whether or not the wine may be regarded as superior sherry quality. There are also Wine-Cellar Records, showing data such as stocks, entries of musts and wines, their origins and quality, as well as outgoings for consumption, either within the country or for another winemaker or shipper.

All wine movement between wine-cellars are recorded and, in each instance, an authorization is provided. This makes it possible to know at any time the situation of each of them. Experienced staff make all the necessary verifications.



Every shipment made to foreign countries is accompanied by a Certificate of Origin guaranteeing the authenticity of the product. All containers or bottles for export must be sealed.

In order to guarantee the authenticity of the product sold as sherry, constant surveillance of the movements in the wine-maturing and production areas must be exercised. For this reason, all wines destined for sherry makers and their cellars must be provided with a Certificate of Origin and destination issued by the Council. The stocks and qualities of each wine cellar are carefully watched and the position and prospects of the wine-making cellars are known at any moment. Outgoings can at no time exceed foreseeable production and must be in keeping with the quantities under processing.



The Control Council also carries out studies on commercialization market surveys, prospects, types of wines most suitable for each market and the means of spreading sales in every market, especially in places where sherry is less well known.

If the Council is out to defend the standard of the wine in its production center by banning and penalizing all operations detrimental to its authenticity and harmful to its quality, it is also natural that it gives preference to its appellation throughout the world, and that it endeavors by every means to restrict its use to the genuine product.

These are, in short, the principal activities carried out by the Control Council for the Jerez-Xeres-Sherry and Manzanilla - Sanlúcar de Barrameda appellations of origin. It has thus contributed to the fact that genuine sherry has become known and distinguishable all over the world, defended the rights of appellation of origin and taken care that the quality of the wine is preserved because this has always been, and still is, the best defense against its many imitators.

Sherry butts line the walls of an important Jerez Bodega.

A dramatic view of an important vineyard set in the white, chalky soil known in the Sherry Region as "Albarizas."

SHERRY— A WINE FOR ALL SEASONS But particularly for Christmas

For many years, sherry has been considered the perfect gift for almost all occasions. Whether one is invited in town or to the country, there are still few gifts as genuinely appreciated by "mine host." A well chosen bottle of sherry fills the bill ideally for so many different people.

The secret is to choose carefully, relating the character of the wine to the person who will be receiving it. And you can always ask your wine merchant's advice.

MANZANILLA— for Uncle George

A pale, light and aromatic wine produced only at Sanlúcar de Barrameda, where the sea air helps provide its unique dryness.

FINO—for Brother Rupert

A specially fragrant wine, the fino is very dry and easily recognized by its pale topaz color and pungent yet delicate almond-like aroma.

AMONTILLADO—for Dad.

A stronger wine whose alcoholic content can go as high as 24 per cent, the amontillados are amber in tone, mild and dry. The characteristic almost hazel nut aroma becomes stronger with aging.

OLOROSO—for Grandpa

A full bodied aromatic wine, dark golden in color, comes either dry or slightly sweet.

PEDRO XIMENEZ—For one's favorite Great Aunt.

An exquisite dessert wine, rich and velvety smooth. The extra sweetness is obtained by exposing the grapes longer to the sun, thus reducing the water-to-sugar ratio.

Perhaps one of the principal reasons for the popularity of sherry as a gift is that one need not face the traditional dilemma of choosing "the right year." In developing five basic varieties of sherry described above, the growers have, through a system unique to sherry wines known as the Solera system, eliminated that problem.

THE SOLERA SYSTEM

The fact that wines of such high quality and international acceptance have no vintage years has been a constant source of surprise to the wine connoisseur.

The truth is that all sherries are the product of many harvests, all containing some of the oldest wine in the bodega.

The new wine, once fermented, is sorted into categories and placed in oak casks which line the walls of many bodegas in groups three and four levels high, known as Soleras. After a minimum of three years, the new wine goes into the top level of the solera, closest to its particular characteristics. The wine is gradually filtered down through the bottom tier, acquiring level by level the character and quality of the older wines. When it is finally drawn off from the lowest level, it is finely blended, fully matured and carries the taste of the "mother" wine, in many cases, the original sherry produced by that bodega; in many cases, well over a century ago.

It is thanks to the solera system that sherry in recent years has managed to meet growing demand, while maintaining its traditional high standard.

Soon, with the season of giving fast approaching, wine merchants will be receiving more and more orders for sherry, for it is only logical that Christmas celebrations all over the world should be blessed by the special glow which only sherry, that unique Spanish wine, can provide.

SHERRY IN THE KITCHEN— A touch of class.

Sherry has been recognized through the centuries as an elegant drink, a warming drink, a heart-warming drink. But, although it has won its fame internationally as a beverage, sherry has long been recognized as adding a touch of class to many of our favorite dishes. Probably best known for its use in desserts, such as trifles, sherry is in fact a very versatile ingredient. There are many meat, poultry, seafood and vegetable dishes which owe their special flavor, and above all, their richness, to sherry.

GAZPACHO:

1 clove garlic, 1/2 teaspoon salt, 2 tablespoons olive oil, 5 ripe tomatoes, 1 onion, 1 wineglass sherry, 1/4 teaspoon pepper, 1/4 teaspoon paprika, 1 1/2 tablespoons vinegar, 1 1/2 cups cold water or bouillon, 1/4 cup dry breadcrumbs.

Crush the garlic and salt together. Add the olive oil, the sliced tomatoes, the onion, chopped and peeled, the pepper, paprika, vinegar and water or bouillon. Leave for an hour. Crush through a coarse strainer. Add the sherry and breadcrumbs. Pour into four soup bowls, adding an ice cube to each. Sprinkle each bowl with chopped cucumbers and finely chopped green pepper.

VEAL WITH SHERRY:

450 grams thin veal cutlets, 1 sliced lemon, 1/2 cup flour, 1/2 cup sweet sherry, 50 grams butter, salt, pepper.

Have veal flattened and cut into pieces approximately 10 centimeters square. Toss the veal in the flour, melt the butter in a pan and brown the cutlets quickly. Add the sherry. Cover and simmer over a low flame for about five minutes, or until the meat is tender. Sprinkle with salt and pepper. Serve with slices of lemon. Serves four.

SYLLABUB:

170 grams sugar, 1/2 liter thick cream, 1 tablespoonful concentrated raspberry juice, 1 tablespoonful strained lemon juice, 1 tablespoonful brandy, 140 centiliters sherry.

Stir the sugar into the cream, together with the raspberry juice, the lemon juice, the brandy and the sherry. Whisk until thick and serve in glasses, ungarnished.

And, as every gourmet knows, good cooking stands or falls on the quality of the ingredients used. Make sure that you use real sherry . . . and remember that real sherry comes only from Spain.

Mexico's Peasants Driven to Action By Land Hunger

By John M. Goshko

CULIACAN, Mexico (WP).—Dominating the main road into this provincial capital is a statue of a man on horseback—the heroic-sized stone chiseled into the fierce, moustached features and broad sombrero of a man who became one of the great legends of Mexican history.

Inscribed on the statue's base are the reasons why: "The agrarian reform has been accomplished according to the dreams and ideals of Emiliano Zapata."

It is a simple reminder of how modern Mexico rose out of the decade of bloodshed that began in 1910 when such leaders as Zapata and Pancho Villa led thousands of impoverished peasants in a revolution whose rallying cry was "Land for the landless."

But today, only a few miles from where Zapata's statue stands, the surrounding countryside of the state of Sinaloa has been gripped by a tension and turmoil that seem to mock the sentiments of the inscription.

Sixty-six years after the revolution, Mexico has been given an unsettling reminder that its agrarian reform—the most radical attempted in Latin America—still has not solved the problem of the 4 million peons who earn their living from the soil but who possess no land of their own.

The fires of land hunger were rekindled a month ago when former President Luis Echeverria, in one of his last acts before leaving office, ordered the expropriation on behalf of the peasants of 100,000 hectares of farmland in the State of Sonora, to the north of Sinaloa.

Chain Reaction

Mr. Echeverria's controversial move touched off a chain reaction that since has seen thousands of other peasants and migrant workers seize vast tracts of privately owned land in this fertile northwestern farm belt stretching through Sinaloa and Sonora to the U.S. border. The region is the most productive in Mexico and its principal business is the growing of winter vegetables for export to the United States.

Squatting in primitive tar-paper tents thrown up amid the partly plowed fields, the invaders announced defiantly that they considered the land theirs and would resist by force any efforts to move them off.

Mexico's new President, Jose Lopez Portillo, who took office Dec. 1, immediately faced crisis that could shatter the country's political stability and do irreparable harm to the already ailing Mexican economy.

At its root, however, the problem that Mr. Lopez Portillo must address is a human one—the polarization between Mexico's haves and have-nots and the differing perceptions they bring to their own needs and to those of their country.

This human drama can be seen 40 miles from Culiacan at a poultry farm run by Jorge Kando, 29, a chemical engineer who gave up a job with the state government to devote himself to the production of chickens and eggs. The farm consists of 130 hectares and represents the jointly run holdings of Mr. Kando, his mother and his married sister.

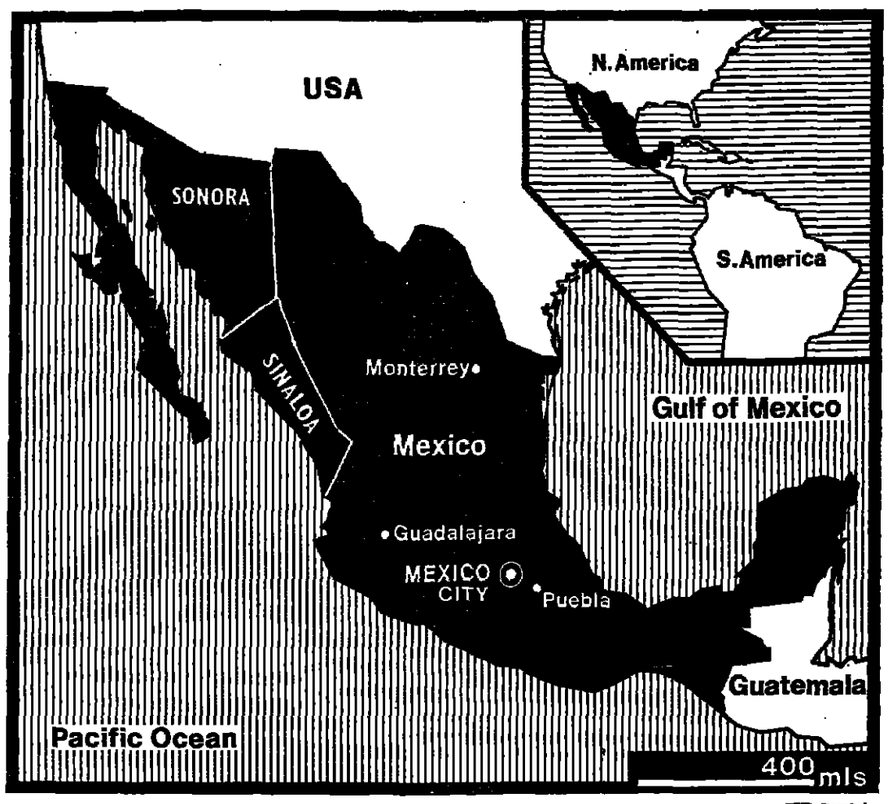
A Good Farm

"It's a good farm but it doesn't exactly make me a feudal lord with lands stretching as far as the eye can see," he said.

"We do well here. We make money. But we do it by working long, hard days—14 hours or more—with your clothes reeking from the stench of the hen houses."

At present, though, Mr. Kando's work day has been forcibly curtailed. He spends much time outside the farm's brick hen houses staring morosely across a narrow dirt road at the fields on the other side.

The 36 hectares lying there are part of the Kando farm and normally they are used to plant sorghum for chicken feed. For the last two weeks, however, they have been occupied by a group of squatters, whose makeshift camp sits under the Mexican flag about 1,000 meters from Mr. Kando's hen houses.



The camp's occupants are all males, ranging in age from a wizened man of 64, who looks more like 80, to boys of 11. They have come from several parts of the surrounding countryside and they have left their wives and mothers at home to care for smaller children.

During the day, they seed the fields with corn, pointing proudly to the tiny stalk tips that in a few places have started to push above the ground. At night, they huddle around a slow-burning log fire, eating the beans and tamales brought to them daily by their women and feeding the scraps to a swarm of mongrel dogs.

The men say that they have no leader—that all are equal. But whenever a problem arises, they seem to turn instinctively to a heavy-set, gray-moustached man of 44 named Mauricio Arayano. He has worked as a farm hand in the area all his life and has left a wife and four children on the big farm where he was employed before joining the land take-over.

Jose Lopez Portillo

INT/Gemini

"All our lives we have been told that we have a right to the land—that our fathers fought in the revolution to give us that right," he said. "But we never got the land—only promises and stories about how we should be patient.

"Now we have no more patience. We know that the law gives us the right to take this land, because it is more than the old owner is entitled to. Nothing can make us leave. We're going to stay here and work this land for ourselves and our families."

To travel throughout Sinaloa and Sonora is to see the same scene replayed almost word for word in dozens of other places. Always, there are the landowners and the squatters, eyeing each other warily across the fences of the disputed fields and arguing that right and justice are on their side.

Underlying their dispute is the complex agrarian-reform law that was born out of the revolution with the aim of freeing the peons forever from serfdom on the estates of great landholders.

Peasant Communes

To accomplish this, the law established as the main element of Mexican agriculture the *ejido*—a land-tenure system that brings groups of 20 to 30 farming families together in a commune. Although the *ejido's* land is communally owned, each member theoretically has approximately 14 to 16 hectares to farm as his own.

The law also allows for privately owned farms but, in areas requiring irrigation, no individual can own more than 100 hectares. It is this limitation that precipitated the current struggle over who has a right to the occupied lands.

The peasants and their supporters charge that many landowners have circumvented the law by putting together huge estates and disguising their ownership under the names of relatives who do not work the land.

There is no question that such abuses have taken place. For example, the 100,000 hectares in Sonora that Mr. Echeverria ordered confiscated had been owned by only 74 families.

However, what troubles many who are concerned with Mexico's agricultural future is how farms such as those run by Mr. Kando fit into this equation. As he pointed out:

"It's natural for brothers or cousins to pool their resources and farm their land jointly. You can get better yields, you have more capital for investment, you are more efficient and more productive in every respect. But, precisely because you are successful, they point the finger at you and say you are breaking the law and must give up some of your land.

"It is no solution to keep breaking up the land into ever smaller parcels. That flies in the face of everything that makes sense. If we do that, we will destroy Mexican agriculture forever."

Private Owners

There is an enormous element of truth in what he says. Although the land distribution has placed by far the greatest acreage in the hands of the *ejidos*, it is the privately owned farms that account for the major share of Mexico's agricultural production.

Here in Sinaloa, for example, 77 per cent of the farm land is controlled by *ejidos* and 23 per cent by private owners. Yet the private farms produce 66 per cent of the total value of crops grown in the state.

The state's most lucrative agricultural business is growing winter vegetables and fruits, and last year Sinaloa exported $200 million worth to the United States. Every penny's worth came from private farms.

The *ejidos* here are involved almost exclusively in subsistence farming and some minor production of grains and cotton.

These figures are well known to Mr. Lopez Portillo, a former finance minister, and to his new agriculture minister, Jorge Rojo Luko. Faced with an adverse balance of payments that has placed severe strains on the peso, they would like nothing better than to make Mexico more self-sufficient in farming.

But they also must contend with the very real problems of a population that is growing at the officially estimated rate of 3.5 per cent annually, that is still largely rural and that clings with mystical devotion to the revolution's promise of land for the peasantry.

No Official Solution

So far, the new government has given only the vaguest hints of how it will approach the problem. It has talked of making all farming more efficient, it has reaffirmed that it will not tolerate big estates and it has said that it will protect legitimate private owners from invasions.

In the main, however, it has asked for time, patience and understanding. Recently the principal peasant organization here in Sinaloa announced that, as a gesture of faith in Mr. Lopez Portillo, it would ask its members to abandon their seized property and wait for the courts and government to sort out the tangled questions of ownership.

It was not immediately clear whether the squatters would follow the advice of their leaders. The general impression, however, was that most of them would, and that there will be a gradual exodus of squatters from the occupied lands.

But the basic problem will remain. Unless the government quickly finds some way of translating its vague promises into effective action, it will not be long before the Jorge Kandos and Mauricio Arayanos of the Mexican countryside again find themselves facing each other across the disputed earth.

Qadhafi Adjusts His Tactics But Holds to His Objectives

By Thomas W. Lippman

TRIPOLI, Libya (WP).—Col. Moamer Qadhafi, the ruler of Libya and the odd man out in the Middle East, is a mercurial zealot who is perhaps the reigning champion at outraging other heads of state.

It is seven years since he came to power. He cuts a dashing figure and charms visitors with his famous grin. But, at 34, the boyishness is maturing.

It appears that Col. Qadhafi is learning that the world is not quite as simple, the issues not quite as clear-cut, as he once thought.

Nevertheless, he remains an absolutist in a world of compromisers who are uncomfortable with his willingness to act impetuously on his beliefs and to ignore international conventions.

His objectives, in the opinion of informed Libyan and foreign sources, are unchanged—the union of the Arabs in a powerful Islamic state, the destruction of Israel and the return of the Palestinians to their homeland, the elimination of great-power dominance from the region and prosperity for the Arab masses. His government continues to proclaim its support of insurgencies and liberation movements and to promote the spread of the Moslem religion.

Changed Approach

What appears to be evolving is the approach; the methods by which he goes after his goals have become more complex.

"Basically, he hasn't changed," said an experienced diplomatic analyst here, expressing a widely held view. "But he has learned tactics. He has learned to be devious. It all seemed so simple when he took over. The Arabs would unite under the banner of Islam, sweep Israel away and bring back the Palestinians. He's learned it's not so simple and he's becoming more of a pragmatist."

The colonel has won enormous popularity by spending Libya's oil billions to bring the people things that were always beyond their reach—housing, schools, hospitals, electricity.

By all accounts, he has bolstered his image by adopting the kind of life he has decreed for the Libyan people. His Moslem fundamentalism and Arab nationalism have long since cleared Libya of alcohol, night life and any signs or markers in languages other than Arabic. He frowns on the displays of personal wealth that are common in the rich countries of the Arabian Peninsula. Aside from an extensive wardrobe that now includes continental suits and cloaks as well as his jaunty uniforms, Col. Qadhafi lives an austere life.

The periodic resignations and retreats into the desert by which he used to manipulate popular sentiment when he was challenged are things of the past. Now he flashes around Libya, dedicating roads and schools, giving the impression of inexhaustible energy and enjoying the popular acclaim.

Col. Qadhafi has not fared as well in his dealings with other nations, however, and he is revising his approach to them. According to sources here and in Cairo, he found himself frustrated by the repeated failures of his attempts to merge with other Arab nations, uncomprehending of the willingness of some Arabs to accept the existence of Israel and nervous over the hostility he caused among virtually all neighboring states.

New Methods

His methods were isolating him and his country in potentially dangerous ways, so he is trying some new ones.

Although still not beyond the use of force or intimidation if he thinks he can get away with it, as in the brazen seizure of a uranium-rich strip of neighboring Chad, Col. Qadhafi now turns more and more to methods he disdained in the past—diplomacy, flattery, cajolery and public relations.

The Qadhafi who sent thousans of Libyans on a march toward Cairo to demand that President Anwar Sadat agree to an immediate merger has given way to a Qadhafi who stockpiles more sophisticated weapons than he could possibly operate to use as bargaining chips.

This trend toward more orthodox methods is reflected, analysts here and in Cairo say, in his recent overtures toward a reconciliation with Mr. Sadat, a patching up of relations with Tunisia and Libyan acquiescence in the Lebanon peace formula adopted by last month's Arab summit conference.

It can also be seen in Col. Qadhafi's public disavowals of terrorism and air piracy, which Libya is universally believed to have fostered in the past.

Considerable skepticism in diplomatic circles here has greeted his professed desire for better relations with Egypt, the United States and Britain. All reportedly question the sincerity of his disavowal of terrorism.

The Libyan leader has told recent interviewers, however, that his country has been blamed for several terrorist incidents with which it was not connected.

With annual oil revenues of about $8 billion for a country of only about 2 million inhabitants, Col. Qadhafi can also spend freely to promote his ideas abroad. Independent experts here say that hundreds of millions of dollars are apparently being spent to finance weapons purchases, subversion and political activity.

It is widely believed, for example, that he has promised leftist Prime Minister Dom Mintoff of Malta to make up much of the $80 million in annual revenue that Malta will lose if it shuts down NATO bases. Col. Qadhafi got rid of foreign military bases in his own country and would like to see them ousted from other states of the region as well.

To spread Islam's message, Col. Qadhafi has financed universities, clinics, mosques and missionary work in several countries, a Libyan official said.

Thus, the colonel uses whatever means seem practicable to promote aims that he used to believe were so reasonable that everyone would adopt them upon hearing about them.

Mohammed Hassanein Heikal, who was minister of information in Egypt under Col. Qadhafi's boyhood hero, the late President Nasser, recalls in his book, "The Road to Ramadan," that he was dispatched to Libya the day after the 1969 coup to find what kind of man Col. Qadhafi was.

The Libyan said to him, "Tell President Nasser we made this revolution for him. He can take everything of ours and add it to the rest of the Arab world's resources to be used for the battle." He was, Mr. Heikal told Nasser, "shockingly innocent—scandalously pure."

Active as an Arab nationalist even in high school, Col. Qadhafi is said to have declined a scholarship to study abroad so that he could enter Libya's military academy, believing that the army was the base from which he could lead a revolution that would turn out the corrupt and complaisant monarchy of King Idris. He was right.

His only exposure to the Western world was a stint of several months spent at a military training course in Britain in 1966. By all accounts, he did not like what he saw.

There is no doubt that he has transformed Libya, a poverty-stricken cat's paw of the Western powers less than a decade ago, into a benevolent welfare state, empty of foreign troops and cultural influences, whose people are prospering.

It is Qadhafi the pragmatic politician, not Qadhafi the flaming zealot, who allows some foreign oil companies to continue operating in Libya, who tolerates corruption and excess among indispensable associates and uses his knowledge of it to keep them in line, who acceded at the last minute to a Palestinian request that Libya participate in the Arab summit meeting.

He has purchased huge amounts of Soviet arms and has won Soviet backing for his quarrel with Egypt without permitting Moscow the kind of influence it once had over Egypt. He is rigidly anti-Communist, he says, just as he is anti-imperialist and anti-colonialist.

Teeming Bombay Is Debating Growth, Reclamation of Land

By William Borders

BOMBAY (NYT).—Residents of this rapidly growing tropical seaport are engaged in a public debate about the uncertain future of their city.

Bombay, India's commercial center and the only city in South Asia that has a Manhattan-like skyline, is lively and cosmopolitan, with an air of wealth and sophistication rare in this part of the world.

But as a recent seminar of civic leaders concluded in a report called "Whither Bombay," there is also a "crisis in Bombay, deepening each day," as its fetid slums spread, and its mass transport and other public services grow ever more difficult.

The problems of Bombay are typical of those facing cities of the Third World all the way from Lagos to Manila, as backward and primarily rural countries make the leap into 20th-century urban life. In Bombay, as elsewhere, migrants from the farms who came seeking a better life huddle together by the thousands in squalid shacks beside elegant high-rise apartments.

Mrs. Gandhi's View

Prime Minister Indira Gandhi recently described the situation here this way:

"The city is in danger of being overtaken by its problems. Slums, congestion, traffic bottlenecks, pollution and intolerable strains on civic services have become characteristic. These are the consequences of unplanned growth. There is urgent need for a fresh approach."

Bombay, which used to be just a cluster of little islands, has been built up gradually through land reclamation from the Arabian Sea over the 300 years since the king of Portugal gave it to the king of England as a wedding present.

Now a long, narrowing peninsula, with 7 million inhabitants, Bombay is twice as densely populated as New York City. And more and more of the people, both the rich and the poor, want to crowd together into the southern quarter of the peninsula.

One result of the overcrowding is inflation. Annual office rents in the most desirable area, on land reclaimed from the sea only 10 or 20 years ago, have climbed to $10 a square foot, and a two-bedroom apartment on the 20th floor can cost $60,000, a substantial amount in a city where three-fourths of the families get along on less than $75 a month.

Packed Trains

Another result is congestion. In the Third World pattern, it is Bombay's poor, not its rich, who live in the faraway suburbs, and many of them spend two hours or more a day clinging to the sides of the packed commuter trains that converge on the town.

"We simply must reduce this concentration and spread out the centers where people want to live and work," said Charles Correa, an energetic architect who is a prime mover in the campaign to create "New Bombay," a planned city 12 miles away, on the other side of the busy Bombay harbor.

"We must create a polycentered system of regional units, like San Francisco," explained Mr. Correa, who was educated at the University of Michigan and the Massachusetts Institute of Technology. "It's the only solution to the urban problem in the developing world."

In all the debate about what to do about Bombay, the fate of the pieces of marshland in the current reclamation project, a choice few hundred acres called Back Bay, has become a symbol of differing approaches.

Heart of Congestion

Since Back Bay is in the heart of the most congested area of town, some persons favor simply halting its reclamation and leaving it as a bay. But since it is in the midst of high-rise apartments, some other people want to go ahead with the reclamation and give the new land to the poor—the tens of thousands of persons who now sleep on the pavements.

Others want to go ahead and build even more high-priced housing, leaving central Bombay even more a center for the rich. At a dinner party in the elegant Cumballa Hill neighborhood not long ago, such a woman stood by the window of her penthouse apartment, describing the breath-taking view to a foreigner. "It's beautiful at night, like strings and strings of diamonds leading to the sea," she said. "But I don't like it nearly as much in the daytime, because then you can see all the poor people's shacks in between."

Trail of Vengeance Leads to an Ex-Nazi

By William E. Farrell

TEL AVIV (NYT).—For three decades, Haviv Kanaan has worked for and dreamed of the day when a man he admired as a child in Poland, a man who later worked with the Nazis and is accused of having killed Mr. Kanaan's parents, would be brought to justice. Now he believes that day is near.

"Destiny wanted my life and my youth connected in some way with Pieter Menten," Mr. Kanaan, 63, said. A tall, dignified member of the editorial board of the influential newspaper Ha'aretz, Mr. Kanaan, after 32 years of trying, is responsible for the current arrest order for his boyhood hero, Pieter Menten.

Menten, 78, a millionaire art collector who fled the Netherlands a few weeks ago, is now wanted in that country—where he lived for years in dignity and luxury—in connection with the World War II killings of hundreds of Polish Jews.

His victims are said to include Mr. Kanaan's parents and many other members of Mr. Kanaan's family—all of whom knew Menten. When the arrest order was issued, Menten fled to Uster, a Swiss village near Zurich. He was tracked down by journalists who were told the story by a Dutch Jew, Hans Knoop, an editor who began investigating Menten's past after he read an article written by Mr. Kanaan six months ago.

Menten, who has been arrested in Switzerland, is said to have attempted suicide while Swiss authorities consider whether to permit his extradition.

The narrative Mr. Kanaan relates began in the 1910s with a group of rich Polish Jewish provincials living in Lvov, Galicia. The trail of the narrative led in 1944 to an Israeli welfare office, where a survivor from Lvov recognized the journalist. The rest of the story concerns the years during which Mr. Kanaan sought to bring Menten to justice.

According to Mr. Kanaan, Menten and his wife, Elizabeth, came to Lvov in the early 1920s. The young Dutch couple fitted in easily with the merchant Jews, attending their balls, their hunts, their picnics and excursions. Even then, Mr. Kanaan said, Menten had an eye for paintings, goblets, tapestries and the like.

Eventually, Menten became involved in lumber dealings with Isaac Pistiner, Mr. Kanaan's uncle and the head of the large family. A business disagreement between them, the journalist said, led to a feud that resulted in years of court wrangling. Through it all, Mr. Kanaan said, Menten remained on cordial terms with Mr. Kanaan's father, David Krumholz. (Before settling in Palestine in 1935, Mr. Kanaan had borne the name Lieber Krumholz.)

Saying Good-Bye

"In 1935, when I parted from Lvov forever, Menten was one of the friends to whom I went to say good-bye," Mr. Kanaan said. "When I arrived in Palestine, one of my first greeting cards was to Menten."

The young journalist, forging a new life, maintained contact with his parents until Poland was divided in 1939, Lvov going to the Russians. In 1941, the Germans captured it. "Since that day there has not been a single word from my family," Mr. Kanaan said.

One day in 1944, as he waited in a shabby Tel Aviv welfare office for an appointment and stared at the faces of refugees, a gray-haired man, Jacob Loebel, stared at him and said, "Are you from Lvov?"

"I said, 'Yes,'" Mr. Kanaan related as he recalled the scene. "He embraced me and wept bitterly.

No One Is Alive

"'I saw everything,' he said. I asked about my family and no one, he said, was alive—all of them exterminated. 'You know who killed them,' he said. 'Pieter Menten.' This was something I couldn't bear.

"I sat down and memories of childhood flooded me—Pieter Menten, the blond, tall man, and me going hunting and fishing. He was for me the first foreigner of the civilized bright world—the West—in that godforsaken place."

Mr. Kanaan said that Mr. Loebel, who has since died, recounted that members of the Krumholz-Pistiner families were shot on the orders of Menten, who, he said, wore a Nazi officer's uniform. Mr. Kanaan said that Menten was obsessed with finding the Pistiner with whom he had the business falling-out. He never did. Isaac Pistiner died of typhoid while living under an assumed name. Mr. Loebel, Mr. Kanaan recalled, said he had been in hiding during a Nazi pogrom in Lvov. When things quieted down, he had gone out on the street. Mr. Loebel told Mr. Kanaan: "Suddenly there was a shouted: 'Guten Tag, Herr Loebel.' It was Pieter Menten in a German uniform. Menten asked, 'Where is Pistiner? Where is Krumholz?' Loebel said he didn't know."

Shot in the Neck

Mr. Kanaan said: "A day or two later Mr. Menten came and took out my father and mother and brother and since then no one has seen them." He added that Mr. Loebel told him that Menten caught up with two Pistiner sons, Hirsch and Albert, and a son-in-law, Tadeusz Zucker. Mr. Loebel said they were taken to a Catholic cemetery and Menten shot each in the neck. Two of them died instantly.

"It was dusk. Hirsch was severely wounded and crawled to a house and was treated and recovered," Mr. Loebel told Mr. Kanaan. "He lived two years until the gas chamber. And he told people about what had happened."

"Menten was conducting a sadistic vendetta," he said. After the war, Dutch authorities tried Menten on two charges—collaborating with the Germans in Poland and stealing the art collection and furniture of a Lvov professor. He received an eight-month sentence, which he had served during his pretrial imprisonment.

Article Is Mailed

The record of Menten's trial and clippings about it vanished into archives. Then, last June, an article appeared in the Dutch press on Menten. It extolled his humanitarianism, his love of art, his taste for the good life. The rare interview was later said to have been given to get publicity for an impending auction of some of Menten's art objects.

Henrietta Boas, a correspondent for Ha'aretz in the Netherlands, mailed the clipping to Mr. Kanaan. It was more than he could bear. He wrote an article for Ha'aretz on "The Two Faces of Pieter Menten," listing the growing number of accusations of murder and genocide in Galician villages.

His article was read in the Netherlands by Hans Knoop, editor of the weekly Accent. The two spent hours on the telephone. Eventually many Dutch publications became interested.

The case grew. New witnesses began to appear. Graves were exhumed. There was a public clamor for an official investigation. Dutch police interviewed survivors in Israel and in New York.

A Rotterdam newspaper, Het Vrije Volk, called Mr. Kanaan and said it would print a story he had written about Menten in 1951 that the newspaper had been too timid to run.

"Menten denied there was anyone such as this Kanaan," Mr. Kanaan said. He paused for a long time so that his voice was measured and even and said, "There is a Kanaan and he wants justice."

10 Years for Corsican In U.S. Drug Case

NEW YORK, Dec. 19 (UPI).—Dominique Orsini, the 54-year-old Corsican accused by U.S. prosecutors of being the principal figure in an international drug-smuggling ring, has been sentenced to 10 years in prison.

U.S. authorities said that between 1968 and 1972, Orsini's ring brought to the United States from France a ton of heroin and cocaine worth about $75 million on the street. Orsini had pleaded guilty.

Euromarket

'Buying Spree' Sharply Boosts The Prices of Most Eurobonds

By Carl Gewirtz

PARIS, Dec. 19 (IHT).—Prices of most Eurobonds rose sharply last week as investors went on what a major trading house called a "hysterical buying spree." Issues by top-quality U.S. firms rose as much as $15 during the week and gains of up to $8 were common in other quality issues. The news of Saudi Arabia's split with other members of the oil cartel over pricing fueled the rally late Friday.

In fact, however, the buying began early in the week, before the news about the oil-price situation. The motivating force, analysts reported, was the expectation that short-term interest rates would decline further and nudge lower the coupons offered on bonds.

Two other elements buoyed the market: the absence of any new issues, which left investors eager to place their money before rates decline—nowhere to go but the secondary market; and the absence of big sellers clearing their inventories of bonds for their year-end "window dressing."

Estimates Vary

Estimates of how much banks have in inventory vary widely, but it had been anticipated that the banks would not want to show such holdings in their year-end reports and would be big sellers in the final weeks of the year. That this has not happened offers no insight into how much the banks may actually be holding. But it does indicate that, with commercial loan demand still weak and with rates expected to head lower, banks continue to find the bond market one of the most profitable outlets for their idle resources.

Nevertheless, investors are wary of this "overhang"—reportedly concentrated in paper with maturities of five years or less—and the disarray that could occur in the prices of these bonds if and when the banks do begin to move out of the market. To protect themselves against this feared whirlwind, individual investors are reportedly concentrating their buying in longer-term issues. This strategy is especially attractive as the coupons on such issues are looking particularly "juicy" in the present situation.

It was this combination, bankers say, that explains the very heavy demand for the long-term paper of Hamersely Holdings. Its $40 million of 15-year bonds carrying a coupon of 9 1/2 per cent were sold at par and the demand far outstripped that for the companion $40-million, seven-year notes carrying a coupon of 8 1/2 per cent, which also were sold at par.

Coupon alone, however, is no sure ticket to success. Brazil sold $75 million in seven-year notes at a discount of 99 with a coupon of 9 1/2 per cent, but investors were reluctant to buy the paper of so heavily indebted a developing nation. The bonds are expected to open trading at about 97.

The lower 8 1/2-per-cent coupon offered on the $80-million, 15-year loan for Norges Kommunalbank did not discourage investors. Priced at 99 1/2, they were quoted at 98 1/2 bid-99 1/4 asked.

Norway itself is expected to be in the market early next year with a five-year loan that may carry a coupon of 7 per cent.

Stockholm, which has just been classed triple-A by the U.S. rating agencies, is still undecided on whether to launch its $60-million issue there or in the Eurobond market. And Venezuela, which is in the process of being rated (triple-A is expected), will float sizable issues in both markets. The Eurobond is expected to be first—probaby for $100 million, larger if demand warrants—on the theory that better terms can be had here and these will enhance its negotiations in the New York market.

While coupons remain to be set, bankers surely have their eyes focused on the recent issue for Dow Chemical. The company's paper in the past has been rated double-A in the United States, but European investors are awarding it superstar status—a function of the paucity of U.S. corporate borrowers now tapping this market. Dow's recent 10-year paper carrying a coupon of 8 per cent is currently trading at 102 1/2-103, for a yield of 7.6 per cent.

Other borrowers expected in the avalanche of issues rumored to be set for next month are Sumitomo Heavy Industries, the

(Continued on Page 13.) Col. 6)

U.S. Commodities

CHICAGO, Dec. 19 (AP-DJ).—Soybean, soybean meal and oil futures, all gainers the preceding three weeks, came under largely speculative selling last week and closed sharply lower, carrying other commodities along.

The available outside news which the trade watched for hints to buy or sell was largely bearish. Export commitments were fair, inspections for export also were only fair. Sales to foreign countries were sporadic and competitor countries in wheat and soybeans made sales to nominally U.S. customers. The latter influenced additional selling.

Also, the U.S. Agriculture Department commented that Russia probably has bought all the grain required for this season. Another selling factor was an estimate by the department that world small grain production this season was higher, as of the end of October, than a month earlier—well over 1 billion tons.

When trade had ended for the week, soybeans were down 15 1/2 to 30 cents a bushel, January 6.77; soybean meal lost 3.00 to 5.80 (dollars per ton) December 195.20; soybean oil was 50 to 93 points lower (nearly 1 cent a pound) December 20.60; wheat was 5 1/4 to 6 3/4 cents a bushel lower, December 2.56 3/4; corn was 3 1/4 to 4 1/2 lower, December 2.40; oats were 1 1/2 lower to 2 higher, December 1.70; and iced broilers were 35 points lower to 30 higher, January 36.50.

Live hog futures advanced $3.17 per hundredweight while pork belly futures gained up to 362 points. Live cattle futures closed the week steady to 22 cents per hundredweight lower. Shell eggs were mixed, closing 100 points lower to 195 points higher.

The biggest gain in hog futures was in the expiring December delivery which rose to a five-month high at $40.50. The lack of tenders against the delivery, a sound cash market and lighter receipts contributed to the bullish thinking. A firm wholesale market, fewer hog slaughterings and firm hog prices tended to influence pork belly futures buying.

The large numbers of cattle on feed disappointed some bulls in the market and sellers took over in greater numbers, sending live cattle futures lower. The run-up in hog prices and modest marketings tended to influence buyers.

The U.S. Economic Scene

Business 'Pause' Seems Over as Indexes Rise

By Thomas E. Mullaney

NEW YORK, Dec. 19 (NYT).—President-elect Jimmy Carter, the nation and the world will not be getting one big gift they had all been coveting—but not really expecting—this year. But they may well be seeing a different and more important Christmas present under their trees next weekend.

The disappointment lies in the decision of the oil-producing nations to raise prices again. The divisiveness among the oil ministers at last week's meeting in Qatar had sparked some hopes that no price increase would emanate from the discussions at this time, and that, of course, would have been a precious present at this time for the industrialized and developing worlds alike.

However, after torturous negotiations, the oil cartel surprisingly announced late in the week that it had agreed on a new two-tiered price rise for its essential commodity. For the next six months, prices charged by Saudi Arabia and Abu Dhabi, which account for one-third of the Organization of Petroleum Exporting Countries' production, will go up by 5 per cent, while prices charged by the 11 other members of the cartel will go up by 10 per cent.

The only reasons for cheer at all over that outcome were the realization that the increase was not larger than it was; the fact that the cartel was not able to resolve a basic quarrel for the first time and the hope that the higher prices might not prevail very long since the Saudis, the major producer, indicated they would step up their output.

A Better Decision

An observer said that the decision, disappointing as it was, might have been better than a unanimous agreement to continue a freeze because that might have preserved a solidarity in the cartel that would have led to greater increases later on.

The disappointment over imminently higher prices for petroleum products aside, the world will have reason for elation in another area when it is realized that the troublesome summer-fall "pause" in business activity in this country appears to have ended at last. A rising economy in the United States, of course, bears favorable implications for many other lands.

There has been no general perception as yet of the improving tone in economic conditions here, but it will be known once the analysts begin peeking under the wrappings. Economist Irwin Kellner of the Manufacturers Hanover Trust Co., one of the first to discern the slowdown that was coming earlier this year, has now turned much more optimistic, stating flatly that "the pause is over." Henry Kaufman, a partner in Salomon Brothers, also said he believed "we are past the lull in economic activity, and we are starting the new year in better condition for our financial system than at the start of the last three or four years."

Upbeat Statistics

Some hints of a turn in the economy came last week in the government's monthly reports on increased industrial production and personal income, as well as in its revisions on the leading economic indicators for recent months. These seemed to offset the only slightly downbeat statistic, the housing figures for November.

The most convincing item was certainly the disclosure that industrial production in the United States rose by a particularly vigorous 1.2 per cent in November to a new peak of 132 per cent of the 1967 average—fractionally above the previous high in June, 1974. That strong gain reversed two months of moderate 0.4 and 0.3-per-cent declines. The strength was pervasive among consumer goods, business equipment and nondurable materials.

The better-than-expected report on industrial production explains the improved employment figures and personal income for November—factors that may have an important bearing on the trend of retail sales at this Christmas season. While the unemployment rate was rising to 8.1 per cent last week under the enduring influence of continued growth in the labor force, the total number of people at work was still showing impressive gains. The month's gain in jobholders was 350,000.

Thus, since the end of the recession in April, 1975, there have

Continued on Page 13, Col. 5)

New York Stock Market

NEW YORK, Dec. 19 (NYT).—Stock prices posted a moderate advance last week as investors were buoyed by hopes that the Organization of Petroleum Exporting Countries would increase oil prices only moderately.

Reflecting the market's moderate strength, the Dow Jones industrial average closed up 5.91 points at 979.06. Few issues made sharp moves last week, with most price changes limited to less than a point. During most of the week, the market responded favorably to reports that the OPEC meeting in Qatar, last week would raise oil prices no more than about 10 per cent, a level that Wall Street felt would be tolerable.

Late Thursday, OPEC's 13 member states agreed to a two-tiered increase for six months for crude oil. Two countries, Saudi Arabia and the United Arab Emirates, said they would increase their petroleum prices only 5 per cent, while the 11 other countries in OPEC will boost prices 10 per cent.

Initial reaction to the price increase on Wall Street seemed mostly favorable. Analysts noted that the price increase for oil would likely be held to an average of around 8.5 per cent and realistically might amount to only 5 per cent as a result of the split.

Also helping the market last week were indications that the Federal Reserve was acting to bring down interest rates. Lower interest rates help strengthen the economy by making business loans cheaper. They also lower the yields on bonds, thus making stocks relatively more attractive.

One of the most actively traded issues last week was American Telephone & Telegraph, which closed Friday at 63 3/8 after hitting 64 3/4—its highest price in a decade—earlier in the week.

In the credit markets, bond prices edged slightly lower on profit-taking following their recent sharp advances.

NEW YORK (AP) — Weekly Over the counter stocks giving the high, low and last bid prices for the week with the net change from the previous week's last bid prices. All quotations supplied by the National Association of Securities Dealers Inc., are not actual transactions but are representative interdealer prices at which these securities could have been sold. Prices do not include retail markup, markdown or commission.

INTERMARKET FUND ONE

Société Anonyme
Registered Office:
11 Bld. Grande-Duchesse Charlotte,
LUXEMBOURG
R.C. Luxembourg - B 7.443

NOTICE TO SHAREHOLDERS

Shareholders are hereby convened to attend an Extraordinary Meeting of Shareholders to be held at the registered office of the Fund, 11 Boulevard Grande-Duchesse Charlotte, Luxembourg, on 29th December, 1976, at 11:30 a.m., with the following agenda:

1) Approval of an amendment of article 5 of the investment advisory agreement between Intermarket Fund One S.A. and Intermarket Management Company Ltd., dated September 10, 1969, to become effective as of January 1, 1977, to read as follows:
"As compensation for its services the fund shall pay the management company the following advisory fee: a) A performance fee of 10% per annum of the increase in its net asset value as computed in accordance with the provisions of article 23 of the articles of incorporation of the fund (exclusive of the performance fee and of the advisory fee described below and of transactions involving sale or repurchase of the fund's own shares) computed and accrued on a weekly basis and payable on the last Thursday of each financial year, provided that no such performance fee shall be paid or accrued as long as there is a negative change in the net asset value from any preceding quarterly evaluation date, and b) An advisory fee of 1% per annum of the average value of the assets under management during each calendar quarter, for this purpose the value of the fund's assets (exclusive of the performance fee and the advisory fee and of transactions involving sale or repurchase of the fund's own shares) shall be computed and accrued on Thursday of each week or, if this be a holiday, on the first business day thereafter, and the advisory fee shall be payable on the last Thursday of each calendar quarter.
Unless advised to the contrary by the management company in writing, this fee shall be paid or credited to the account of the management company in U.S. dollars."
2) Authorization to the board of directors to amend the current explanatory memorandum relating to the issue of shares, dated April 10, 1972, to reflect this change in the description of the investment advisory agreement.
3) Any other business which may properly come before the meeting.

No quorum is required for this meeting and resolutions shall be approved by a simple majority of those present or represented at the meeting.
In order to attend the meeting, holders of bearer shares should deposit their shares on or before 22nd December, 1976, at the registered office of the Fund, with respect to registered shares, proxies should be deposited at the registered office of the Fund on or before 22nd December, 1976.

THE BOARD OF DIRECTORS.

IBJ
The Bank for All Reasons

Long-Term Financing. IBJ is Japan's oldest and largest long-term credit bank. We are the leading bank in arranging yen-denominated bond flotations by both foreign and domestic issuers.

Main Bank to Japan's Key Industries. IBJ is main bank to more of Japan's industrial leaders than any other bank in the country. And because we are independent of any industrial group we can offer you complete flexibility in your dealings with these industries.

US$30 Billion in Assets. As our size indicates you can expect uncommon organizational efficiency and security in your dealings with IBJ.

In-Depth Expertise. Our considerable experience as Japan's leading long- and medium-term loan bank has provided us with the analytical skills and foresight you require to deal efficiently on world markets.

Project Financing. IBJ has been financing industrial projects since 1902. We are Japan's most experienced bank in overseas project financing.

Your Resourceful Bank

As Advocate of Carter's Economics

Blumenthal Seeks Direct Business Contacts

By Eileen Shanahan

WASHINGTON, Dec. 19 (NYT). —Michael Blumenthal, the secretary of the Treasury-designate, hopes to win the backing of the business community for the economic programs of the Carter administration, partly by advocating policies that business approves but also by personally explaining to businessmen why the new administration may feel forced to do some things that many businessmen will not like.

With this objective in mind, Mr. Blumenthal has begun telephoning businessmen and bankers to explain his views and to get theirs and he expects to hold meetings with a cross-section of business executives in the next few weeks.

Mr. Blumenthal, the chief executive of Bendix Corp., detailed his views on a wide variety of subjects in an interview.

Among the highlights were these:

- He favors government planning in the sense of setting goals but not a planned economy or such specific pieces of legislation as the Humphrey-Hawkins full-employment bill.
- He thinks the economic condition of the underdeveloped countries is one of the major issues facing the United States and expects the Carter administration to follow policies that are more sympathetic than the present administration's, but also pragmatic.
- He has never personally invested in a tax shelter (although he does own some tax-exempt bonds), but he does not see the [illegible] of the present law, which [illegible] a higher maximum tax rate on income from investments than on income from wages or salaries.
- He is not exactly sure how to accomplish it but he thinks the tax system should make it neither more nor less advantageous for U.S. corporations to operate in foreign countries. It is more advantageous now for many of the multinational companies, although not for all of them.

As for the program that the Carter administration will adopt to stimulate the economy, Mr. Blumenthal said he thought there was a considerably greater divergence of opinion within the business community than was expressed by the 15 business executives who met with President-elect Jimmy Carter at Blair House recently. On that occasion, Reginald Jones, chairman of General Electric, proposed a $23-billion tax-cut and job-creation package and none of the other executives present spoke against it.

But Mr. Blumenthal said he felt the need to explore, with "a wider cross-section of the business community," their feelings about tax reduction and spending increases and about the total size of any package to stimulate the economy.

Budget Deficit

What is currently being discussed in administration circles has ranged between $15 billion and $20 billion in programs to cut taxes and create jobs. A package of this size, as has been pointed out by Bert Lance, the director-designate of the Office of Management and Budget, would mean a budget deficit of $75 billion or more.

In talking with business executives about what should be done, Mr. Blumenthal said, "I want to challenge them, not just by getting their standard reaction—the bankers saying don't fiddle with interest rates and the businessmen saying balance the budget—but to challenge them by saying, 'If you were in our place, how would you deal with this problem?' "

Mr. Blumenthal expressed confidence that he could make many business executives see things his way.

When businessmen are looking at their own businesses, he said, "they look at the facts and they do that very well. But when it comes to the broad public questions, many of them begin not to think about fact, but just philosophy."

He plans to explain to business executives his own impression of the facts, which is that without any government program of stimulus to the economy, the unemployment rate could go up to 10 per cent or more and there could be new riots in the cities.

Abandoned Goals

These facts will preclude the reaching of certain "philosophical goals," such as a smaller budget deficit, at this time, he said.

He expressed the belief that a consensus could be built in support of whatever stimulus program Mr. Carter finally adopts, partly by just such explanation of the facts.

In addition, he said, it is necessary to "put together a set of policies that take into account the views and needs of as many different sectors as possible."

He noted, for example, that some people have advocated a tax cut that would go almost exclusively to the low-income group. But, he said, that would not be the best answer because "it is necessary to build confidence in the business community by doing some of the things they want."

Fruits of Confidence

The building of such confidence, he said, would "translate itself into investment decisions and other business decisions" which, in themselves, would be benefical to the economy.

He did not specifically mention tax changes that would make investments in new equipment more profitable, but that appeared to be what he meant. Other key Carter aides have also endorsed such investment incentives.

In Mr. Blumenthal's view, it is necessary that the program be "a compromise package that has something in it for more than one group, even though you could make an initial economic argument that it all ought to go to one group."

AP.

Michael Blumenthal

Mr. Blumenthal begged off discussing longer range tax policy questions in any detail on the ground that he was no tax expert. He mentioned simplification of the tax laws and making them fairer as two desirable goals, but stated that he did not know, at this time, how to achieve either one.

Pesticide From U.S. Killed 5 in Pakistan

By Peter Milius and Dan Morgan

WASHINGTON, Dec. 19 (WP). —The common pesticide malathion killed at least five persons and made 2,900 ill last summer when it was incorrectly sprayed by teams of "uneducated village men" in two provinces of Pakistan, a U.S. government report has revealed.

The pesticide, which came from the United States and Italy, was purchased partly with U.S foreign aid program loans to kill mosquitoes in malaria eradication.

In a related development, it was learned that the U.S. government is helping this year to pay for the delivery of 600 tons of the pesticide benzene hexachloride (BHC) from the Philippines to Pakistan for use against malarial mosquitoes.

That chemical has just been placed under review by the U.S. Environmental Protection Agency because of findings that it caused liver and other tumors in laboratory mice and reproductive problems, including reduced fertility, in rats.

Doubts Voiced

Officials of the U.S. Agency for International Development (AID) said last week that Pakistani authorities had been told of EPA's doubts about BHC after they were announced in October.

The casualty figures attributed to the malathion spraying were contained in a detailed report to AID from a five-member team of the Center for Disease Control in Atlanta. It was released this week by the office of Rep. David Obey, D-Wis., ranking majority member of the House Appropriations subcommittee that approves money for AID programs.

Malathion is the fourth most widely used insecticide in the United States and is commonly used in homes and gardens against mosquitoes and other insects. It is manufactured in the United States by American Cyanimid Co. Environmentalists and scientists say that it is generally considered safe if used properly.

AID officials said the Pakistani government had promised to follow stringent safety procedures as a condition for receiving U.S. loans to finance the malathion spraying program.

"We were assured by the Pakistani government that these safety procedures were being followed and that the [United Nations] World Health Organization was acting as the technical overseer of the project," said Charles Jenkins of AID's Commodity Division.

Giddiness, Nausea

The poisoning occurred last July in Pakistan's Punjab and Northwest Frontier provinces. In addition to at least five deaths linked to the spraying, an estimated 2,900 persons suffered symptoms of "malathion intoxication"—blurred vision, giddiness, nausea, vomiting or abdominal cramps—according to the report of the six-member team from the Disease Control Center.

The team was sent to Pakistan at AID's request after reports of poisoning reached the AID mission in Pakistan.

The report said that at least one person died after eating food sprayed with the chemical.

Rep. Obey's office said it had learned from the investigators that sprayers were observed mixing the pesticide with their hands and washing spraying equipment in local water supplies. In some cases, barefoot children were found playing where malathion had been sprayed, spilled or stored.

Nervous System

As a poison, malathion disrupts the nervous system by inhibiting the production of a necessary substance called cholinesterase.

In Pakistan, little attention was given to safety measures, according to the investigators' report. About 7,940 workers were involved in the field spraying operations, and were not reimbursed for lost wages or medical expenses resulting from the pesticide poisoning, the report noted.

The AID officials said last week that, as a result of the incident, the Center for Disease Control had promulgated more stringent specifications for the use of the chemical.

Italy Wins Its 1st Davis Cup

By Barry Lorge

SANTIAGO, Chile, Dec. 19 (WP).—Paolo Bertolucci, who is only 5 foot 8, was nearly lost in the mob scene in the middle of the court yesterday as the Italian Davis Cup team and its entourage jubilantly held aloft their early Christmas present to themselves, the gleaming sterling punchbowl that symbolizes international team supremacy in tennis.

Bertolucci disappeared into the mass of teammates, photographers, and Italian officials and partisans who swarmed onto the court at the Estadio Nacional for the spontaneous celebration, moments after the decisive 2-hour, 34-minute doubles match that gave Italy possession of the celebrated "Copa Davis" for the first time.

But Bertolucci, a chunky 25-year-old who is known as "pasta kid," had been conspicuous most of the afternoon, partnering Italian No. 1 Adriano Panatta to the 3-6, 6-2, 9-7, 6-3 victory over Jaime Fillol and Patricio Cornejo that gave Italy an unbeatable 3-0 lead in the best-of-five series. Panatta made it 4-0 today, beating Fillol, 8-6, 6-4, 3-6, 10-8.

Italy, losers to Australia in 1960 and 1961, its only two previous finals, is the seventh nation to win the Cup that American Dwight Filley Davis put into play as the "International Lawn Tennis Challenge Trophy" 76 years ago, during his undergraduate days at Harvard.

The United States has won the Cup 24 times, Australia 23, Britain nine, France six, and South Africa and Sweden once each, in 1974 and 1975, respectively.

Chile was the first South American team to reach a final.

The victory concluded a long campaign during which Italy defeated Poland, Yugoslavia, Sweden, Britain and Australia. Over the distance, Panatta was 9-1 in singles, 5-1 in doubles with Bertolucci.

U.S. Tops Mexico

TUCSON, Ariz., Dec. 19 (NYT). —Welcome back Smith and Lutz, it's so nice to have you back where you belong.

That was the feeling yesterday after America's most identifiable tennis combination played their first Davis Cup match in six years and clinched a decisive 3-0 lead for the United States over Mexico in the 1977 North American Zone semifinals at the Tucson Tennis Club and Ranch.

The two Californians, Stan Smith and Bob Lutz, separated from Cup competition in recent years for a variety of reasons, overwhelmed a team playing together for the first time, Raul Ramirez and Emilio Montano, 6-2, 6-3, 6-4.

The 1-hour 30-minute victory left today's final two singles matches meaningless between Roscoe Tanner-Roberto Chavez and Arthur Ashe-Ramirez.

Mexico had eliminated the United States from the Davis Cup in 1975 and 1976, winning each doubles match and the series, 3-2. In this 1977 series, the might-have-beens will concern Mexico's decision to play Chavez ahead of Joaquim Loyo-Mayo, 31, in singles and the 23-year-old Montano, who had no previous Cup experience in the doubles.

But any doubles team that Pedro Langre, the Mexican captain, might have assembled would have had an uphill fight against the lanky 6-foot 4-inch Smith and the muscular, 6-1 Lutz.

The pair have played seven Davis Cup doubles matches and won them all since 1968, losing only one of 22 sets and winning challenge-round finals against Australia, Romania and West Germany in successive years from 1968 through 1970.

On Friday, Tanner and Ashe had each scored straight victories to give the United States a 2-0 lead. Tanner defeated Ramirez, 7-5, 6-4, 6-4 in the first match and Ashe whipped Chavez 6-4, 6-4, 6-4 in the second.

Marquette Fails to Win One For Retiring Coach McGuire

NEW YORK, Dec. 19 (UPI).—The script called for Marquette to win one for Al McGuire. But it didn't happen that way.

The second-ranked Warriors improvised once too often and dropped a 78-75 decision in overtime to Louisville in their first game since coach McGuire unexpectedly announced his retirement effective at the end of the season.

"I don't think the announcement had anything to do with it," said McGuire of the Warriors' first loss in five games this year. "If anything, it would be an asset rather than a liability."

Louisville's Ricky Gallon hit four free throws in overtime as the Cardinals handed Marquette its first loss at home since 1974.

The score was tied 67-67 at the end of regulation time after Marquette's Butch Lee missed a foul shot with no time remaining that would have given the Warriors victory. Earlier, Lee had evened the score with a jumper with 19 seconds left in regulation time.

Marquette held a 69-68 lead in overtime, but Gallon was then fouled twice and made three free throws to put the Cardinals ahead to stay.

In other games involving top 20 teams, No. 1 Michigan routed Kent State, 102-66; No. 3 Kentucky was beaten by Utah, 70-68; No. 8 Arizona lost to Detroit, 70-68; No. 9 Cincinnati clobbered St. Louis, 86-53; No. 10 UCLA battered Tulsa, 110-85; No. 11 Nevada-Las Vegas routed Idaho 135-78; No. 13 Maryland edged Appalachian State, 76-74; No. 14 Clemson took Stetson, 78-64; No. 18 Minnesota beat Vermont, 96-61, and No. 20 Oregon whipped Los Angeles State, 87-56.

Rickey Green scored 25 points, including 20 in the first half, as top-ranked Michigan unleashed its running game to destroy Kent State and boost its record to 4-0. The Wolverines, who led by as many as 40 points, were also sparked by Phil Hubbard and Joel Thompson with 19 each. Kent State was paced by James Collins with 18.

Utah's Earl Williams hit a jump shot with one second left to help snap third-ranked Kentucky's 16-game winning streak en route to capturing the Kentucky Invitational tournament. Jeff Judkins topped Utah with 24, while Buster Matheney added 14. Rick Robey led the Wildcats with 19.

Czechoslovaks Upset by Swedes In Cup Hockey

MOSCOW, Dec. 19 (AP).—The Swedish hockey team defeated this year's world champion, Czechoslovakia, 2-1, tonight in the Izvestia Cup international tournament.

Lars Gunnar Lundberg scored the winning goal on a breakaway at 18 minutes 49 seconds of the final period to the delight of the near capacity crowd.

The loss dropped Czechoslovakia out of a tie for the lead with the Soviet Union, which scored three goals in the second period to defeat the World Hockey Association Winnipeg Jets, 6-4, in an earlier game.

The Soviet Union is unbeaten after three games, while Czechoslovakia now has two victories and a loss. Those two teams meet in the final game, Tuesday, to determine the tournament winner.

Sweden has a victory, a tie and a loss. Winnipeg only has a tie in the three games, while Finland has lost both its contests.

Economic Scene

(Continued from Page 9.)

been some 4 million new jobs created in the U.S. economy, or about 5 per cent of the total work force. Never before in a similar period after previous recessions had a greater percentage of new jobs been added in industry.

Another indication of a better economy was contained in the upward-revised statistics for the leading economic indicators for the August-October period. Instead of remaining unchanged, as previously reported, the October index is now said to have risen by 0.2 per cent, the September decline is now shown as 0.6 per cent, instead of 0.9, and the August drop is now put at 0.4 instead of 0.8.

Buttressing the outlook was the disclosure by Edgar Speer, chairman of the United States Steel Corp., the nation's largest steel producer, that the company's "order intake had shown improvement the last six weeks." In an interview here, he also said that orders for capital goods, which had been lagging this year, "are beginning to bubble up, mostly for light construction."

Dutch Trade Deficit

THE HAGUE, Dec. 19 (Reuters).—The Netherlands had a visible trade deficit of 402 million guilders ($160 million) in October compared with a surplus of 194 million guilders in September and a surplus of 475 million in October, 1975, central statistics office figures showed.

Euromarket

(Continued from Page 9.)

European Investment Bank and Air France. In addition, banks are expected to tap heavily the floating-rate loan market.

Only one such loan is currently on offer and that, for Poland's Bank Handlowy, is really structured for other banks rather than individual investors. In fact, the loan appears to have been set up in place of a syndicated bank credit in order to mask the fact that the cost of borrowing to Poland has gone up dramatically.

The $30-million, five-year loan will carry a coupon of either three-eighths of a point over the interbank rate, now at about 5 1/4 per cent, or 6 3/4 per cent, whichever is higher. The minimum guarantee rises to 7 per cent in the final three years of the loan.

The Terms

At the outset, the banks are getting about 1 1/2 points more on this loan than their own cost of borrowing funds to finance it.

In addition, each $1,000 unit will be sold at a discount of $968.75. The notes are redeemable at each six-month renewal period at a stepped up rate—$970, for example, after the first six months—rising to $1,000 at the final maturity. But interest is paid on $1,000. Adding all these factors together, the cost to the bank in the first six-month period is calculated to run at a rate equivalent to 1.97 per cent for a year, well over the 1 1/4 point charges on the most recently syndicated bank loans for other East-bloc borrowers. Managers say the size of the loan may be increased to $40 million.

The biggest surprise of the week was the 200-million deutsche-mark loan for Norway, which was gobbled up in two days. The five-year paper carries a coupon of 6 1/2 per cent —the lowest since 1972. Although pricing had been expected to be at a slight discount, demand was such that the paper was sold at par.

Meanwhile, the World Bank is in the market, seeking 250 million deutsche marks for 10 years with a coupon of 7 per cent. It is expected to be sold at a discount of 99.

Imperial Chemical Industries priced its 100-million-DM, 10-year paper at 100 1/3 with a coupon of 7 1/2 per cent while Copenhagen sold its 75 million DM of 10-year paper at 99 1/2 with a coupon of 7 1/2 per cent.

An ICI loan in the United States had earlier been rated triple-A, but the Frankfurt manager, when questioned about why no rating had been sought on this ICI loan, rejected having a U.S. agency rate DM-denominated paper. He said ICI had received the best possible terms anyway, noting that the Copenhagen loan was sold at a discount and ICI at a premium and that the average life of the ICI loan was longer since repayment of principal will be made in one step at final maturity whereas Copenhagen will repay its loan in five equal installments beginning in the fifth year.

In the Kuwaiti dinar market, Panama is borrowing 4 million KD for 10 years at 9 per cent. Cuba is reportedly seeking to arrange a KD loan.

Of some interest to dealers in the secondary market was the news that Cedel is giving participants "an exceptional 20-per-cent refund on transaction fees" paid this year because of "the high turnover and the good results foreseen for the entire year."

BOOKS

POWER, INC.

Public and Private Rulers and How to Make Them Accountable

By Morton Mintz and Jerry S. Cohen. Viking. 589 pp. $15.

Reviewed by John L. Hess

THE buck doesn't stop here anymore. To use the fad word, nobody is "accountable" for what has gone wrong, or can be required to set it right. The observation is not new, but it can hardly have received so devastating a documentation as it does in this book.

Morton Mintz, an investigative reporter for The Washington Post, and Jerry S. Cohen, a former counsel to a Senate antitrust inquiry, have woven the revelations *of hundreds of recent exposés* into a tapestry portrait of the United States in its Bicentennial year. It is a troubling picture.

The checks and balances cunningly devised by the U.S. Founding Fathers have become inoperative, the authors say. With perhaps the tacit assent, but not the advice and consent of the Congress, they point out, presidents make war, sign treaties, sell ambassadorships, conspire against the lives of foreign leaders and spy on citizens—all in violation of the Constitution.

An inquiry into criminal conduct by the executive branch is transformed into an investigation of the reporters who exposed it.

The judiciary, they maintain, protected by life tenure, a mystique of untouchability and gag orders, makes mockery of the *principles* that all are equal before the law. For identical offenses, one man gets 30 days in jail and another 15 years, while *corporations that break the law* are seldom punished in any meaningful way, and their executives are seldom held accountable.

For Mintz and Cohen, the multinational corporations are a power center that is essentially unaccountable. They cite others—big unions, organized medicine, the bar associations, the press, sundry bureaucracies—but the major corporations, they say, exercise a governance over resources that evades control either because they operate beyond the national borders or because they dominate the agencies that are supposed to regulate them.

The book is rich with incisive case studies of misuse of unaccountable power. Some are familiar, but many will be new to the most indefatigable reader. A number of the more shocking concern the protective role of the Food and Drug Administration toward medicines and additives found to imperil life. Like the death theme in "Carmen," these episodes appear to lead toward a tragic finale: a society out of control, sliding toward total pollution and nuclear catastrophe.

As a witty Frenchman observed, there must be hope, or the situation would be hopeless. To a degree, "Power, Inc.," rebuts itself, for exposure is a manner of holding to account, and the authors plead for still more exposure, by lifting the curtains of secrecy from the courts, the Congress and government agencies.

In passing, each abuse suggests some other reform, such as keeping the banks from controlling the Federal Reserve System, or barring regulators from going to work for the industries they regulate. But the authors eschew any radical revamping of the political structure. Instead, they close with a modest proposal: a constitutional amendment that would give any citizen the right to sue in federal court against any conduct that "threatens to cause or is causing substantial harm to the safety or happiness of a consequential number of people." The courts could award damages and legal costs and grant "such relief as deemed appropriate."

Considering that Mintz and Cohen had earlier accused the courts of allowing the Constitution to be subverted wholesale, their hopes for such an amendment may seem excessive. They themselves raise another objection: That the amendment would have to be approved by the Congress and three-fourths of the state legislatures—bodies they had already described as unaccountable.

"Have we painted ourselves into a corner?" they demand. "Y... But accountability is an idea whose time has come. The pa... will dry."

John L. Hess is on the staff of The New York Times.

CHESS

By Robert Byrne

One of the most exciting attacking games of the recent chess olympiad in Haifa, Israel, was won by Michael Stean of England against Lars-Ake Schneider of Sweden in the 11th round.

The development system 7 B-K3, 8 Q-K2 and 9 0-0-0 constitutes the Velimirovic attack, leading to a sharp struggle with both sides castling on opposite wings. The advance 12 P-N5 not only drove back the defensively useful black KN, but also allowed White to operate with a possible threat of Q-R5 and R-R3 (after 15 R-N3).

The violence of the Velimirovic attack was revealed by Stean's powerful knight sacrifice, 16 N-B5! Declining it with 16 ... B-Q1 would not have held up after 17 Q-R5, R-K1 (he must anticipate 18 R-R3, which can now be answered by 18 ... N-B1); 18 NxQP.

A Useless Defense

After 16 ... KPxN; 17 N-Q5, Q-Q1; 18 PxP, Stean threatened 19 P-B6, while the defense 18 ... P-B3 would have been useless against 19 P-N6, P-R3; 20 Q-R5 with the unstoppable and decisive 21 BxP to follow.

Schneider's best defense would have been 19 ... R-N1; 20 P-B6, B-B1; 21 PxP, BxP; 22 N-B6ch, K-R1 with the idea of yielding rook plus two pawns for the minor pieces to diminish the attack. Instead, his 19 ... B-B1 encountered Stean's incisive 20 N-B6ch!, NxN; 21 PxN, B-Q2; 22 B-Q4. After that, Black's last hope was 22 ... P-N3; 23 Q-Q... (threatening 24 PxP, PxP; 25 B... Pch), BxP; 24 QxB.

Schneider's 22 ... Q-R4? was smashed by Stean's 23 RxPch! At that point, 23 ... BxR would have allowed 24 Q-N4 followed by mate.

Schneider resigned after 23 ... K-R1; 24 Q-N4 since mate was still unavoidable.

Raiders' Final-Second Score, Vikings' First Play Lead to Victories in Playoffs

Penalties, Stabler Run Beat Pats

By Bob Oates

OAKLAND, Dec. 19.—In a game filled with passes and penalties, New England was ahead most of the afternoon except at the end. Then Stabler won it for the Oakland Raiders yesterday, 24-21, with two touchdowns in the last 3 minutes and the winning touchdown in the last 10 seconds on a one-yard rollout.

Stabler's nine passes to Fred Biletnikoff for 137 yards were part of the difference, driving the Raiders past the Patriots and into the second round of the National Football League's annual Super Bowl tournament, which will continue next Sunday in Oakland's Coliseum against either the Pittsburgh Steelers or Baltimore Colts, who meet today in Maryland.

Ably directed by their big, strong sophomore quarterback, 6-feet-4 Steve Grogan, the Patriots led until the last minute of the first half, when a circus catch by Biletnikoff put Oakland ahead at the break, 10-7.

In the third quarter Grogan opened a 21-10 lead as the Patriots accumulated the last of their seven first downs on penalties—a playoff record and within one of the NFL's all-time penalty record.

With 4:30 left the Patriots still had a 21-17 lead, and also possession of the ball at the Oakland 7-yard line. But at that late hour their luck turned.

In an improbable sequence, all this happened to beat them in those last 4 1/2 minutes:

• Running for a first down on third-and-1, the Patriots were guilty their eighth penalty of the day on which they were to be taxed 10 times for 83 yards. The Raiders were penalized 11 times for 83.

• On the next play (third-and-8) Oakland linebacker Phil Villapiano roughed Grogan in front of an official who didn't call it.

• On fourth down, New England's John Smith, the English soccer kicker from Southhampton, missed a 50-yard field goal by inches.

• Starting a 68-yard move to the winning touchdown, Stabler passed 12 yards to Biletnikoff but was promptly sacked to get into third-and-19 trouble. Moreover, he threw incomplete that time against a heavy rush which persuaded an official to drop a penalty flag citing New England's guard Ray Hamilton for roughing the passer. It wasn't as flagrant as some of the roughness plays that weren't called.

• Suddenly alive again, Stabler moved the Raiders to the New England four-yard line, where he stalled again on third-and-1. And again a penalty flag fluttered down to save the Raiders with 37 seconds left when a personal foul was called on New England's Prentice McCray.

• With a first down on the New England 1-yard line, Stabler rolled out and on a dive play scored the winning touchdown as a red smoke bomb went off on the playing field to celebrate either the touchdown or the offside penalty that was called against the Patriots but wasn't needed.

The Patriots complained bitterly afterward that they were beaten on penalties, whereupon the Raiders pointed out they wouldn't have been in the game but for the epidemic of penalties that set up New England's two go-ahead touchdowns in the third quarter—changing the score from 10-7 Raiders to 21-10 Patriots.

This strange sequence began on New England's first possession of the second half. Punting on the fourth play of this series, the Patriots got the ball back at midfield when the Raiders were flagged for defensive holding—a most curious call on any punt. Thus reprieved, Grogan marched to the 14-10 touchdown.

Next, Oakland was penalized on a punt that stopped at the New England 15 and had to punt again, Ray Guy line-driving this one to give the Patriots possession at midfield.

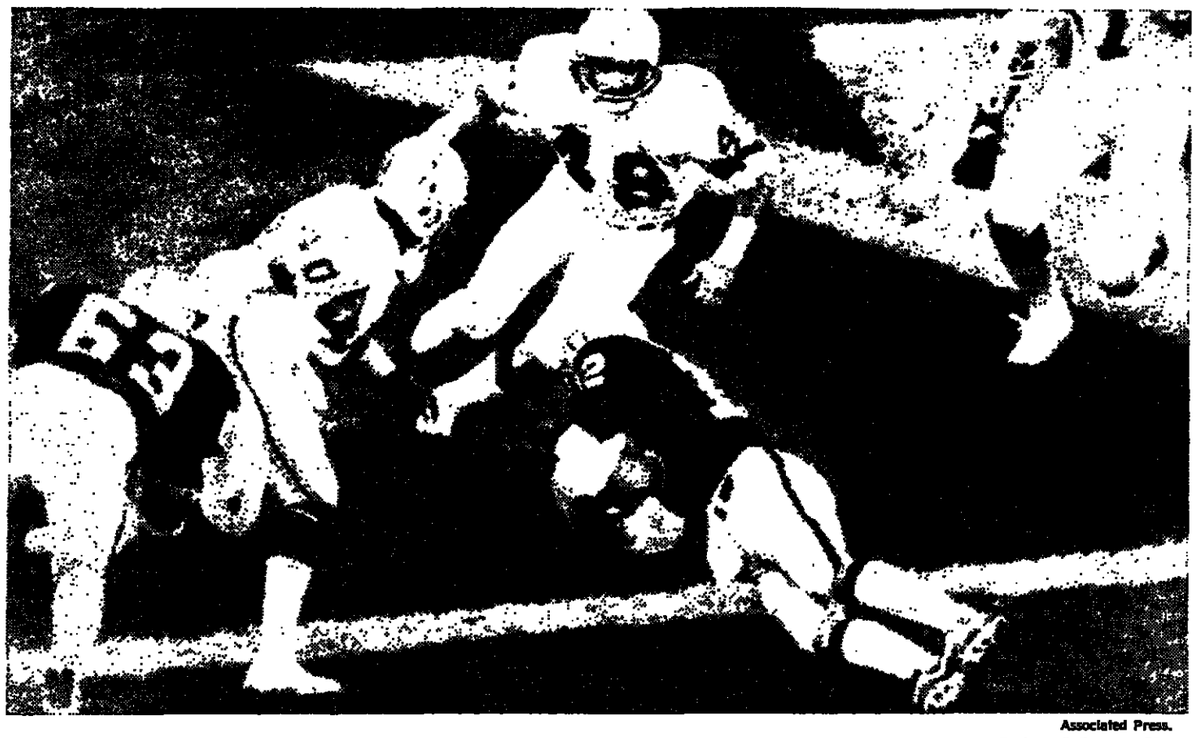
This time they only needed two penalties on a march to the 21-10 touchdown. The first came on another Patriot punt when Oakland's Ted Hendricks was offside. Taking the ball once more, New England set up its last touchdown on a personal foul against Oakland's Willie Hall for slugging.

So it was a game in which the team benefiting from the last penalty was likely to win, and did, although New England had a slight edge in the statistics with 23 first downs to 20 and 331 total yards to 282.

One of the game's great passers, Stabler completed 19 of 32 for 233 against Grogan's 12 of 23 for 167.

With the help of New England penalties, the Raiders marched 76, 70 and 68 yards to their touchdowns, mostly on Stabler passes and a few runs by Mark Van Eeghen, who netted 39 yards.

Assisted by Oakland penalties, the Patriots marched 86, 80 and 55 yards to their touchdowns on a combination of Grogan's 167 passing yards and 164 running yards by Sam Cunningham, Andy Johnson and quarterback Grogan.



A nifty runner-passer, Grogan carried the ball seven times for 35 yards, a five-yard average.

ENDZONE ANTICS—Vikings' Sammy White bobbles ball before clutching it for touchdown in first period on an 18-yard pass from Fran Tarkenton in opening moments...

Associated Press.

...while Raiders' Ken Stabler closes game against Patriots by going for winning one-yard touchdown dive.

Tarkenton Paces Rout of Redskins

By William N. Wallace

BLOOMINGTON, Minn., Dec. 19 (NYT).—The key play was the first play yesterday as the Minnesota Vikings trounced the Washington Redskins, 35-20, in the National Football League's opening playoff game. What was it? A simple off-tackle call as Francis Tarkenton handed the ball off to Brent McClanahan, Minnesota's "other" running back, and McClanahan raced downfield for 41 yards to the Redskins' 25-yard line. That one set the mood of the one-sided contest.

Three plays later Tarkenton completed an 18-yard touchdown pass to his tight end, Stu Voigt, and the Vikings were off and running. They kept on scoring and at the end of the third quarter they were so far ahead, 35-6, that Tarkenton was retired for the afternoon by his coach, the imperturbable Bud Grant. Tarkenton had completed three touchdown passes, two to Sammie White, while Chuck Foreman, the No. 1 running back, made two touchdowns on runs of two and 30 yards.

This victory was the first for the Vikings in the NFL's so-called second season, the one that will end with the Super Bowl at Pasadena, Calif., on Jan. 9. "We'll be there," said Alan Page, the mighty Minnesota defensive tackle.

But there must be another victory first for Minnesota. The Vikings have one more game here at Metropolitan Stadium this season, and that will come a week from today with the National Conference championship at stake. The opponent will be either the Dallas Cowboys or the Los Angeles Rams, the contestants today in the fourth and last playoff game of this weekend.

Which would be the preferred opponent? "We don't care," said Page. "I'll say it again, we'll be there."

Apart from victory, the Vikings ran up impressive statistics yesterday. The most significant one was 35 points. That figure equaled the most points anybody has ever scored on a team coached by the defensive-minded Washington coach, George Allen, in his many years in the NFL as a boss man.

History will little note that another Minnesota team, the 1966 Vikings, with Tarkenton the quarterback, beat the Allen-coached Los Angeles Rams, 35-7.

Was there any satisfaction in defeating the coach who manages to antagonize so many foes? "Heck, no," said Tarkenton. "If you have to depend on things like that you are lacking real football players."

Tarkenton had something more to say. "When it comes to these playoff games you don't know what's going to happen, what the scores will be, who will win."

Grant was even more generous. He said of the Redskins, "Today's game was a good demonstration of what emotion meant. Washington ran out of it a little bit. They had to be so emotionally supercharged every week they couldn't sustain their emotion. We were at an emotional peak."

Foreman and McClanahan each carried the ball 20 times. Foreman gained 105 yards and McClanahan 101, the first 100-yard game for the overlooked Viking fullback now in his fourth pro season. Tarkenton completed 12 of 21 pass attempts for 170 yards and as for Page and those other Purple People Eaters on the defensive unit, they held the Redskins to one first down in the first 20 minutes as the score ran up to 21-3.

What about that first play? Did Tarkenton call it? He certainly did. "No one calls my plays," he said. The simple play worked because Voigt blocked the defensive end, Dennis Johnson, to the inside and Foreman blocked the linebacker, Chris Hanburger, to the outside and McClanahan darted in between.

"We've run that play hundreds of times," said Foreman. "But it never worked better."

The Vikings strung together three successive 66-yard scoring drives, rolling to a 21-3 lead in the first 22 minutes of the first-round playoff game. After the 18-yard touchdown pass to Voigt only 99 seconds into the contest, Sammy White's sprawling catch of a Tarkenton pass in the final minute of the opening period boosted the Vikings to a 14-3 lead. Foreman barged in from two yards out midway through the second quarter.

A 30-yard scoring burst by Foreman early in the third period gave Minnesota a 28-3 lead. The Vikings added some insurance in the final minute of the third quarter when White beat Joe Lavender to haul in a nine-yard scoring pitch from Tarkenton.

The Redskins, going home for Christmas, could look back to some ifs and maybes. Bill Kilmer's pass receivers dropped some passes which if caught could have made matters somewhat different. Roy Jefferson and Frank Grant were the guilty parties, Grant failing to hold a pass in the end zone in the second quarter when Washington trailed by 11 points.

As to technology, Tarkenton found something. In a formation which placed his two wide receivers in a flanking posture to the same side, the Washington defense responded with Ken Houston, the safetyman, covering White all by himself. "No way," said Tarkenton. "Houston's fast but Sammie's faster. We got one touchdown that way and just missed on another."

Tarkenton, 36, had one more word. "We can do anything," he said. That remains to be seen between now and Jan. 9.

Oklahoma State Tops BYU to Win Tangerine Bowl

ORLANDO, Fla., Dec. 19 (UPI).—Junior running back Terry Miller rambled for four touchdowns and 173 yards last night to lead 14th-ranked Oklahoma State to a 49-21 rout of Brigham Young in the Tangerine Bowl.

Miller, a second-team all-America selection who finished fourth in this year's Heisman Trophy voting, scored on runs of three, 78, six and one yards, while the Cowboys' defense produced four interceptions and one fumble that led to touchdowns.

Oklahoma State finished the regular season with a 9-3 won-lost record. Brigham Young had its best season ever coming into the Tangerine Bowl, with a 9-2 record for a share of the Western Athletic Conference title.

Brigham Young kept the game close in the first half, trailing 21-14 when tight-end Tod Thompson scored on a 27-yard pass from Nielsen with 2:16 left in the first half. Miller made it 28-14 at the half when he went over the right side of the line for a 78-yard touchdown, a Tangerine Bowl record.

Finland Honors Viren

HELSINKI, Dec. 19 (AP).—Lasse Viren, the long distance runner, was elected Finland's athlete of the year in a poll among the country's sports writers Friday. Viren, 27, made Olympic history in Montreal last summer when he repeated his victories in the 5,000 and 10,000 meters from Munich four years earlier.

'Slumping' Cowboys, Streaking Steelers Choices to Do the Right Thing

Colts' Defense Is the Big Question Mark

By Gerald Eskenazi

BALTIMORE, Dec. 19 (NYT).—When the Baltimore Colts meet the hottest team in the National Football League today, the Pittsburgh Steelers, will they be seeing dark images of last year's game?

This is the second time in 12 months these teams meet in an American Conference divisional playoff. Last year the Colts carried the sobriquet of Cinderella. They won their last nine games to make the playoffs, and then were beaten by the Steelers, 28-10.

This year the Steelers had to come back. They did it with style, allowing a total of two touchdowns in those 36 quarters of the last nine games.

All week the Colts have been talking in "ifs." They are reacting like the underdogs, which they are. Coach Ted Marchibroda believes 11 Steelers can make the Pro Bowl, and Marchibroda's players hang on his words.

The Colts know they have a weakness—their secondary. And they are worried that this can do them in, especially if their front four has troubles as it did against the last good club it faced—the Cards.

The Colts and Steelers gained many honors this season. The Steelers had the conference's best differential of points-for and points-against. The Colts were second. The Colts led everyone in total offense. The Steelers had the league's best defense.

This game probably will pivot on the Steelers' ability to move the ball along the ground and on their defense to take away the Colts' frightening big play.

The crowd in Baltimore's Memorial Stadium may know before the half is over which direction the game is going. The first quarter has been the Colts' poorest. They have averaged only five points. In the opening quarter the Steelers have not given up a touchdown all season.

In the second quarter, Bert Jones and his receivers have broken open the games, averaging almost 20 points. But the Steelers' opponents averaged only a bit more than three points in the second period.

"We have been playing this last part of the season one play at a time," says Andy Russell, the Steelers' linebacker. "Every game has been sudden-death for us."

Russell is part of the Steelers' linebacking corps that features Jack Lambert and Jack Ham. They have had an outstanding season. So has mean Joe Greene, the defensive tackle. People are doubleteaming him again.

Throughout the remarkable nine-game stretch, in which the defense produced five touchdowns—the Steelers' defense would take the field and very quickly produce the football for the offense.

Then the offense would grind out the yardage, tiring the opposition's defense. The Steelers' quarterbacks, Terry Bradshaw and Mike Kruczek, threw only about 16 times a game.

The key was that Pittsburgh running attack that produced two 1,000-yard men—Franco Harris, of course, and Rocky Bleier. Because of them the Steelers averaged 69 offensive plays a game while the opposition could manage only 57.

Pearson, Entire Team Healthy to Play Rams

By Michael Katz

NEW YORK, Dec. 19 (NYT).—The Dallas Cowboys are in a slump.

They won only 11 of 14 games his season on the way to the National Football League playoffs.

They are only three-point favorites over the Los Angeles Rams, even with the home-field advantage for their first-round game tomorrow, even though they ousted the Rams, 37-7, in last year's National Conference final.

Poor Dallas.

Preston Pearson was laughing in the Cowboy locker room. "We all know what people have been saying," he said on the telephone. "But when you are 11-3, you must be doing something right."

Pearson's leg injuries have been part of the reason the Cowboys haven't looked right in the last part of the season. His running mate in the Dallas backfield, Robert Newhouse, has been sidelined off and on with groin pulls. And since Roger Staubach has been throwing with a fracture in his right pinky, the Cowboys have been camouflaging the No. 2 offense in the conference.

After unimpressive victories over the Giants and Buffalo Bills, the Cowboys lost two of their final four games. But now, when it counts, suddenly everyone is healthy.

"Right now, no matter what your injury is, you've got to overlook it and play," said Pearson.

In fact, all 43 men on the roster at the beginning of the season are available for tomorrow's game. To go through an NFL season with a roster intact is an incredible statistic—and last season, when the Cowboys were losing finalists in the Super Bowl, they did it with 42 of their original 43 players.

But the injuries to Pearson and Newhouse have hurt the offense. "We just haven't jelled," said Pearson. "We haven't put it together."

"I suppose we would rank far down the ladder among the eight playoff teams," said Coach Tom Landry, "based on our recent performances."

There's no doubt the Cowboys will come back, at least not among the players, according to Pearson. But no one expects to handle the Rams the way they did last year, when Pearson caught three touchdown passes from Staubach.

"Nobody's going to blow them out like we did last year," said Pearson. "You have to classify that game as a fluke."

"You don't do much offensively against the Rams," said Landry, "even when you're doing everything right."

But the Cowboys have managed to win the big games this year, such as the 19-14 Thanksgiving Day decision over the St. Louis Cardinals. Possibly three big games remain for them.

"I've got one goal," said Pearson, a 10-year NFL veteran who is the only Cowboy to have played on other NFL teams. "To be a starter on a Super Bowl team—and win."

Last season, the former Baltimore Colt and Pittsburgh Steeler reached half that goal. He was a Super Bowl starter. In itself, that was quite an achievement for a player who was released by the Steelers before the season started and was not claimed by another team on waivers. "You talk about tearing somebody's ego apart," said Pearson. "That did it right there."

Italians, Klammer Dominate World Cup Skiing

From Wire Dispatches

MADONNA DI CAMPIGLIO, Italy, Dec. 19.—The powerful Italian ski team today swept the top three places in the first men's slalom of the World Cup season, a day after mighty Austrian Frank Klammer completed a sweep of the men's downhill races this weekend.

The slalom, here was won by Fausto Radici, who has one eye; he beat Olympic champion Piero Gros. Gros, who won the title in 1974-75 but who has not won a World Cup race for 22 months, was bitterly disappointed as Radici wiped out a first-leg deficit of more than half a second to beat him by four-hundredths of a second.

"I am getting desperate," Gros said afterwards, near tears. "It is so long since I have won, and so many times I have been beaten by such tiny margins . . . I can feel my morale beginning to fade."

Radici was jubilant. "It was just a marvellous day, and I felt capable of anything," said the Italian, whose last World Cup victory was at Garmisch last January.

Radici, who lost an eye as a child when hit by a stick in a fall, said, "In a slalom you feel the course with your skis, you don't look at the gates."

Third place went to Italy's Gustavo Thoeni, who has won the Cup four times in the last six years. Noted for rarely showing any emotions, he smiled today when he saw his result.

A surprise of the day was the poor showing of Sweden's Ingemar Stenmark, the World Cup holder, who completely dominated the special slalom last season, winning five races and placing second in two more.

Tense and nervous, the Swede made a mistake at the third gate of the first leg, managing the eighth fastest time. On the second run, he missed a gate on the upper part while trying to recover from another error.

"I was a little nervous and not concentrating enough," Stenmark said. "The fact is I skied very badly. It was difficult with the crowd cheering the Italians and booing me, but I am not complaining about that. It's just the name of the game."

The Italian team manager, Mario Cotelli, said he did not think Stenmark would be a danger to Italian World Cup ambitions this year because Stenmark had not done enough snow training during the summer.

"He will find it very difficult this year," Cotelli said. Stenmark spent much of the off season in the military.

Thoeni was not so ready to write off Stenmark's chances. "He could win in Yugoslavia on Tuesday. The World Cup is a long season, and you cannot make predictions this soon."

American Phil Mahre, who finished first and third in the first two giant slaloms of the season, at Val d'Isère, France, placed 12th today, retaining third place in the Cup standings with 40 points, compared to Gros's 51, and the 50 by Austrian Klammer with his two victories here Friday and yesterday.

Klammer's victory yesterday was as apparently as easy as his first. He beat teammate Josef Walcher 0.95 seconds, despite being fractionally slower on the upper part of the course. Swiss Bernhard Russi was third.

Klammer displayed all his acrobatic skills when he was thrown off balance near the finish, landing on one ski and almost falling before he crossed the line. Klammer's victory brought his run of downhill successes to seven. Last year he won seven of the eight World Cup downhill races, along with olympic gold.

Klammer said he would now take a three-week rest from competition, and would work on his giant slalom technique.

Placings in giant slaloms and in combination events are vital to the Austrian if he is to have a chance of winning the World Cup.

"But I am not thinking about the World Cup at the moment. The season is a long one. The important thing is to ski fast and to fight to win without worrying about records or anything else," Klammer said.

Oh, Christmas Tree

By Russell Baker

NEW YORK.—Notes on Christmas trees:

(1) "Oh, Christmas tree! Oh, Christmas tree! How faithful are thy branches." This is the most famous line ever written about Christmas trees, and, of course, it makes no sense whatever. Babes caroling the line already know the faithlessness of Christmas-tree branches, how they sag in lugubrious grouch lines under their shiny ornaments, how they traitorously drop their thousands of tiny needles over the electric-train tracks. Why this anomaly between the hymn to fidelity and treacherous reality? (2) All is clear, all is bright once we recognize that we are singing a line translated from German. The German author knew about Christmas-tree branches and discreetly neglected to mention them. He wrote praise, instead, to the Christmas tree's *blaetter*, a German word which can mean leaves, petals, blades of grass, sword blades, membranes, laminae or a dozen other things, none of them branches. We can assume he was smart enough not to hymn praises to the Christmas tree's notoriously dropsical leaves or petals (those browning needles), nor to its sword blades. We can also assume he was poet enough not to waste his time on paeans to laminae. Whatever they may be. It is obvious, then, that what enchanted him about the Christmas tree was its membranes.

Baker

(3) "Oh Christmas tree! Oh, Christmas tree! How faithful are thy membranes." With the correct translation, we approach understanding of the Christmas tree. Its branches will sag and its needles will fall, but its membranes will never let us down, unless . . . unless . . . There is a caveat which the author neglects to mention. The membranes will be faithful to us, but only so long as we are faithful to the membranes.

(4) "What do the membranes want?" an exasperated Sigmund Freud once cried aloud in front of a failed Christmas tree. The answer is: water. Membranes are crazy about water. Cut off a membrane's water, and it will let you down every time. This is why the Christmas tree should be doused heavily with water the moment you bring it home.

(5) Here is a typical horror story from Mr. B. D., who failed to understand the water lust of the membranes: "I brought the Christmas tree home, propped it in the corner, and we all started to celebrate with a pitcher of gin. Much later that evening, we were all singing praises to the faithfulness of its branches and breaking up a little furniture when the Christmas tree called the police and tried to get us arrested for disturbing the peace. Double-crossed by my own Christmas tree! I could have cried."

(6) Classic technique calls for placing the tree, stump down, in a bucket of water. This cannot be done in apartments because the tree will topple over, upsetting the bucket and ruining the ceiling of the people underneath. Therefore, the tree must be put into the bathtub or suspended upside down from the shower head.

(7) Mrs. J.S. knows all about the importance of humoring the membranes, but notes a natural hostility between the Christmas tree and house pets. "When my cats climb the branches, the entire Christmas tree bombards them with falling needles," she writes.

Mrs. J.S. would not feel so coldhearted if she were sensitive to the Christmas tree's predicament. Consider: It has recently undergone a radical amputation. At a time when it should be convalescing quietly, it is hauled into a noisy, overheated party atmosphere, propped up on its stump, dressed in gewgaws and half strangled with electric wires. It is a testament to the gentle temper of its membranes that, in return for a bit of water, they are able to restrain the tree from having everybody locked up for cruelty. It is only natural that under direct physical assault it may occasionally turn churlish and even vengeful. On balance, however, a Christmas tree will remain faithful to you as long as you remain faithful to its membranes. This is more than you can expect from cats.

After many months of enduring articles in national publications purporting to explain the Southern idiom, the Atlanta Constitution struck back with an article called 'Reverse English on the Sidewalks of New York.'

U.S. Southerners Take Linguistic Revenge

By Wayne King

ATLANTA (NYT).—Alfred E. Smith would have said, "The woim has toined."

Jimmy Carter, who should know, would say, "The wuhm has tuhned."

Any way you say it, the point is more or less the same. Now that Jimmy Carter is President-elect, it is no longer Southerners who talk funny. It's Yankees.

Or, at least, the Southerners are no longer sitting quietly by while Northerners make fun of the way they handle the King's English. It is the Southerners' turn to point out that Yankees are the ones who speak haltingly in their native tongue.

Latest Article

After many months of enduring articles in national publications purporting to explain the Southern idiom, the Atlanta *Constitution struck back last week.* Emblazoned across the front page was a long article called "Reverse English on the Sidewalks of New York."

It resulted, said the staff writer, Dick Green, from the most recent piece in a national newspaper representing Southerners as saying things more or less like, "Hit's mah bid-ness the way I talk."

"We got such a violent reaction to that piece," Green said. "We were getting calls, hoppin' mad. We like to poke fun at ourselves, but we don't like outsiders doing it."

"By the way," Green said, "you know what a seven-course Alabama luau is? A possum and a six-pack.

"Anyway, we decided what we got to do was send somebody to New York and do a piece on how those folks up there talk."

Green's first encounter in New York was, of course, a New York taxi driver, Charlie Kerner. *Kerner said:* "S'like the old joke, Y'know, th'cartoon. Shows ya Cottuh standing and saying, 'Well,' he says, 'It's about time we had somebody in the White House that doesn't talk wit' an accent. Ya-know-wadda-meen?'"

Down at Macy's, Green encountered one *Bernadette Bacon,* who, he said, "steers a steady stream of customers hee-ah, they-uh, everwhe-ah, fu'th flo-a, seventh flo-a, da cell-ah."

"Ladeez sca'fs?" she intoned. "Fu'th flo-a."

And so on, through assorted polyglot New Yorkers, all hiding from muggers and saying "dese and dose," "Am I right?" and answering questions by posing their own. A Latin short-order cook lamented: "Twenty years and steel poor!"

But the linguistic coup de grâce was administered by Marshal Berger, a professor in the Department of Speech at City College. A New Yorker.

According to Berger, as reported by the Constitution, what is thought of as a New York accent—classic Brooklynese—may not be pure New York at all. It may be corrupted Southern.

Suspecting journalistic hanky-panky, The Times telephoned Berger in New York.

Patrician Tones

It's true. Or at least possible. What is more, according to Berger, there is a suggestion that New Yorkers not only picked up speech habits from Southern planters, they corrupted those patrician Southern tones into the language of the lower classes.

"It's a startling suggestion, isn't it?" Berger said.

His hypothesis—and he emphasized that it is no more than that, "not even a theory, really"—is that the aristocratic planter classes of Mobile, New Orleans and, to a less apparent degree, Charleston, passed on certain pronunciations and speech patterns to entrepreneurs in New York.

The hypothesis is strengthened by evidence of a strong mercantile relationship between New York and the Southern planters before the Civil War, Berger said.

His example is the expression, "The worm has turned."

The patrician planter pronounced that something like, "the whurm has tuhned," which gradually became "the whuhm has tuined" and finally, "da woim has toined."

A Glossary

In the article on New York speech patterns, the Constitution helpfully provided readers with a glossary. Some excerpts follow:

Bah—A place to get drunk.

Beeah—What you sometimes get in a bah.

Boids—Feathered, winged creatures that sing in trees, if you have any trees.

Coil—A ringlet of hair.

Curl—What snakes do when they get all wrapped up.

Dare—At that spot. As in, "Put dat over dare."

Dat—What you just put over dare.

Deeuh—Charming, sweet. As in, "Yes, deeuh, I'll be glad to put dat over dare."

Fayuh—Equitable. Also, what the cab driver charges.

Feeuh—A feeling one gets when walking alone in New York City parks.

Lon Gyland—Where most sane New Yorkers have moved to.

Molda—What Brooklynites do to bums.

Mudder—Female parent.

Pleece—Officers of the law. Rarely found in parks.

Pock—A piece of earth in New York City, usually with trees, always with muggers.

Toity—Number that comes after 29.

True—In one side and out the other—as in "he ran true da pock."

Wit—In addition to, or alongside. As in "I'll go wit ya if ya won't go true da pock."

PEOPLE: *Princess Anne Facing Charges of Speeding*

Princess Anne is being charged with driving 90 miles an hour on a 70-mile-an-hour highway, police in Britain said Sunday. The 26-year-old princess is alleged to have topped 90 on the Derbyshire section of the M-1 Motorway in the English Midlands. With her at the time in a Rover sedan was her husband, Army Capt. Mark Phillips, and her personal police bodyguard. The incident happened Nov. 27 when the royal couple were on a private visit "somewhere in the north," according to a spokesman at Buckingham Palace.

A Derbyshire police spokesman said: "I'm not sure whether a summons has been issued yet or which court the proceedings will take place at. But I can confirm that court proceedings are pending." The princess has been warned in the past for speeding, and there was public criticism in 1972 when police decided not to prosecute her for driving offenses.

Rabin Quits, Sets Stage for Early Israeli Elections

From Wire Dispatches

JERUSALEM, Dec. 20—Prime Minister Yitzhak Rabin, who shattered his fragile ruling majority yesterday by expelling a coalition p, resigned tonight and called for early Israeli elections.

Mr. Rabin, who submitted a formal resignation as Prime Minister, resident Ephraim Katzir, will remain as head of a caretaker gov- ent until new elections are held, probably in May. They had scheduled in November. Mr. Rabin is expected to seek re-election. The Prime Minister said today that he would not rule with the minority he now commands in parliament and his party's parliamentary faction followed his call to move for early elections.

The Laborites voted to write a bill to dissolve parliament and call elections. Israeli television said the bill could be presented within 24 hours.

143-Day Interval

Elections cannot be held before May because of laws requiring an interval of 143 days between resignation and balloting.

If he had not resigned, Mr. Rabin could have been forced out by a new no-confidence motion presented by the opposition Likud party and scheduled for debate tomorrow.

Mr. Rabin's call for early elections was made in the Knesset (parliament) in the wake of his expulsion of the National Religious party from his shaky coalition government.

The expulsion of the NRP, whose members abstained in a no-confidence vote against Mr. Rabin last week, cost the Prime Minister his tenuous majority, leaving him with only 57 assured votes in the 120-member house. A total of 61 votes is needed for a bare majority.

"This government now becomes an interim government until new elections," the Prime Minister told reporters in the President's mansion after he handed in his one-line letter of resignation just before midnight.

"I saw a trend toward division in the heart of the people as one of the main problems to be faced and all of my moves were related to this basic issue," said Mr. Rabin, who has been in office since July 3, 1974.

Before seeing President Katzir, Mr. Rabin said that his resignation would not affect the government's functions. He apparently sought to reassure foreign nations that negotiations for peace in the Middle East would not be hampered.

After addressing the Knesset today, Mr. Rabin told newsmen he was aware that his action had precipitated a parliamentary crisis. But, he added, it was impossible to ignore the defection of members of the government during a time when the leadership's ability to run the state was under challenge.

She Is Commerce Secretary

Carter Picks Woman, 2 Others for Cabinet

From Wire Dispatches

PLAINS, Ga., Dec. 20.—President-elect Jimmy Carter today named his first woman Cabinet member, educator Juanita Kreps, to be secretary of commerce and appointed an Atlanta lawyer to be attorney general and a Minnesota farmer-congressman as secretary of agriculture.

He said that he is actively recruiting "very large numbers" of women, blacks and other minority-group members to serve in sub-Cabinet positions and predicted that this will provide a pool of talent to serve at the top appointive levels of future administrations.

With four appointments still to be made to fill his Cabinet, Mr. Carter indicated there will be at least one black. He indicated that the rest of the Cabinet will be selected by "Tuesday or Thursday."

In a nationally broadcast news conference, Mr. Carter presented:

● Mrs. Kreps, 55, an economist and vice-president of Duke University, for secretary of commerce. He said that her credentials are "absolutely superb."

● Griffin Bell, 59, an Atlanta lawyer and former federal appeals court judge, for attorney general. Mr. Carter said that Mr. Bell, a law partner of Carter adviser Charles Kirbo, will be a "great attorney general."

● Rep. Robert Bergland, 48, a farmer who has served in the House since 1970, to be secretary of agriculture. Rep. Bergland is a political ally of Vice-President-elect Walter Mondale.

Defends Criteria

Asked about the selection of more women and minority appointees, Mr. Carter said: "I am applying the same criteria in the selection of all Cabinet members without regard to their race or sex." He said that it would not be fair to lower the standard in their cases.

Mr. Carter said that there surely are thousands of qualified women and minority-group members who could serve adequately in the Cabinet. But, he said, "I have tried in every instance to get the best qualified person to serve in a Cabinet post, not just someone who would serve adequately."

Mrs. Kreps said: "I think we simply have to do a better job of looking in the case of both women and minorities."

"I think she said she disagrees with me," Mr. Carter said.

Later, in an interview, Mrs. Kreps agreed with Mr. Carter that judgments should not be made until the entire Cabinet is appointed.

"Then I think if the administration does not set about doing a great deal for women at very high levels, then I think criticism is in order and I will join it," she said. "But I think there is a dedication here and that it will be borne out."

The nomination of Mr. Bell raised questions from reporters about his support for civil rights and his 1970 letter to President Richard Nixon stating that he found U.S. District Judge Harrold Carswell to be qualified for appointment to the U.S. Supreme Court. Judge Carswell was rejected by the Senate after a debate in which he was called "mediocre" and was accused by some senators of being a racist.

Says Guerrillas Killed Blacks

Rhodesia Reports 26 Massacred

SALISBURY, Rhodesia, Dec. 20 (UPI).—Security force headquarters said today that at least 26 black tea plantation workers were massacred yesterday by nationalist guerrillas in the Inyanga Mountains on the border with Mozambique.

A communiqué said that a group of guerrillas abducted a number of tea estate workers, their wives and children and took them to an adjoining tea plantation. The men were separated and taken some distance away and told to lie down. The guerrillas then opened fire on them, the communiqué said.

"At least 26 African men were killed and 7 injured. Some members of the labor force are still missing from the estate and investigations continue to establish their whereabouts," it said.

Officials at the plantation put the number killed at 27.

Recruiting Drive

Plantation officials in the area are currently holding a recruiting drive for black labor and expressed fears that the slayings would stem the flow of workers to the region.

The estates lie at the center of a major combat area in the guerrilla war. Last week, Rhodesian troops fought a series of running battles with insurgents in the rugged mountain terrain, killing 70 of them and losing 8 of their own men, including 2 white junior officers.

Today's communiqué also reported the deaths of 2 more guerrillas, bringing the total so far this year to 1,547 and to 2,260 since the start of the war four years ago.

A government spokesman today denied that Rhodesian troops clashed in Botswana with a mobile police patrol near the Botswana town of Francistown.

The Botswana government has said that Rhodesian troops crossed the border and were operating in Botswana when the clash occurred.

Denying the allegations, the Rhodesian government spokesman said that it was "a fact that terrorists have crossed into Rhodesia from Botswana and returned to that country after committing various acts of terrorism and violence.

"The government has evidence that residents of Botswana have assisted them. If the Botswana authorities were to round up the Rhodesian terrorists and expel them, this would greatly assist in reducing tension in the area," he said.

No formal protest has been received from the Botswana government, he said.

Wider Sanctions Urged

UNITED NATIONS, N.Y., Dec. 20 (Reuters).—The General Assembly today called for wider economic sanctions against the white minority government of Rhodesia and asked the Security Council to meet urgently to consider the matter.

Congress Adjourns

Vietnam Party Expands Two Governing Panels

By David A. Andelman

BANGKOK, Dec. 20 (NYT).—Vietnam today adjourned its first party congress in 16 years after naming a larger ruling Politburo and a vastly expanded Central Committee that seemed designed to preserve the power and privileges of Vietnam's traditional ruling circles.

In the concluding session of the congress, broadcast live from Hanoi and monitored here, Le Duan was named to continue as the party's first secretary. Although he is clearly the most powerful figure in the nation, Mr. Le Duan was still not named party chairman, in apparent continuing deference to the late Ho Chi Minh.

The new Politburo, which was expanded from 11 to 17 members, added several southern Vietnamese with close traditional ties to the north. In a surprise move, one of the north's oldest revolutionaries, Hoang Van Hoan, 71, a political operative who joined the Communist movement at the age of 19, was dropped.

A new body, an inspection committee, headed by Gen. Song Hao, chief of the army's political department, was named—apparently to undertake a purge of party ranks throughout the country.

'Blemishes' Cited

"Blemishes in the party will be corrected," Nguyen Duy Trinh, the minister of foreign affairs, said at the final session of the congress, summarizing the various reports presented to the week-long series of meetings. "Members of low political and revolutionary awareness will be dismissed from the party. New members will be recruited," he said.

There reportedly has been considerable unrest, particularly in the south, due to widespread corruption and inefficiency in party ranks. There have been charges that hundreds, even thousands, of dollars have changed hands for simple bureaucratic tasks.

The doubling of the size of the Central Committee—from 47 full members and 25 alternates to 101 full members and 22 alternates—seemed to most Western experts here to have been accomplished to include a number of younger party cadres and technocrats. Few of the new names had appeared publicly before.

However, if the Politburo is any indication, the southerners on the Central Committee will continue to have little real power over the major affairs of state in Vietnam.

3 From South

The new Politburo, in fact, contains only three southerners—Pham Hung, a veteran Politburo official who had been placed in charge of the war and political effort in the south; Nguyen Van Linh, who is secretary of the Ho Chi Minh City

Under separate bilateral accords, West German and Belgian vessels are continuing to fish in Icelandic waters. But these arrangements also will have to be renegotiated next year.

First of 81 Promised Their Release

South Africa Frees 13 Political Prisoners

By John A. Burns

JOHANNESBURG, Dec. 20 (NYT).—The South African government today released the first 13 of 81 political detainees whose freedom was pledged last week by Justice Minister James Kruger. At least 350 other persons, most of them black, remain in detention without trial.

Those released today, all black, were freed from prison in the coastal city of East London, long a center of black resistance to apartheid. They had been held since August under the Internal Security Act, which provides for the indefinite detention of any person considered a threat to national security or public order.

The 81 include 7 black journalists, among them 4 from the World, the country's leading black newspaper. The 4—Willie Bokala, Arthur Molefe, Duma Ndlovu and Moffat Zungu—constituted the newspaper's "riot squad," responsible for covering the outbreak of unrest in black communities across the country. They had been held for three months.

Other Prisoners

Two other journalists, Peter Magubane and Nat Serache of the Rand Daily Mail of Johannesburg, a vigorous opponent of the country's racial laws, were not on the list of those to be released. Nor was Winnie Mandela, a Soweto women's leader who is the wife of Nelson Mandela, imprisoned head of the African National Congress, the principal black resistance group.

Mr. Kruger, under pressure from opposition groups to free all those detained in the unrest, promised several weeks ago to review each case before the end of the year. He subsequently announced that all those held under the International Security Act—more than 100—would be released if there was no fresh outbreak of unrest. There is to be no amnesty for those held under other laws.

Today's releases occurred as white opposition groups moved a step further toward the formation of a new coalition party to challenge the government's race policies. Leaders of the two opposition groups—Sir De Villiers Graaff of the United party and Colin Eglin of the Progressive Reform party—hailed a report recommending a merger.

The new party would have 47 of the 171 seats in the assembly.

The government feels confident that it can head off any challenge by the new party, whose elements won a total of 36 per cent of the vote at the last general election in 1974, against 56 per cent for the ruling party. But there is greater concern over the proposed cooperation between the white opposition and a new black political group called the Black United Front.

Gatsha Buthelezi, the Zulu tribal leader heading the front, which includes moderate blacks, suggested earlier this month that the white opposition ignore the legal injunction against political groupings that cut across race lines.

Power Broker in Democratic Party

Chicago Mayor Richard Daley Is Dead at 74

From Wire Dispatches

CHICAGO, Dec. 20.—Chicago Mayor Richard J. Daley, the 74-year-old boss of the "last of the big-city machines," collapsed and died today after suffering a heart attack.

Mr. Daley's death was sure to cause shock waves not only in Illinois politics but in national politics as well. He had played a kingmaker's role in 21 tumultuous years as mayor of Chicago and undisputed boss of its Democratic party hierarchy.

Richard Daley

At one point in his career as "boss of Chicago," he was accused of "stealing" the 1960 presidential election for John F. Kennedy by manipulating the crucial Illinois vote into a paper-thin Democratic majority.

Last Nov. 2, his kingmaker's image was diminished when his forces failed to carry Illinois for Jimmy Carter and his handpicked candidate for governor, Michael Howlett, was defeated by Republican James Thompson by a record margin.

Power Broker

But knowledgeable politicians said that even after the Nov. 3 debacle Mr. Daley's power remained substantially undiminished. There was no one to challenge him in Chicago and his clout as a power broker in the Carter administration remained firm because his organization could be depended upon to deliver Chicago.

There had been doubts whether Mr. Daley should keep on at full throttle after he suffered a "slight stroke" which required surgery in 1974. But he went on to win a sixth four-year term by a landslide. He had two more years left to serve.

Mr. Daley's admirers hailed the way he ran Chicago—and he did run it by swiftly settling deadlocked strikes, keeping the streets unlittered and the garbage collected, the school doors open and the elevated train running and by building four new expressways.

Asked at age 73 how long he planned to remain chairman of the local party, Mr. Daley replied: "As long as there's a breath in me."

If Mr. Daley was admired by Chicago businessmen, respected by party professionals across America and revered by his precinct troops, he was detested by many—though not all—in his party's liberal wing.

At the Democratic National Convention this year in New York, where the mayor had planned a triumphal comeback after his ouster by McGovernites in a 1972 credentials fight, he was cheered as he climbed the platform for a showcase speech on urban problems. But considerable booing also rose up from the floor.

Mr. Daley's detractors remembered his battles with Martin Luther King jr. in the mid-1960s when civil rights forces called Chicago "the most segregated city in the North" and demanded the ouster of a Daley-backed schools superintendent, Benjamin Willis. They recalled his orders to police to shoot to kill arsonists in the riots following the King assassination and to shoot to "maim or cripple" looters.

To many, the name Richard Daley called to mind a florid, angry political boss, shaking his fist at Connecticut Sen. Abraham Ribicoff from the floor of the 1968 national convention in Chicago and cutting off power to delegates' microphones while the mayor's cops whacked the heads of antiwar demonstrators and "Yippies" in Grant Park.

The short, burly mayor relished the limelight, but kept close to his working-class ties, never moving out of the street in which he was born on May 15, 1902, the son of a sheet metal worker of Irish descent.

2d Navy F-14 Crashes at Sea

MANILA, Dec. 20 (AP).—A U.S. Navy F-14 Tomcat crashed in the South China Sea yesterday, but a Navy spokesman indicated today that an attempt to recover it—as was made for an F-14 that crashed in September—would not be ordered.

The jet, the most advanced U.S. fighter plane, plunged into the sea after a bad landing on the carrier Enterprise. The two crewmen were rescued.

An F-14 armed with a secret Phoenix missile crashed on Sept. 14 and sank in 2,000 feet of water in the Atlantic off the northern coast of Scotland. The plane and the missile were recovered after a two-month search.

A Navy spokesman said that yesterday's crash occurred in water 12,000 feet deep.

Seizure of Newspapers Seen as Prelude

State-of-Emergency Decree Expected in Beirut

By Henry Tanner

BEIRUT, Dec. 20 (NYT).—Lebanon is moving quickly toward proclamation of a state of emergency with the institution of military press censorship suspension of the right to hold public and political meetings without prior authorization and creation of military tribunals.

The Cabinet of Premier Selim al-Hoss, which was formed a week ago, is expected to proclaim the state of emergency at its first meeting Wednesday before asking the National Assembly for a vote of confidence the following day, rightist and leftist politicians said today.

The policy is in keeping with the view held by President Elias Sarkis and by the Syrian government that questions of law and order must be given foremost priority after the 19-month civil war. The Syrian view is decisive because of the 30,000 Syrian troops in the Arab peace-keeping force that has been imposing a cease-fire here since late October.

Most Diverse

The Lebanese press, by far the most free and most diverse in the Arab world, has been the target of a crackdown by Syrian troops for the last six days.

In all, seven newspapers and their printing presses have been closed down and occupied by Syrian soldiers, so far.

The latest action last night was directed against the highly respected independent daily An Nahar and the equally independent French-language newspaper L'Orient-Le Jour.

Also seized last night was the daily Nida, the Communist party organ, which had put its presses at the disposal of three other newspapers after they were seized and closed down by Syrian troops last week. The three—Al Moharrer, Beirut and As Safir—had all continued to appear.

Many Lebanese politicians believe that the Syrian action against the newspapers has political implications far beyond Lebanon and is part of the current efforts by Syria, Egypt and Saudi Arabia to forge a common Arab platform for the forthcoming negotiations on a Mideast settlement.

Discordant Voices

The three governments feel that it is essential that no uncontrolled and sometimes extreme discordant voices be heard in the forthcoming phase, these politicians, who can agree on little else, were saying today.

President Sarkis, along with the Syrian authorities, is convinced of the necessity of proclaiming a state of emergency. His plans, however, have been widely and often critically discussed in the press. With the most outspoken newspapers out of the way, the controversial character of the emergency measure will be less evident and political leaders opposed to it will be less tempted to make strong statements about the measure, it is argued.

Law Dates to 1953

The law under which a state of emergency can be proclaimed goes back to 1953. It gives wide powers to the Lebanese military command. It provides for censorship in the form of a ban on publications, it bars public gatherings without authorization and gives the military the power to keep a person under arrest without trial.

Since the Lebanese Army disintegrated during the civil war, Lebanese legal experts expect these powers to be given to the Arab peace-keeping force which, in practical terms, means the Syrian Army.

Doha Proud to Be 'on Map'

Qatar Brightens Up Its Image By Playing Host to Oil Talks

By Eric Pace

DOHA, Qatar, Dec. 20 (NYT).—A sports-loving Qatar prince has been worrying about his image in Washington. Desert-bred Qatari officers have gained experience in crowd control. Party hosts in this unsophisticated capital have encountered a servant problem.

The remote Arabian emirate of Qatar has grown a bit grander and more worldly from playing host to last week's three-day conference of the Organization of Petroleum Exporting Countries.

This is not a very big country, but the people feel that their place in the world has grown, a traveler was told by Jamil Bahbah, a Qatar administrator, as delegates from the 13 OPEC countries continued their long hours of wrangling over oil prices here

Qatar is essentially a small city, Doha, with a population of roughly 100,000, attached to a swatch of sparsely inhabited desert.

Beneath that desert are oil depcsits that yield $2 billion a year in revenues and enable the Qatar ruling family to provide lavish hospitality.

And so the Qatari government invited the OPEC nations to have their conference here and thought nothing of providing a few dozen new Mercedes cars for the occasion and offering the delegates free telephone service to any point in the world.

And so also Qatar's oil minister, 26-year-old Sheikh Abdel-Aziz ben Khalifa al-Thani, found 200 reporters hanging on his every word as he answered their questions before the conference began in the state-owned Gulf Hotel.

The sheikh, a son of Qatar's ruler, who is a fervent soccer fan, called for an oil-price rise —which was opposed by Washington, and then paused, reflected and said amiably, "I hope the Americans are not too mad at me, now."

The sheikh's father, Sheikh Khalifa ben Hamad al-Thani, was on hand to address the opening of the conference and he beamed when the Indonesian chief delegate, Mohammed Sadli, made a speech praising Doha as "this gracious, lovely and hospitable capital."

Such recognition is thirsted for by Qatar's relatively large upper crust—the 66-page national telephone listings contain more than two pages of sheikhs. The family of the ruler is proud of its traditions—it moved here two centuries ago from what is now Saudi Arabia—but these have attracted little attention abroad.

In recent years, Qataris have taken various steps to gain international recognition. In the last decade alone, Qatar has issued more than 600 new postage stamps. And in April this year it played host to a tournament of soccer teams from the Gulf region, for which the rulers of other Gulf sheikhdoms flew in planeloads of fans.

Oil-World Celebrities

Such activities were outclassed by last week's conference, which brought together such oil-world celebrities as Saudi Arabia's oil minister, Sheikh Ahmed Zaki Yamani, and Iran's chief oil negotiator, Jamshid Amouzegar. Though the conference ended with a painful split in oil-pricing policy, the Qataris did their best to provide it with a serene environment.

The deputy commander of Qatar's armed forces, Brig. Gen. Mohammed Attiyah, scion of an old clan, paced the lobby of the Gulf Hotel, walkie-talkie in hand, to insure that the conference was not disturbed by possible terrorists or by the swarms of journalists and other onlookers thronging the hotel's ground floor.

Qatari soldiers were in position around the hotel.

"The men are proud to do their duty," he said.

The Doha bureaucracy also threw itself with enthusiasm into activities befitting a diplomatic center. Billboards were put up along city boulevards proclaiming such slogans as "Control of nations over their natural resources is an inalienable right." The Qatari national radio marked the convening of the conference by inaugurating a morning English-language disc-jockey program playing Western tunes.

The conference also touched Qatar's people, who have largely given up such traditional pursuits as fishing and have concentrated in the Doha area, where much new housing has been going up. Some taxi drivers charged double the usual fare for rides in the neighborhood of the Gulf Hotel. Extra servants became hard to find because so many Doha waiters were put to work serving visitors who had come here for the conference.

Idlers watched as OPEC potentates came and left in motorcades, guarded by steel-helmeted policemen and heavy machine guns.

Though no activities by any would-be terrorists were reported, and there were no arrests, some logistical problems arose—a crowded Gulf Hotel elevator carrying foreign visitors to Sheikh Yamani's suite got briefly stuck, causing panicky onlookers to cry inaccurately, "They're dying in there!" as passengers pounded on the elevator walls.

And OPEC employees temporarily ran out of copies of the final declaration. Yet such occurrences did not dilute the Qataris' sense that, as officials repeatedly declared, "The eyes of the world are on us," and that what the world was seeing was good.

JERUSALEM MEETING—Prime Minister Yitzhak Rabin and former Prime Minister Golda Meir early yesterday after party meeting to discuss critical political situation.

Rabin Resigns, Setting Stage For Early Elections in Israel

(Continued from Page 1)

sponsibility," Mr. Rabin said, was one "on which no one can make any compromise."

"We now have a government that controls only a minority," he said, and "early elections are practically inevitable."

The no-confidence motion was initiated by members of the United Torah Front, another religious bloc in the parliament.

The UTF charged that Mr. Rabin had "desecrated" the Jewish Sabbath by holding a welcoming ceremony late on the previous Friday afternoon for three U.S.-made F-15 jet fighters sold to Israel.

Numerous splinter groups, many of them avidly opposed to the religious parties in the Knesset, nevertheless supported the no-confidence motion for their own political reasons. Mr. Rabin withstood the challenge by only seven votes.

A number of politicians and observers discerned a subtle strategy afoot in the expulsion of the NRP. This group, according to some interpretations, was extracting more from the Labor party than it was giving. By expelling the hard-line religious bloc, it is thought, Mr. Rabin will have more leeway in taking moderate positions on foreign and domestic issues. However, Mr. Rabin cautioned newsmen today against reports that he was softening his policies.

Blow to 'Indecisiveness'

Rightly or wrongly, Mr. Rabin's abrupt and uncharacteristic repudiation of members of his majority was being viewed here as having gone a long way to eradicate his reputation for indecisiveness.

He has also been regrouping some of the disaffected members of the Labor party leadership under his banner, as well as long-time supporters such as former Prime Minister Golda Meir.

At least for now, he has stolen the limelight from his chief opponent in the Labor party, Defense Minister Shimon Peres, who is an ambitious and able contender for Israel's top office.

Hanoi Session Is Adjourned

(Continued from Page 1)

(Saigon) Central Committee, and Vo Chi Cong, who had headed the People's Revolutionary party during the war and most recently was vice-president of the Presidium of the National Liberation Front Central Committee.

Curiously, the man who for years was Mr. Cong's superior as president of the National Liberation Front Presidium's Central Committee, Nguyen Huu Tho, was not included on either the Politburo or the Central Committee, although he may have been named an alternate Central Committee member. However, Mr. Tho had no close connections with northern party leaders.

One of the three alternates on the Politburo, Yo Yan Kiet (alias Sau Dan), is the deputy to Mr. Linh. The Politburo contains 14 full members and 3 alternates compared with 11 full members and no alternates before.

Another new addition, Do Muoi, also an alternate, is a deputy premier and the minister of building. Several weeks ago, he became the first senior Vietnamese official to meet Chinese party Chairman Hua Kuo-feng during a visit to Peking. There was considerable surprise at the time that Mr. Hua would see a Vietnamese who was not a member of the Politburo. It now appears that word of his imminent elevation may have been passed to the Chinese and that it was indeed a high-level contact.

Chinese Are Absent

China sent no delegation to the Hanoi session, although nearly 30 other foreign Communist parties sent observers. The Moscow delegation was led by the Soviet Communist party's chief theoretician, Mikhail Suslov.

The 1,008 delegates, assembled in Hanoi's Ba Dinh Conference Center, approved a change of the name of their party from the Vietnam Workers party to the Vietnam Communist party.

During today's session, the congress ratified unanimously the nation's new five-year development plan, which had been presented by Premier Pham Van Dong, and the party's political report, presented by Mr. Le Duan.

The conference also approved a new series of "rules and regulations," believed to be a new Constitution, but no details of the document were disclosed.

Mob of Rightists Jostles Speaker Of Spain's Cortes

MADRID, Dec. 20 (UPI).—The police today had to rescue one of the chief architects of post-Franco reform when an angry mob of rightists jostled and insulted the speaker of the Cortes (parliament), Torcuato Fernandez Miranda, in central Madrid.

Opposed to democratic reform and angered by the recent kidnapping of a prominent politician, about 200 demonstrators beat on Mr. Fernandez Miranda's car with umbrellas until he was finally able to get in it and speed away. He had attended a memorial service for assassinated Premier Luis Carrero Blanco.

Earlier today in a guerrilla-style attack, five youths firing submachine guns killed a 51-year-old guard and robbed a Madrid bank of 16 million pesetas ($240,000).

Meanwhile, Falangist youths handed out leaflets charging that the Spanish Communist party made the plans for, and financed, the kidnapping nine days ago of the president of the Council of State, Antonio Maria de Oriol y Urquijo, 63.

Almost 48 hours since the last communication from his abductors and a note from Mr. de Oriol, there was no new word from either.

Germany to Curb A-Plant Sales After Brazil Deal

BONN, Dec. 20 (AP).—Like France, West Germany will stop exporting nuclear technology that could boost the spread of nuclear weapons, but the move will not affect a controversial deal with Brazil, a Foreign Ministry spokesman said today.

The spokesman, Klaus Terfloth, was commenting on last week's Paris announcement that France, like West Germany under pressure from the United States, has declared an embargo on sales of nuclear reprocessing technology to other countries.

In confirming that West Germany will not cancel a much criticized nuclear technology sales agreement with Brazil, he said there has been "no question" of existing deals being affected by the new guidelines.

He said, "As far as I know, the French statement referred to the future"—meaning that France will go ahead with plans to sell a nuclear reprocessing plant to Pakistan. [It has been widely reported in Paris that the Pakistan deal will not go through.]

The West German and French deals have caused concern in the United States over the possible spread of nuclear-bomb capability to Third World countries but Bonn has often said that it will honor the agreement with Brazil.

European Accord On Oil Pollution

LONDON, Dec. 20 (Reuters).—Victims of offshore oil pollution in northwest Europe will be able to claim compensation under an international liability convention that has been signed here.

The agreement, signed by representatives of Belgium, Denmark, France, West Germany, Ireland, the Netherlands, Norway, Sweden and Britain, is the first of its kind.

The draft text of the convention was produced by the Intergovernmental Conference on Civil Liability for oil-pollution damage from offshore operations, which met in London last week. A conference spokesman said that details of the agreement would not be released until it was ratified by the respective governments.

S. Yemen to Free Pilot From Iran

CAIRO, Dec. 20 (UPI).—The Southern Yemeni government has agreed to release an Iranian pilot it captured on Nov. 24 after shooting down his Phantom aircraft, the Saudi Arabian Royal Court announced today.

The announcement said that Southern Yemen "responded" to Saudi Arabian mediation efforts and will release the pilot to the Saudi government which will return him to Iran.

Aden authorities said they shot down the plane, killing one pilot and capturing the other, when it violated Southern Yemeni airspace. Iran denied the charge and said the plane was flying over Oman at the time.

Refugees Gain Australia

DARWIN, Australia, Dec. 20 (UPI).—A motor launch with 56 South Vietnamese refugees aboard sailed into Darwin Harbor last weekend, ending a 2,800-mile voyage lasting two months.

Russia to Allow Top Conductor To Go to Israel

MOSCOW, Dec. 20 (UPI).—Rudolf Barshai, founder of the Moscow Chamber Orchestra and one of the Soviet Union's foremost conductors, has been granted permission to emigrate to Israel, he said today.

Authorities summoned the 52-year-old musician last Wednesday to inform him that his application to leave had been approved. But he said they gave no date for issuing the exit visa.

Mr. Barshai applied in August to emigrate. At the time he had not been allowed to travel abroad with the chamber orchestra for more than a year, apparently because he had requested Soviet cultural officials for a 12-month "creative leave" or sabbatical in the West.

As founder and conductor of the orchestra, he had traveled previously throughout the world with the group.

Mr. Barshai said he has not worked with the orchestra since it returned last month from a concert tour in Austria and West Germany. His last concert was Oct. 3, just before the orchestra left without him on the tour.

Mihajlov Is Reported On Total Food Strike

BELGRADE, Dec. 20 (Reuters).—Imprisoned dissident Mihajlo Mihajlov has gone on a "total hunger strike" to protest what he considers the lack of special rights for political prisoners in Yugoslavia, family sources said here yeterday.

The author, 42, serving a seven-year sentence on charges of spreading anti-state propaganda, told a family member who visited him that he had not accepted anything but water since Dec. 6. In the last year, Mr. Mihajlov has reportedly staged two hunger strikes to press for concessions.

Widow's Plea For Pension Gets the Ax

KASSEL, West Germany, Dec. 20 (UPI).—The Federal Social Court ruled today that a wife convicted of murdering her husband cannot claim a widow's pension.

The 47-year-old woman, the mother of six children, was convicted of murdering her husband with an ax in 1972 and drew a suspended 18-month prison term.

When the social security system denied her a widow's pension, the woman filed a complaint. Two lower courts ruled that social security must pay a pension but the Federal Social Court threw out the rulings.

10 Die in Turkish Crash

ANKARA, Dec. 20 (Reuters).—At least 10 persons were killed and more than 30 injured yesterday when an intercity bus fell 30 meters over a cliff after colliding with a car on the Istanbul-Ankara road.

Sheepish Admission

LONDON, Dec. 20 (Reuters).—Scotland and Wales have more sheep than people, an official statistical report said.

A real-silk dressing-gown makes a magnificent gift

If you're thinking of giving some lucky man a dressing-gown this year, you won't be able to resist those on offer at Lanvin 2.

They're in different designs of natural silk, woven by the banks of lake Como, and they're made up by hand here at Lanvin 2 (F 1 150).

If you prefer your colors plain, Lanvin 2 has other models in woolen satin (F 1 200). And in the same department you'll find an impressive collection of matching pajamas (from F 320).

Recent Killing Provides Clue

Probe of CIA Agent's Murder In Athens Last Year Is Stalled

By Mary Anne Weaver

ATHENS, Dec. 20 (WP).—Despite an exhaustive yearlong investigation, mobilizing at least eight security services around the world, the assassination in Athens last December of CIA station chief Richard Welch remains a mystery.

No substantial leads have been uncovered and authorities have exhausted most of the clues, which were fragmentary at best.

But impetus has been given to the investigation by the assassination last Tuesday of Evangheios Mallios, a ranking security official of the ousted Greek military government. The police said yesterday that ballistics tests show that the same 45-cal. pistol was used in both slayings.

During the year since the killing of Mr. Welch, teams of CIA investigators have come to Athens. They have directed or participated in four major inquiries. A number of foreign services have cooperated, including the Cypriots, Turks and the Soviet KGB.

According to authoritative sources, the KGB apparently was eager to show that it was not responsible for Mr. Welch's death. It apparently realized that its own agents could become highly vulnerable if warfare broke out between major intelligence services.

Professional Job

For the investigators, there was little to work on from the beginning since the assassination was a highly professional job.

Surrounded by three masked men outside his suburban villa as he returned from a Christmas party Dec. 23, Mr. Welch, 46, was shot down with cool precision. Within 60 seconds he lay dead on the pavement. The assassins fled in a black Fiat without leaving a trace.

After a year of sifting clues, interrogating suspects and trying to unravel motives, the prevailing theory, according to a source close to the investigation, is that a small group of rightist extremists were responsible for the assassination. They could have been Greek, Greek-Cypriot or both.

Their motive was twofold, according to the theory, to destabilize Greece's new democratic government and to settle a score with the U.S. agency. The CIA has been accused of betraying rightists in both Cyprus and Greece.

"This was a time," another source said, "when major trials were sending the leadership of the junta [deposed in 1974] to prison for life. Makarios had returned to Cyprus and the idea of 'Enosis,' union of Greece and Cyprus supported by the rightists, was clearly and finally dead. These were guys who, in their right-wing, anti-Communist fanaticism, thought they were implementing the agency's plans. So they expected the CIA to support them. But dictatorships were overturned in both Nicosia and Athens and the CIA never said a word."

Volatile Years

"Welch was well known on Cyprus," the source continued. "He served there in the volatile years after independence, from 1960 to 1963. On an island like that, you're bound to make enemies and some of the best guns in the eastern Mediterranean are members of EOKA-B," the Greek-Cypriot terrorist group.

Interrogation of scores of Cypriots, both sympathizers and informers of EOKA-B, has unearthed no substantive information relating to the Welch murder. Neither have any of the more than 500 interrogations to date.

Known anarchists, professional gunmen, members of Greece's ultra-right and left, have all been summoned to security headquarters. Their homes have been raided and, in some cases, their offices sacked. Although the authorities have uncovered a scattering of small-arms arsenals, they have unearthed nothing on the assassination of Mr. Welch, despite the offer of a $16,000 reward.

The car used in the killing has not been found and there is no iron-clad evidence that the assassins were Greek.

Mr. Welch's driver and bodyguard, Evangheios Christoulou, insists that one of the assassins shouted "Put up your hands" in Greek. Mrs. Welch, the only other witness, does not agree.

Two previously unknown organizations have claimed responsibility for the killing but neither claim could be verified. The police dismissed both claims as the work of cranks.

One of the most mystifying aspects of the two assassinations is the surfacing of a little-known underground organization calling itself the "Revolutionary Organization of Nov. 17."

Named after a student uprising against the junta on that date in 1973, the organization, through printed statements, has claimed responsibility for killing both Mr. Mallios and Mr. Welch.

Other than those claims and some minor bomb attacks on U.S. cars, the authorities have no information on the allegedly leftist splinter group. Experts are examining leaflets strewn near Mr. Mallios's body, allegedly by "Nov. 17," and comparing them with statements slipped under the doors of foreign news agencies last December, claiming responsibility for the assassination of Mr. Welch.

There are a number of striking similarities between the Welch and Mallios operations, according to one the ultimate objective of destabilizing the Greek government.

However, in the case of Mallios, it appears to be work of a group with a far leftist base.

U.S. to Quer Cuban Over Chilean Dea

By Norman Kempste

WASHINGTON, Dec. 20.—Venezuelan government agreed to let U.S. investig question a Cuban-exiled ter now in a Caracas jail about assassination in Washington former Chilean Cabinet min Orlando Letelier, according sources familiar with the in tigation.

The sources said that Cuban, Dr. Orlando Bosch, a suspect in the killing. But said that the Justice Depart has determined that Dr. B probably knows who murd Mr. Letelier and why.

A federal prosecutor and FBI agent plan to go to Ca early next month to interro Dr. Bosch, a pediatrician an anti-Castro militant, who is sidered a leader of a vio group of Cuban exiles.

The sources said that the Justice Department believes Bosch can corroborate evide already obtained, which seem point to a plot in which C exiles were hired to do killing.

U.S. investigators, the sou said, have developed infor tion indicating that the Cu were hired by an official of military government of C who traveled to the Un States under an assumed n to arrange for the murder.

Identity Not Revealed

The sources refused to iden the Chilean except to say he was closely connected that country's intelligence ag cy, Dina, and had close ties an extreme political group partly funded by the U.S. C

Mr. Letelier, 44, who served foreign minister and defense m ister in the government of late President Salvador Allen was killed on Sept. 21 when bomb exploded in his automo as he was driving in Washing

Also killed was Ronni Mof 25, a colleague of Mr. Lete at the Institute for Pol Studies, where Mr. Letelier l worked following his release fr prison in Chile in 1974.

Dr. Bosch, who was convicte 1968 of firing a bazooka at Polish ship in Miami Harb was indicted in Venezuela in c nection with the bombing Oct. 6 of a Cuban airliner which 73 persons were killed.

Dr. Bosch, who once worke Miami as a pediatrician familiar with the world of a Castro terrorists and the in ligence arm of the Pinochet ernment in Chile. He viol parole in the United States of Interest 1974 and fled to Chile, w he lived for almost a year government-owned guest ho He later entered Costa Rica a Chilean passport issued to under a false name.

Soviet Stand Halts Trip by U.S. Scientists

Soil-Research Teams Planned an Exchange

By William Robbins

WASHINGTON, Dec. 20 (NYT): —An agreement to exchange soil-research teams this year has collapsed because of Soviet limitations on travel by U.S. soil scientists, according to government officials and researchers here.

The exchange had been planned under an agricultural cooperation agreement signed in 1973, they said, and breakdowns had been rare. They said that the program had shown slow but steady progress despite problems of access to study areas such as those encountered by the soil researchers.

Officials said that 13 of 15 scientific, technological and economic exchanges proposed under the cooperative program had been completed as planned this year and that another had been postponed by mutual agreement.

No public report has been made on the deadlock over the soil-research project but details were contained in a series of unclassified messages and memorandums, copies of which were obtained by The New York Times.

Officials were reluctant to discuss the issue, apparently for fear of hampering further progress in the program. But Paul Vander Myde, a deputy assistant secretary of agriculture, and researchers acknowledged that the plan had fallen through.

Under the plan, a team of four U.S. researchers would have visited permanently frozen areas in the Soviet Union's northern regions. Among their interests were percolation of water in such soils, forage crops grown in them and the use of waste heat for glass-enclosed gardens.

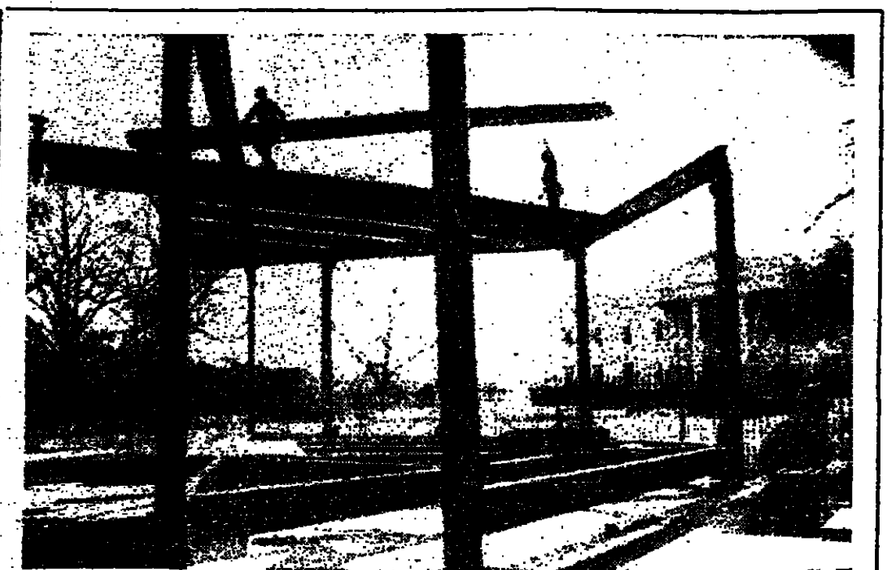
Proposed Visits

The team was to have visited the Soviet Union in July, with a return visit by a Soviet team scheduled for August.

The U.S. team proposed visits to five northern cities, from Kirovsky in the Soviet northwest to Magadan in the Soviet Far East. They also sought to visit Tiksi, on the northern coast; Salekhard, near the northern edge of the west Siberian plain, and Yakutsk, an inland Siberian city on the Lena River.

A Soviet response, received only a few days before the U.S. team was scheduled to depart, limited the visit to the Yakutsk area.

According to an undated memorandum in Agriculture Department files, the Soviet explanation was that visits to the other areas "would hardly benefit the trip." The same memo says: This was contradicted by Americans visiting those areas, talks with Soviet scientists, Soviet press and journals."



Despite protests, the Soviet position remained unchanged. As a result, the United States canceled the trip and said, according to the memo, that "the corresponding U.S.S.R. team would not be accepted in August."

'Lack of Interest'

A memorandum written Nov. 24 by an aide at the U.S.-U.S.S.R. secretariat, the Agriculture Department unit that arranges exchanges, indicated that the problem might be merely a Soviet lack of interest in the frozen-soils project area."

Economic, technological and scientific agricultural exchanges have been conducted continually since an agreement was signed in 1973. On only one occasion has the United States publicly reported a problem concerning the exchanges. That occurred in 1974, when a team of agricultural experts sent to study the Soviet wheat crop returned to the United States without carrying out its mission. They said their proposed travels had been so restricted that they could not gather accurate data.

Subsequently, U.S. agricultural attachés in Moscow often have been denied permission to visit proposed areas. Such teams try to assess Soviet crops to determine prospective Soviet needs. Teams have made inspections and returned with crop information that has provided clues to crop conditions that later were borne out by production data.

PREPARATIONS—Workmen in front of the White House on Pennsylvania Avenue place beams for the stand on which Jimmy Carter will be inaugurated Jan. 20.

As Independence Campaign Intensifies

Quebec Reinforces French-Speaking Dictum

By Henry Giniger

MONTREAL, Dec. 20 (NYT). —Quebec's new government has begun efforts to reinforce the position of French as the only official working language of this province.

The campaign to make Quebec's cultural and language identity more distinctive appears to be part of the preparation to achieve Quebec's independence in the next few years. The provincial government's principal legal base is the Official Language Act, which was passed in 1974 under the previous, Liberal government.

This law, contested and attacked by those who do not speak French in Quebec and other parts of Canada, sought to establish the primacy of French in education and in work; it will be made even more stringent in the future, according to plans announced for its revision.

The new campaign was indicated at the opening of a special session of the Quebec Assembly Tuesday when the speech from the throne, a statement of government policy delivered by the lieutenant governor of Quebec in the name of Queen Elizabeth II, went against a century of tradition: It was entirely in French.

A few sentences or paragraphs were always spoken in English as a gesture to Quebec's English-speaking minority, but Premier René Levesque described the practice as "an obsolete tradition." Jean-Noël Lavoie, leader of the Liberal opposition, accused the federal government of insulting Quebec's minority and called the omission of the English "a gesture of separatism."

Just before the session opened, there was another such gesture. Mr. Levesque went to Quebec city from a conference in Ottawa in an official plane and, when they were over Montreal, the pilot spoke to ground-control in French.

An English-speaking pilot on a nearby commercial flight lodged an official complaint, thus refueling the controversy that has raged in Canada since French-speaking pilots demanded the right to use French instead of English, which is used almost universally.

The right has been granted for small Quebec airports but not for Montreal. Mr. Levesque, however, said his government would back the pilot in any court case.

The two incidents gave a flavor of things to come, which was subsequently spelled out a bit more when the Premier renounced a revision of the Language Act. Controversy over this act helped to defeat the previous Liberal government. Camille Laurin, the minister for cultural development, was given until Feb. 15 to propose revisions that would make French "a useful, profitable and necessary language for all Quebecers."

Jacques-Yvan Morin, the minister of education, told the Assembly that "in our view, all spheres of Quebec life must be made French—work, public administration, business, the professions and communications."

The English-speaking minority has long dominated business life in Montreal, and the effect has been to make most French-speaking people, working in subordinate positions, bilingual out of necessity. English schools will continue but only those Quebecers whose maternal tongue is English will be allowed to send their children to them.

Increased pressure, however, is expected to be brought to bear on the English Canadians here to learn French.

Future immigrants will be obliged to attend French schools. The expectation is that the majority would go to English-speaking cities such as Toronto, rather than to Montreal. Meanwhile, the present government has inherited from its predecessor the problem of what to do with immigrant children who are here now.

Some were admitted to English schools after language-proficiency tests, which will disappear under the proposed revisions, but others are attending English schools illegally under the terms of the present law.

Goldwater Drops Bid For Senate GOP Post

WASHINGTON, Dec. 20 (AP). —Sen. Barry Goldwater of Arizona announced last weekend that he was withdrawing from the race for Senate Republican leader, a post being vacated next month by retiring Sen. Hugh Scott of Pennsylvania.

Sen. Goldwater decided to pull out of contention because his supporters had been unable to line up the 20 votes needed for election, his press secretary said. Many of the 38 Republicans in the Senate have committed themselves to Sen. Robert Griffin of Michigan, the Senate minority whip. Sen. Howard Baker jr. of Tennessee also has been reported interested in the post.

Tanker Oil Spill Threatens Fish Off Mass. Coast

BOSTON, Dec. 20 (AP).—As 1.5 million gallons of heavy fuel oil from a grounded tanker headed toward one of the world's richest fishing grounds, the Coast Guard today mapped strategy for keeping 6 million gallons more from escaping.

Capt. Lynn Hein, coordinator of the clean-up operation, said that the amount of oil leaking from the 640-foot Argo Merchant had dwindled because cold temperatures had thickened the oil to a pudding-like consistency.

The oil was flowing out into a wedge-shaped area extending 65 miles to sea from the tanker. At its farthest point from the ship, the 35-mile-wide edge of the wedge was about 40 miles from the Georges Bank fishing grounds.

Many species of fish in the Georges Bank area could be poisoned, biologists said.

The Argo Merchant ran aground Wednesday on shoals 27 miles southeast of Nantucket. The Liberian-registered vessel was traveling from Venezuela to Salem, Mass.

The Coast Guard plans to pump the oil into two large barges to shuttle it ashore, but officers now say it will be Thursday before pumping can begin because the thickened oil must be heated before it is pumped.

Confucius Quote on Statue Draws Women's Lib Wrath in Houston

HOUSTON, Dec. 20 (UPI).—In 473 BC, Confucius said, "Men have their respective occupations and women their homes."

The remark threatens to keep a statue of Confucius—a Bicentennial gift from Taiwan—from display in city hall.

"I thought Confucius had been buried," said Nikki Van Hightower, a women's rights advocate, when told that Parks Director George Lanier hopes to display the four-foot bronze image bearing the quotation in his new office.

She first complained about the statue after a July 4 presentation and it was put in storage a short time later. The controversial phrase is part of a lengthy definition of "The Great Harmony," printed in English and Chinese on the statue.

"When the great principle prevails," Confucius is quoted as saying, "the world is a commonwealth ... mutual confidence is promoted ... men have their respective occupations and women their homes."

"My feeling is that it's a sexist statement and ... we should not have such statements out and around in a public place," Miss Van Hightower said.

Mr. Lanier disagreed.

"We think it's a nice statue," he said. "We think it's appropriate as a gift to the city of Houston. And we want to provide a prominent location for it. The phrase in question is a minor part of a historical quotation."

Joan Little Is Denied Parole for Burglary

RALEIGH, N.C., Dec. 20 (AP). —Parole has been denied for Joan Little, 22, the black woman who was acquitted of murder last year in the death of a white jailer but who is being held on another charge.

Miss Little is serving a 7-to-10-year sentence for breaking and entering in 1974. She was in the Beaufort County jail, while that conviction was on appeal, when she killed her jailer with an ice pick. She later testified that she stabbed the jailer in self-defense while he was sexually assaulting her.

A Site for EEC Still in Doubt

BRUSSELS, Dec. 20 (IHT).— At France's insistence, EEC research ministers today canceled a meeting called to decide whether Britain or West Germany is to be the site of the Joint European Torus (JET), the plasma machine essential to the EC's thermonuclear-fusion program.

This puts in serious doubt the project's whole future, according to officials of the European Economic Community. The delay caused by a year of wrangling about the (JET) site has reduced the lead in this field which Europe has had over the United States.

Since the last EEC debate on this subject, officials had assumed the site choice was between Culham in Britain and Garching in West Germany. But the French now insist on their own preference, Cadarache. Unless the other countries were prepared to take account of Cadarache, French officials said, there was no point in holding the meeting.

Politicians Getting Phone Calls

Nixon Believed Planning Public Re-Emergence

By Lou Cannon

WASHINGTON, Dec. 20 (WP). —Twenty-eight months after he resigned from the presidency rather than face impeachment proceedings, Richard Nixon is behaving like a man who believes he can rehabilitate his reputation and make at least a limited re-entry into public life.

"I think you're going to see a lot of President Nixon on the scene in 1977," said a southern California friend who said he had spoken with Mr. Nixon recently. "Without knowing exactly what he is going to do, I get the impression that he thinks a lot of people are willing to look at the good things about him as well as the bad."

This impression is reinforced by a series of telephone calls Mr. Nixon made during and after the presidential election to Rep. Guy Vander Jagt of Michigan, chairman of the House Republican Campaign Committee, and to Sen. Bob Dole of Kansas, President Ford's running mate.

Mr. Nixon talked to Rep. Vander Jagt twice before the election and once afterward, praising the Michigan congressman's performance in a debate with Rep. John Brademas, D-Ind., and offering what Rep. Vander Jagt called "a very penetrating analysis" of the presidential election campaign.

Mr. Nixon telephoned Sen. Dole at his apartment in the Watergate complex in Washington after the election.

"He wanted me to know I had a couple of friends in San Clemente and that he thought I'd done a good job in the campaign," Sen. Dole said.

The former president reportedly also telephoned former Republican Sen. Edward Gurney of Florida to congratulate him after he was acquitted of perjury charges Oct. 26.

And Mr. Nixon has talked to several close friends in California. One of these said he was "in very good spirits and looking forward to the publication of his book."

His deadline for completing the book is now Jan. 9, the date of his 63d birthday. The book is scheduled for publication in the autumn and for serialization beforehand in The New York Times.

4 TV Interviews

But Mr. Nixon's public re-emergence will occur before then, in April and May, in a series of four still-to-be-taped, 90-minute TV interviews with David Frost. Mr. Nixon was paid $600,000 for these interviews.

"He is setting great store by these interviews," said a friend. "He believes that the public is now ready to put the mistakes he made in perspective and listen to his side of the story."

This reference to "mistakes" is consistent with the view that Mr. Nixon always has taken about the Watergate case, which he often has referred to as an error in judgment without ever accepting criminal responsibility, even after he was pardoned by Mr. Ford.

Republican officeholders seem to be of two minds about Mr. Nixon. Most of them are worried that any Nixon emergence will keep active the Watergate issue, which severely damaged the party in the 1974 and this year's elections. On the other hand some Republicans see Mr. Nixon as having some future role in foreign affairs.

Foreign Issues

Sen. Dole said this week that he thought that Mr. Nixon might be acceptable in dealing with foreign issues because even his adversaries concede "he did a lot of good things in this area." The senator said he did not believe that Mr. Nixon would be able to play a domestic role.

A similar comment was made by Rep. Charles Wiggins, R-Calif., who was one of Mr. Nixon's staunchest defenders on the House Judiciary Committee until a tape showed that Mr. Nixon had tried to squelch the Watergate investigation a few days after the break-in.

"It's inevitable he's going to come out at some time," Rep. Wiggins said. "I don't expect him to remain a recluse."

A person close to Mr. Nixon said the former president has "no illusions" about the difficulty of a public role.

Lockheed Ex-Official Asserts Japanese Requested Bribes

By Richard Halloran

WASHINGTON, Dec. 20 (NYT). —The former vice-chairman of the Lockheed Aircraft Corp., Carl Kotchian, who was a central figure in the Lockheed scandal in Japan, has asserted that the bribes his company paid in that country were all requested by Japanese, not offered by Lockheed.

Mr. Kotchian's contention, contained in the manuscript of a book, runs counter to the widespread impression in Japan last winter and spring, when the scandal was at its height, that Lockheed had taken the initiative in bribing Japanese leaders and businessmen.

Mr. Kotchian says that, "In the TriStar sales campaign in Japan, we never once offered money from our side." He contends that all the requests came from Lockheed's "confidential consultant," Yoshio Kodama, who was one of Japan's most effective power brokers, and from officers of the Marubeni Trading Co., Lockheed's sales agent.

Mr. Kotchian, who has resigned from Lockheed, justifies the bribes as "admission to a ball game." He says that, "If you didn't pay the admission, you were not even qualified to participate in the game—Your product would not even be considered."

He argues that the payments were "a defensive strategy to defend ourselves in the game of international trade." He also maintains that they were "worthwhile, since they amounted to less than 3 per cent of the expected sum of about $430 million" that Lockheed would receive for the sale of 21 TriStar airliners.

In his book, entitled "Lockheed Sales Mission: 70 Days in Tokyo," Mr. Kotchian also alleges that:

- Seven additional Japanese politicians, including a potential premier, were involved in the scandal beyond the 16 who have been arrested.
- Of the $12 million that Lockheed paid to help sell the TriStar to All Nippon Airways, only $3.4 million was in sales commissions. Mr. Kotchian disclosed for the first time that $4.3 million purportedly went to Mr. Kodama in retainer and consulting fees and that $4.3 million was paid in bribes to Kakuei Tanaka, the former premier, and other politicians.
- Lockheed initiated and circulated a rumor in Japan that the Richard Nixon administration was urging the Japanese airline to buy the Lockheed planes, although that was untrue.

The book is an outgrowth of about 100 hours of interviews with Yoshio Murakami, a reporter for Asahi Shimbun, a leading Japanese newspaper. Mr. Murakawi wrote the book for Mr. Kotchian in Japanese, then produced an English-language version. Mr. Kotchian has declined to see any other reporters.

Mr. Kotchian asserts in his book that Kenji Osano, an executive in the transport business, took a bribe of $1.6 million to use his connections with Mr. Tanaka on Lockheed's behalf. Mr. Osano is a close confidant and political financier of Mr. Tanaka but has denied in testimony before parliament any connection with Lockheed.

Mr. Kotchian also asserts that Mr. Kodama, Lockheed's "confidential consultant," used his influence with Yasuhiro Nakasone, then minister of international trade and industry, to gain a favor for Lockheed. Mr. Nakasone, the leader of an important faction of the governing Liberal-Democratic party and an aspirant for the premiership, has also denied any involvement.

The name of Ryoichi Sasakawa also appears in Mr. Kotchian's manuscript. Mr. Sasakawa, like Mr. Kodama, is a power behind the scenes in Japan.

Mafia Swindle Aimed at Firms Reported in U.S.

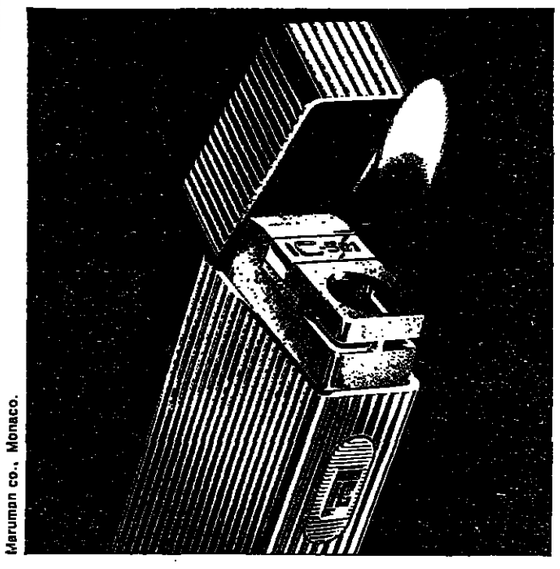
NEW YORK, Dec. 20 (AP).— Authorities have uncovered a nationwide, Mafia-operated swindle operation that bilks businessmen out of millions of dollars and takes over companies that owe them money, The New York Times said today.

The newspaper said that detectives in six Western states had discovered evidence that hundreds of persons may be involved in the racket and several minor figures have already been arrested.

Investigators believe that the Carlo Gambino crime family of New York is a major cog in the operation, whose prime activity is a variety of the loan sharking game, according to the article.

Law enforcement officials from Arizona, California, Colorado, Nevada, New Mexico and Utah have pooled their information in an effort to focus on the swindles that involve at least 20 other states, including New York. Several investigators have called it the largest example of organized economic crime they had found, The Times said.

Detectives asserted that the organization under investigation also was involved in a variety of crimes, including the advance-fee swindle, land frauds, vending machine tampering and medical malpractice insurance.



1st Male U.S. Saint

VATICAN CITY, Dec. 20 (Reuters).—Pope Paul announced today that he would canonize Blessed John Neumann of Philadelphia as the first male U.S. saint on June 19 of next year.

Britain Under Pressure

The first effect of Britain's latest budget cuts will be, unfortunately, another erosion of its standard of living. The first benefit will be another large international loan to prevent another run on the pound. The recent recession, and particularly the conditions attached to the new loan, are forcing Britain to reconsider and debate even the most firmly established of its national policies.

The quarrel within the ruling Labor party runs far deeper than the rather conventional differences between Labor and its formal opposition, the Conservatives. The dominant and centrist segment of the Labor party is strongly committed to the idea of Britain as a trading nation, a world financial center and a member of the European Community. The party's left wing, bitter in its resentment of foreign creditors and foreign competitors, inclines increasingly toward protectionism and letting the rest of the world go hang itself. The centrists and internationalists have once again won—but only after many weeks of intramural combat, and not by any very reassuring margin.

* * *

The basic question is the remedy for a country with very high unemployment, low exports and a desperate need for credit. Britain's case is hardly unique. In Europe alone, Italy and France are on the same list. But unlike France, Britain is already so heavily in debt that it can borrow only from lenders of last resort—in this case, the International Monetary Fund—that set painful requirements to reduce current deficits. Unlike Italy, Britain is weighted with the recollection of influence and markets that it no longer commands.

Britain's economic strategy is to induce higher industrial investment, higher productivity and, above all, higher exports. That is the larger purpose of the program that Denis Healey, the chancellor of the Exchequer, read to Parliament last week. Its success is anything but assured. The economy has not responded well to previous inducements along these lines, and export performance in the recent months has been disappointing. The fall of the pound has left British goods priced at very competitive levels, but sales have not improved much. Exports are not yet rising as fast as imports. Mr. Healey referred repeatedly to the very touchy matter of incentives to work and to invest. He drew a connection between Britain's low industrial output and the rapid increases recently in public spending. At another point he expressed concern about the "narrowing gap" between the social benefits for those who do not work and the incomes of those who do. Social benefits are commonly indexed to rise with the inflation rate, which has been going up three times as fast as wages under the very tough wage agreements now in force. Mr. Healey also held out hope for future reductions of the income tax, "which I believe to be too heavy."

Mr. Healey's critics have observed sourly that, while he noted the erosion of incentives in the British economy, he has not yet done anything about it. Egalitarianism has been one of the central tenets of the Labor party. Much of the party still considers it heresy even to suggest, as Mr. Healey has done, that a relationship exists between industrial performance and the tax-and-benefit structure. Any attempt by the government to reverse the prevailing pattern will guarantee another divisive row within the party.

There is a widespread tendency in Britain to see all economic strains as a matter of the short term, since within the next several years oil will begin to flow ashore in volumes sufficient to balance the national trade accounts. It constitutes the strongest kind of temptation to postpone all painful choices indefinitely, and use the oil money to paper over the widening deficits. Mr. Healey took the occasion to say that it is more important to rebuild the capital base of the country's industry. A great deal depends on whether his party listens to him.

For Americans, there is another message here. Britons and their bankers continue to argue whether the budget cuts were big enough—but that question is not yet answerable. It depends on the state of world markets and the expansion of world trade over the coming years. If the United States and West Germany, the trading world's leaders, continue to pursue highly restrictive economic policies and draw the world into another recession, no amount of budget-cutting will bring Britain back to stability. Britain's chances, along with many other countries, now depend upon the economic initiative that the United States chooses to provide.

THE WASHINGTON POST.

Spain for Democracy

It was a foregone conclusion that Spanish voters would endorse overwhelmingly the government's plan to hold free elections for a new democratic parliament next spring. There was, nonetheless, something exhilarating about the 75-per-cent turnout in last Wednesday's referendum and the 94-per-cent approval for the program advanced by King Juan Carlos and Premier Adolfo Suarez for dismantling the authoritarian system of Francisco Franco.

Opponents of the program and advocates of abstention were allowed to campaign openly with only minor police harassment, and were even given access to television and radio—unthinkable in the Franco era—to present their case against the government. The only serious act of violence was the kidnapping, evidently by left extremists, of the ultra-conservative president of the advisory Council of State. But abstention rates were high enough in two of the Basque provinces to remind the government of unresolved problems.

For the country as a whole, the voters emphatically rejected the advice to oppose or abstain, pressed on them from both left and right; and the result constituted a sharp rebuff for the late generalissimo's political heirs, who had campaigned on the slogan, "Franco would have voted no." The referendum thus provided another indication of the rapid disintegration of Spain's extreme right, reflected dramatically last month when the holdover Francoist Cortes (parliament) voted itself out of existence and approved democratic elections.

Under the Francoist Constitution, the referendum was necessary in order to ratify that action of the Cortes. Premier Suarez is now expected to move rapidly to set an election date sometime before next June and to try to bring those democratic forces that boycotted the referendum into the developing political process—perhaps even into his transition government. If they reject his overtures, these democrats may damage their cause severely.

After the self-destruction of the Cortes, convincing pledges of political aloofness by military leaders loyal to the King, and the massive turnout at the referendum, two things seem clear: King and Premier have set Spain firmly on the democratic road and the Spanish people overwhelmingly approve of their actions.

Antarctic Mysteries

Nearly 20 years ago, the orbiting of Sputnik-1 began the space age. Since then, men have visited the moon and returned safely; the dark side of the moon eternally turned away from earth has been fully photographed; man-made instruments report regularly from their stations on the surface of Mars; similar reports have come from instruments landed on Venus; and scientists now have excellent pictures of Mercury and Jupiter taken from cameras flown to the neighborhoods of those planets.

Yet even now there are still plenty of scientific mysteries on earth. The Antarctic continent in particular still poses an awesome variety of unanswered questions though we live in an era when it is so relatively accessible that tourists can visit there under the aegis of enterprising travel agents.

The Ross Ice Shelf project is a 10-nation cooperative effort conducting scientific research on this vast, icy continent. It has just been reported that a bold effort to dig a hole a quarter of a mile through the ice to the water underneath has failed. That is a disappointment; but the space program also had its failures which persistence in time overcame. There seems little doubt that similar future successes will be achieved in the Ross Ice Shelf and other Antarctic areas.

Even more important, this reminder of continued, steady, quiet international cooperation in Antarctic research calls attention again to one of the great success stories of the post-1945 world. There were times in years past when it seemed likely that the Antarctic would be an unending source of contention among many nations, all greedily competing for the area's enormous strategic and economic potentials.

But from today's perspective, it is clear that the Antarctic treaty of 1959 was one of the great accomplishments of modern diplomacy, for it turned Antarctica into a continent of peace dedicated to friendly scientific research. That accomplishment only gains in stature with the passage of time.

Seventy-Five Years Ago

December 21, 1901

LONDON—The ships proposed for construction for the new Canadian mail service will have the distinction of exceeding in length any of the other ocean liners. The new ships are not to be less than 825 feet long, a size that will be better realized by comparing it with that of the Oceanic, which measures 685 feet from stem to stern, and is at present the largest vessel afloat.

Fifty Years Ago

December 21, 1926

NEW YORK—"No mistletoe for Christmas" is the slogan of dentists in and around Trenton, N.J. They are warning people of the spread of "trench mouth," an infection of the gums. The malady, which is traceable to the war, has affected thousands of persons and is highly contagious. The Trenton Health Department has ordered a campaign to stop kissing in order to stop the spread of the disease.

New U.S. Establishment Is Called the Community

By Leslie H. Gelb

WASHINGTON.—Cyrus R. Vance, secretary of state-designate; Zbigniew Brzezinski, who will be national security affairs adviser; W. Michael Blumenthal, named secretary of the Treasury, Harold Brown, who may be chosen defense secretary—all are part of a small floating group that comes close to monopolizing the top foreign and national security posts in any administration. Known as the foreign policy community, it does not operate as a club of the like-minded or a conspiracy or a governing board. It acts more like an aristocracy of professionals. Its members sometimes actually make the decisions, usually define what is to be debated and invariably manage the resulting policies.

The elite of the Community comprises some 300 professors, lawyers, businessmen, Congressional aides, foundation executives, thinktank experts and even some journalists. It first infiltrated, then subsumed the older and familiar Establishment of Wall Street bankers and lawyers.

It is difficult to compare the power of the Community with that of the Establishment. What can be said is that its power is different, more diffuse and makes itself felt in more complex ways. For the old Establishment that was led by such men as Henry L. Stimson, Robert Lovett and John J. McCloy, foreign policy was essentially a second career. Their main interest was the interests of business in and out of government. For most members of the Community, being in government or second-guessing the government on foreign affairs is a full-time job.

Insiders

The men of the Establishment were insiders, who knew the right persons to telephone, meeting quietly, avoiding publicity. Most members of the Community operate far more openly. They have to—unlike the Rockefellers, they cannot pick up the phone and speak to the president. They talk to the president indirectly, through the articles they write in journals such as Foreign Affairs and Foreign Policy or in the op-ed pages of The New York Times and other newspapers, or in testimony to congressional committees, through attending conferences with high government officials at the Brookings Institution in Washington or the Council on Foreign Relations in New York.

As in any group of people seeking power, the premium is still on reputation for judgment and skill in personal relations. But in the post-1950s world, that calls for more than simply fighting wars and doing business, expertise became the ticket to power, and the members of the Community had it.

University men, experts and professors, used to be merely assistants to the men of the Establishment. But with the advent of McGeorge Bundy in the Kennedy administration, Walt W. Rostow in the Johnson administration, and finally Henry Kissinger in the Nixon administration, the professors had moved to the center of power.

Three Groupings

These men, and particularly their students and protégés, were not cut from a single socio-economic mold. The Establishment was wealthy, almost pure WASP, and their views were centrist, cautious, often nonpartisan with a slightly Republican cast. The denizens of the Community are Republicans and Democrats and often highly partisan.

There are at least three identifiable groupings of views within the Community. Right of center is the group that looks to James R. Schlesinger, defense secretary in the Nixon and Ford administrations. It still sees power and force as the governing elements of world politics, and still perceives the Soviet Union as an imminent threat to U.S. security. Its adherents seek to increase military spending and get tougher with the Russians. In the center is a group that can be identified with Secretary of State-designate Vance and Mr. Brzezinski. Its adherents are as concerned with relations among industrialized nations and relations between these nations and the developing world as they are with security issues relative to Moscow. They are prepared to play power politics but profess to want to move beyond it. On the left are those who think like Marcus Raskin and Richard Barnet of the Institute for Policy Studies, a private thinktank in Washington. They would restrict the military budget to continental defense, eschew intervention abroad and look to the United Nations to settle disputes and divide the world's riches.

While those on the left are invited to the conferences and can get their articles published in the right journals, they are rarely asked to serve in the administration. They are still not considered safe or sound enough for real power. But a measure of their influence is that the views of the present center are those which the left expounded 10 years ago.

This is not to say that the right and center comprise one happy family. In the last few years, they have been critical of Mr. Kissinger, who fell between the two. In the last week or so, the dispute over the possible reappointment of Mr. Schlesinger to the top Pentagon post was a good measure of the mutual discontent.

But it is from these two groups principally that President-elect Carter and his aides will be drawing to fill the top foreign-policy making positions. In his book on Vietnam, David Halberstam wrote about some of these men and many of their predecessors, calling them "the best and the brightest." He found them cut off from the concerns of the U.S. people, too certain of their judgments and opportunistic. Some of them stayed in government; most did not. Many of them have reformulated their views of the role of the United States in the world. Whether they will operate differently remains to be seen.

A Ghost of Christmas Past

By Anthony Lewis

BOSTON.—Four years ago this weekend there began the most destructive single episode of international violence in recent history: the Christmas bombing of North Vietnam. For 11 days, U.S. B-52s and other planes bombed Hanoi and Haiphong. There were 2,000 strikes, the most intensive conventional bombing campaign ever carried out. It was also one of the most cynical. For the available evidence indicates that its purpose was not military advantage but exemplary punishment.

Why should we call up from our memories such a ghost of Christmas past? This is a time of change and hope for Americans. The election wrote a symbolic end to the era of Vietnam as well as Watergate. The one remaining official who had a particular responsibility for the Christmas bombing is about to leave government. The President-elect is pledged to stay out of distant conflicts posing no real threat to U.S. security.

Planned in Secret

But there is a risk in too easily forgetting painful experience. Those who do not learn from history, Santayana said, are condemned to repeat it. The warning is especially apt as the new administration takes office—one with its share of men who were wrong on Vietnam. It is necessary to remember, not in order to wallow in guilt for the past but to observe wise caution in future.

The Christmas bombing was planned by a few in secret and carried on without any convincing explanation to Congress or the public. Henry Kissinger indicated that its purpose was to force new concessions from North Vietnam in the pending peace negotiation, but that claim was quickly proved false. When a peace agreement was reached in January, 1973, it differed in only trivial respects from the terms disclosed the previous October.

One new agreement was reached after the bombing—but not published. The United States secretly promised to give North Vietnam $3.5 billion to help reconstruct the country after years of U.S. bombing.

The real purpose of the Christmas bombing, as outside analysts pieced the clues together afterward, was to persuade (South) Vietnam to accept the truce. The Saigon government had been furiously resisting it because it allowed Hanoi to keep troops in the south. Gen. Alexander Haig, then Kissinger's assistant, had gone to Saigon and promised by way of persuasion that the North would be "brutalized." The bombing thus was a signal of commitment to Saigon.

The episode of the Christmas bombing was only the last of many U.S. disasters in Vietnam, and many administrations were responsible. But it has always seemed to me that there was a special obtuseness, moral and political, in pressing the U.S. war effort after 1968, when every informed, realistic person knew that the United States could not impose its views on Vietnam by legitimate means.

From 1969 to 1973, when the last U.S. ground forces left, 15,387 Americans were killed in Vietnam—a 50-per-cent increase in the death list. The U.S. spent $50 billion on the war in those years, and dropped 4 million tons of bombs. The human cost to the Vietnamese has not been measured so precisely, but casualties must have been in the hundreds of thousands.

And none of it made any difference. We know now that something very much like the terms signed in 1973 could have been agreed in 1969, with a result no worse from the U.S. standpoint.

For many people, the great puzzle of the period after 1968 was Kissinger. Richard Nixon might be obsessed by Vietnam, might see it as a crucial test of strength. But Kissinger, we thought, was a rational man. He spoke of the agony of Vietnam, of its damage to the U.S. fabric. He promised his friends when he went to Washington in 1969 that the war would be over in months.

No Puzzle

But there never really was a puzzle. Henry Kissinger was as obsessed as Richard Nixon by the need to demonstrate "strength" in Vietnam, and he did not let reality interfere. His agony was at arm's length; there is no sign that the human torment of Vietnam affected him inside, as it did so many others. Even at the end in 1975, in defiance of reality, he wanted to keep the war going. If he had his way, we would be bombing Vietnam still.

The lessons for Americans are clear enough: Beware obsession. Beware secrecy. Beware concentrated power. Beware men untouched by concern for the moral consequences of their acts.

In this forgetful country, the necessity to remember is a lesson itself. Christmas is a time of tenderness, the more acute when we are conscious of our failings. Yet we hardly think now of what we did in Vietnam, or even worse next door in Cambodia.

Howard Hunt: A Political Prisoner?

By William Buckley Jr.

NEW YORK—This being the season for cheer and forgiveness, I am moved to meditate that Chile may be showing greater concern for its political prisoners than the United States, it not being obvious that Howard Hunt really is just that—a political prisoner.

A year ago Prof. James Q. Wilson of Harvard, whose book on crime and punishment is a contemporary classic, made a reference to the extraordinary prison terms given out by Judge John Sirica. As for Howard Hunt's term—2 1/2 to 8 years—Prof. Wilson, who is a penological hawk, said that with Hunt's record (i.e., no previous convictions, low probability of a repeated offense), anyone else convicted of the identical offense—conspiracy, break and enter—would have been fined, and given a "30-day suspended sentence."

Special Pressure

Judge Sirica, as everybody knows, was endeavoring to put special pressure on his prisoners to cooperate with the prosecution. Well, that pressure worked. Hunt testified before every committee and every grand jury impaneled to investigate. As practically everyone knows, his wife was killed in an airplane accident in the fall of 1972, and he was left with four children to look after and the months went by.

Now, there is a procedure for persons convicted of a federal offense who believe that their sentences were inordinate, or that for special reasons those sentences should be mitigated. In the office of the attorney general of the United States is someone called the pardon attorney. His job is to prepare recommendations for the president of the United States. Hunt's attorney approached the pardon attorney in October, 1975, and asked how long it would require to weigh the evidence in the case of Hunt, in order to prepare a recommendation for the president. The answer: "Three or four months." The papers were completed instantly, and recommendations for leniency filed, including copies of public statements made by such as Eric Sevareid, James Jackson Kilpatrick and Howard K. Smith.

Eight months went by. I am a friend of Hunt, and godfather to three of his children, and accordingly telephoned the pardon attorney and asked if he could account for the extraordinary delay. Were there political considerations standing in the way of a commutation of sentence? He replied that I would have to draw my own conclusions, that he believed the recommendation would be made in a very short while.

Later

A long while later—in July, 1976—I addressed the attorney general directly to ask whether, in fact, political considerations were vitiating due process. A month after that, I received a reply from the acting attorney general advising me that the pardon attorney "expects to receive shortly the last report which he views as necessary to developing his recommendation to the attorney general."

On the whole, I like to believe attorneys general, but it is difficult to do so in this case. If there is an American this side of the fever swamps who believes that Howard Hunt should still be in jail for the foolishness he committed in June of 1972, and after spending 30 months in jail, I doubt that that person would have taken 10 months to forward his recommendation in the matter to the pardon attorney.

What obviously the whole gang did not want is to pardon Hunt during the election campaign, on the grounds that doing so would revive talk about the pardon of Richard Nixon. Well, let us be grand about it and accept it that Hunt's remaining in jail must be considered a trivial sacrifice to pay for the prospective re-election of a president of the United States.

But the election was weeks ago. Hunt rots in jail, for no purpose, and there is no explanation for it other than the sadistic neglect of uncommunicative bureaucrats who give speeches about justice and apparently think nothing of taking more than one year to process a simple application for justice and for mercy. If the pardon attorney concludes that Hunt should not be let out of jail, then why not develop the guts to say so? Perhaps the services of John Sirica as a ghost-writer could be made available? Or will Hunt have to wait for a Democratic president to exercise rudimentary clemency for a minor participant of that sordid affair who has been redundantly punished?

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address.

Letters

Britain's Values

Prof. Fritz Stern's article, "When Britannia Waives the Rules" (IHT, Dec. 10), is a welcome corrective to the current American journalism which predicts—not without relish—imminent financial ruin for the English.

Without at all minimizing the seriousness of Britain's situation, it is nevertheless possible that these Cassandra-like pronouncements are in part compensatory. The Americans— smarting from the humiliation of the Vietnam defeat and the Watergate scandals—may unconsciously be trying to detoxify their recent past by making a lot of noise about Britain going down the drain.

Furthermore, the problem is not one of turning the English into a nation of feverish workers. The problem is whether Britain's productivity can be improved without impairing those values—that stubborn adherence to standards—which cause so many Americans to describe England as "civilized."

All over the world, industrial efficiency seems to go hand in hand with pandemic corruption. Witness Japan. Prince Bernhard of the Netherlands has been discovered to have taken bribes, but no one expects that any such disclosures will ever be made about Prince Philip. The rich nations of the world, called upon to provide yet another loan to tide the English over, would do well to approach the situation not punitively, but with a humble awareness of their own shortcomings.

MARGARET HALSEY.
London.

Radioactive Wastes

I have a small contribution to the standing debate about radioactive waste. I know that thoughts about radioactive waste occupy people very much, and they have a feeling of helplessness.

How would it be if, under the auspices of the United Nations and perhaps together with the International Atomic Energy Agency in Vienna, an appeal were addressed to all the people in the world to give a penny to establish a research institute for radioactive waste? This would raise a great deal of money and give people the feeling they are doing something.

Such worldwide research focused on radioactive waste with the wisdom of the East joining the technical knowledge of the West, perhaps could solve the problem of radioactive waste.

I hope and pray for it.

Revolution's Pinch Being Felt

Portuguese Suffer Shortage Of Meats and Staple Codfish

By Marvine Howe

LISBON, Dec. 20.—Portuguese housewives are beginning to feel the pinch of the revolution.

Every day they have to struggle with long lines to buy meat, a growing black market for milk and other products and shortages of essentials such as potatoes.

Portugal now imports 52 per cent of its food supply, but it is not enough.

National food production fell and costs rose sharply after the April, 1974, revolution, which disrupted the country's traditional economic structures.

The most urgent problem today is the shortage of meat. Early last year in the heat of the revolution, many landowners feared they would lose their farms and sold their cattle for slaughter or exported it clandestinely to Spain. Later the new collective farms, also indiscriminately slaughtered cattle to raise funds to pay farm workers higher wages.

Meat Production Down

As a result, the national market offered only 50,000 tons of meat this year, compared with more than 92,000 tons last year. This has meant that the country has had to import 44,000 tons of meat, or twice as much as last year, spending precious foreign exchange.

Even so, there has not been enough meat to go around. Beef is increasingly scarce in the fashionable Lisbon suburbs. Shoppers are switching to pork, which now sells for the same price as beef, about $6.66 the kilo.

"I had to wait an hour in line to get a kilo of steak and what a triumph, it's the first fresh beef we've had in two weeks," a diplomat's wife said the other day in front of a nearly empty meatshop in the wealthy suburb of Restelo.

Things are worse in the working-class districts where people used to eat fish instead of meat. Now even codfish, a national staple, is selling for $3.80 the kilo, if it can be found.

"At this point all we can afford is rice and beans and acorda," the wife of a construction worker in the working-class town of Amadora, said bitterly. Acorda is a soup usually made of bread, oil and garlic.

Supplementary Dishes

Lisbon restaurants have been offering turkey for the last month to supplement the array of pork dishes and make up for the lack of beef.

At first the meat shortages were attributed to a rise in consumption produced by the general increase in wages after the revolution. But recent statistics show that the per capita consumption of meat in Portugal is only 70.4 pounds a year, one of the lowest in Europe.

The authorities have imported 15,000 calves from Ireland this year for breeding, but this is only a small beginning.

The Portuguese press has shown alarm over the meat problem since fish, the natural substitute, has also become increasingly scarce.

With waters off Canada and Greenland overfished and with new international restrictions, Portugal's codfish fleet brought in only 20,000 tons last year, compared with 36,000 tons five years ago. A recent announcement said that next year's quota for the cod fleet would be set at 10,000 tons, a reduction that amounts to a national tragedy.

United Press International.

PUBLIC CONVENIENCE—Boy waits while his cocker spaniel takes advantage of dog WC in Stade, Germany.

Polish Measure Encourages Small, Private Businessmen

WARSAW, Dec. 20 (Reuters).—After two years of deliberations, the Polish parliament approved during the weekend a program to encourage the small, private tradesman.

The government acted slowly because of criticism by middle-rank officials that concessions to private enterprise in a Communist state could be a politically retrograde step.

Persons in the private craft and service industries will benefit from tax cuts, higher pensions and state health insurance and family allowances under the bill.

It should mean that there will be more plumbers, carpenters and electricians available for house repairs. It should also help fill the need for more private bakeries, sausage shops, tailors and garage mechanics.

"A small, private shop can do a lot with offal which a state abattoir just throws away. And a private tailor can make up something with the last few meters of a bolt of cloth which a textile factory will let rot on the floor," an official of the Services and Handicrafts Association remarked.

Opportunity for Youth

The measure also aims to make raw materials more readily available to private workers, guarantee them suitably located accommodation and encourage young people to "go private."

In the past, many young Poles have spurned offers of apprenticeship with private craftsmen because they could easily get a job in a state industry which paid much the same wage and probably made fewer demands on their energy.

But now Poland is on the threshold of a program to expand the number of jobs in private services and limit the openings in state industry. This should help promote higher productivity rates and alleviate the average citizen's problems in getting home repairs done in an emergency.

It is feared that the bill may produce a booming black market in scarce items such as glue, leather, faucet washers, plastic fittings, car accessories and many other small everyday needs not produced by the state in sufficient quantity or quality.

Consumer Problems

How difficult life can be for the consumer was again illustrated last week by the weekly Polityka.

"It's difficult to have an electric iron repaired or a washer replaced. It's difficult to repair a bicycle or a car... Ordering a bookshelf is a still more difficult problem.

"During the last five years 105,000 new private shops opened but 94,000 closed."

Crippling taxes, arbitrarily imposed by hostile officials, and forced removal from a thriving city center to a quiet suburb accounted for part of these closures, observers added.

Under the new measure, tax-free incomes rise from 12,000 to 72,000 zlotles ($600 to $3,600) and the deduction on turnover tax—the volume of annual trade—is doubled from 12,000 to 24,000 zlotles ($600 to $1,200).

Taxis Are Private

In Poland, 97 per cent of taxis are private. But prohibitive taxation on new cars for the drivers means they operate vehicles that are 10 to 15 years old. They may work only for a few hours daily while lines form in the snow or rain.

Polityka forecast 33,000 new shops in private hands by 1980, with an increase in employees and owners from 200,000 to 500,000.

But the measure has to overcome much skepticism among private shop owners, service workers and artisans, who wonder how long the new conditions will last.

But the Perons' Memory May Defy the Tomb

Argentine Regime Quietly Buries an Era

By Joanne Omang

BUENOS AIRES, Dec. 20 (WP).—Juan Peron was in the streets of Buenos Aires again yesterday, only this time hardly anybody noticed. The military men who have been trying for nearly 30 years to bury the movement Peron started were this time burying the body of the man himself.

In an ambulance, escorted by four black cars, the enormous black coffin was taken with no advance notice from the near-shrine at the Olivos presidential palace to the simple family vault at Chacarita Cemetery. There were no sirens, no crowds, not much visible security in the 20-minute ride.

They have moved Evita, too, Peron's blonde second wife and political right arm, seemingly asleep in her white dress, the rosary twined in her fingers and her bare brown feet somehow incongruous in the glass-topped coffin. Her body, that miracle of the embalmer's art, was returned last month to her sisters and interred in the Duarte family vault at Recoleta Cemetery.

Given Argentina's penchant for resurrecting its dead, heroes and doctrines alike, Peron and Evita stand little chance of resting in peace.

Just before Evita died of cancer in 1952, a million Argentines jammed what they say is the world's broadest boulevard to express their love. They wanted to make her a saint: they named everything in sight after her. Today, not even a parking lot bears her name, not because she is forgotten, but because her memory is too powerful still, a charm that could work evil against her successors.

Discreet Silence

Similarly with Peron, who was a memory of a man already when he died in July, 1974, at the age of 78. The line of mourners had no end; the tears and mountains of flowers were unequalled anywhere. There was nearly a year of discreet silence over the dazed young widow's alarming preference for soap operas over government and finally Isabel Peron was gone, too. As her request to be sent to a convent in Spain languishes, disbelieved, in the military rulers' files, the name Peron is once again being heard where ordinary folk gather to complain.

What Evita and Peron evoke here and what may ultimately resurrect their movement is just what is missing now under the stiff uniformed men: The feeling that the country is in the hands of a generous, all-giving source of love, charity and understanding.

The fact that the giving, the endless pay hikes, Evita's diamonds and the Swiss bank accounts gutted the Treasury is dismissed, if it is believed at all, as the taking of pennies for noble goals, pennies from the bottomless wealth that all true patriots know is the real Argentina.

Today's military rulers have steadied, if not yet balanced, the books left in chaos by Isabel Peron, preaching that there is no free lunch. But they have done it in military style. They have disdained the public spectacles, the humor and the occasional unbuttoned moment that make iron disciplinarians into much-loved leaders.

Eager for Discipline

In some ways, it is curious that the armed forces waited as long as they did before moving Peron's body. When they came in last March, their discipline was eagerly awaited. President Jorge Videla refused to live in the official residence while the Perons lay in their little temple on the park-like grounds. But very few people had come to see them anyway in the closing months of Isabel's misrule.

Gen. Videla might have moved the bodies then but he didn't. The soldiers had waited longer than they wanted to before overthrowing Isabel Peron, hoping Argentines would see the connection finally between Peronism and the rising cost of steak. And it seemed at the time that the myth was moribund: why bother?

So Peron was moved yesterday out of the shrine and to a family crypt, like Evita's, across the city in Recoleta where she will be another tourist attraction among its dozens of Argentine heroes. But the grumbling about the bitter pill of military rule is under way again and the memory of Evita's smile and Peron's hearty wave is harder to bury than their bodies.

Peking Asks Increased Production

By Fox Butterfield

HONG KONG, Dec. 20 (NYT).—Peking today called for better management, harder work and increased efficiency in China's factories amid indications that this has generally been a poor year for the country's industry.

The call, contained in an editorial in the party paper, Peking People's Daily, is part of the current effort by China's new leaders to put the country's economy back on its decade-long course of growth after a year of disruptive political strife.

"We must work hard for a new year" to build up modern industries throughout China, the editorial said. It added that the country's 850 million inhabitants must also "make up for the losses caused by interference and sabotage by the gang of four," the epithet applied to Chiang Ching, Mao Tse-tung's widow, and three other disgraced Politburo members denounced as sham leftists.

After averaging nearly 10 per cent growth a year during the last 15 years, China's industrial output declined to a 7-per-cent increase in the first half of this year. Peking has released little overall information since then but analysts believe that production dropped considerably further in the third quarter and that a number of factories may not reach their annual targets.

In addition, the beginning of China's fifth five-year plan, from this year to 1980, has had to be delayed a year because of conflict over economic priorities earlier this year during the anti-rightist campaign.

Today's editorial pledged not to modify Mao's demanding economic policies, including presumably his opposition to wage raises and bonuses for workers, which have been largely frozen since the Cultural Revolution. But the editorial suggested that Hua Kuo-feng, the new Chairman of the Communist party and a career party administrator, apparently hopes to restore production through better management.

Timor Guerrillas Say 151 Indonesians Slain

SYDNEY, Dec. 20 (Reuters).—Guerrilla forces in East Timor have killed 151 Indonesian soldiers since Oct. 5, a statement issued here by the Campaign for an Independent East Timor said today.

It said that in the biggest action, near the village of Sanara Dec. 13 and 14, Fretilin independence movement forces killed 89 Indonesian soldiers and wounded many others. Eight guerrillas were listed as killed.

Manila Progress On Rebels Cited

MANILA, Dec. 20 (UPI).—Imelda Marcos, the wife of the Philippine President, said today a "major breakthrough" has been reached in efforts to end the Filipino Moslem revolt as a result of her trip last month to Libya.

Mrs. Marcos said the secessionist movement in the southern Philippines was the main subject of her trip to Libya, on of the biggest foreign supporters of the rebel Moro National Liberation Front.

Mrs. Marcos said progress on a settlement would "not have been achieved without the generous and enlightened support at every turn" of Libyan leader Moamer Qadhafi and his foreign minister, Ali Tureiki. Mrs. Marcos said Col. Qadhafi also accepted an invitation to visit Manila.

Area of New Zealand Suffers Heavy Floods

WELLINGTON, New Zealand, Dec. 20 (UPI).—Dozens of persons had to be rescued from the roofs of their suburban homes flooded by torrential rains today.

The floodwaters cut all but one road to the city and the heavy rains—three inches of rain fell in three hours—kept airplanes grounded.

20,000 Subject to Arbitrary Actions

Portuguese in Mozambique Live in Fear

MAPUTO, Mozambique, Dec. 20 (NYT).—Zeca Ruco, one of the 20,000 Portuguese of Mozambique, has a dune buggy with chromed exhausts, a new motorcycle, a spacious villa and a job with influence—inspector in the Criminal Investigation Division of the police.

Under the former colonial regime here, he was in and out of jail for a variety of offenses, mostly thefts. In Johannesburg, he is wanted for the attempted murder of a police officer while evading arrest.

But "Ginger Joe," as he is known to the readers of the press in South Africa, apparently has skills that recommended him to the black rulers who were desperately short of capable administrators when they took over from the Portuguese in Mozambique.

Sitting in an office in police headquarters, just off Avenida Ho Chi Minh, he is casual, self-assured, urbane—qualities that set him apart from most of the other Portuguese in town. Among the other settlers it is more common to find an apprehension bordering on fear. Almost all plan to leave, following the 230,000 Portuguese who have already departed.

Class, Not Race, Basis

The ideology of the governing party, known as Frelimo, is rooted in class differentiations, not race. However, the victims of the revolution in Lisbon and the subsequent liberation of the colonial territories in Africa usually have been Portuguese. In a society where almost all positions of power and privilege were reserved for the colonists, a backlash was inevitable. However, few people calculated that the retribution would be so severe.

No executions have been reported, but thousands of settlers have been arrested and held, sometimes for months, without trial. While there is cause in some instances—attempts to evade foreign-exchange controls, for example—as often as not the arrests have been purely arbitrary.

President Samora Machel, who worked as a hospital orderly before leaving in the early 1960s for guerrilla training in Algeria, has intervened to limit harassment of the settlers by the army and police. He has visited jails, reviewing cases and ordering the release of the innocent.

On the other hand, his speeches before and after independence on June 25 of last year heightened feelings against the Portuguese here.

The Harshest Blow

Denunciations of "colonial masters, economic saboteurs and foreign ideas" were coupled with fiercely anti-capitalist rhetoric. The medical, legal and teaching professions were nationalized, as were funeral services. The harshest blow fell this year—the confiscation of rented properties—for many settlers had invested their savings in second houses and apartments.

At the same time, regulations governing repatriation were tightened, limiting emigrants to a suitcase of clothes and a maximum of $2,000. Scores of cars on which an export duty of 90 per cent had already been paid were left on the docks.

Villas that had been confiscated or abandoned were assigned to officials of the new government, including Mr. Ruco. Others were occupied by experts from the Soviet bloc who were pouring in under agreements signed in Moscow as many more remained empty, waiting for action by a bureaucracy that moves slowly when it moves at all.

The most pitiful of the settlers are those who were never wealthy or powerful, members of the working class. Many have trouble finding the money to leave, and in any case face a bleak future in resettlement camps in Portugal.

Others are more fortunate. Most of the large landowners left before independence, abandoning estates that produced the cash crops—cashew nuts, coffee, rice, tea and sugar—whose export was the backbone of the economy. A few wealthy families remain, conspicuously spending their excess escudos at the remaining luxury spots.

At the Polana Hotel, a favorite gathering spot, bronzed women and young girls in skimpy bikinis daily by the swimming pool, sipping drinks carried by white-jacketed waiters. At lunchtime and in the evening they are joined by their men, elegant in well-tailored suits and expensive shoes.

For them there is wry humor in the situation. One man, offering a visitor a ride into the city in his late-model Jaguar, laughed when asked if he was Portuguese. "Yes, I'm a fascist," he said. "And you? You're an American, aren't you? Well, that makes you an imperialist. Happy to have you with me."

Carter Unaware Of Young's Ties To South African

ATLANTA, Dec. 20 (AP).—UN Ambassador-designate Andrew Young said yesterday that President-elect Jimmy Carter may have known that two children of a South African black dissident live with his family but the matter "never really came up" during talks preceding his appointment.

Carter spokesman Rex Granum said yesterday that the President-elect was not aware of Mr. Young's relationship with Robert Sobukwe, leader of the outlawed Pan Africanist Congress. But Mr. Granum said that Mr. Carter "doesn't feel that the friendship will cause any difficulties."

Mr. Young said that his relationship with Mr. Sobukwe, whose two children live with the Young family here, will not affect his position on South Africa, which he termed one of "general abhorrence."

Mr. Young said that he had met Mr. Sobukwe on a trip to South Africa two years ago. Mr. Sobukwe refused Mr. Young's offer of help but wrote several months later, asking if his children could attend college in the United States.

The two youths, Miliswa Sobukwe, 22, and Dimilesizwe Sobukwe, 21, arrived in May of last year to study at Atlanta Junior College, where Mr. Young's wife teaches.

Miliswa is now studying biology at Spelman College and her brother is an engineering student at Morehouse College.

The Sporting Life

CASABLANCA, Morocco, Dec. 20 (Reuters).—Moroccan handball officials banned the local Sidi Bennour team for life because members beat up the referee each time he awarded points to a visiting squad.

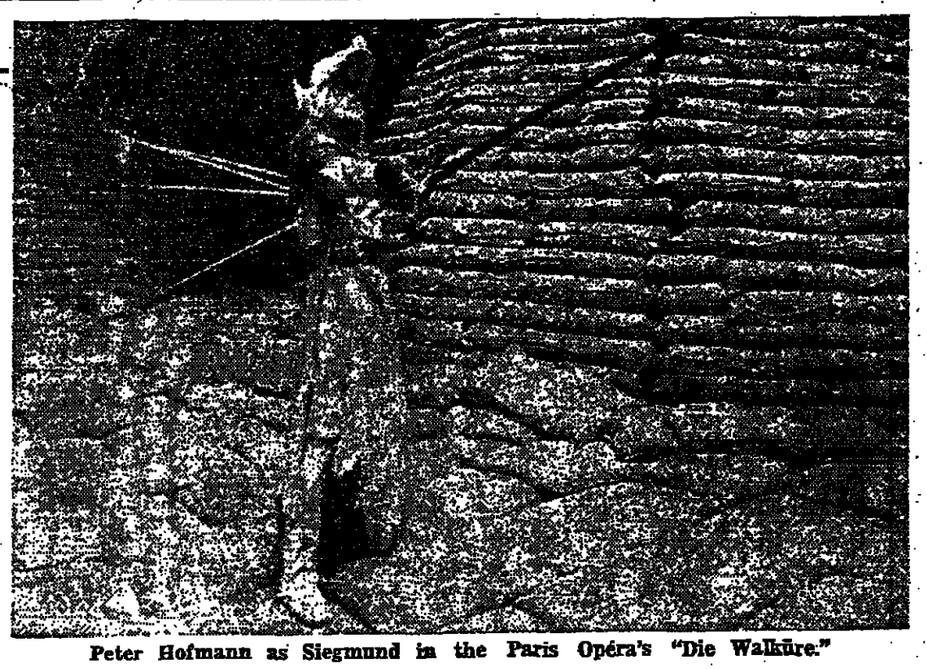
OPERA

Paris Opéra Sandbags Myth With Its New 'Die Walküre'

By David Stevens

PARIS, Dec. 20 (IHT).—When the curtain went down on the Paris Opéra's new production of "Die Walküre," the public reaction—which had seemed somewhat tentative after "Das Rheingold" two weeks earlier—abruptly polarized into a storm of disapproval for the team who did the staging and cheers for the musicians.



At first glance, what met the eyes in this "Walküre" did not seem to have much to do with the almost bare stage, the stripped-down stage machinery and the vaguely 19th-century costuming of the "Rheingold."

In the first act, Hunding's hut was a cramped space at the front of the stage, limited by a huge black wall composed of about 500 overlapping black men's suits suspended from hangers, broken up in one corner only by the protruding south end of a northbound horse. When this backdrop soared out of sight toward the end of the act, it revealed a set made almost entirely of sandbags—or burlap-covered cushions made to look like sandbags. Three stylized mountain peaks made of sandbags, populated by stuffed deer, filled the stage, the floor was covered by the burlap cushions and the side and back walls of the same material boxed in the playing area. The third act was similar, except that the sandbag mountains had been moved to the left, making room for an evergreen forest on the right.

We are still in the 19th century, then; not the 19th century of tuxedos and evening gowns, but the one that produced Wagner's vision of this primordial German myth. Except that here it is not the romantic myth that Wagner conceived and composed, but all the stage trappings of the myth served up with painstaking literalness in a deliberately anti-illusionist, anti-romantic way. It is as if Brecht had been hired to stage Wagner.

Same Team

Klaus Michael Gruber, who directed, and Eduardo Arroyo, who designed this "Walküre," are not the same who produced "Rheingold," but since they are part of the same team engaged to produce the entire "Ring," it must be assumed that continuity was intended.

Peter Hofmann as Siegmund in the Paris Opéra's "Die Walküre."

So the family of gods that climbed the bridge into Valhalla in evening dress is now engaged in playing out the Nibelung story in its own private make-believe theater, dressed in the robes and horned helmets, surrounded by the scenery and accompanied by all the animals that Wagner insisted on. Fricka enters, not quite in a chariot drawn by two rams, but in a vast sheepskin robe surrounded by rams' heads meant to give that impression. Brünnhilde arrives leading her real horse, and the Valkyries arrive and depart at the gallop on real horses. The fir forest of the final act is there because the libretto plainly says it is there, not because this staging makes any particular use of it.

In the first act, Siegmund staggers in wounded, and you know it because there are three arrows sticking out of his back. But he dismisses his wounds as mere scratches, and in a few minutes he takes off his outer garment and the arrows come off with it, like disposable theater wounds. He is no more hurt than a figure in a puppet show. Time and again, where Wagner and his music invite you to suspend disbelief, this staging refuses to let you. Where Wieland Wagner scrapped all the artifacts of Wagnerian theater to seek out the myth in abstract simplicity (and he was booed for it in Paris too), the new staging seems to say that the artifacts are the myth; the medium is the message.

Real Emotion

Some provision seems to have been made for real emotion, and almost every time there is an important personal confrontation—Siegmund and Sieglinde, Wotan and Brünnhilde—the singers move down to stage front, out of the artificial world of their toy theater and without their extravagant gesturing, even sitting down on an ordinary kitchen chair.

Yet the music had an uphill struggle all night establishing its rights. The magical spring music of the first act went for next to nothing, with little to match it but a make-believe moon shining through a stuffed deer's antlers, and it is surely asking too much of any Brünnhilde to sing the long phrases of the *Todesverkundigung* while keeping a horse calm. Gwyneth Jones succeeded, but animals always steal scenes like that, and for the wrong reasons.

Sir Georg Solti again conducted with passion and with a marvelous breadth of phrasing, always sustained despite some very slow tempos and long, pregnant pauses. A lesser cast might not have been able to stay with him, but on Saturday night this one did—except for an unsettlingly squally group of Valkyries.

Theo Adam was again the powerful, domineering Wotan and Christa Ludwig an imperious Fricka. Despite moments of uneasiness, Peter Hofmann repeated the fine impression he made as Siegmund in Bayreuth, while Helga Dernesch was an eloquent Sieglinde despite a tone that tended to spread when pushed. Kurt Moll was the superbly dark Hunding—his primitive savagery reinforced by a big side of raw beef he carried home and the forbidding black costume that was one of Moidele Bickel's most effective designs. Gwyneth Jones, stepping in on late notice for Ursula Schröder-Feinen, was a most human and affecting Brünnhilde, despite some of the familiar vocal struggles she has with this daunting part.

Whether this "Ring" production will ever be completed seems to be a matter of conjecture. Budgetary considerations have now forced a postponement of "Siegfried" and "Die Götterdämmerung," which were scheduled for late next year, and it remains to be seen whether they will be reinstated later.

ART

The Last Calder—the Work Continues in French Plant

By Andreas Freund

TOURS, France (NYT).—The creative genius of Alexander Calder, who died last Nov. 11 in New York, still inspires work here on what could become his most monumental achievement, a sculpture for Jerusalem.

Following instructions left by the artist, workmen in light blue overalls were busy last week hammering and welding together elements for Calder's ultimate creation at a steel-plate manufacturing plant on the outskirts of this industrial center on the Loire River. It is the same plant the sculptor used to have his models executed to size in the last 15 years.

No Name

The Jerusalem project, a stabile, has as yet no name. At the plant, it is being referred to as "Le Jerusalem," "Israel" or "Number 131," because it is the 131st Calder produced here.

The sculptor's less-than-man-sized model for the stabile stood in a corner of the plant, a gray metal structure delineating what looked like the interlocking portals of a grand imaginary place of worship.

The Jerusalem project dates to 1975 when Calder visited Israel. It was not long after an Arab-sponsored resolution at the United Nations had again condemned the Jewish state, provoking demonstrations of support for Israel from many intellectual and artists.

Traveling with his wife, Louisa, the then 77-year-old Calder was shown around by Mayor Teddy Kollek of Jerusalem, who one day asked him if he would give a sculpture to the Holy City. The answer was yes, and while Calder went to work at his Loire Valley home, Jerusalem began making ready a site on the northeastern slope of Mount Herzl. It is there that the monument to peace is to be dedicated next May.

At the plant here owned by the Biemont Co., Jacques Basillon, the general manager, said this was no problem and that everything would be ready late next month, when the stabile's components would be crated and sent to Israel by boat for the on-the-spot reassembly.

The plant's association with Calder, Mr. Basillon recalled, was quite accidental. One day, he said, Calder decided he needed a steel-plate company in the area to do his structures, picked a name in the telephone directory and called. The man on the other end said, "Sorry, we are not equipped for that sort of work but..." He then called Mr. Basillon, a friend, and said, "I have a funny American here, perhaps you want to see him."

From that day, Biemont, which is mainly a supplier for nuclear power stations, added the production of Calder sculpture to its activities. The plant, which employs 160 people, executed many Calder stabiles for New York, Philadelphia, Grand Rapids, Mich., the Dallas airport and the 1967 Montreal exhibition.

Calder insisted that no industrial methods be employed in the execution of his structures, that they bear "the scars of workmanship," and the plant respected his wishes. The workers knew Calder, who would come in at least twice a week when work was in progress on his creations. He would never ask technical questions, but wished to know whether they liked the sculpture or not.

Celebrating Drake's Circumnavigation

LONDON, Dec. 20 (UPI).—Four centuries ago next autumn, Sir Francis Drake began his epic circumnavigation of the globe that churned up an empire in the wake of his Golden Hinde.

Drake set sail from Plymouth, on England's southwest coast, in late 1577 and in June, 1579, dropped anchor in or near San Francisco Bay.

He set up a brass plate claiming the area, which he called Nova Albion (New England), for Queen Elizabeth I. Then he took the Golden Hinde the rest of the way around the world.

"Drake achieved for England what Columbus achieved for Spain," said California Historical Society president Bob Power.

"In 1580 the world empire concept became a reality and the 400th anniversary of Drake's voyage will also be that of the British Commonwealth of Nations," he said.

Power, a Nut Tree, Calif., restaurant owner and Drake scholar, recently visited London and Plymouth to arrange details of an anniversary trip next August by members of California's Sir Francis Drake Commission.

The commission is sending an exhibition of Drake maps and books to Plymouth, where Queen Elizabeth and Prince Philip will mark the Drake quadricentenary with an Aug. 5 visit in the Royal Yacht Britannia.

Between 20 and 30 members of the commission and their families are expected to be on hand for the royal visit, Power said, and the commission has invited the Queen and Prince Philip to visit California.

Power maintains the 400th anniversary takes on a special significance because Drake's voyage, although ostensibly one of exploration, was also one of colonial acquisition and empire-building.

He points to the wording of Drake's brass plate, set up in 1579 and rediscovered in the San Francisco Bay area in 1933, which claims the territory of Nova Albion for England and declares that the local Indians "freely resigned" the ownership of the land to the English crown.

He calls this voluntary handover of sovereignty the earliest model of what later became the British Commonwealth of Nations, a free association of states under a common sovereignty.

Byron, Shelley Manuscripts—'Literary Find of the Century'

LONDON, Dec. 20 (Reuters).—A hoard of manuscripts by two of England's greatest poets, described by experts as the literary find of the century, has been found in a London bank vault.

The papers include an original manuscript of George Gordon, Lord Byron's "Childe Harold's Pilgrimage," an early version of Percy Bysshe Shelley's "Hymn to Intellectual Beauty" and drawings of Napoleon by a sailor who accompanied the exiled French emperor to the island of St. Helena in 1815.

They were found in a studded leather chest in a vault at a London branch of Barclays Bank while alterations were being made there. A spokesman for the bank, Geoffrey Kelly, said: "Experts studying the manuscripts have described them as the literary find of the century."

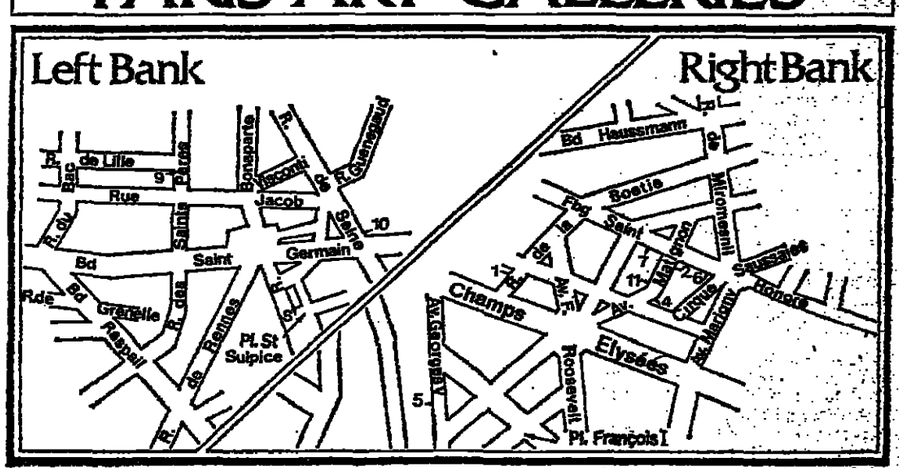
The papers, originally the property of Byron's friend Scrope Berdmore Davies, have been estimated to be worth between £250,000 and £500,000. They are now owned collectively by Davies' descendants.

Mr. Kelly said that the find was made a few months ago. The papers will be lent to the British Library early next year, he said.

Other papers include an early version of Shelley's poem "Mont Blanc," two possibly unpublished poems by Shelley and several unknown letters from Byron.

The Times newspaper today carried a front-page article on the discovery by a descendant, Davies-Bevis Hillier. Mr. Hillier was invited to inspect the Davies papers. His ancestor left England to escape creditors, leaving the chest containing the manuscripts behind.

Arabs Protest Film



TOKYO, Dec. 20 (Reuters).—Five Arab countries have protested to the Japanese government over the screening here of a film "Victory at Entebbe," which depicts Israeli commandos freeing hijacked hostages in a raid on Uganda's airport last July. A ministry official said that the ambassadors of Algeria, Iraq, Egypt, Sudan and the United Arab Emirates described the film as Israeli propaganda which could affect relations between Japan and the Arab world.

ENTERNATIONAL EXECUTIVE OPPORTUNITIES

INTERNATIONAL COMPANY
with headquarters in Europe, is seeking
MANAGING DIRECTOR
for its subsidiary in
NIGERIA (Lagos)

- The candidate will be European, 35 to 45 years of age, with a proven record in managing a company or the subsidiary of a large corporation.
- This managing experience should include a reasonable period in a developing country, with Profit & Loss responsibility.
- The candidate should be sales oriented, dynamic and possess a sense of organization and leadership.
- Candidates who have used a well-organized Management reporting system will have an advantage.

Candidates interested in this position and who are looking for an attractive salary with free housing, company car, frequent homeleaves with paid passages plus well developed pension plan, should send their resumé with photo to:

Box D. 5,614, Herald Tribune, Paris.

MILLIPORE CORPORATION
SEEKS FOR THE EXPORT DIVISION:
3 SALES ENGINEERS

- Young, 25-35.
- Extremely dynamic.
- University degree or equivalent in chemistry, biochemistry, microbiology or pharmacy.
- Capable of public speaking.
- Travel: 50 per cent of the time.

To be responsible for sale and technical assistance to research institutes and to the pharmaceutical industry in the following countries:

USSE—Languages essential: Russian and English, based in France to start with.

EASTERN EUROPE—Languages essential: German and English, based in Vienna to start with.

MIDDLE EAST—Language essential: English, based in France to start with.

Selling experience in these countries will be an advantage.

Please write (with c.v.) or phone:

Mr. A. Massot, Millipore S.A.,
19 Rue Yves-Dumanoir, 92420 Vaucresson (France).
Tel.: (1) 970.69.99.

THE BANK FOR INTERNATIONAL SETTLEMENTS
an international Institution in Basle, Switzerland
invites applications from
ECONOMISTS

whose ages should probably be between 25 and 40, to fill vacancies in its Monetary and Economic Department. The emphasis of the Department's work is on domestic and international economic, financial and monetary analysis.

CANDIDATES should have good academic records, together with a thorough knowledge of macro-economics, especially in the areas mentioned above. In addition they should preferably have previous professional experience in national or international research or banking institutions. They should be able to write and speak English fluently. A good knowledge of some other European language, particularly French and/or German, would also be useful.

Good salaries, first-class pension and welfare schemes and many other ancillary benefits. Own Sports Centre.

Please write, enclosing curriculum vitae, copies of testimonials and recent photograph to the

Personnel Office, Bank for International Settlements, Postfach 262, CH-4002 Basle, Switzerland.

GENERAL MANAGER

This position is responsible for Marketing, Sales, Administration and Manufacturing Management for our Manufacturing Operation in Belgium, East Flanders.

Our products are marketed through both direct OEM sales and industrial distributors. We are a growing successful company. The right candidate can achieve his growth ambitions while helping us to achieve ours.

The Manager we seek will have a strong marketing background, proven ability to coordinate Sales, Administrative and Manufacturing functions plus ability to forecast and meet profit objectives. Should be fluent in English, Dutch and French. German an added advantage.

Salary commensurate with experience.

Please submit resumé with complete compensation history in confidence to:

Box D-5,544, Herald Tribune, Paris.

MANAGING DIRECTOR
Instrumentation and Electrical Constructing
SAUDI ARABIA

World leading Company looking for a Manager for Saudi Subsidiary, requested negotiating ability with international oil Companies, Government Agencies and main contractors.

Managing experience in similar countries appreciated.

High tax-free salary in accordance with experience.

Direct mail to Mr. GUIBERT, Personal Manager.
COMSIP ENTREPRISE,
B.P. 305, 92506 RUEIL-MALMAISON CEDEX (France).

FRENCH SUBSIDIARY OF U.S. COMPANY
seeks
marketing manager
INDUSTRIAL PRODUCTS

EEC Informs Industry Of Steel Quota Figures

BRUSSELS, Dec. 20 (AP-DJ).—The Common Market Commission today dispatched letters to the nine EEC steel companies informing them about their delivery quotas for six groups of steel products for the first four months of 1977, Henri Simonet, the commissioner responsible for steel matters, said.

These quotas refer only to deliveries to the EEC area and not to exports to non-EEC markets, where Common Market producers already face tough competition from Japan, Spain, Sweden and Brazil.

At a press conference, Mr. Simonet said the decision was taken in line with its anti-crisis plan for the EEC steel industry, which is in serious difficulties because of sharply reduced order inflows and crumbling steel prices.

Mr. Simonet said that many EEC steel companies are forced to sell at prices 30 to 50 per cent below average, with the order backlog amounting to about one-month capacity utilization, which varies between 62 to 75 per cent according to individual companies.

He warned that if producers fail to accept the voluntary plan, the Commission would be forced to declare the EEC steel industry in a state of a "manifest crisis." In such a case, the Commission could establish production quotas and set minimum prices for rolled steel products for the community.

Mr. Simonet did not disclose individual quotas and would not estimate the overall delivery reductions in the first four months for shaped wire rod, reinforcing bars, merchant bars, heavy and medium plate and cold rolled sheet.

Aides said, however, that in calculating the quotas, Commission experts used deliveries in the last 1974 and first 1975 quarters as a basis for reference. The proposed reductions are calculated by comparing deliveries in the final 1976 quarter with shipments of individual producers.

Japan Output Cut

TOKYO, Dec. 20 (Reuters).—The Ministry of International Trade and Industry today announced a cutback in Japanese steel production, partly as a result of pressure from Europe and the United States to curb soaring steel exports.

For the January-March quarter next year, the ministry's official guideline to the industry for crude steel production would be 26.4 million metric tons, down 1.3 million tons from the current quarter.

The ministry said steelmakers would have to avoid unruly competition among themselves by working out individual production programs that left total output within the official guideline.

The cutback means Japan's crude steel output for the whole of fiscal 1976 ending next March would total just below 109 million tons—up 7 per cent from last year, but below this year's production target of 110 million, the ministry said.

Steel industry sources said the cutback reflected overseas criticism of Japanese exports, as well as dull demand in the home market.

Half-Yearly Record

Japan's steel exports in the six months to the end of September totaled a half-year record 18.9 million tons.

Under strong pressure from the EEC, Japan recently agreed to prolong self restraints by major steel firms on exports to EEC countries—and also to extend the restraints to smaller manufacturers who had been strongly increasing European sales.

This agreement has strengthened fears in the United States that more Japanese steel exports might be diverted to the U.S. market, and the U.S. industry has asked the White House to consider action—such as higher import duties—against Japanese steel imports.

Within Japan sales have also turned sluggish, reflecting a pause in the upturn of business activity.

The Trade Ministry said today domestic steel consumption was expected to fall to 12.82 million tons in the January-March quarter, from 13.68 million in the current quarter.

U.K. Supply Of Money Said to Slow

Private-Sector Loans By Banks Are Cited

LONDON, Dec. 20 (Reuters).—The broadly based U.K. money supply indicator—M-3—grew at a slower pace in the four weeks to Nov. 17, rising a seasonally adjusted 0.4 per cent against a rise of 1.2 per cent in the five weeks to Oct. 20, Bank of England data shows.

The sterling component of M-3 rose nearly 0.75 per cent, while the indicator as a whole rose 4 per cent in the latest three months to give an annualized growth rate of 16 per cent against 21 per cent in the three months to October.

The narrowly based indicator M-1 rose 1.1 per cent in the latest reporting period after a fall of 1.8 per cent in October to give a net increase of 1.5 per cent in the latest three months.

The data shows that the sterling component of M-3 rose 8 per cent in the seven months from mid-April, and total M-3 by 9 1/4 per cent.

Lending Cited

A major factor increasing money supply was the rise of £440 million in bank lending to the private sector. Sterling lending to the public sector rose a seasonally adjusted £100 million after a sharp fall in the previous month.

Substantial official sales of gilt-edged stocks outside the banking sector restrained the growth of the money supply, although the sales were below the previous month's figure of over £1.5 billion and the central government borrowing requirement was larger.

The latest figures come after Chancellor of the Exchequer Denis Healey announced as part of last week's economic measures that monetary targets will now be expressed in terms of domestic credit expansion (DCE) rather than money supply.

He said a target for DCE is more appropriate than a target for M-3 during a period when top priority will be given to correcting the balance of payments. Earlier this year, Mr. Healey had laid down an M-3 growth guideline of 12 per cent in the 1976-77 financial year.

Last week, he said DCE will be kept to £9 billion in the year to April 1977, with M-3 growth likely to be between 9 and 13 per cent.

The Treasury also announced last week that M-3 itself will be redefined in future to exclude foreign currency deposits made by British residents.

Wage Increases In Britain Fall Behind Inflation

LONDON, Dec. 20 (Reuters).—Wage increases in Britain are now falling well behind the rate of rising prices, according to government figures issued today.

Basic pay rates for November were 12.8 per cent higher than November, 1975, the smallest year-to-year increase in three years.

By contrast, retail prices in November were 15 per cent higher than last year.

The figures showed the impact of the government's voluntary wage restraint deal with the trade unions. Until now, the rate of wage increases had stayed above price increases.

French Hourly Wages

PARIS, Dec. 20 (AP-DJ).—French hourly wages rose 3.4 per cent during the third quarter and increased 14.9 per cent over the 12 months ended in October, according to latest Labor Ministry figures released today.

The 12-month increase is only 14 per cent if reduced working hours are taken into consideration. At the beginning of October the average work week was 41.7 hours, or 0.2 hour less than in the three months earlier.

The ministry remarked that prices during the third quarter rose only 2.8 per cent.

States Sign Pact To Pool Data on Heating by Sun

PARIS, Dec. 20 (UPI).—A group of industrialized countries signed an agreement today to pool solar energy knowledge in order to lessen their need of oil.

On the heels of a decision by oil-producing nations to raise the price of oil again, most member countries of the International Energy Agency reached an accord to coordinate research on how to heat and cool buildings with the sun's energy.

Milton Klein, of the United States, head of the agency's research and development section, said, "That is the first intergovernmental agreement in history on solar energy."

"Today solar energy is not economic on any widespread basis, except for heating water," he said. "But heating and cooling houses with solar energy is approaching being economical in some regions and that is what we will concentrate on."

He said IEA headquarters in Paris will collect and evaluate information from member countries on designs for solar houses and methods for measuring the sun's radiation.

The agreement will tie together and prevent duplication of $175 million in solar energy programs planned for 1977 in the participating countries, Mr. Klein said.

The participants also contributed $3 million for the new program.

Those signing were Austria, Belgium, Denmark, West Germany, Italy, Japan, the Netherlands, New Zealand, Spain, Switzerland, Sweden, the United Kingdom and the United States. The Common Market, counted as one participant, also signed. This will allow France, not an IEA member but a pioneer in solar energy, to join in the research.

FINANCIAL NEWS AND NOTES

Monroe Auto, Tenneco to Link

Monroe Auto Equipment has agreed in principle to merge with Tenneco through an exchange of common stock, valued at about $185 million. The exchange would be based on a ratio of one Tenneco share for each 2.6 shares of Monroe's 13 million common shares outstanding. The transaction is subject to the receipt of any necessary government approvals, approvals of the boards of each company and negotiation of a mutually satisfactory agreement, the companies say. Tenneco's major interests are in oil and gas but it has expanded into chemicals, shipbuilding and packaging. Monroe makes shock absorbers and other replacement items for the auto market.

U.S. Newspapers to Merge

Two U.S. newspaper chains—Gannett and Speidel Newspapers Inc.—have agreed in principle to merge. The agreement provides for the exchange of 8/10 of a share of Gannett common stock for each share of Speidel, worth about $173 million. The merger will increase the number of newspapers Gannett operates to 73 daily papers in 18 states with a combined daily circulation of about 2.8 million. Prior to the merger, it operated 54 daily newspapers in 18 states and Guam.

Sandoz to Focus Expansion in U.S.

Sandoz, the Swiss multinational pharmaceutical and chemicals company, plans to further expand its U.S. operations, which were recently increased through the acquisition of Northup, Kind & Co., a major seed producer. Hans Zaeslin, finance director, says that "our priority of expansion is the United States." He adds that the company would expand somewhat in Europe, but that Swiss operations will be held in check for the time being. The reason for this expansion policy, he explains, is the strength of the Swiss franc. Rather than expand Swiss operations with the franc becoming even more expensive, the company has decided to expand abroad. Of group sales of about 3.9 billion Swiss francs in 1975, Europe accounted for about 58 per cent and North America for about 18 per cent. Mr. Zaeslin says Sandoz is looking for a 24-to-25-per-cent U.S. share of total turnover. He expects group profit this year to be little changed from the 146 million Swiss francs (about $60 million) earned in 1975 when profit fell from 185 million francs in 1974. Turnover this year is expected to be higher than the 3.9 billion francs in 1975.

BP Sets Up Minerals Division

British Petroleum has set up a new division to investigate possibilities of the company starting mineral production. A spokesman says the department has no specific brief and will investigate any opportunities which may arise, either onshore or on the seabed. The company envisages joint ventures with established mining houses and Rio Tinto-Zinc is a possible partner, he adds. Meanwhile, the company announced major restructuring of its £100-million protein and animal feed business. BP Nutrition Ltd., to start up next month, will have overall responsibility for the company's diversification program in protein and animal nutrition. Two subsidiaries, BP Nutrition Europe and BP Proteins, will carry out the expansion of research and marketing efforts in this field.

Stock Prices Retreat for 3d Straight Day

NEW YORK, Dec. 20 (IHT).—Prices retreated for the third consecutive session, owing partly to profit-taking and partly to normal end-of-the-year tax selling pressures, on the New York Stock Exchange today.

Some analysts suggested that many investors also were still trying to assess the full meaning of the two-tier price increase announced by the Organization of Petroleum Exporting Countries last week.

They said there was no apparent market reaction to the reduction in bank reserve requirements by the Federal Reserve Board on Friday.

The Dow Jones industrial average closed down 6.65 at 972.41.

Declines outnumbered advances by about 1,000 to 510, and volume totaled 20.69 million shares, compared with 23.87 million yesterday.

Despite some relatively encouraging fundamentals, the market faced selling pressure right at the opening from those investors determined on selling for profit. Much of this selling began late last week.

In the morning, the government said third-quarter corporate profits and real gross national product rose at a faster rate than originally announced, but this failed to motivate traders.

Even a constructive news background of lower interest rates and signs of improved retail Christmas sales failed to encourage buying.

Coca-Cola fell 1 5/8 to 73 1/2, although the company said it expects good gains in volume, net sales and earnings in 1977.

Texas Instruments, which raised the dividend last week, surrendered 1 1/4 to 96 1/8.

Panhandle Eastern Pipe Line eased 1/8 to 47 1/8. It said it reached a "conditional understanding" to acquire Dixilyn Corp. for about 514,000 shares of Panhandle common.

Dixilyn did not trade on the American Stock Exchange. It last traded at 9 3/8.

R.H. Macy lost 1 1/8 to 32, with Sears, Roebuck down 1 1/4 to 66 1/2, and Technicare 2 1/8 lower at 40.

Monroe Auto Equipment rose 1 1/8 to 11 3/4. It announced a merger agreement with Tenneco Inc., which fell 3/4 to 36 1/2.

Tandy Corp. gained 1 7/8 to 38 3/4. Tandy said it received 5,240,000 common shares in its exchange offer and will accept 2,500,000.

Prices on the American Stock Exchange declined in moderate trading.

The Amex index dipped 0.13 to 103.94.

International Systems & Controls fell 2 7/8 to 18 1/2. The company attributed weakness to lower-than-expected first-quarter earnings reported recently.

Syntex eased 3/8 to 20 7/8, with Prentice-Hall down 3/8 to 23 5/8. But Houston Oil & Minerals rose 5/8 to 41 3/8.

Plan Filed for Liquidation Of Bankrupt Penn Central

PHILADELPHIA, Dec. 20 (AP).—Trustees of the bankrupt Penn Central Transportation Co. have filed a plan of reorganization which would result in the liquidation of the firm.

"This is the beginning of the end of reorganization," said Robert Blanchette, chairman of the board of trustees.
